POWER OF ADVERTISING

The power orf advertising has again been attested to by the life insurance companies. They have been leaders in many fields and are now giving evidence of what can be done through the printed page to advertise the institution of life insurance.

A fundamental reason for advrtising life insurance institutionally is to show the adaptability of insurance to practically every human need involving life and money. This adaptability of life insurance seen in business insurance, monthly income, group insurance and other branches of the business has of course been largely responsible for its great development and advancement. The adaptability of life insuance to human needs forms one of the great stories for this advertising campaign, it being very little appreciated.

Life Insurance affords wonderful scope for the advertising man and particularly for the writing and institutional advertisments. As a background for such a campaign, there are such facts as the following:

One thousand persons a day on the average are turning to life insurance for the purpose of carrying out some part of their life's programme.

The people of Canada are insured for over three billions, more than enough to provide for four hundred thousand widows and orphans for twenyt years or to purchase seven hundred and fifty thousand homes at four thousand dollars each, or to furnish an education for over a million people.

Never has there been a failure of a Canadian Life Insurance Company in the loss of a dollar to any policyholder.

Life Insurance is the friend alike to the living policyholders and the beneficiaries of the deecased. No one would gainsay the value of life insurance to the dependents of persons who had died leaving dependent. In compliment to this however, the companies are today paying out more money to living policyholders than they are to beneficiaries of the deceased. This is true in the experience of the past decade, despite the heavy death losses resultant from the Great War and the Influenza Epidemic.

At least fifty per cent of all estates consist of life insurance; many people are unable to leave any thing else to their families. This, in view of the fact that life insurance is but in its infancy, indicates its place and sphere in the lives of the people of Canada.

Then again, there is the fact that while life insurance is doing all of those things for Canadians as individuals, it is also doing tremendously large and important work for Canada as a whole. From the premiums received, life insurance companies have buit up trust funds amounting to some seven hundred millions of dollars and these are carefully invested in Dominion, provincial and municipal securities, mortages, agriculture, industry and other stable enterprises go to develop the country and make it a better place in which to live.

The life insurance companies have become great reservoirs for the people's money, granting them protection for many times the annual premium paid in, and while holding money for the day of call it performs an equally important service "as it waits". Life Insurance performs a two-fold service—a fact not hitherto displayed and a distinct theme for institutional advertising. Truly life insurance is the great friend of the people and the nation.

Bill Receives Second Reading in South African House of Assembly. Commission Appointed.

SMUTS ATTACHED.

LONDON, April 24. — (Canadian Press).—The indemnity bill arising out of the Rand revolution was read Saturday a second time in the House of Assembly of the South African Union after a sitting lasting 20 hours, says a Reuter despatch from Cape Town. Debates on the bill, which promises compensation for sufferers through the acts of the rebels, have occupied the House exclusively since April 10.

TORONTO MAN TOOK LECTURE SERIOUSLY.

Turned on the Gas and Tried Out Conan Doyle's Theory.

TORONTO, April 24. — Canadian Press. — A smell of illuminating gas oozing from a room in a lodging house here yesterday morning, led to the discovery of Percy Brown, aged 79, dead in bed, while on a chair beside him lay a clipping from a newspaper containing a report of Sir Arthur Conan Doyle's lecture, headed "Death is beautiful and without any sense of pain."

With the clipping was a note, which ran in part: "I am 79 and blind or very near so, and if this cipping is true why should I linger here?"

BABY BOY NAMED AFTER THE G.W.V.A.

OTTAWA, April 24 (Canadian Press). — The infant son of Albert Terry, steward of the Veterans' Club, corner of Cartier and Cooper Streets, which was born a few minutes before the opening of the Ontario Provincial Convention, G.W.V.A., last Thursday morning, and registered as a delegate, has been named after the Association.

The lusty youngster has been given the name of George William Victor Albert Terry, the initials of which are G. W. V. A.

G. W. V. A. Terry is the second child to be born in the steward's quarters of the local club, but the first in Canada to bear the full initials of the Association.

NEGOTIATIONS FAIL TO SETTLE BRITISH STRIKE

Employers Announce That Lock-Out Will Go Into Effect in a Week's Time.

600,000 MEN.

LONDON, April 24.—(Candian Prss)—The engineering employers' federation have instructed their members to put the lock-out notices into operation which means that 600,000 men will be idle in a week's time in addition to the 250,000 members of the amalgamated engineering union already out.

Log statements issued yesterday by both sides to the disputo show that while there was no difficulty about the prinicple nvolved in memorandum of agreement submitted by employers, a quarrel arose over the meaning of the phrase "material changes' which the employrs claimed they were entitled to introduce into workshop practice pending negotiations.

The unions demanded to know what "material changes meant and the employers replied that was matter for them to decide but what the representatives of the uions could discuss it with the maagement after the changes have been introduced.

The employers statement protests against the suggestion that they went to force the unions to come to heel and declare that they are still desirous of an amicable agreement.

The agreement which the employers asks the men to sign propesd for the employers a great measure of managerial control especially in rearo to over-time and also the right to review wage conditions.

LOCAL FOOTBALLERS DEFEAT LAKEFIELD.

The Score Was 4-0 in Favor of the Home Team — Poor Weather For Football.

LAKEFIELD, April 24. — The Owls of Peterborough and the local fotball team met in a game here on Saturday afternoon. Owing to the extremely cold weather, there was a small attendance, and the grounds were in very poor condition, but the game was well played on both sides. G. Howarth, of Peterborough, acted as referee, the final score standing at 4 goals to 0 in favour of Peterborough. The line-up was as follows:

Peterborough — McFadden, goal; Hawley and Rawlston, backs; Burroughs, Hosker and Frost, halfbacks; Burgess, Hotston, Davey, Edwards, and Hotston, forwards.

Lakefield—L. Sabatino, goal; Rev. T. L. White and C. Crawford, backs; L. Charlton, E. Robertshaw, and C. Ridpath, half-backs; A. Somers, D. Darling, T. Waldon, H. Payne, and Elliott, forwards.

ANOTHER EFFORT TOWARDS A TRUCE.

POWERS SEND STERN REPLY TO GERMANS

Point Out Errors and State That the Governments Reserve Right to Declare Clauses of Treaty Void.

INCIDENT CLOSED.

GENOA, April 24 (Canadian Press). — The text of the note sent the chairman of the German delegation yesterday after the meeting of the delegates of the ten Powers signatory to the Versailles Treaty, which was convened to discuss the French protest against the German note of 21st April, follows:

"The undersigned desire to acknowledge the receipt of your reply to their note of 18th April, indicating the attitude that they felt bound to adopt in view of the treaty concluded by the German and Russian delegations.

"They note with satisfaction that the German delegation realises the conclusion of a separate treaty with Russia on matters falling within the purview of this conference renders undesirable that that delegation sholud participate in the future in the discussion of the conditions of an agreement between Russia and the various countries represented in the Conference.

"The undersigned would have preferred to refrain from further correspondence on the subject. There are, however, certain statements in your letter which they feel it their duty to correct.

"Your letter suggests that the German delegation has been forced to conclude a separate agreement with Russia by the refusal of the members of the delegations of the inviting Powers to consider grievous[illegible] ties which the proposals formulated by their experts in London [illegible] have created for Germany.

"The undersigned representatives of the inviting Powers have made inquiries of the members of their respective delegations, and find no shadow of justification for this statement. On various occasions members of the German delegation have met and talked with members of the delegations of the inviting Powers; but never has it been suggested that the London proposals afforded no basis for discussion in the Conference,and that the German delegation was about to conclude a separate treaty with Russia.

"The allegations that the informal discussions with the Russians on the subject of debts exposed the delegation to the risk of being confronted with a scheme unacceptable to Germany, but already approved by a majority of the members of the commission, is equally unfounded. No scheme would, or could, have been accepted by the Conference without the fullest oportunity for discussion in competent committees and sub-committees; and in these Germany was represented on a footing of equality with the other powers.

"A misconception of the scope of the experts' proposals or a misunderstanding of the informal conversations with the Russians might well have justified a request for full discussion in the committees of the Conference. They can provide no justification for the action which now has been taken and the undersigned can only regret that your note should have attempted in this way to impose on the other powers the responsibility for a proceeding so contrary to the spirit of loyal co-operation which is essential to the restoration of Europe.

"The undersigned expressly reserve for their governments the right to declare null and void any clauses in the Russo-German Treaty which may be recognized as contrary to existing treaties. The) incident may now be regarded as closed.

"Please accept, Mr. President, the assurance of our high consideration."

The note is signed by the representatives of the Big and Little Entente and Portugal.

CAPITALISTS WANT ANOTHER RAILWAY.

NORTH BAY, April 24.—(Canadian Press)—It is learned that a number of Toronto capitalists are urging the Governement of Ontario through T. and N.O. commission and offering substantial inducements for construction of railway from Swastika to Key Harbor distace of 160 miles which would tap C.N.R. at Westree and provide direct route to Lake Michigan. It is claimed railway would provide an excellent outlet for Ores of Northern districts.

DON'T NEGLECT BRONCHITIS

The principal symptom of bronchitis is a cough which is dry, harsh and hacking, accompanied with rapid wheezing, and a feeling of tightness through the chest.

There is a raising of phlegm, especially in the morning after rising from bed. This phelgm is at first light color, but as the trouble progresses it becomes of a yellowish or greenish color and is sometimes streaked with blodd.

In

DR. WOOD'S

NORW. PINE SYRUP

you will find a remedy that will stimulate the weakened bronchial organs, subdue the inflammation, soothe the irritated parts, loosen the phlegm and mucous, and help nature to easily dislodge the morbid accumulation.

Mr. John H. Root, 40 Maple Ave., Hamilton, Ont., writes:—"I was troubled with bronchitis and I had a very bad cough. I had it so long I aws beginning to get afraid of other developments. I tried all kinds of cough remedies without relief. I was advised by a friend to try D. Wood's Pine Syrup, so I got a bottle, and it convinced me to believe that I had at last gotten the right medicine. I used several bottles and am practically well. I have recommended it to others since, and good results followed."

Be sure and get "Dr. Wood's" when you ask for it, price 35c, and 60c. a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

TWO MEN HELD FOR BIG ROBBERY

Max Goldberg and Victor Viniskis Arrested in Toronto, Charged With Burglary in Montreal.

MONTREAL, April 24.—(Canadian Press.)— Charged with breaking into the premises of the jewellery firm of J. L. Sababth and Company, Ltd., 5 Notre Dame Street West, and stealing watches, chains, rings, etc., valued at $10,000, on April 15 last, Max Goldberg and Victor Viniskis, who had been arrested in Toronto last week, were arraigned in the enquete court Saturday. Both men denied the charge and bail was set at $5,000. They will appear for preliminary enquiry April 28.

CANADA WILL HAVE TEAM AT BISLEY SHOOT

One Officer and Twelve Men Will Compete at National Rifle Association Meet.

A NEW RULE.

OTTAWA, April 24.—(Canadian Press.)— The Dominion of Canada Rifle Association has decided to send a team of twelve men and one officer to the annual competition of the National Rifle Asociation of Great Britain at Bisley, England, and the team will sail from Montreal June 24. This is about half the number usually sent, as the team in past years has consisted of twenty men and two officers. The money saved in reducing the team will be used in encouraging the attendance of teams from the provincial rifle associations in Canada to the D.C.R.A. meeting at Connaught Ranges, Ottawa in August next.

CHICAGO WHEAT.

CHICAGO, April 24. Canadian Press. — A bullish construction placed upon the Kansas State crop report, which was followed by some buying, caused wheat prices to advance sharply on Saturday. The advance was not held, however, because of profit taking by local longs. This caused a set back but at the finish, which was strong, wheat ranged 1 to 2 5-8c net higher, with May $1.47 1-2 to $1.47 3-4, and July $1.29 1-2 to $1.29 3-4; corn finished 3-8c to 1c up and oats were -8c lower to -2c higher. Provisions ranged from 7 -2c to 17 1-2c higher.

CASH GRAIN.

MONTREAL, April 24. Canadian press.—The local cash grain market was quiet on Saturday. There is a steady feeling in the flour market. Business in mill feed is active with the rolled oats market quiet. Trade in eggs at the present prices is good. The market in butter is firm and there is nothing new to report in cheese.

YESTERDAY'S PARADE.

The large turnout at the church parade of Peterborough's returned soldiers yesterday in commemoration of the seventh anniversary of the Second Battle of Ypres was inspiring, and it is to be hoped that the anniversary of that first great battle test of the Canadian Army will be observed in similar fashion each year. There was a new Canada born during those days when the Maple Leaf soldiers blocked the way to the Channel ports and "saved the situation," and the anniversary should never be allowed to pass unnoticed. The veterans of that Canadian Army can help to keep the memory of that glorious feat of arms ever green by parades such as yesterday's. For if they themselves grew indifferent to the significance of the occasion, it is not likely that their fellow-citizens—plain though their duty is—would be inspired to a fitting recognition of the importance of the date in Canada's history. The Batle of Ypres is one of the war anniversaries that should be yearly observed. There are others of great importance, of course, but it was that engagement that brought the war to Canada, that made the Canadian people realise that they had a big part to play in the greatest conflict in the history of the world.

THE DANGER IS SLIGHT.

During a wrestling bout in Toronto recently, one of the contestants was thrown in such a way that he was fatally injured; and some of the jurors at the inquest expressed an opinion that any game in which it was possible for a man to be killed should be prohibited. They lost sight of the fact that an accident of that nature was a very rare occurrence in wrestling, and that if all sports in which a fatality might possibly eventuate were to be eliminated, there would not be much left. Cycling would have to go, boxing, baseball, hockey, and football would come under the ban, for it is quite possible, although highly improbable, that a person might be killed while participating in any one of those pastimes. But he is much more likely to meet death crossing a street than he is in taking part in a wrestling match.

Amateur wrestling, which prohibits the more strenuous holds used by professionals, like amateur boxing, is a sport which develops character as well as muscle and brawn, and despite the recent accident in Toronto, there seems no reason why the abolition of the sport should be advocated. If all games in which there is the slightest element of risk, were to be declared illegal, the Canadian people would soon degenerate into a race of weaklings.

DR. BARKER'S VISIT.

In arranging to bring Dr. Barker, noted lecturer, to Peterborough, the local Rotary Club is actuated simply by the desire to be of service to the community, and because it is confidently believed that the message to be delivered by the eloquent speaker will prove of benefit to all who hear him. Dr. Barker comes to Peterborough on 5th May, and will deliver three addresses—one of which will be to the pupils of the Collegiate Institute, one to the women of Peterborough, and the third to the men—and it is the hope of the Rotary Club that he will be greeted by capacity audiences. It is not a money-making affair—there will be no admission charge, nor will any collection be taken. All the expenses will be met by the Rotary Club, and the public is asked to do its part in making the visit of Dr. Barker a success by turning out to hear him. He has been lecturing under Rotary auspices with marked success for the past year and one-half, and prior to that time was one of the best-known and most popular lecturers on the Chautauqua circuit. Literally millions of people throughout the United States and Canada have listened with rapt attention to Dr. Barker's stirring messages, and it would be unfortunate if the enterprise of the Rotary Club in bringing such a speaker to Peterborough, in the interests of the community generally, were not rewarded by worth-while audiences for all of the speaker's local addresses. His visit to Peterborough should have a very beneficial effect, judging by the testimony of other centres Dr. Barker has visited.

CLEAN-UP WEEK.

Mayor Taylor has issued a proclamation, setting apart this week as "Clean-Up and Paint-Up Week" for Peterborough. A general compliance with the spirit of the request would undoubtedly have splendid results. Peterborough, in many respects, is a clean, tidy, home-like city, boasting of many fine residences and an abundance of trim lawns and well-kept gardens. Nevertheless, a walk around the city at this time of the year shows many a point where improvements are needed, many premises that need to be cleaned up, many houses that require a touch of paint. Most of these will be loked after, sooner or later. The object, however, of a Clean-Up Week is to have the whole community, if possible, select the present week as a desirable time for this work. Remarkable results have been scored in some cities by a campaign of this kind. Where the majority of citizens have co-operated in such an effort, an amazing transformation in the appearance of many sections of the city have been secured, and while Peterborough perhaps compares most favourably in the matter of cleanly and neat appearance with other Ontario centres, yet, nevertheless, there is much that can be done here if Mayor Taylor's proclamation is acted upon as it should be.

SOVIET BLUFF AT GENOA.

There are sentimentalists in this country who believe that any revolution is a triumph for freedom. The same people believe that any change constitutes progress. They never recognize the utterly reactionary character of every form of socialism—its complete surrender of individual freedom in an unworthy fear of the competitive facts of life. They have read into the Lenine-Trotzky programme moral qualities it never had. They do not see what historians will see that the Soviet Government in Russia is the most colossal bluff the world ever saw.

It has all the impudence of the master criminal. It has all the crudity of the thief's disordered mind. Every criminal, however clever, is in some vital way mentally deficient. The Soviet adventurers required some sort of slogan. They seized upon that worn out and almost discarded fallacy of Karl Marx, that labor creates everything. Their first experiment in the conduct of production proved the falsity of the assumption. Up to date, according to the best calculations, they have blown out the administrative brains of their country without which production, with all its comforts and securities for labor, becomes impossible.

In fact, the Soviet intelligence did not go beyond a crude dividing up of what tangible wealth they could reach. They did not know that at least 95 per cent. of what they envied and coveted was not in any form they could divide. They could not divide up credit, after they had destroyed it. They could not divide up a railroad they had reduced to two streaks of rust. They could not divide up an oil well they had flooded or a water supply or a sewer system they had destroyed with the furious unintelligence of the ape. They could loot the banks and the private citizens and make a bandits' division, and a repetition of this is the one tangible proposal they make to the representatives of powers gathered in Genoa.

In form, as proposed by one of the Soviet representatives, it is a proposition that the rich nation possessing the most gold—obviously the United States—shall lend that gold to the poor nations, on a population basis which would give Russia the largest share. Then, of course, Lenine and his friends could divide up again. This is the Soviet programme. Its Punic faith has been proved again and again. Lenine and Trotzky are prepared to give any promise which will look attractive. They told the truth when they said that they did not consider promises to the hated capitalists as binding. They have looted the Russian house and are still in possession of the premises. They cannot develop Russia's resources, but they think they can compel the world to buy the bandits out.—Wall St. Journal.

PRESS AND PULPIT.

At a recent gathering in London, one of the speakers, a minister of the Gospel, declared that papers were fond of looking for the sensational statements in a preacher's address, featuring these, and generally making the preacher say what he did not say at all. In his opinion many of the young men who were sent to report sermons knew more about sporting events than they did about sermons.

Now, perhaps, there may be quite a deal of truth in that attitude, but that feeling is not generally held by the men in the pulpit. Many a pastor realises that the daily press is his one best chance to take his message and lift it outside of the four walls of the church, in the hope that it may reach the hundreds and thousands outside who never go to church from one year's end to the other.

Now, for the sake of argument, and without getting het up over the matter, let us look at it from the point of the reporter. He gets his assignment to cover such and such a church on Sunday. Any editor looking for scares can be provided with a number of very likely-looking leads from the subjects on which some of the preachers of to-day announce their intention of preaching. If the papers do get a bit sensational at times in reporting a sermon, they can plead by way of justification that the parsons themselves start the thing in the announcements they make in their advertising matter. So if a reporter goes along with the idea of carrying this out, he probably does so on the ground of helping the speaker in question look just as sensational in print as he did in announcement.

Very well. Now, let's get the reporter to the church. As a rule you won't find him there very early. The usher sees him coming and drops him in a seat some place near the back, and when he starts to get the sermon he is forced to use the back of an old hymn-book or just his knee as a place to record what is being said. Two or three people are watching him on each side, and the chances are that he can hardly move his elbow. Under these conditions, from a seat far removed from the pulpit, he undertakes to follow the sermon and give to the readers of his paper in a few minutes what the speaker has taken hours to prepare. He is under a very serious handicap all through.

When the reporter goes to other meetings, what happens? At a political meeting, at a session of the Board of Education or City Council, the reporter finds the press table, right up near the front, where the facilities are the best for getting what the speakers have to say. Under these conditions the reporter has a fair chance to get the thing right, and if he is wrong then he is in for a session with his chief at the office.

In only two churches that we can think of at the time is there any provision made for the reporters who come to take the sermons. In both of these there is a seat with a little desk that can be brought up something like a small shelf. It is situated on the side and fairly well to the front, and is reserved for reporters who care to attend the services at that church on Sunday, or at any time when gatherings are taking place.

It is an altogether mistaken idea that the press to-day is looking for sensations. The press to-day is seeking to keep them down as far as possible. There are enough and to spare without having to look for them. Papers are called upon to have their reporters at all sorts of gatherings, public, in court, and in private. They are striving out of all this mass of material, good, bad, and filthy, to pick out the things that are fit to print—that can be read by any member of the family without a blush or an explanation or apology.

Striving for sensations? No. Not by a long shot. If it were, a paper could print a sheet every day that would not be fit to read.

VOICE OF THE PEOPLE

SPRING NUISANCE.

Editor of The Examiner.

Sir,—The usual spring nuisance has commenced — running coaster waggons on the sidewalks, endangering people walking. Sometimes three or more youths will get on a waggon and yell and make all sorts of noises, especially on the streets with a little incline to them. This is a nuisance, especially to delicate people. We are paying too much in taxes to be annoyed in that way; and it is to be hoped the police will respond quickly when telephoned in this connection, and gather in some of the delinquent boys, with a view to eliminating this nuisance.—Yours,

Justice.

IN MILLBROOK AND DISTRICT

MILLBROOK, April 24. — The cold and stormy weather on Thursday last, which was "Sports Day" in Millbrook, under the auspices of the C.S.E.T. organizations, very very disappointing and necessitated holding all the events of the afternoon, except the races, in the armouries, instead of out of doors as had been planned. However the attendance was larger than had been thought possible with the roads in very bad condition, and groups of boys with their mentors and friends were present from Bethany, Frazerville, Baillieboro, Cavan and Peterboro.

Basket Ball.

The basket ball game in the morning attracted a fair number of spectators, the teams being as follows: Thelma Ball, Florence Fallis, Florence Larmer, Margaret Russell, Alex. Johnston, Luella Shaw, Capt., Kathleen Lancashire, Hilda and Thelma Spencer, Helen Syer, Geraldine Morton, Dorothy Armstrong, Captain.

The Races.

The score was 10-6 in favor of Luella Shaw's side.

The 1 mile race which was run off in the morning, resulted as follows: 1 I. H. Cardwell; 2 R. Bates; 3 J. Ward; 4 Jim Larmer; 5 R. J. Miller.

The 200 yard dash—1 Oscar Guthrie; 2 Lawrence Ingram.

The 3 mile race—1 R. Bates; 2 S. Stacey.

The relay race — 1 Peterboro gorup; 2 Presbyteran group.

Excellent Supper.

An excellent supper was served in the armouries about 6.30 p.m. by the ladies of the town, and at its conclusion the prizes were distributed by the Rev. G. S. Gervan presenting them to the winners.

The group events in the afternoon could not all be carried out in the Armouries but will be completed on Saturday, April 29th, if the weather will permit them being held out of doors. The floor push, high jump and potato race were put through, but the latter will have to be repeated as the floor was too slippery to let the boys do themselves justice, and the shot put and broad jump were also left over till the 29th, until after that date the final averages of the various groups can not be totalled up nor will the winners of "shield," medal, etc., be known.

The Committee.

Mr. D. Loomis, of the Y.M.C.A. Peterboro, was preesnt in his official capacity and the local committee included Rev. R. R. Spencer and Mr. A. Thomas of the Anglican group, Rev. G. S. Gervan, and Mr. H. W. Johnston of the Presbyterian group. Mr. J. L. Byam and Mr. C. Garside of the Methodist group; Messrs. A. Alcorn, H. Lancashire, L. R. Atkinson, L. C. Russell and Rev. S. T. Tucker were also assisting the committee in their work.

Play was Success.

The play, "Eliza Comes to Stay," given by the Port Hope E. L. in the town hall in the evening, was well acted and proved quite entertaining, making a good finish to the day's sports. The financial results of the day are not yet available but the money will be used to provide gymnasium equipment for the armouries.

Woman's Auxiliary.

The Women's Auxiliary of St. Thomas' Church held their April meeting at the Rectory. After the opening worship period, the routine business was attended to and the reading of the Study Book for the year was completed. It was decided to have the missionary reading circle in evenings when the work reopens next fall so that more members may attend. The secretary reported that the bale for the Blackfoot Home at Gleichen, Alta., had been shipped.

The president, Mrs. (Canon) Allen, was appointed delegate to the annual meeting to be held in Toronto in May, with Mrs. (Rev.) C. R. Spencer, as alternate. Arrangements were completed for the sale on Saturday, April 22nd, and the meeting closed in the usual manner.

Afternoon Tea.

The afternoon tea and entertainment given by Miss Grandy's primary class in the S. S. Hall of St. Thomas Church on Wednesday from 5 to 8 p.m., was a very pleasant and well attended event. The tea tables looked very dainty and attractive, each centred with daffodils or other spring flowers, and each waited upon by one of the little primary girls, while the boys brought the tray with a cup of tea for each guest. Mr. J. A. Vance acted as chairman as the rector was absent in Toronto, and Rev. Mr. Spencer had a wedding at 7 p.m. The programme was as follows:

Piano solo—Miss Francis Turner.

Song and chorus—Primary Class

Action song, "Annie Rooney," Geo Gray and Eloise Lamb.

Rectation—"Don't you Wish?" by Cameron Vance.

Chorus—Primary Class.

Dialogue, "Spring Flowers" — Dorothy Conliffe, Lena Weeks, Margaret Russell and Marjorie Vance.

Recitation, "An Easter Bunny"—Eloise Lamb.

Dialogue, "Captain of the Nine"—Cameron Vance, Peter Leach, Geo. Spencer and Margaret Spencer.

Piano Duet—Mi.. May and Ada Attwood.

Recitation, "Hurrah for Canada" —Linden Saunders.

Dialogue, "My Wish,"—Geo. Grey Kathleen Whyte, C. Vance, E. Lamb M. Spencer, Kate Shaw and Helen McCorry and K. Shaw.

The National Anthem concluded the programme, and the chairman called for three cheers for Miss Grandy, which were heartily responded to, everyone feeling that the time and the patience she had expended on the afternoon's programme deserved some special recognition. About $18 was realized, this amount to be donated by the Primary Class to the renovation fund of the church.

Enjoyable Dance.

The dance held in the armouries on Wednesday evening under the auspices of the G.W.V.A. was as usual, a most enjoyable and successful event. The attendance was somewhat lessened owing to the rainy night and the muddy roads, but there were enough couples to comfortably fill the floor for each dance. The music was furnished by Follis' orchestra of Peterboro, and was thoroughly appreciated. An excellent supper was served about midnight and dancing then resumed for another hour or two.

Amongst those present were Mr. an Mrs. Hall, Mrs. F. Johnston, Miss Florence Westall, Mr. W. Saxby, Mr. W. McKim, Miss A. Lacheur, Miss C. Watts, Mr. Lee, Mr. E. Reilly, Mr. Gray, of Peterboro; Mr. H. Cummings, Mrs. Fiddes of Toronto, Miss H. Adams, Mr. C. Piercy, Mr. Tuckett, Lindsay, Mr. Frank Stoddard, Mr. Roy Honey, Mr. W. Dean, Mr. A. McDonald, H. ENGLISH PRINTERS REACH AGREEMENT.

LONDON, April 24.—(Canadian Press.)—Prospect for the stabilization of printers' wages till the end of 1923 is held out by the announcement that the federation of master-printers of the United Kingdom and also the newspaper society held a conference with representatives of the printers' unions which was of the friendliest character and resulted in certain modifications of the original proposals for wage reductions.

The representatives of the unions undertook to recommend acceptance of the new proposals by the men at the forthcoming ballot.

SHIPS COMPLETE ROUND LAKE TRIP.

SAULT STE. MARIE, Mich., April 24.—(Canadian Press.)— The steamers Hagarity and Glenisls were the first steamers to make the down trip from Lake Superior for the season of 1922. The Glenisls will be the first to make the round trip, she being one of the first to lock up last week. Both steamers report the ice heavy. She struck the heaviest part of it at two o'clock yesterday and worked steadily through it. From reports the upbound fleet have not yet reached the open water of Lake Superior. There were about forty boats on their way. Weather conditions are more favorable but there will be no appreciable change in the situation until the wind shifts.

"Our First Year"

(By a Bride.)

(Continued from last week.)

YOU MAY BEGIN HERE

This odd pact betwen Jack and Peggy to maintain individual freedom after marriage is not working perfectly. Because of Peggy's extravagances Jack diplomatically has to work out a budget system.

Chapter XIX

IS HUSBAND A CENSOR?

Jack didn't mean to leave me so subdued this morning.

I'm never going to let him know how easily he can hurt my feelings. For when he went into budget making so solemnly it really seemed to me that he isn't quite satisfied with me as a housekeeper.

We've been married only six weeks and this day he proposed that we make a schedule for spending our salary. Am I a poor manager-Does he think I'm a mistake as a business partner?

So many unexpected forries turn up as soon as you're married. This budget business tumbled from a clear sky. I had run out of money and it's only Thursday and I had spent every cent Jack gave me last Monday morning.

He gives me $10 every week for groceries and meat and this morning it was all gone all gone, on account of my luncheon for the girls. And after I had told Jack I hadn't a penny to buy our dinner I found that he had only $5.83 and that he intended it to cover all his personal expenses until the first of the month—five days away.

I'd never have known if I hadn't insisted. For Jack gave up his fiver with the gayest smile. I had to go through his pockets to find out how much he had left for himself. Only 83 cents! And Jack thught it a wonderful joke!

"Let's make life a great adventure together, Peggins!" he said. "Let's take the good and bad of it as if we were explorers! After my years in the war, darling, nothing at home is hard! Nothing that can happen to you and me together can hurt. No money for five days? Let's make it an adventure, Peggins!"

But I couldn't see it so. I didn't have sense enough to stop bemoaning our financial stringency, and finally Jack sugested that the way to keep out of such a fix in the future was to make a budget and live by it.

"I've always kept accounts at home", I told him.

"Somebody says that keeping accounts is writing epitaphs on dead money", Jack laughed.

"I suppose a budget is a sort of futurist fashion" I said. "You divide up your income before you spend it. Let's make one now.

But a budget was not to be quickly mapped out over the breakfast table. Jack had to go to the public library for a model. He came home a night with it in his pocket.

"First of all, we save" he explained. "Put down 10 per cent for savings. Rent we have already contracted for, our lease says $60 a month; that's one-fifth of our income; 20 per cent for rent is too much if we have a family—when we have a family"—here Jack kissed me—"we'd have to save on rent to spend on food."

"Clothinfg, 15 per cent. Housekeeping, including laundry, cleaning and any extra help, 10 per cent. Culture, meaning magazines and newspapers, health and recreation, charities, 15 per cent; food, 20 per cent, and 10 per cent for personal miscellaneous, my daily lunchs for example. But I guess well have to experiment a little, Peggins! Taxes hav to come in somewehre.

Somehow housekeeping seems much more important to me, now I have some fixed rules for spending. But I wish I had suggested the budget myself. I can't help feeling 'censored' because Jack thought of it first.

FIRE DESTROYS A BARN IN TOWNSHIP.

Maxwell Kidd of Smith Suffers a Heavy Loss at Noon Yesterday.

LAKEFIELD, April 24. — At noon yesterday the barn of Maxwell Kidd, 11th Concession of Smith, was totally destroyed by fire, with its contents of seed grain and feed, and a quantity of stock.

The fire is supposed to have started while the entire family were at church. On their return, they saw smoke issuing from the barn, and before help could arirve, the entire structure was destroyed, with seed grain, feed, 3 valuable horses, 7 calves, and 15 pigs.

The catle were outside at the time.

The Lakefield Fire Brigade arrived in time to save the house, drivingshed, and the hen house.

The origin of the fire is unknown.

No cause can be assigned, beyond the accumulation of a quantity of damp straw in the barn.

The loss is partially covered by insurance.

Canadian Daily Newspapers Association,
902 Excelsior Life Bldg.,
Toronto, Ont. Canada.

Gentlemen:-

In considering our advertising media, we have made a careful analysis of each class, and after several years of continuous effort, we have demonstrated to our satisfaction that for Canadian merchandising the daily newspapers are the basic media through which to educate the users of a product that is sold to the masses.

We feel that the daily newspaper is just as essential to our merchandising as is our sales force and our direct dealer work, for through it we are enabled to tell our story to those whom we desire to reach, at a smaller per capita cost than is possible through any other media, and by mass selling, it has enabled us to reduce our prices.

Manufacturing the highest standard of quality and backing it with our entire organization for performance, we feel that the daily newspaper has been only secondary to these factors in its importance in gaining for Champion Dependable Spark Plugs the enviable position of market domination.

Needless to say, we expect to continue to place daily newspapers first on our lists of media.

Yours very truly.

CHAMPION SPARK PLUG CO. of Canada, Limited.
F B Caswell
Vice-President & General Manager.

FBC:F

High testimony, this, from the makers of Champion Spark Plugs. They say that Daily Newspaper Advertising has been second only to the factors of organization and management in securing for them domination of the Canadian market for Champion Spark Plugs.

What more convincing testimony could there be to the all powerful influence of Daily Newspaper Advertising?

DO WOMEN WORK AS HARD AS MEN?

Yes. And They Must Keep Well and Strong

Two Interesting Letters

Toronto, Ontario.—"When my husband was called back to England in 1914 I took Lydia E. Pinkham's Vegetable Compound to strengthen me so I could work. I had a trouble that used to make me weak, but I am able to do my work now and am perfectly satisfied with your medicine. I still get it at the chemist's and I strongly recommend it to anybody I hear of suffering as I did. You may publish this if you wish." —Mrs. E. HORNBLOWER, 899 Yonge St., Toronto, Ontario.

I Did Not Feel Like Working

"I was in a general run-down condition with a weak back and a tired feeling so that I did not feel like working. My mother was taking Lydia E. Pinkham's Vegetable Compound and recommended it to me, so I have taken it and my back is better and I am now able to do my work. I recommend the Vegetable Compound to my neighbors and you may publish my letter."—Mrs. JOSEPHAT A. GRENIER, Box 47, Carbon, Alberta.

Lydia E. Pinkham's Vegetable Compound should be taken when you first notice such symptoms as nervousness, backache, weakness and irregularity. It will help you and prevent more serious trouble. Give it a fair trial.

THREW BOMB ON PORCH OF CHURCH.

Woman Killed and a Constable Wounded in the Explosion.

BELFAST, April 24 (Canadian Press). — Mrs. McCabe died last night from injuries received in an explosion of a bomb thrown on the porch of St. Matthew's Catholic Church in the evening.

The Vatican Denies Treaty With Soviets.

ROME, April 24 (Canadian Press) —The Vatican denies the existence of any treaty between it and Soviet Russia, and there has not been any re-establishment of diplomatic relations with the Lenine Government.

RUSSIAN REPLY TO ENTENTE POWERS

GENOA, April 24 (Canadian Press). — The text of the Russian reply to the Entente Powers is as follows:

"The Russian delegation has examined with the greatest care the proposal of the Allied Governments, as set forth in the official note of 15th April, and at the same time has consulted with its Government thereanent.

"The Russian delegation is of the opinion that the present economic situation in Russia and the circumstances leading to it amply justify, in respect to Russia, the complete remission of all her debts as set forth in the above-mentioned note by recognition of her counterclaim.

"However, the Russian Government is ready to go a step further in the quest for a solution and adjustment of differences and to accept Articles 1 and 2 and Item 1, of the above-mentioned annex, provided that war debts and arrears in interest, as well as postponed interest on all debts, are written down and financial assistance is given Russia to help her to recover from her present economic state in the shortest possible time.

"Regarding Article 3, Part 2, on the subject of the above conditions, the Russian Government would be ready to restore to their former owners the use of property, nationalised or reserved, under the reservation that in the event of that being impossible, satisfaction shall be given to the legitimate claims of the former owners, either by mutual agreement arrived at indirectly between both partes, or in virtue or arranggments to be worked out during the present conference.

"Financial assistance from foreign sources is absolutely vital for the economic reconstruction forthcoming, the Russian delegation does not see its way to saddling its country with debts of which it would not be able to acquit itself.

"The Russian delegation wishes it clearly understood, notwithstanding the fact that it appears obvious in point of right, that the Russian Government cannot assume any obligation with respect to the debts of its predecessors until it has been officially recognised de jure by the interested Powers.

"Hoping you will find the foregoing proposals will be an adequate basis for a resumption of discussions, we have the honour to be,

"Your very obedient servant,

(Signed) "Chitcherin."

RHEUMATISM?

If you are a Sufferer, Heed This Advice

Collinwood, Ont.—"It is with pleasure that I write this note of commendation. I suffered with muscular rheumatism for three years and have been completely cured of same by taking a few packages of Dr. Pierce's Anuric Tablets and Dr. Pierce's Golden Medical Discovery after doctors' medicines failed to do any good. I am now free from all signs of rheumatism for which I most heartily thank Dr. Pierce and his wonderful medicines." Mrs. Kerwood Cook, Box 464.

Woodstock, Ont.,—"My husband always speaks a good word for Dr. Pierce's Golden Medical Discovery and we both feel that he owes his present good health to this splendid medicine. Bronchial pneumonia, as a child, left him with chronic bronchial trouble and it just kept getting worse every year even though he doctored and tried every remedy recommended to him. Some nights he would cough so hard I used to be afraid he might die before morning. Last fall his mother advised him to try the 'Golden Medical Discovery' and from the first few doses he improved. It is just a year now and he seems to be entirely cured of all bronchial ailments." Mrs. S. M. Greer, 27 Sydenham St.

OFFICERS ELECTED FOR MISSION CIRCLE.

News of Interest From Millbrook and District—Personals.

MILLBROOK, April 24. — The "Golden Link" Mission Circle of the Methodist church held their annual meeting on Tuesday evening last at the home of Mrs. Fred Smith. The president, Miss Ella Elson, occupied the chair for the opening exercises, and while the reports were received the year's business was completed, after which the pastor, Rev. Mr. Tucker, took charge of the election of officers for the ensuing year. The following officers were elected:

President—Miss Marjorie Skitch.

1st Vice-Pres. — Miss Marian Spence.

2nd Vice-Pres. — Miss Martha Lunn.

Recording Sec.— Miss Lila Pethick.

Corresponding Sec.—Miss Ella Elson.

Treasurer—Miss Stella Pethick.

Organist—Miss May Byam.

Supt. Christian Stewardship—Miss Edith Sheppard.

Supt. Mite Boxes— Miss Phyllis Richards.

The treasurer's report showed a total amount raised so far this year of $71.38, with some mite boxes still to come in. $6.90 was received in thank offering on Easter Sunday, and $18 has been realized for the autograph quilt the Circle is making, up to date. There are still a number of blocks not filled with names, $50 will be paid towards Miss Hawken's salary, this being the special purpose for which the girls are raising the money, and $15 was voted for the Russian Famine Relief Fund.

Mr. Tucker, in his pastoral remarks, congratulated the Circle on the excellent work which they had done during the year under the able leadership of the Superintendent, Mrs. J. L. Byam, and urged an equally loyal suport for the new officers in the coming year. Miss E. Elson was apointed delegate to the Branch meeting in Belleville in June, with Miss Phyllis Richards as alternate. A treat of home-made candy was enjoyed during the social hour with which the meeting closed.

CONCRETE for surfacing of course but what of the other features that contribute to ROAD PERMANENCE

Upholders of "building roads for permanence" must—to be consistent—recognize that true permanence calls for something more than merely the right surfacing material.

With the adoption of Concrete for the road's surface, we must also realize that other factors besides the surfacing enter into the building of

permanent highways of concrete

As the initial cost-per-mile increases, more care *must* be taken to protect the investment.

This protection includes:

(a) A proper location.

(b) The establishment of satisfactory grades.

(c) A Drainage Plan capable of carrying away surface and ground water; together with the installation of Culverts and Bridges adequate for the carrying of modern loads.

(d) The widening out of the sub-grade.

Such care in the preliminary work, may require considerable patience before the road is ready for surfacing. But the inconvenience of the delay, and the increased investment, are both amply justified by the permanent character of the work which results.

On main highways a high type of surfacing is needed for the carrying of modern traffic. This higher type of surfacing is most truly an economy when it is accompanied by the higher type of construction throughout.

All who are in any way interested in Highway Construction should write for our literature explaining the advantages of Concrete for Highway Improvement.

Get the Cream of the Trade

Order New Styles by Long Distance

"What lovely styles! How do you manage to get all these delightful novelties?" said the new customer as she looked around her.

"I get tired of seeing my customers boarding the trains to buy elsewhere, just because I didn't have some novelty that was being advertised."

"Whenever a new style makes a decided hit, the wholesaler or manufacturer's salesman calls me on Long Distance and tells me about it, and I order a few."

"I haven't seen prettier veils, smarter stockings or gloves, or more fashionable organdies, georgette-crèpes or ginghams anywhere. And I see you have the new music, too. How perfectly splendid. They leave me no excuse at all for going up to town to buy."

That's just one of the many things Long Distance does for small-town merchants, enabling them to obtain new styles immediately and cater to the progressive people in their town—the cream of the trade.

Dry Goods, Hardware, Grocery, Paint, and Shoe Stores find it pays them to buy small stocks of the new things people are asking for, and reorder by Long Distance at Station-to-Station rates.

SPECIAL AUTO FOR LONG TOURING TRIPS WANTED

Should Have Storing and Heating Space.

Wanted: An automobile especially suited for long touring and camping trips.

When such an automobile is produced the joy of the tourist and camper will be complete. He will not have to strap trunks, bags, poles and other paraphernalia to the sides, back and top of his car. He will no longer look like a tramp on the road.

Instead, the camping automobile can have all room and provisions for storing the things needed on long trips, and it can look as neat as any other machine.

That such a car can be made is evident from a study of the construction of the modern automobile. What is most needed in a camping car is room. That can easily be provided by a few modifications of the present model.

Storage Space

The first place for improvement is underneath the seats. If the tank is set back a little farther, a large, long box-like affair can be attached to the car on each side, reaching from the rear axle almost to the gear box in front.

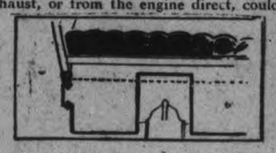
It would be more than a foot deep underneath the rear seat and could afford ample space for camping utensils and other equipment.

A tank for carrying water may be set into the box on one side, while on the other side, away from the exhaust, may be a miniature zinc-lined icebox.

In the back above the tank, there is room for a trunk rack. Behind the front seat and in the doors there is more room for supplies.

Heating Provision

A heater attachment from the exhaust, or from the engine direct, could



HOW ROOM CAN BE MADE UNDERNEATH REAR SEAT.

be installed, so that the motorist may have warm food wherever he stops along the road.r

By an arrangement like that of lower berths in Pullmans, the front and rear seats of the automobile could be raised and locked so as to form a comfortable bed.

Such an automobile would obviously be cumbersome and slower than that of the present, but the comfort it would afford is worth more than speed and a sleek appearance.

UNIFORM ROUTE WORKING SYSTEM.

Roads Being Numbered For Benefit of Strangers.

BOSTON, MASS., April 24.—What is expected to develop into a uniform route marking system for the entire country is being inaugurated in New England.

Roads hitherto marked by lines and symbols that confused rather than helped motorists are being numbered so that no doubt may arise in the mind of strangers as to the correctness of their routes.

Red, blue and yellow bands are being painted out in Massachusetts. The various markings along the New Hampshire roads are disappearing and the individual state highway designations in Maine, Vermont, Rhode Lsland and Connecticut are giving way to the new system.

Numbering System

Route No. 1 is to run north and south along the Atlantic coast, from the international boundary at Calais, Me., down to New York and eventually to the southern end of Florida.

In the same manner other main highways will be extended, in accordance with this numbering system, so that all designations will be the same throughout the country.

O. M. Wells, chief road man of the Automobile Club of Ameraci, is plotting the routes and numbering them. Short state routes, not reaching beyond state boundaries, are to be numbered above 100.

The lettering will be four inches high. The larger highways will be numbered from 1 to 100, with six-inch black numerals within the uniform square.

The numbering plan will not interfere with naming the routes, says Wells, but it will help motorists keep on the same highway.

One Symbol

Instead of these there will be a uniform symbol on all the highways, federal, state and local—a large yellow square, with a heavy black border. Within the square will be a black numeral—the number of the road, according to a systematic designation of all the country's highways.

The symbol and other details of this new plan were decided upon at a recent meeting of the Automobile Club of America, the New England Hotel Men's Association, Automobile Blue Book publishers and highway officials from all the New England states.

Held a Debate At the Lyceum

One of the series of sucsessful debates which have ben held during the winter in connection with the regular meetings of the Holy Name Society at St. Alphonsus Lyceum, was discussed yesterday afternoon, on the resolution, 'That, the present Irish Free State is a proper solution of th Irish question."

The crowd, which numbered a large attendance of members and several ladies, had an exceptionally entertaining hour in the spirted discussion of this subject, the debaters, pupils of the High School, having some suprisingly good arguments on both sdes. The judges, Messrs J. J. Duffus, Jos. Begley and Wm. Rudkins, were compelled to announce a tie decision at the conclusion. Those taking part were: Negative, Messrs. Castricum, Guiry and Scollard. Affirmative, Messrs. Roche, Holland and Hodgson.

The debaters were congragulated by the three judges and by Rev. Father Costello, and a vote of thanks to the judges was moved by leaders on both sides. Messrs. J. Roche and G. Castricum. Mr. A. Doherty, president, occupied the chair.

VENUS HOPING TO KNOW US BETTER.

While Planet Mars Is An Old, Dying World.

STOCKHOLM, April 24.—(Associated Press).—The planet Mars—an old dying world—is receiving altogether too much attention from earthly scientists these days and nights, while the up-and-coming young planet Venus is just waiting for a chance to know us better.

This is the conclusion of Professor Svante Arrhenius, Nobel Prize winner and one of Europe's foremost scientists and astronomers, who lectured here on the prospect of wheedling from the heavens the secrets of some of our celestial neighbors, and especially Mars, when that planet swings into closest proximity to the earth two years hence.

If scientists and long distance radio fans really want to communicate with some celestial neighbor, Professor Arrhenius said, they will not find Mars very cordial, for the old fellow—dying or already dead—is covered with hard, frozen sand and is so dry that its only rain is meteoric dust. Perhaps a few sea weeds still exist, he said, but it is highly improbable that even low animal life could find enough to sustain it. He described as "fantastic" the belief that so-called canals observed on the planet were the work of engineers and attributed them to earthquakes fissures.

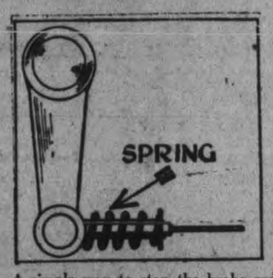
Venus, on the other hand, offers potential possibilities to the patient astronomer, Professor Arrhenius declared. By "patient" he meant about a billion years, he explained. At the expiration of this period, he thought a flourishing colony of intelligent beings might be discovered on the bright little planet.

"Everything on Venus is dripping wet," he continued. "The planet is covered by constant rain-clouds 10 kilometers thick, preventing any rays from the sun penetrating to the bottom of the air-strata. Life on the planet of love is short and intense."

Living organisms, he thought, might be found at the polar regions where the temperature was slightly lower than other parts of the planet.

"When the earth is extinguished," he concluded, "it will be Venus, queen of the heavens, that will take over the role as carrier of culture."

BRAKE ROD SILENCER



A simple way to stop the brake rod from rattling is to slip a fairly stiff coil spring over the clevis, as shown. One end of the spring presses against the lever arm, while the other is held back by the lock nut on the brake rod. This takes up the lost motion on the brake rod.

Ground soapstone is used to some extent in foundry facings, as a lubricant, as a dustig agent in making prepared roofing, in low-grade paints and for a few other minor uses.

SALTS IF BACKACHY AND KIDNEYS HURT

Stop Eating Meat for a While if Your Bladder is Troubling You.

When you wake up with backache and dull misery in the kidney region it generally means you have been eating too much meat, says a well-known authority. Meat forms uric acid which overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and loggy. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels; removing all the body's urinous waste, else you have backache, sick headache, dizzy spells; your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys, also to neutralize acids in the urine so it no longer irritates, thus ending bladder weakness.

Jad Salts is a life saver for regular meat eaters. It is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink.

is, and will continue to be as long as time shall last.

If one were a poet, he could, perhaps, invoke the muses and draw from them a wreath of verses to cast around their graves.

If one could command the words he feels, if one could summon all his thoughts and embody them in one mighty sentence he might, perhaps, construct a fitting epitaph to those who have gone before.

But we are weak and silent when we think of the 60,000 comrades whose bodies lie in the fields of France and Flanders.

It would take too much time to recount their illustrious deeds, so in conclusion I will ask you to do something that every soldier among us must do with sobbing sorrow in his heart, because we realize these comrades ecause we realize these comrades are not dead, but are the living dead —these men could not die. They went down to save civilization, to save the whole world, to make possible this very hour and a free tomorrow. Because they are living I can ask you to bare you rehads and bear them tribute in this solemn moment.

Inspiring Sermon.

After the Last Post the comapny formed with the Peterborough Rangers' Band and marched to the church for the service. The line of march was along Murray street to George, to Charlotte, to Rubidge, to the church. At the church the front seats had been reserved for the vetcrans, their wives and families.

Between 20 and 30 members of the Ladies' Auxiliary to the G.W.V.A. occupied front pews for the service, which was of the usual morning character, with a special and inspiring sermon by the rector, Rev. R. B. Grobb.

Mr. Grobb took for his text, "What mean ye by these stones," and after explaining how the children of Israel had taken the stones from the River Jordan to build a monument that their children might know of the circumstances surrounding the crossing of that river he showed how the annual parade of the local Great War Veterans Association was also a monument to the memory of those sons of Canada who fell in the fields of Flanders. These men, he said, had made the name of Canada forever great, and the greatest memorial that could be erected to their name was to lead a life in keeping with the ideals for which they died.

Continue Custom.

He hoped that the custom of the annual parade would be continued, for as the years went on and we would get a clearer and better conception of the circumstances of the war. We will know better the causes of it, the history of it and who won it. "The war," he said, "is still on, economcially and spiritually, and it remains for the years to tell who will be the winners."

Many of the returned men have found, he asserted, that on coming back to Canada after years of hardship and peril that the very Canadainism for which they fought has not given them the fair play to which they feel they are entitled. This has resulted in constant bickering and many petty jealousies as well as violent accusations among themselves. Each man has set out to reprove and reform his neighbor when the truth of the matter is that he should first start to reform himself. Every man sees the sins and shortcomings of his next door neighbor and overlooks his own.

These difficulties will in the course of time be straightened out and will give place to a greater Canadianism and a better loyalty to the great Empire of which this nation is a very fundamental part.

At the close of the service the "Last Post" was sounded by the buglers, after which the veterans filed from the church and marched back to the rooms, where they were dismissed.

BETTER GARDEN TIPS

BY LUTHER BURBANK

BURBANK.

Here is a general calendar suggested for beginners in back-yard gardening, giving more detailed information on planting, etc.

BEETS—Plant from 3-4 to an inch deep. Rows to be 12 to 18 inches apart. Plants to be 2 to 4 inches apart. For a 50-foot row about an ounce of seed is required.

ONIONS—Plant 1-2 inch deep; rows 12 to 14 inches apart; plants should be thinned to 2 inches apart; use about an ordinary packet of seeds.

LETTUCE—Plant 1-4 inch deep; rows 12 to 18 inches apart; plants 8 to 10 inches apart for heading; one packet of seed required. Birds, slugs and other pests are particularly fond of lettuce and, hence, more than ordinary care is required for successful crop.

CARROTS—Plant 1-2 inch deep; rows 12 to 18 inches apart; plants about 2 inches apart. Use one packet of seeds.

TURNIPS—Plant 1-2 to 3-4 inch deep; rows 12 to 18 inches apart; plants about 2 inches apart. One packet of seeds.

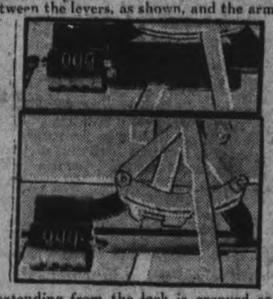
PARSNIPS—Plant 1-4 to 1-2 inch deep; rows about 18 inches apart; plants 3 or 4 inches apart. Use one packet seeds.

RADISH—Plant 1-2 inch deep; rows 12 to 18 inches apart; plants one inch or more apart. These grow particularly well in sandy soil. One packet seeds sufficient.

NEW AND SIMPLE DEVICE FOR CONTROL

Of Emergency Brake and Control Levers.

A Frenchman has devised a combination lock device by which the emergency brake and control levers are held in place and cannot be moved before the lock is opened. The device is set between the levers, as shown, and the arm



extending from the lock is grooved so that it will hold the levers in place—the emergency set and the control in neutral Knowledge of the combination, a word or syllable of three letters, is needed to open the lock.

It is against the fire laws to chain a car to a post, but even where this can be done with impunity it is not a sure safeguard against theft. For the experienced auto thief has his tools with which he can easily remove the chained wheel, substitute a spare wheel and drive off.

USES FOR OLD TUBES

A worn old inner tube can be cut up and put to several good uses. Part can cover up the distribution cap and ignition wires so no water will get in while it is raining or the car is being washed.

Strips can be laid on the clutch and brake pedals, or around the openings to keep out drafts. Wads of rubber can be wedged into spots where rattles are caused. The battery could be covered up and protected against dirt and moisture, and a temporaty hose connection can be made of a strip.

MOST HORRIBLE STORY

Mary Woolstoncroft Shelley, wife of the poet, is credited with having produced the most horrible, blood-curdling story in the whole range of English letters. It came into being during the summer of 1816, when Mr. and Mrs. Sheelly were neighbors of Lord Byron on a vacation in Switzerland. To beguile the time, Byron suggested that each write a short story. Mrs. Shelley wrote "Frankenstein," and it is considered to bear off the palm ofr literature of the weird and hair-raising sort.

It is concerned with a gentleman whi, having stumbled upon the principle of life, constructs a monstrous man from bits of human anatomy found in graveyards and churnet houses. The creature he imbued with life, and it pursues him him to his own destruction. The story became so celebrated that the phrase "a Frankenstein monster" came to have a figurative signidicance, and is still employed to designate something which a man creates and which afterwards destroys its creator.

ANNIVERSARY KNOX CHURCH

Rev. H. J. Keith Spoke at Both Services -- The Morning Sermon.

Taking as his text words which symbolized progress, "Remember ye not former things, neither consider the things of old. Behind, I will do a new thing. Now it shall spring forth," Rev. H. J. Keith, M.A., of St. Andrew's Church, Winnipeg, spoke at the morning service yesterday at Knox Church.

The occasion, the fifteenth anniversary of the raising of Knox Church to the status of an independent charge, was fittingly observed by the presence of Rev. Mr. Keith, the first pastor of the church, who, just before the sermon, performed the baptismal ceremony for the baby son of Rev. and Mrs. Mackenzie.

"In many respects, we should forget the things that are behind. The best things are not behind, and it is fatal for a church or a people to take that attitude," said Mr. Keith, referring to progress in literature, in science and in religion, also as examples of the fallacy of considering only the old things as the good things. The wonderful vision of the founders of Knox Church, Mrs. Dickson, Mrs. Jas. A. Hall, Messrs. Bennet, Morrison and Smith, the debt of gratitude due to St. Paul's Church, to the Dickson family, to the late Mr. and Mrs. Hugh Waddell, were commented on.

A Glowing Outlook.

"Will you fold your hands now and settle down?" said the speaker, giving as his message to the congregation of to-day the hope of a more glowing outlook in the days to come.

To the older people, those to whom the promise had been made, "I will do better for you at the close than at the beginning," Mr. Keith directed the thought of that more glorious experience than had yet been encountered on life's pathway; and for the young, there was a more wonderful outlook than at any other period in the world's history, in the opportunity afforded them of participation in the developments of world-wide nationhood, in the awakening of our own Dominion to its manifold possibilities.

For the church of Jesus Christ, there was a more glorious outlook still. Lack of confidence in each other and hatred had been characterized as the evils between nations at the present day, and who was to bring about the restoration of peace and goodwill among the peoples of the earth if not the Church of Christ? "The call to you people is to be loyal to the Church. Let it be known abroad in business and in your daily taks that you are loyal. The world is waiting for an expression of that love and service that will come by the inspiration of Jesus Christ, that will come from the lives of those who are loyal. Go forward into the morrow, forgetting the things that are behind, expecting great things from God, and forever achieving great things for God."

Story For Children.

To the children, Mr. Keith told a little of the story of "Whistling Jimmy," who, at 89 years of age, is whistling still, as he has whistled through life, gathering friends as he goes on the way that he says is to be a life of work and usefulness until he is 100 years old, when he proposes to take a vacation, and to the advice of the mother of Abraham Lincoln, on her death-bed, when she asked her son to learn to sing, and, if this were impossible, to make other people sing. "My message to the boys and girls this morning," said Mr. Keith, "is to get the secret of 'Whistling Jimmy,' and to go about making other people happy because of your own happy lives."

Referring to the remarks of those who had thought with his departure from Knox Church some years ago, that "now the whole thing will fall through," Mr. Keith spoke of the work of the young man "who, by the inspiration of his spirit and example, has built up a strong and lasting congregation in this south end of the city."

Add Pearly Teeth

To your attractions—Combat the film

Have you noticed how many smiling women now show pretty teeth? And how much they add to beauty?

Millions now combat the film—that dingy film on teeth. And they gain results which, when you know them, you will never go without.

Film is unsightly

You can feel on your teeth a viscous film. It is ever-present, ever forming. Mere brushing does not end it. So much remains to form the basis of dingy coats.

Film is what discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acids. It holds the acids in contact with the teeth to cause decay.

Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea. Thus most tooth troubles and most dingy teeth are now traced to film.

Now millions do this

To save the teeth it was essential to combat that film. So dental science, after long research, found two ways to do it. Leading dentists the world over now advise their daily use.

A modern tooth paste has been created—made to comply with the new-day requirements. And these film combatants are embodied in it.

This tooth paste is called Pepsodent. Millions of people who have seen its results now apply it twice a day. And they enjoy the teeth you see—whiter, cleaner, safer.

Mouths kept alkaline

Another result is to multiply the alkalinity of the saliva. And that neutralizes acids which cause tooth decay.

Each use also multiplies the starch digestant in the saliva. That to digest the starch deposits that cling. If left to ferment they form acids.

Thus every application gives manifold power to Nature's tooth-protecting forces in the mouth.

The results will surprise and convince you. You will see that teeth-cleaning can be made vastly more effective.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Then you will know why this new method is everywhere advised. Cut out the coupon now.

Queer Hobbies of Old Hermit of Round Lake

Hid His Money in Rags in the Attic and Collected Padlocks and Mouth Organs—James Bannon, Who Is Held on Charge of Insanity, Is No Fool, Says Havelock Merchant.

Mouthorgans and padlocks were the objects of James Bannon's peculiar sense of acquisitiveness as revealed a few days ago by a search for money which he was believed to have secreted in his squalid shack on the shore of Round Lake, a few miles north of Havelock County. authorities had been advised that the old man, whose age is variously estimated at from 65 to 70 years, needed medical attention, and High County Constable A. R. Moore, accompanied by Reeve Breckenridge of Belmont and George Dewey of Havelock, motored to the lake and brought him to the Nicholls Hospital.

"I was told that Mr. Bannon was supposed to have some money hidden away around his place," County Constable Moore told the Examiner; "I found it all right, but it was almost a miracle. You would never have expected it where I found it and I can't describe it very well.

"Reeve Breckenridge climbed up into the attic. There was a whole jumble of things on the floor, boxes and cans, old clothes and rags, loosely wrapped in a red handkerchief as $300 in ten dollar bills. I just happened to open it as I picked it out of the pile of stuff, and I certainly didn't expect to find any money in it.

"Bannan must have an ear for music. I don't know how many mouthorgans we found. Most of them looked as though they had never been used, and the lot of them was enough to stock a music store. He had a fondness for locks too. He had a bunch of them all around the place, some of them locking heavy chains he had tied about the tin cans.

In the centre of the attic floor were these milk cans, six of them, regular size." Mr. Moore continued. We managed to undo the locks and the chains that had been tightly tied around them. In one was a bag of flour, a bag of sugar, in another, beans in the third. Mr. Bannon must have brought his food stocks in large supplies at a time.

In one of the cans, I think it was, we found a whole lot of quarters, twenty-five cent. pieces, tied in a bag. A pile of them all had the 1888 stamp on them. Another lot was shiny and bright. The silver amounted to $168.50 Altogether we got $468.50 and his bank book showed credit of $236, so he has a little more than $700.

"When we in were the house, a big rat, the size of your hat, came out on to the floor. I'd have shot him only when I moved my hand, he scampered into a hole. I arranged with Reeve Breckenridge to have the place cleaned up. The old man comes up on Tuesday on a formal charge of insanity. He has a bad leg, a running sore, gangrene or something like that. It was swollen the size of a stovepipe. I was told he was in bad shape."

According to a story told by several Havelock men to the Examiner, James Bannon was found "frozen stiff" in his yard about a month ago.

"Two of his neighbours, Tom Cook and Matt Petherick found him one day during the last cold spell" said the narrator of that episode. "He was so far gone that one man took him by the head and the other by his feet and he never "cricked" or bent, he was that stiff. They carried him into the house just like a log, but he came around. When they went inside there was twenty-five dollars on the table."

Mr. Petherick and Mr. Cook appear to have befriended Mr. Bannon on more than one occasion, but it is told that several strangers were noticed about the place, who were suspected of designs upon the hidden, and perhaps exaggerated wealth of the eccentric old man.

"Jimmy Bannon's queer, but he's no fool," said a prominent Havelock merchant to the Examiner. He has lived out at Round Lake all his life. It is a beautiful place in summer, and east of his house are quite a few cottages. Several years ago, a doctor who was spending his vacation there had Jimmy's leg almost healed, but he paid no attention to it and was soon in as bad condition as before. He has some good connexions in Peterboro' and elsewhere."

How the Potato Peddler Became Mayor of Busy, Big Youngstown, O.

How George Oles's Platform of Unlimited Spooning, Jitneys Instead of Trolleys, Donating His Salary to the Poor and Sensational Advertising Methods Won Him Control of One of the Richest Cities of the Middle West

Not so many years ago Oles was peddling potatoes in Newcastle, Pa.

From Newcastle he moved his food market to flourishing Youngstown and soon made it a success with his peculiarly human advertisements and low prices

George L. Oles whose sensational rise from potato peddler to Mayor through his own aggressiveness and ingenuity reads like one of Horatio Alger's inspirational tales

"WHY, that fellow could sell refrigerators to Esquimaux." You have often heard some one thus refer to the selling ability of some individual, but you probably didn't believe that the man referred to could actually do it.

Out in the flourishing Middle West city of Youngstown, Ohio, there is a man who could not only sell refrigerators to Esquimaux, but who could also sell them a year's supply of ice to boot. His name is George L. Oles and he is the newly elected Mayor. Three months before election no one knew him. He had just moved to Youngstown. He ran—and still runs, for that matter—a food market. He sold food to the people of Youngstown, and at the same time he sold himself to the people—so thoroughly that they elected him Mayor. Not so many years ago he was pushing a wheelbarrow around the streets of Newcastle, Pa., and hawking potatoes.

From potato peddler to Mayor—that's George Oles's story—part of it, at least. Sounds like the title of one of Horatio Alger's stories, which used to fill so many juvenile readers with the ambition to go out and do likewise. The meteoric rise of George Oles from potato vender to Mayor isn't so remarkable. Many men have risen to greater heights from more lowly beginnings. Lincoln split rails, only to become President. Thousands have triumphed over their environment.

The astonishing element in Oles's election is not the fact that he was once a potato peddler, but how he got himself elected. He is the first man ever to be elected Mayor on an independent ticket.

Applied psychology, finding the universal human note, that touch which appeals to human nature in everybody, and striking it through the medium of newspaper advertising—that was what elected Oles.

Oles really didn't start out to be Mayor of Youngstown. He began his campaign as a joke.

"I was hunting around for something sensational for my advertisement one day," he says, "and since the campaign was foremost in everybody's mind then, I thought I'd say that I was going to run for Mayor—thought it would get people talking about Oles and his market."

People had already been talking about both of them. Oles's advertisements constantly screamed about something that interested nearly everybody. Rolled-down stockings, bootleg liquor, his competitors' personal shortcomings—there was always something in Oles's advertisements for people to laugh over, something which made them say, "Did you see Oles's advertisement to-day? About what he saw on the beach down in Florida. It's rich."

It was the human touch—and not a matter of accident either. Oles was in business with a partner in Newcastle, Pa., after he had made enough money peddling potatoes to buy an interest, and the partner says that often he had to rouse Oles from a study of psychology long after their market had closed and tell him it was time to go home. With a good business in Newcastle, Oles decided to pull up stakes, come to Youngstown and try out his theories as to human advertising. His partner couldn't dissuade him, and soon Youngstown newspapers grew more interesting.

"I studied Billy Sunday when he was in Newcastle," said Oles to an interviewer. "You know that man is a great psychologist. And I modeled my advertisements after his stuff. Brass band stuff, you know. I thought if he could sell religion that way, I could sell bananas the same way."

"And I did, too," he mused, after a pause.

Well, Oles's announcement that he would run for Mayor worked better than he thought it would. Offers of support came in, and he decided to keep up the joke for a while. Of course, a candidate had to have a platform, and Oles worked out a platform which was all his own. It was based on that human touch which had made his business a success.

First of all, there was the streetcar question—every city has one. The man in the street isn't much interested in the streetcar company's financial statement. There's nothing human in a column of figures. He knows he hasn't been getting service, and he knows that the fare is nine cents. And he's sore. So Oles's streetcar plank said:

"Oles is going to put the streetcars off the streets and turn the streets over to the jitneys."

It went big. Every one went around saying, "Did you see Oles's ad to-day? He's going to throw out the streetcars and turn the streets over to the jitneys! Haw, haw, haw!"

Then there is the twenty-year-old battle to have the Erie Railroad's grade crossings eliminated from the downtown district. Purchases of land and various negotiations have dragged along over the years, as long as most people can remember, and the crossings are still there.

"Oles is going to make the Erie eliminate the grade crossings or he'll tear up their rails."

A new property valuation had just been made and all values had been revised upward—which, of course, wasn't exceedingly popular with the property owners. Anent this situation, Oles's platform promised that any one who paid taxes under the new valuation would be put in jail.

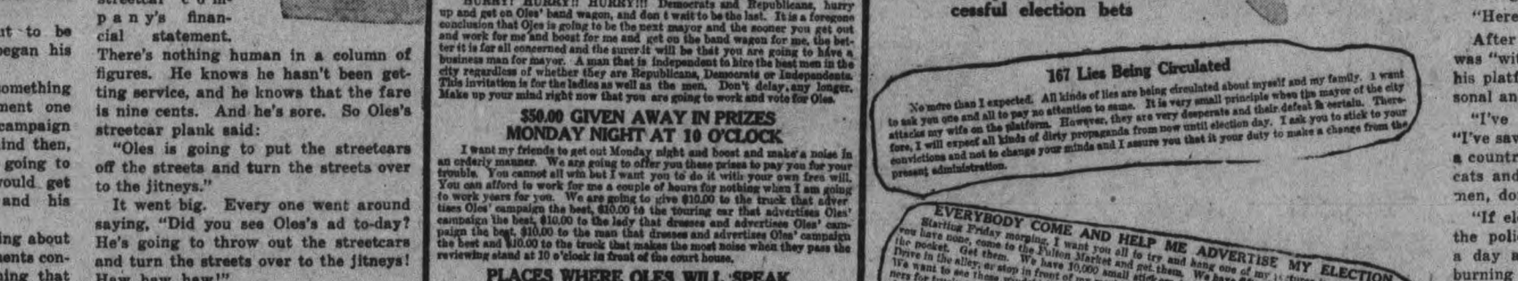
And then there was that plank about spooning in the parks. Oles declared that under his administration lovers could spoon on every bench in the city, and the police, instead of moving them on, would be ordered to protect them from annoyance. Then the whole police force was going to be fired if it didn't obey orders to clean up the town. And the political bosses and their gangs were going to be cleaned out. And City Hall employees would have to work a full day or be fired. Finally, Oles's salary as Mayor would be turned over to the Community Corporation, which finances thirty different charities here.

The human touch, all through. Every plank an appeal to human nature.

The offers of support grew in volume; the campaign got beyond a joke, and finally Oles grew serious himself and went in to win. Three months before election he moved in from his country home and established a legal residence in a hotel apartment. From that time on the fur flew. Meetings were held in every fire station, every schoolhouse, every hall.

Oles's advertisements were master-pieces of human appeal. Any one who reads them cannot doubt his ability to sell refrigerators to Esquimaux or radiators in the Sahara. They hit straight from the shoulder. People couldn't help reading them.

They were all headed in the same manner—FULTON FRUIT AND MEAT MARKET—and at first glance they looked like an honest-to-goodness advertisement of the merchandise Oles sold, but they were more than that. They placed George L. Oles before the public, and at the same time called attention to his market. If Oles were elected so much the better. If he wasn't at least every one in Youngstown knew of the Fulton Fruit and Meat Market.



Mrs. Oles and her two children basking in the sun at Miami, Fla. Mr. Oles was able to pay the expenses of his vacation with the proceeds of his successful election bets

167 Lies Being Circulated

No more than I expected. All kinds of lies are being circulated about myself and my family. I want to ask you one and all to pay no attention to same. It is very small principle when the mayor of the city attacks my wife on the platform. However, they are very desperate and their defeat is certain. Therefore, I will expect all kinds of dirty propaganda from now until election day. I ask you to stick to your convictions and not to change your minds and I assure you that it your duty to make a change from the present administration.

EVERYBODY COME AND HELP ME ADVERTISE MY ELECTION

Starting Friday morning, I want you all to try and hang one of my pictures in your windows. You have mine, come to the Fulton Market and get them. We have fifty thousand cards at my market for the pocket. Get them. We have 10,000 small stickers to go on the wind shields of your automobiles. There in the alley, or stop in front of my market and get them. We will have a few oil-cloth banners for trucks and taxi cabs and cars that are in continuous service. I want every one that had an oil-cloth banner before to see if they can find them and get them back into use. If you can find the old cloth banner, fix it up and get it on your car. You surely should be able to do this much for me after what I am doing for you. I thank you for your support in helping me advertise during the last ten days of this campaign.

EVERYBODY EAT GRAPE FRUIT AT 75c A BASKET

The healthiest thing for you to eat, the healthiest thing to feed your family, is grape fruit. The price is unusually low at this time of year. A nice basket full for the small price of 75c.

OYSTERS! OYSTERS! OYSTERS!

We are back in our old standard of oysters again. We are now receiving the best that come out of the city of Baltimore. We had a little trouble last week and had some under size oysters. However, from now on you will receive the very finest that come into this city.

Specimens of Oles's human interest advertisements which first attracted attention to him and did much to bring about his election

STICK TO YOUR CONVICTIONS AND DO NOT BE LED ASTRAY BY MALICIOUS LIES.

This is the heading of one ad which appeared a few weeks before election and which went on to say:

"If you will stick to your convictions as you have them now, there is no doubt that you will have a new mayor of this city. They are so scared that they are circulating a lot of malicious lies. No more than I expected. Just like a drowning man grasping a straw. I would not be surprised at anything they do. The only thing to remember is to pay no attention to lies. As far as I am concerned, it does not worry me in the least, but they show small consideration when they lie about my family. I feel sure they will make votes for me instead of them. Thanking you again to stick to your convictions, I remain, Yours truly,

"GEORGE L. OLES."

Then a few lines further down:

BUY YOUR WINTER POTATOES AT $3.85 PER BAG

BUY YOUR SAUERKRAUT CABBAGE AT 2 CENTS A POUND

BREAD, PIES AND DOUGHNUTS

"Don't forget our famous hot bread for 10 cents a loaf. Our large pumpkin pies, hot from the ovens continuously, for 20 cents each. Our doughnuts are superior to any in the city for the small price of 20 cents a dozen."

This was great stuff. It went large. It might not meet with the approval of highly paid copywriters and might even be referred to by them as "hot hokum" but it sold Oles's merchandise and it sold Oles to the people of Youngstown. The housewife perusing the ad for bargains in potatoes or sauerkraut read about Oles and became interested in him. The politician reading about Oles also read about his famous hot bread and the chances are, bought some. But Oles appealed to the women more than he did to the men.

And here there entered another factor in Oles's victory. His wife moved into the hotel, too, with her two pretty little daughters, and went headlong into the campaign with her husband. Meetings for women only were organized, with men rigidly excluded, and Mrs. Oles told the women about her husband's business and home life, of how he had supported his mother since he was seventeen years old, of what a wonderful husband and father he was.

Meanwhile Oles himself was appealing to the men. Great crowds turned out to be entertained—and Oles entertained them. He never appeared till the crowd was there; and then he would rush upon the stage with arms in air, shouting:

"Here I am! Vote for Oles!"

After that, he explained, the crowd was "with him." Then he would go over his platform, making it even more personal and more human.

"I've worked hard," he would say. "I've saved some money, I have a family, a country home, some poultry and a few cats and dogs. Let me tell you gentlemen, don't get too much money.

"If elected mayor, Oles will clean up the police. Now they work six hours a day and run around half the night burning up gasoline that the taxpayers pay for. The mayor says they're all right. If that's so, how does it come that one was standing on Central Square in front of my market when robbers broke into my safe?"

And the crowd, "with him" at the start, was "for him" at the finish.

Of course, it was the women who elected him. It was the women to whom Oles had persistently played from beginning to end.

In some wards more women registered than men; and overwhelming majorities for Oles in those wards showed which way they had voted. They gave Oles enough votes to beat out the Republican candidate, the present mayor, by more than 500 ballots, and the Democratic candidate by more than 5,000.

He and his wife and the kiddies left for the South three days after the election—his wife taking along $140 worth of candy, bought at a local store, to keep the children in sweets until they returned.

A brass band and an automobile parade which took fifteen minutes to pass, turned out for a rousing farewell the night they left. And the next day betting commissioners began to check up, and found that Oles by taking all bets offered by his challengers, had cleaned up enough to pay his campaign expenses and his trip to Florida.

TONIGHT'S DRAW OF BOUTS FOR CITY CHAMPIONSHIPS

All the Choices For First Honors Will Be Seen in Action.

OPENER AT 8.15.

The city amateur boxing and wrestling championships will get under way to-night at the Grand Opera House, the first bout being scheduled for 8.15 o'clock, with "Bill" Turley of Toronto as third man in the ring. H. B. Cowan will referee the two wrestling bouts. Officials have been selected to take charge of every detail of the programme, and there is every reason to expect that the bouts will be well handled.

Holy Name Society, Peterborough A.A.A., Lakeviews, Canadian Woollens, Y.M.C.A. and C.G.E. have entries in the tournament, and to-night's show promises to be a hummer. Champions will be returned to-night in two classes. "Babe" Anthony and Ed. Dugan have it all to themselves in the 145 lb. class, and as the two are well matched this bout promises to be one of the features of the bill. It will be either Griffis or Simmons for local honors at 158 lbs., they being the only contenders.

The officials are: Referee for boxing, W. E. Turley; referee for wrestling, H. B. Cowan; judges, Sam Ray, J. Rowan; timekeepers, G. Miller, W. A. Davern; medical examiners, Dr. N. O. Sutton, Dr. E. H. Wood; clerk of scales, F. E. Convery; committee, Ford Turner, chairman, H. A. Cranfield and Walter Smaill.

Officials and those competing in the tournament will enter the theatre by the stage entrance. Boxers and wrestlers are urged to be at the theatre at 7.30 o'clock.

LAWN BOWLERS LOOK FOR BEST SEASON YET

Local Officers Elected—A Two Day Tournament

At the annual spring meeting of the Lawn Bowling Club arrangements were made for the coming season's work. Reports from the various committees were heard, which showed that the club is expecting to have one of the most successful seasons they ever had. The membership committee report a number of new applications for membership, and before the season opens it is expected that the club will be at full strength. A very capable caretaker has already been engaged for the green, and he will commence his duties this week. Given suitable weather, the greens will be ready by the middle of May. Improvements and extensions to the club-house were decided upon, and these will be made at once. The programme for the season will consist of full rink games, doubles and singles, a schedule for which will shortly be drawn up. The annual two-day tournament will also be held, the date of which was left with the Executive Committee to decide upon.

Much interest will be taken this year in the Whattam Challenge Cup games. The cup is still held by the local club, they having won it more times last year than any other club in the district, so that the first challengers this year have to come to Peterborough to play for it.

The club is anxious to have a full list of names ready for the Schedule Committee not later than May 15th. Any who are intending to join and have not already handed in their applications, are asked to notify any member of the Executive at once.

The following are the officers for the year:

President—Dr. E. A. Hammond; Vice-President—W. J. Oke; Secretary-Treasurer — T. McArthur. Executive—The above officers, with J. W. Mayneord, R. Elliott and Alex. Dick. Green Committee—W. J. Oke, J. C. Read and J. F. Convery. Schedule Committee — A. Ross, A. Gilliam and G. F. Cairns. Tournament Committee—W. J. Oke and Dr. Allen.

STANDING OF HANDICAP LEAGUE TO DATE.

In the three-men event Morden, Gilliam and McDonald lead with 1,892; in the doubles, Byers and McGee with 1,321; in the singles, A. Miller leads with 738. The tournament is most likely to be finished to-night or to-morrow.

CATARRH OF THE STOMACH FOR EIGHT YEARS

The cause of this trouble is the fermentation of food in the stomach which generates a gas that is very frequently belched up. There is also a rumbling of the bowels and a discharge of gas therefrom, here is a constant retching, and the meals are frequently vomited. There is a burning pain in the stomach, the appetite is fickle, the tongue coated, the breath bad, constipation is generally present and the sufferer becomes weak, nervous, depressed and exceedingly miserable.

The blame lies with a sluggish liver, as it holds back the bile which is so necessary to promote the movement of the bowels, and when the bile gets into the blood a badly disordered condition of the stomach, liver and bowels will surely follow.

Keep your liver active and you will always enjoy good health.

Mrs. Agnes Gallant, Reserve Mines, N.S., writes:—"I had been a great sufferer for eight years, from catarrh of the stomach. I tried several, so-called, catarrh remedies without relief until a friend advised me to try Milburn's Laxa-Liver Pills which I did, and four vials completely relieved me. That was six years ago, and I have had no return of my old trouble."

Price, 25c. a vial at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

BOBBY JONES NOW RATED REAL STAR

Tiger Third Baseman, a Long Time Arriving, Must Now Be Ranked Among the Leading Third Basemen in the Majors.

Who is the best third baseman in the American League? A year ago, in considering that question, Bobby Jones, of the Detroit Club, wouldn't have been in the running.

To-day, Bobby Jones stands out as one of the most likely candidates for the honor. Jones has arrived with a vengeance.

Always the possessor of great natural ability, it took Jones four or five years to find himself. Possibly his failure to show his true worth more quickly was due to lack of opportunity.

When Jones came to the Detroit club Hughey Jennings was manager. Jennings, while he knew Jones had great ability, was of the opinion that he lacked a certain something, and never gave him a real chance.

Jones would break into the line-up for a week or so and if he failed to do everything in tip-top fashion he would be yanked out and given a seat on the bench for a couple of weeks.

The failure of his successor would again give Jones a chance, and he would usually go through the same procedure. It was a case of in again and out again with Jones.

Ty Cobb had faith in Jones. When he took over the Detroit club he told Bobby he had no rival for the position, that he was the regular third baseman.

That seemed to be the only thing Jones needed, assurance that he was a member of the Tigers in good standing. It supplied him with the needed confidence.

From that day Jones has been a real star. His play around third was brilliant all last season. He batted .303. In the opening series with Cleveland he fairly sparkled on defence.

"Jones has developed into a remarkable third baseman," says Umpire Billy Evans. "No third baseman in either major league can cover more ground.

"Jones is a quick starter, fast on his feet, and can go to his right or left with equal ease. He is sure death on balls hit down the third base line, one of the most difficult plays a third sacker is called upon to make.

"Jones is also blessed with a strong, accurate throwing arm. This enabledl him to knock down hard hits and get his man on drives that the ordinary thick sacker would be content to hold to a single.

"Jones has certainly arrived. He deserves to be classed with the great third basemen of the majors."

BASEBALL

The New York Americans are certainly a happy family. Ruth does't speak to Mays, Mays doesn't talk to Huggins. Huggins merely nods to Owner Huston.

Walter Johnson may not do any pitching until the first of May, says a news report. That will be good news to seven other clubs in the American League.

Connie Mack's team is fast rounding into shape to hold down the cellar championship. The St. Louis Cardinals recently beat them five straight games.!

The three fighting shades continue to win from most of their opponents by an even wider margin than their name.

Detroit has a recruit, by name Herman, who swings a baseball bat as heavy as that of Babe Ruth. There ends the comparison.

Carl Mays is right-handed, which disproves the long accepted theory that only southpaw pitchers are temperamental.

It seems that a great many pitchers are basting their hopes to do a comeback on the theory that the lively ball will be missing in 1922. Certainly would be tough if the ball makers crossed them up.

Eddie Roush continues to remain down on the farm. He will have to produce some real crops to equal the salary that he refuses to accept from the Cincinnati club.

All the water hazards are not on golf courses. Some of the ball fields in the south have 'em. Bib Falk of the White Sox tumbled into one the other day and lost a ball game to the Giants.

The Brooklyn pitchers have been having such an easy time with the Yankees on the training trip that President Ebbert says he intends to pitch old Nap Rucker, now a scout for the club. That seems to be rubbing it in.

Indoor Lacrosse Has An Initial Try-Out.

MONTREAL Que. April 24.—(Canadian Press)—Indoor Lacrosse was given its initial tryout here Saturday night at the Mount Royal Arena. Two teams representative of English and French players resepctively in Montreal battled for an hour and the result was 13 to 9 in favor of the English team who added the last four goals in a whirlwind finish in the last ten minutes.

Women are said to be more valuable than men for work in delicate eye tests.

MATHEWSON INVENTS NEW GAME ON BASEBALL

Serious illness that has extended over the past two years has in no way dulled the interest of Christy Mathewson in baseball.

Up at Saranac Lake, N. Y., where Matty is rapidly growing well, according to his personal physician, Dr. Packard, the former idol of the baseball fans has been employing a little baseball strategy of his own.

In his spare moments, Matty has framed a game which has been called "Bix Six." That was the name sport writers had given Matty at the height of his pitching career, since any time he worked, he was hitting on all six, as they say.

In the old days Joe Tinker of the Chicago Cubs, was the hardest man in the National League for Matty to fool. It was a battle of wits when Tinker faced Mathewson.

Sometimes Matty got the upper hand, at other times Tinker and his timely hit would break up the ball game.

Matty admits that he spent more time trying to fool Tinker than any hitter in the history of the game. Not only would he work his hardest on the ball field against Tinker but he would give Joe much study off the field.

Matty says Tinker inspired him to evolve the baseball game "Big Six.' He says it is the direct outcome of many of his battles trying to outguess Joe.

HOW TO PROPERLY STOCK BROOK TROUT STREAM

How to stock a trout stream.

The Pennsylvania Fish and Game Commission has just issued the following interesting facts on that subject.

First—Brook trout will not live in streams that rise above 68 degrees temperature in summer.

Second—Banks of streams should bear trees or tall shrubs to provide necessary shade and coolness. In open spaces quick-growing willows or black alder should be planted.

Third—Remember that in a manufacturing state of large towns and cities, sewage, mill and other refuse pours into many of our streams. It is useless to put trout in such waters.

Fourth — The best places for planting are the rivulets and spring feeders. The trout will work their way into the larger streams as they grow.

Fifth — Rearing pools on the streams and side pools built of rock and sod are peculiarly suitable for brook trout.

Sixth—In order to be sure of healthy, normal propagation of trout it is imperative that pure living water should be selected.

Seventh—Notwithstanding laws restricting fishing to certain seasons most brook trout streams would soon be fished out if they were not restocked.

MANVERS LEAGUE IS WARMING UP

Arrangements have been completed for the organization meeting of the Manvers' Baseball League, which will be held in Bethany on Thursday evening of this week. Invitations have been sent to the various clubs interested in the formation of the new league and also a special invitation to Mr. S. S. Staples, M.P.P. for Durham.

Frank Baker Slows Up Huggins Is Worried

In baseball bad legs put more players out of the major than any other cause.

A great many players are forced out of the big show because of weak underpinning when their batting eye and arm are as strong as ever.

Tris Speaker is reported having trouble with his knes. If such is the case it will have a serious effect on his fielding and the chances of his team.

Ty Cobb is walking around with a cane because of an injured ankle. The other day Cobb admitted that his legs were going back, that he was slowing up.

He went even further by saying that from now on he will play the conservative game, that the boys will have to hit him around.

Then there is the case of Frank Baker. It is givinb Miller Huggins mueh concern. Baker at the present time is fielding on a 10-cent piece. Baker. It is giving Miller Huggins and he still takes a mean cut at the ball, but he has slowed up so much that he is covering so little ground around third that Huggins is worried.

Unless Baker shows an improvement in his fielding it is said that Ward will be sent to third and McNally shifted to second.

ALBERT SMOKE TOURNEY GUEST

Albert Smoke and a party of friends, including A. T. Johnston, who made it possible for the Indian to compete in the Boston Marathon, will attend the city boxing and wrestling championships at the Grand Opera House to-night, at the invitation of the athletic association. The party will occupy ringside seats, and an opportunity will be given the audience to recognize the Indian's prowess as a marathoner, by giving him a volley of whoops.

The preliminary bouts to-night will be of three rounds, of three minutes each, with an interval of a minute between each round. The two bouts on which the championship hinges, will be two rounds of three minutes each and the third round will be four minutes.

Ladies will be made welcome at the tournament, at which members of the I.O.D.E. will act as ushers.

CERTIFICATES FOR CITY LEAGUE CLUBS

Intermediate and junior clubs of the City Baseball League are requested to attend a meeting at the Chamber of Commerce on Wednesday night at eight o'clock, when they will receive player's certificates.

CLUTCH LOCK FOR AUTO

A strong home-made automobile lock may be made to keep the clutch cut and the brake pedal in one position. It consists of an iron or steel sleeve to fit around the brake arm, with an arm stretching from the sleeve and holding down the clutch pedal. A padlock keeps the steel sleeve in place. The only way the car could be stolen, with this lock attached, would be by breaking the lock or towing away the car.

A REAL BUSY DAY FOR THE CATCHERS.

Eight Players Retired at Plate in Major League Game.

Did you ever hear of eight men being thrown out at the plate in a major league game?

Well, such a thing actually happened. The game was played at St. Louis just prior to the opening of the present season between the Browns and Cardinals.

The fact that it was the deciding game of the spring series gives some idea of how bitterly it was fought. If the Cardinals won it meant a tie, a Brown victory gave the series three to one in favor of the American Leaguers.

The Browns won by as core of 6 to 3. Each team had four men snuffed out at the plate, George Sisler, speed merchant of the Browns, being nipped three times.

SMOKE TO RUN FOR GLADSTONES

TORONTO, April 24.—(Canadian Press)—Manager C. H. Bushnell of Gladstone Athletic Club of Toronto threw a bombshell into local long distance camps by his announcement today that he had signed Albert Smoke, the Peterborough Indian who ran third in the Boston Marathon to a Gladstone certificate, and that he would in future run for the Bloor-Bathurst club.

Arthur Johnston, proprietor of the Windsor Hotel who has had Smoke under his wing for several years confirmed the Toronto despatch this afternoon. He said that Saturday, Art Scholes, Gladstone coach, signed up Smoke. The Indian runner went to Toronto because he did not receive support from any athletic associations here, Johnston said. "If the P.A.A.A. had looked after him he'd rather have run here" he said. Mr. Johnston said he had backed him along and "dipped" into his own pocket to take him to Boston. The Gladstone club had been after him for some time and since the Boston run he decided to sign their certificate. He will not leave Peterboro or Chemong but will run whenever entered by the Toronto club

C. G. E. STILL HEADS LEAGUE

By defeating the Canadian Woollens, the C.G.E. team retain the leadership of the League. The interest taken in these games, judging by the attendance, is increasing, and the crowd was well pleased with the game. Although the C.G.E. won by 3-1, it was not a walk away. The Woollens put up a stubborn fight, and were dangerous right to the final whistle. Monkman scored the first goal for the Woollens; incidentally the first against the C.G.E. this season. It is not easy to score against Griffin, and he was at his best on Saturday. Dyer equalized just before half-time. In the second half the play was pretty even, until Monks put in the winning goal for C.G.E. Later, from a pass, when a free kick was taken, Manders put in the third. Unfortunately, the Woollens were without some of their regular players, and were in great difficulty in getting a full team out. The teams:

C.G.E.—Griffin; Davis and Service; Williams, McMillan and Hurle; Sharman, Monks, Dyer, Parkins and Manders.

Canadian Woollens—Murcer; Hillman and Chambers; Read, Roberts and Monkman; Shuttle, Hotson, Gaskill, Stott and Downer.

Referee—Mr. Clarke.

COMRADES DRAW WITH PACKERS.

These teams were both lucky to get a point apiece out of Saturday's game. Play was of a very ragged nature, and greatly interfered with by the wind. This is Comrades' first appearance, and they showed that they have not got together yet, but they will surely be better as time goes on. The Packers did well to hold them to a draw, and at times looked like winning. They are a much improved team, but are still lacking in combination. McDougall scored twice for Comrades, and M. Shaw and Strickland for the C.P.C. The teams:

Comrades—Fenner; Millinson and Hill; Blackwood, Sayer and Anderson; Thorpe, Shaw, McDougall, Dingwall and Hanson.

OLD COUNTRY SOCCER GAMES

Outstanding Event Was Huddersfield's Defeat of Preston, Saturday, 6-0.

OTHER CLASHES.

LONDON, April 24.(Canadian Press)—The most interesting event of Saturday's league football games was Huddersfields 6-0 defeat of Preston, their cup tie opponents of next Saturday. This will make Huddersfield favorites for the cup, although after Preston's defeat of the Lancashir club, particularly seeing that Preston were in a safe position in the league and far from full strength in Saturday's match where as Hudersfield had every need of a decisive victory in order to avoid relegation.

All three of the top clubs in the First League were defeated, but Liverpool have ensured the championship, thanks largely to their wonderful defence. Burnley having been beaten by Manchester City who will be ruuners-up, is still undecided as to position. Spurs still have the best chance despite their defeat of yesterday, while the victory of Arsenal gives that team a splendid chance of avoiding relegation they now having a one-point advantage over Bradford City. Everton saved themselves by drawing with Sheffield United.

In the Second Division it is still undecided what team wil join Nottingham Forest, in promotion to the first league. Stoke, beaten at Nottingham Forest, are level with Bernsley, but have a match in hand of West Ham who are also in the running. A desperate fight is proceeding among the teams at the bottom of the second league. Blackpool, Bradford and Bristol City are levell on points, but Bradford have the worst goal average.

Plymouth with a one-point advantage over Southampton, at the top of the Southern section, third division, seem to have the best chance of promoion.

Stockport County are sure of promotion in the Northern Section.

Aggregate goals scored in league fixture yesterday were 107, Huddersfield beig top scorers. Only seven visitng teams won. .....

Ten matches were drawn and twenty-six home teams won.

ONTARIO CHAMP TO BATTLE HERE

Walter Newton Billed to Take Part in Big Smoker Next Week.

The Wm. Hamilton Athletic Association throws its hat into the boxing rings with the announcement today that on Monday, May 1st, the association will stage, under the management of Jerry Coughlin, a big programme of boxing in Brock Street Rink. There will be ten bouts on the card. And listen to what Jerry Coughlin has succeeded in hooking up for the programme. The main bout will feature Walter Newton, the Ontario 135-pound champion, who will be matched against Tommy Coyne, one of Toronto's best known boxers, or if Coyne is unable to make the trip against Elderton, the good Classic A. C. boy who gave Newton such a hard battle for the championship the other night. This should alone be worth a trip to the Rink. Then Trickey, of Toronto, who was just nosed out of the 125-pound championship the other night, after a great battle in the finals, will be up against "Irish" Jordan. Ted Williams, of Peterborough, will be drawn against a Toronto middleweight, whose name will be announced later, and in addition there will be seven local bouts. This will be about the choicest card of the season, and will undoubtedly attract a big crowd of fans.

CAMERON GEDDES

FAMOUS BASSO WILL SING AT THE CAPITOL.

Cameron Geddes, the famous Canadian basso, late of the Chicago Grand Opera Company, who's singing created a big musical sensation at the Regent Theatre in Toronto, has been engaged to sing at the Capitol all this week. Mr. Geddes is the possessor of a magnificent pure bass voice of great power and flexibility, which he uses with artistic taste. He will be heard in such well-known concert numbers as "I Fear No Foe," "I'm a Roamer," and "Vulcan's Song" from "Robin Hood." His appearance here will provide Capitol patrons with a rare musical treat.

UNIVERSITIES NOT SELF-SUPPORTING.

Oxford and Cambridge Are Seeking Assistance.

LONDON, April 24.—(Associated Press).—Oxford and Cambridge Universities, for the first time in their long histories, are unable to support themselves, and have called upon the public for assistance.

This was disclosed in a report issued by the Royal Commission appointed under the chairmanship of ex-Premier Asquith, to investigate the financial condition of the two institutions, which two years ago, wa sadmittedly so unsatisfactory that the government granted each of them an emergency subsidy of $30,000 annually, thus saving both colleges from collapse.

Including these subsidieds Oxford had an income of $8,247,10 in 1920, while that of Cambridge totalled $719,554. The Commission's report recommends increasing the annual grants to $100,000 each, with additional provisions for extending educational facilities for women for women and paying pension arrears.

The Commission stresses the point that to-day the universities have largely returned to their original function of ministering to the non-wealthy student, and have, in face, become "student democracies."

In addition to recommending ample facilities for the education of women, the report pleads for more state scholarships, cheaper living costs and better pay, with pension prospects, for professors.

Although the report regrets "the comparative neglect of living languages" at both universities, it notes that there is an increasing tendency on the part of business men to look to universities for trained men as future assistants and partners. It adds that "business salsriea now offered to first-class science men would make it impossible to keep enough of the best men to do the teaching at Oxford and Cambridge were it not for their devotion to academic research and teaching and their attachment to the university."

As regards the cost of living for undergraduates, the report finds that it is too high. In 1919-20 the average total year's cost for an arts student, including food but not clothes, washing, books, stationary and personal expenses, was $156 for Oxford and $145 for Cambridge. The cheapest college during that year was Oxford, $114; Cambridge $123. The dearest was at Oxford, $202; Cambridge, $172.

Marquis Curzon is chancellor of Oxford, where the number of resident undergraduate students according to the latest statistics is 4,651, while at Cambridge, where Sir Arthur Balfour is chancellor, there are 5,733 students.

Emma DeWeale, Beatrice O'Connor, and Mary Moore, in One of the Big Laughing Moments of the Smart Musical Comedy, "Irene," which will be the Attraction at the Grand, on Wednesday Evening, April 26.

AT THE THEATRES

GRAND— Wednesday night, the most talked of musical play in the world, "Irene." The original Chicago and New York Company.

CAPITOL—Mark Twain's greatest comedy, "A Connecticut Yankee," the greatest screen production of the year. Also balance of a Capitol first-class programme.

REGENT—Very special Dorothy Gish in "Flying Pat." Also Mabel Normand in "What Happened to Rose."

ROYAL—An exceptional bill, including "Two Minutes to Go," Vitagraph spectacular feature, "Received Payment," and the funny Toonerville comedy in which "The Skipper Gets a Surprise."

Capitol Entertainment

Attraction extraordinary at the Capitol to-day. Cameron Geddes, famous basso, late of Chicago Grand Opera Company. Mark Twain's greatest comedy, "A Connecticut Yankee," is the feature picture. No advance in prices. A programme that excels all others. We guarantee it.

"A CONNECTICUT YANKEE" IS TWAIN'S MOST DISCUSSED BOOK.

When Mark Twain published "A Connecticut Yankee in King Arthur's Court," the William Fox special film version of which is to be shown at the Capitol Theatre to-day, he expected to arouse a lot of discussion—and he did. He had become sick and tired of hearing about "the good old times," and was determined to write a book showing, in humorous fashion, that the knights of old were by no means all they were cracked up to be. So he transplanted a Connecticut Yankee to the Court of King Arthur and proved that the modern American is more than a match for the ancient knight.

Anticipating discussion, Mark Twain prefaced the first edition of his book with the following:

PAULINE STARKE
in "A CONNECTICUT YANKEE"

"The ungentle laws and customs touched upon in this tale are historical, and the episodes which are used to illustrate them are historical. It is not pretended that these laws and customs existed in England in the sixth century; no, it is only pretended that, inasmuch as they existed in the English and other civilizations of far later times, it is safe to consider that it is no libel on the sixth century to suppose them to have been in practice in that day also.

"One is quite justified in inferring that wherever one of these laws or customs was lacking in that remote time, its place was filled by a worse one."

This warded off much discussion, but long after the publication of the book the author was kept busy answering letters from people who thought he had libeled the Middle Ages. However, a very great majority of people agreed with Mark Twain; and even those who thought he ought not to have laughed at King Arthur found that they could not keep from laughing with him. The irresistible calibre of his fun and satire completely routed his critics—who ere many years found this remarkable book translated into practically all languages. No more convincing demonstration of "laugh and the world laughs with you" has been seen in literary production.

AT THE GRAND.

BEAUTIFUL LOVE STORY

"Irene" the smart musical comedy which startled the amusements world by its phenomenal success both here and abroad, will be the attraction at the Grand theatre on Wednesday evening next, April 26. "Irene" is an up-to-date love story by James Montgomery, with lyrics and music by Joseph McCarthy and Harry Tierney, respectively. Twenty musical gems are rendered and several big dancing numbers are scattered through the piece.

The same lavishness which has always characterized the mountings of organizations under the banner of the Vanderbilt Producing Company, has been followed in this instance its owners and producers offering it here on the same magnificent scale.

AT THE REGENT.

DOROTHY GISH AS A RUNAWAY BRIDE.

Comes Back to the Kitchen in "Flying Pat."

Dorothy Gish's latest picture, "Flying Pat," is the merry story of a young husband who conducted a nation-wide search for his runaway wife and found her in his own kitchen. It will be the chief attraction at the Regent Theatre to-day.

In the role of the bride, Miss Gish is urged by her screen husband to choose a "career" for herself and decides to become a flyer. But this leads to complications, when her teacher turns out to be of a flirtatious disposition. Following an accident in the air, there is a smash-up at home, and the bride leaves in haste and tears. However, the world gives her the cold shoulder, and she comes back to her own kitchen, disguised as a cook. Some laughable complications lead to the newlyweds' reconciliation.

Miss Gish is supported in "Flying Pat" by James Rennie and a competent cast. Richard Jones directed the picture, which is a Paramount.

AT THE ROYAL.

FORMER GRID-IRON STAR STARS IN GRID-IRON PLAY

Every young man with red blood in his veins should see and bring his girl to see Charles Ray to-night in the First National college football romance called "Two Minutes to Go." Mr. Ray was for three years previous to his going into the movies, full-back on his university team. In this play he stars as Chester Burnett, a "senior" at Baker University. He has taken an active part in helping his college team to victory until his senior year when his father's sudden death leaves him destitute. To pay his way through college until graduation he works at night driving a milk waggon, unknown to his friends. His rival for the hand of Ruth Taylor finds out about the young man's humble occupation and thinks by telling her to make the girl give him up. Did his meanness change the girl's affection for the

ambitious young student who, whilst driving a cart at night had to forego football by day? It did not! She knew that an ambitious and honest milkman was worth a hundred tale bearing dudes and stuck by the man of her heart until such time as she should promise to love, honor and sway him. A live story depicting live events and played by a live, very much alive, actor. Then to-night we present that universal favorite, Connie Griffith in the Vitagraph special, called "Received Payment." This is a story dealing with a crabbed and rich old man whose daughter married the man of her choice, an actor. He disowned her and tried to forget her, but when he found her daughter, in later years, on the stage and a success before the footlights he found that blood is thicker than water and that love conquers in the end. So did his granddaughter!!! For the lighter end of this programme we present another of these funny Toonerville comedies in which "The Skipper Finds a Surprise." And it was a surprise package that lots of fellows would welcome. A well-balanced programme of artistic merit and interesting subjects.

FORMER PETERBORO MAN IS APPOINTED

borough Lodge, established in 1872, has 391 members; Otonabee Lodge, established in 188z, has 276 members; and Rebekah Lodge for ladies enjoys 250 members. The building at the south-west corner of George and Hunter streets, in which these lodges meet, was built by the late W. H. Cluxton, himself an original charter member of Oddfellows in Peterborough.

First Communication.

The first annual communication of the Grand Lodge of the United States was held in Baltimore, April 25, 1825, with Thos. Wildey, Most Worthy Master-elect. In 1827 the first encampment was instituted at Maryland, U.S.A., and Grand Sire Wildey was elected High Priest. The degree of Rebekah and ritual prepared was adopted in 1851 in Indiana, U.S.A., through the advocacy of Schuyler Colfax, who subsequently became Vice-President of the United States. At first this Rebekah was an honorary degree conferred on Scarlet Degree members and wives. Ten years later permission was granted for the establishment of Rebekah Degree Lodges, the membership to be confined to the wives of Oddfellows; but during the last few years membership has been extended to unmarried daughters and sisters of Oddfellows.

The Sermon.

Dr. R. C. Blagrave prefaced his discourse by a warm welcome to the visiting Oddfellows and associate Rebekahs, who by their presence to join with the congregation of this old historic church in divine worship recognized religion and honored God. He gracefully extolled Oddfellows as inculcating and practicing principles which have a wonderful influence on community life in the country; in fact, he said, one cannot measure up the importace of such an organization, numbering 65,000 Oddfellows and 22,000 Rebekahs in Ontario, disseminating, uplifting ideals orginating from fraternal association; and incalculable in their value to the citizenship of this province.

Friendship, Love, Truth.

The reverend doctor here delivered an eloquent and thoughtful discourse based on 15 John, vs. 12, 13, 14—"This is my command, that ye love one another, etc."—which command of Chist's he opined was faithfully exemplified in Oddfellowship. He commended their constitutional motto of "Friendship, Love and Truth" as embodying three precepts, without which the civilized world cannot exist. Truth, he continued, involves all principles which are right; the recognition that right shall obtain between man and man; between country and country—the right to develop, to give and take on equal terms; the right to work out our own destiny, nationally and otherwise. On this particular day, he emphasized, we are conscious of the value of truth and right; for we are remembering those gallant Canadian citizens who held the strategic line of defence at Ypres, defending the right of nationality, country, home and empire; of treasure, family and friend. Truth is the real perspective of life, in that it involves justice.

Noblest Thing on Earth.

Friendship, the speaker characterized as the noblest thing in life, with a common purpose and a common end; and one of the finest things on God's earth, he said, is a true friend. Dr. Blagrave here extolled the exemplification of friendship as evident in Oddfellowship, especially so by the maintenance of that splendidly equipped home in Toronto, where 100 orphaned boys and some old folk, too, are tenderly cared for, the former being educated for the subsequent battle of life.

The Middle Word.

Turning to the middle word of the trinity adopted by Oddfellows as their motto— Love —the reverend gentleman thought that as the principle of human love enters so fully into the precepts conveyed by the other two words, it surely must with this order signify the love of God. "You have the word incorporated, he said, in your social life, and therefore I presume that you also recognize another element and principle which must be the stay and bulwark of every society—the love of God, who purifies and sanctifies every effort."

In conclusion of a stirring peroration the Vicar of St. John's warmly commended the aims and objects of this world-wide organization, the practice of whose precepts evolving from their trinity of Friendship, Love and Truth would, he hoped, blaze the way for the advance of civilization to a higher and nobler destiny in which the friendship of God obtains.

The presentation of the offertory was followed by the singing of one verse each of "O Canada" and the National Anthem.

TWO MONTHS MORE FOR LEGISLATURE

Expecting another six or eight weeks of the Legislature, Mr. T. Tooms wil remain in Toronto for the entire period without returning to Peterboro, he told the Examiner yesterday. Persons wishing to get in touch with him are advised that he will not be at home during the week ends until the Legislature is prorogued.

Mr. Tooms was carrying the plans for a house of which he had secured the contract, but he was on his to inform the man who had engaged him that he was prevented by the prolonged session from undertaking the work.

"It has spoiled my work here" said Mr. Tooms. "I suppose I might have stayed here a little more and remained away from the House but wehn you promise to attend faithfully to the public's work you must give it first attention."

Mr. Tooms said that he had looked forward to Spring work in Peterboro with every prospect of obtaining all that he could handle but for the present his plans are upset, He stated that if the Opposition desired it could easily faciliate the business of the House and help in bringing it to a nearly conclusion.

THE MARKETS

NEW YORK, April 24.—(Canadian Press).—In the Stock Market the week opened with further accumulation of buying orders and new high records for movement by such issues as General Electric, Pullman, Norfolk and Western and New Haven. General Electric led at a two-point advance, and United Fruit and Barnsdall A gained 1½ each. U. S. Steel Common and Preferred forfeited small fractions and moderate re-actions were made by Baldwin, Studebaker and California Petroleum. Royal Dutch was the heaviest of foreign oils.

The market reversed its course sharply before the end of the first hour on heavy selling of Motors, Oils, Steels and Investment Rails. Gains of one to two points in General Asphalt, Midvale Sloss, Sheffield Crucible Preferred and Republic Iron Preferred were offset by losses of 1 to 2½ points in Bethlehem, U. S. Steel, Colorado Fuel, California and Mexican Petroleums, Sinclair, Mack Trucks, Lima Locomotive, Studebaker, Goodrich, Central Leather and American Telephone. Among Rails, Atchison, Illinois Central and Atlantic Coast Line re-acted one point each, the list wavering almost as a whole before noon. Call money opened at 3½ per cent.

The afternoon dealings were featured by a series of confused fluctuations. Speculatives' favorites, like Steels, Motors, Oils and Equipments, felt the weight of the extensive profit-taking. Meanwhile a wide assortment of low-priced Railroads and minor specialties were pushed up strongly, indicating a constant shifting of professionals from one group to another. New Haven, Ontario and Western, Wisconsin Central, Federal Mining and Smelting Preferred, Wilson Packing, Marine Preferred, Allis Chalmers, National Enamelling, Pierce Oil Preferred, American Radiator, Weber and Heilbroner and Bush Terminal Preferred advanced one to three points.

TORONTO CATTLE MARKET.

STERLING EXCHANGE.

NEW YORK, April 24 (Canadian Press). — Sterling exchange firm. Demand rates—Great Britain, 4.42 3-4; Canadian dollars, 1 1-4 per cent. discount.

TORONTO STOCK MARKET.

TORONTO, April 24.—(Canadian Press.)— Initial session on Toronto Stock Exchange this week was comparatively dull, with more attention given to unlisted than to listed. Brazilian lost 3-4 of a point at 43 1-2, Steel of Canada lost 7-8 at 68 5-8, while gains of 1-4 were registered by Abitibi, Bell Telephone and Mackay at 53 1-4, 107 and 92 3-4 respectively. In unlisted section Mines were active at higher prices. Teck Hughes on sales of 65,000 shares, advanced to 62 3-4 with close at 62, gain of 2 1-2 from Saturday.

MONTREAL STOCKS.

MONRTEAL April 24.—(Canadian Press)—What is expected to be one of busiest weeks on local exchange for some months started this morning. Abitibi and Price Bros. were most active of paper group former selling up half point at 53 and later up an eight at 45. Smelters was also stronger selling at 24 1-2 highest point touched in its present advance. Other stocks were firm but unchanged.

CHICAGO GRAIN MARKETS.

CHICAGO, April 24. Canadian Press. — The opening figures which varied from unchanged figures to 1 1-2 higher with May 1.48 to 1.49 and July 1.29 1-2 to 1.29 3-4 were followed by moderate fluctuations in which May continued well above Saturday's finish with July and September below that level. Seaboard demand gave a little firmness to corn. After opening unchanged to 3-8 to 1-2 higher July 65 3-4 to 66, corn market held at about normal range. Oats sympathized with corn starting shade off to 1-4 higher, July 41 1-8 to 41 1-4 and later hardening a little more.

Work Out Wheat Market Problem

OTTAWA, April 24.—(Canadian Press)—A sub-committee, the duties of which will be to present a report showing what form of national wheat marketing proposal may be provided by Parliament was named to-day by the Standing Committee on Agriculture.

This committee will meet the law officers of the Crown and also grain marketing experts, and seek to work out a solution which will be legal.

GENERAL OF REPUBLICAN ARMY SLAIN

Troops of Athlone Brigade Mutiny and Shoot to Death Their Commandant in Street.

BRIEFS FROM WIRES

DUBLIN, April 25.— (Canadian Press.)—According to a statement issued by headquarters of the Irish regular army to-day, Brigadier-General Adamsoin, commanding the Athlone brigade of the regular Republican army, was shot and killed to-day in the streets of Athlone by mutinous troops. He was confronted by armed men, who ordered him to throw up his hands. When he complied his assailants deliberately fired into him. Several of mutineers' officers have been arrested.

TROUBLE IN CHINA.

MANILLA, April 25.—(Canadian Press.)—United States flagship Huron of the Asiatic squadron has received rush orders to-day to sail to China because of disturbed conditions there

ULTIMATUM TO RUSSIA.

LONDON, April 25.— (Canadian Press.)— There is reliable information, declares a Central News despatch, from Genoa, that M. Barthou of the French delegation, received explicit instructions this morning to insist at the Conference upon terms contained in Premier Poincare's speech on Monday.

The delegation has declared it it would press for a forty-eight hour ultimatum to Russia or else break from the Conference.

Poincare's speech has created great consternation in Conference circles.

RUSSIAN VIEWS.

GENOA, April 25. — (Canadian Press.)—Foreign Minister Tchitcherin, of Soviet Russia, declared today that it was Allied resistance to the Russian principle of nationalization which was blocking the conference.

It was obvious, he said, that the only serious obstacles to peace with Russia and general reconstruction were the pretentions of a few former owners of property in Russia.

NO FURTHER PLANS.

PARIS, April 25. — (Canadian Press.)— Premier Poincare has not adopted any plan for further military occupation of Germany in case of default in the German reparations payment on May 31, it was stated officially to-day.

NO MORE PARLEYING.

PARIS, April 25. — (Canadian Press.)— The sentiment expressed yesterday by Poincare in a speech echoed throughout France was endorsed by leading public men at the sessions of the General Councils of Departments. Charles Jonnart declared that there was no more time for parleying on the reparations question, and that the moment had come to act.

SEAPLANE MISSING.

KEY WEST, Florida, April 25.—(Canadian Press.)—The commercial seaplane Santa Maria, which left here Monday at 6.10 a.m. for Nassau with six persons aboard, including one woman, has not arrived at its destination, and naval seaplanes of the Atlantic squadron left here early today to search for it.

Slain By Hands Of A Strangler

NEW YORK, April 25. — Canadian Press.—Slain by the hands of a strangler, the body of five year old Lilian Givner was found to-day in a closet of a Houston street house behind one in which her parents lived. In an adjoining room, the door of which was broken open by the police, a man who said his name was George Wasill, was found. He was arrested and charged with homicide.

CONGRETE WORK IS ILLUSTRATED

Interesting Lecture to the Local Engineers By Lt.-Col. Boyden of Chicago.

Lieut.-Col. H. C. Boyden, of Chicago, gave a very interesting and instructive lecture last evening, before the Peterborough branch of the Engineering Institute, in the Board of Trade rooms on the subject of "Recent Developments in Concrete."

The art of making concrete, he said, was an old one, but it is only in recent years that any serious large scale investigations of its structure and the real effect of various combinations of the ingredients have been undertaken.

He discussed some of the newest field tests for getting good concrete, and advocated that the exact proportions of the mix be left out of specifications, and that the strength required be specified in its stead. The contractor can then mix the concrete in accordance with the prevailing conditions and better results will be otbained.

Exhaustive Tests.

He told of the results obtained in exhaustive experiments with the use of aggregates of varying degrees of hardness, sharpness and cleanness. The absence of any organic impurities in the sand used was stressed. He also told if the bad results obtained by the use of too much water and poor mixing.

He also spoke of the exhaustive experiments which have been carried on at the Structural Material Research Laboratory in Chicago. This laboratory was established in 1914 and is equipped to conduct about 75,000 tests in concrete in a year. The findings of the investigations carried on here have been such as to make many vital changes in the use of concrete, and conclusions have been reached that allow excellent results to be obtained in cases that before were thought to be impossible.

His address was very well illustrated with lantern slides.

On Thursday evening Colonel F. M. Gaudet of Ottawa, will give an address on "The Development of Scientific Research in Canada." This will also be delivered in the Board of Trade rooms, and will be illustrated with moving pictures and lantern slides.

PUT A STOP TO FISH POACHING.

Inspector M. J. Woodcock of the Department of Game and Fisheries has confirmed the appointment of special overseers in this district to prevent fish poaching during the spawning season. Through the agitation of the Game and Fish Protective Association men have been appointed at Peterborough, Bridgenorth, Young's Point, Bewdley and at the Ouse on the Trent, near Birdsall's, by Deputy Minister of Game and Fisheries D. Macdonald. These officers will be on the payroll until May 4th, when the spawning season will be over. They took up their duties on April 14th and are working under Warden John Fleming, of Orillia. "There is considerable poaching going on," admitted Inspector Woodcock, "and the fish need to be especially protected during the spawning season." The inspector offered to give the names of the overseers, but it was thought advisable that they be withheld for the present.

M. MACVICAR THREATENING RESIGN SEAT

Member for East Elgin Strongly Resents Being Dubbed Laziest Man in Legislature.

ASKS FOR CENSURE

ST. THOMAS, April 25 (Special to The Examiner). — The report has just leaked out to-day of a very lively United Farmer meeting held in Aylmer several days ago, in which the alleged delinquencies of Malcolm MacVicar, Legislative representative for East Elgin, in connection with the summoning of seven Port Stanley fishermen last month, were ventilated.

Mitchell Hepburn, secretary of the East Elgin U. F. O., following a visit to Toronto in reference to the fishermen's cases, referred to Mr. MacVicar as "the laziest man in the House," and the "Rip Van Winkle of East Elgin," in interviews in the local press.

Mr. MacVicar is said to have strongly resented the imputations at the meeting, and to have threatened to place his resignation in the hands of the U. F. O. executive if Mr. Hepburn was not publicly censured for his remarks and replaced as secretary.

The censuring has not taken place, nor has the executive evidenced any disposition to elect a new secretary. In fact, the majority of the members are said to have approved of Mr. Hepburn's stand.

Just what will develop is not known, but there are vague rumours that a bye-election may take place in the East Elgin riding in the near future.

THE MARKETS

NEW YORK, April 25.—(Canadian Press).—In to-day's early market, declines outnumbered gains for the first time in several weeks. Among the exceptions were United States Steels and Studebaker, both scoring fractional advances. New Haven, the leader of the preceding session, opened unchanged, but soon lost half a point. A number of specialties, notably the Rubber Tire division, added to yesterday's gains, Federal Mining and Smelting Preferred also displaying pronounced strength. Foreign exchanges were irregular, German marks forfeiting much of the recent rally.

Opening losses were soon cancelled on demand for local Tractions, Motors and Rails. Manhattan Elevated was the chief feature, gaining five points. Third Avenue rose 2¼, and other strong local issues included Brooklyn Rapid Transit and Consolidated Gas. Studebaker's advance of almost two points brought it within a fraction of its recent record. Motor Accessories made further gains and Metals were strong on buying of International Nickel Preferred and National Lead.

CHICAGO WHEAT.

CHICAGO, April 25.—(Canadian Press). — Opening wheat prices, which varied from ½ to 1¼ higher, with May 1.46 5-8 to 1.47 and July 1.29 to 1.29¼, was followed by slight further upturn and then by a rapid descent that in some cases went more than five cents under the early top figures.

Corn and oats paralleled action of wheat. After opening unchanged to 1-8 to ¼ higher, July 65¼ to 65 1-8, corn dropped well below yesterday's final figures. Oats started 1-4 to 3-8 off to 1-8 advance, July 40 3-8 to 40 1-4 and later declined all around.

TORONTO CATTLE MARKETS.

TORONTO, April 25.—(Canadian Press).—Receipts, 1,134; trade slow. Heavy beef steers, $7.75 to $8.50; butcher cows, medium, $3.50 to $4.50; butcher steers, choice, $7.80 to $8; calves, $9 to $10.50; lambs, $12 to $15; hogs, selects, $13.

NARROW ESCAPE TWO BOYS FROM DROWNING IN RIVER

Punt Upset While Howard Kennedy and Clarence Beebe Were Gathering Drift Wood—One Rescuer Upset and Left Hanging to Post in the Otonabee.

Two boys, Howard Kendry and Clarence Beebe, had a narrow escape from drowning yesterday afternoon when the punt from which they were gathering drift wood at the foot of Smith street, upset and left them struggling in the water. Residents of the vicinity immediately came to the rescue, and a hurry up call was sent to the police station for aid. Members of both the police and fire departments responded, making the trip in record time.

Beebe was pulled from the water by Joseph Murphy, with the aid of a rope. Claude Rogers, in endeavoring to aid the other boy from a boat, was also upset and left hanging to a post in the river. Robert Sturgeon, Fireman Thomas Hatley and Detective E. Cookman went to the rescue of Rogers and Kendry in a row boat and brought them safely to shore. The oars, however, were lost, and they had to be pulled in with ropes. Officer Carey and Fireman Pammett and John Saddler, who lives close by, also took part in the rescue.

The Beebe boy is to-day apparently suffering no ill effects from the accident, but Kendry has been ordered by the attending physician to stay in bed for a few days.

High Opinion of Canadian Engineers

Mr. H. C. Boyden, well-known engineer from Chicago, who last evening addressed the Peterborough branch of the Engineering Institute, has a high opinion of Canadian engineers.

"When I come to Canada I have to stand up on my toes, and when I return to the States I can step down," was Mr. Boyden's expressive way of putting it.

While in th city yesterday, Mr. Boyden, who specialises in cement work, inspected the Peterborough Lift Lock, and commented favourably on th durability of the work. The cement work on this job was constructed during the time when cement construction was in its infancy.

TRAPPERS NEED PIPE OF PEACE

Local Pelt Buyers Say Rice Lake Rats Will Soon Be Exterminated By "Close Catching" Every Year.

If councls are still held by the Indians of Hiawatha, they might profitably discuss a one of their sessions the question of a year's protection of muskrats for the purpose of preserving a means of revenue that has been steadily diminishing.

Trappers cannot understand the improvidece of the Indians who, it is said, catch "so close" that they would take the last rat for the two dollars it would bring, and without a thought for next year's re-stocking.

Some years ago the average catch was up in the hundreds. It is told of Alfie Crowe that his biggest catch in one season was almost one thousand rats. This year the average at Hiawatha has been variously estimated at from 65 pelts to 150. It seems certain that the Rice Lake muskrat is disappearing, and those caught this year seemed to be smaller than the best sizes of a decade ago.

"Suppose there were one hundred rats at the Lake," said one trapper, explaining the expression a "close catch." "If fifty of them were taken this year, and fifty next year, their number would be steadily increasing. But supposing that ninety were caught this year and another high percentage killed next year, that is what we mean by a 'close catch.' Some of the Indians would kill them down to ninety-nine, and I believe some of them would even take the hundredth. They ought to realise that by this slaughter they are depriving themselves of a natural source of revenue which will become more valuable as the rats are exterminated. They could have trapping prohibited for a year, and after that they could arrange between themselves a limited catch. By that means they would be assured of perpetuating the Rice Lake muskrats in fairly large numbers."

A baby elephant, serving as caddy at Miami Beach, Fla., picks up the golf balls for the players.

NEW SMOKE STACK FOR INCINERATOR

Will Be Made and Erected For $738 By the Wm. Hamilton Company.

The Wm. Hamilton Company's quotation of $738 for a new smoke stack for the incinerator was accepted by the Committee of the Whole Council last night on Ald. Turner's motion seconded by Ald. Jones. This price covers cost of taking down the old stack and erecting the new one. The stack can be made in ten days and put in position with the least possible delay.

Ald. McIntyre informed the Committee that for the painting of the market clerk's office he had obtained a price of $16 for two coats inside, $57 for outside and $20 for painting the brick.

A bid for kalsomining the interior of the fire hall, two coats, and painting woodwork except rafters and ceiling for $207 was also quoted by Ald. McIntyre who vouched for the efficiency of the painters who had offered to do the work. He was authorized by the Committee to have the painting proceeded with, and also to get a price on the painting of the approach to the market hall.

OVER 300 GUESTS WERE DINED AT KNOX CHURCH

Celebration of Crystal Anniversary Continued

The celebration of the fifteenth, or crystal, anniversary of the establishment of Knox Church as an independent charge was observed last night with a very sumptuous dinner served to over 300 people in the lecture hall of the church, under the auspices of the Ladies' Auxiliary of the church. The hall was prettily decorated in yellow and green, with tulips at the guest-table, and the viands provided by the ladies left nothing to be desired, either in quality or quantity or daintiness of service. A hearty vote of thanks was moved to the Auxiliary by Mr. M. N. Clark, and seconded by Mr. H. J. McCannan.

After the supper, a pleasant programme was given in the church, with addresses by Rev. H. J. Keith, M.A., of Winnipeg, first pastor of Knox Church, by Rev. R. Pogue, Rev. J. R. Webb and Rev. Jas. Rollins. Mr. J. F. Morrison, who occupied the chair, gave a very interesting historical sketch of the progress of the congregation during the last fifteen years, which was illustrated with lantern slides. Mr. Leslie Unitt contributed a piano solo, Mr. Alex. Seager an organ number, and Kenneth McCannan sang.

Among the guests from other churches in the city were the Misses Dickson, Mr. and Mrs. Wm. Madill, Mr. and Mrs. Jas. Connal, Rev. and Mrs. Pogue, Rev. and Mrs. Webb, Rev. Mr. Rollins, and Mr. and Mrs. J. Harrison.

NO NEED OF RAINMAKER IN ALBERTA

Precipitation Averages 2.17 inches, and Indications Are that Hatfield Towers Are Superfluous

CANCEL CONTRACT

LETHBRIDGE, Alta., April 25 (Special to The Examiner). — Southern Alberta is going to get along without its famous rainmaker this year. Present indications are that Hatfield would be superfluous.

To date this month there has been 2.17 inches of precipitation at Lethbridge, and the average holds good the whole of the south-western part of the Province. Even in the territory where Hatfield endeavoured to make the rainfall last summer around Medicine Hat, there has been almost half as much moisture this month already as was produced under the tempting of the clouds by Rainmaker Hatfield during May, June, and July last year.

Southern Alberta farmers, despite this fine outlook, are not going to take any chances. They will sow a smaller acreage than for years. They will stick to summer fallow and early spring ploughing, and make a real effort to farm right. Even the possibility of $1.50 wheat as a result of the wheat war in the Chicago pit isn't going to shake them from their determination to sow smaller acreages and do it well. Seeding will be general on Wednesday.

Hatfield's $6,000 contract with the United Agricultural Society of Medicine Hat has been cancelled, and the famous towers will not be erected this year.

OBITUARY

FRANCIS XAVIER FORTIER.

LAKEFIELD, April 25. — The death occurred here this morning, at his residence, Burnham Street, of one of the oldest residents of the village, in the person of Francis Xavier Fortier. The deceased, who was born in Quebec seventy-five years ago, but had been a resident of Lakefield for the last fifty years, was affectionately known as "French Joe." He was one of the most popular men in the village, his quiet, unassuming manner and genial personality having gathered about him a host of friends during his long residence in the community. A shoemaker by occupation, he had a little store on Queen Street. He was a member of the "Colts" rink, composed of elderly men of the village, that played in the Peterborough Bonspiel of 1921. He is survived by his wife, formerly Marguerite Phelan, and his daughter, Mona.

The funeral will take place at 9 o'clock on Thursday morning from St. Paul's Roman Catholic Church, of which the deceased was a devout member, thence to St. Mary's Cemetery, Young's Point.

Mr. H. T. Gillespie, for thirteen years connected with the Canadian Packing Co., has accepted a position with the Peterboro Milk Products, Ltd., as salesman.

THE MARKET

TORONTO, April 25. — Keen demand for government loans, particularly 1933 and 1934 Victories, made itself felt on the local stock exchange this morning. Marked strength was shown in Victories with 33's advancing 85c to 103.60; 34's 65c higher at 100.90 and 37's 40c higher at 105.40.

Stocks were lower at close. Abitibi lost 1 1-4 at 52; Atlantic Sugar 1 off at 23; Barcelona and Brazilian lost 3-4 at 61 and 45 1-8. Smelters was off point at 23 and Twin City 3-8 lower at 63 1-2. McIntyre Mines declined to 1790; Can. Steamships on active trading advanced 1-4 to 51 1-4. B. C. Fish closed 3-4 higher at 27 3-4, and Toronto Rails 1-2 higher at 63 1-2.

NEW FIRE CHIEF TO BE SELECTED THURSDAY NEXT

List of Thirty-Five Applications Has Been Cut Down to Eight Prospects — Committee Gave the Applications a Once-Over Last Evening.

"ROUND ROBIN" SHELVED.

Selecting for further information eight of the thirty-five applications for the position of Chief of the Fire Department, the Committee of the Whole Council last night appointed the Fire, Water and Light Committee, supplemented by Ald. Morrison, as a deputation to interview six of these applicants in Toronto on Thursday, and decided to ask Mr. G. O. Cameron, formerly of this city, but now on the head office staff of the Bell Telephone Company in Montreal, to confer with and enquire about two applicants from the Montreal Fire Department, and report to the Council.

Such was the course the committee launched upon in its effort to secure a successor to Chief Grange, whose term of office is supposed to end on May 1st. At least three of the members, Aldermen Morrison, Jones and McIntyre, advocated the retention of Chief Grange, Ald. Morrison especially contending that none of the applicants finally considered by the committee gave conclusive or encouraging evidence of being better qualified than Chief Grange. During part of the proceedings he conducted a vigorous and at times belligerent filibuster, but at length abandoned it when a motion and several amendments sought to bring the committee's deliberations to a head.

The "Round Robin."

Ald. McIntyre urged the committee to consider the "round robin" in behalf of Chief Grange signed by eighteen of the firemen, but the committee had previously adopted a formal motion simply to receive this petition.

Prior to taking up the applications it had been decided to send to Toronto on Thursday a deputation to be named by the Mayor, and authorized to support the demands which the Municipal Hydro-Electric Association will present to the Government. As a matter of economy, Ald. Holloway later proposed that the local deputation while in Toronto should interview three Toronto applicants, and also meet there by appointment the three other men from Hamilton, Brantford and Guelph respectively, whom the Council was inclined to regard with some favor.

Ald. Holloway's motion was sec-

Mr. E. Worth Instals Radio Receiving Set

The distinction of having one of the first radio receiving sets in the city is possessed by Edgar Worth, president of the Canadian Woollens Company. Last evening, as soon as the outfit was installed at his home, 590 Water st., Mr. Worth, his family and friends, sat around the apparatus and listened to a song and an address from Pittsburg. Mr. R. Powell of the electrical firm of Miller, Powell & Watson, who installed the set, had hardly completed his connecton before the first sounds came out of the air. Mr. Powell regulated the set last evening, but after a few lessons Mr. Worth hopes to be able to manage it himself. Many enjoyable evenings are anticipated and it may be imagined with what delight the first concert last night was received, and the success of the outfit established. Mr. Powell, who installed the apparatus, is constructing a radio set at his home, 590 George Street.

PROCEED TO PAVE HUNTER ST. EAST

Roadway on Bridge and the Approaches Will Be Repaired Temporarily.

Temorary improvemement of the roadway over the Hunter street bridge and its approaches was strungly recommended by Ald. Stocker to the Committee of the Whole Council last night, Ald. Gainey doubted the effect of repairs but Ald Stocker said the ruts would be filled in with crushed gravel and rolled. Ald. McIntyre moved, seconded by Ald. Crowe, that this temporary work be done at once.

With a by-law already passed sanctioning the paving of Hunter steet Ald. Gainey moved that City Engineer Parsons advertise for tenders for paving Hunter street east and George street south and that the City Engineer put in his own price. Concrete pavement will be laid on both these streets.

Noitce will be given of the city's intention to pave Hunter street east, and the Hydro-Electric Commission will be similiarly notified and will be requested to reply whether they intend to lay street railway tracks to Ashburnham.

BUSY ISSUING 1922 AUTO LICENSES.

The Chamber of Commerce is doing a land office business in automobile licenses. On Saturday all high marks to date were eclipsed when 132 were issued, yesterday the total went to about 80 and today had all indications of being a record breaker. Applications are pouring in from all over the district and the capacity of the office is continually taxed. So far 1650 licenses have been issued. This is just over half the number expected to be issued. There must be a great many automobiles that have not made their debut this year and of course there are many in the showrooms that will need licenses when they come into the possession of persons who drive their own cab for the first time.

Loud and long are the lamentations in the Police Station over the offences of the Motor Act and local by-laws committed in ignorance and defiance apparetly. Recognizing that many err who know to better the police pause to say it is against the law to allow the crank handle of a car to hang over the number must be clear, visible and Act tries to make it plain that the number mus be clear, visible and the police say the vision of the number is being interfered with in this way and it is a common offence by one brand of automobiles particularly. Officers say that the handle hanging down makes a 0 into a 9 and a 6 into an 8. The eyes of the officer play him all sorts of tricks when the handle gets in line and the Act in this regard is hereafter to be strictly enforced.

Not only is it against the Railway Act but it is a contravention of the city by-law to turn at railway crossings. In all parts of the country accidents, many of them fatal have occurred when cars stalled on railway tracks and the police are going to put a stop to the practice here. The G.T. tracks on Charlotte street are a favorite spot for such evolutions the police say.

McMASTER'S MOTION DEFEATED 145-59.

Division of Commons at 1.10 This Morning.

OTTAWA, April 25. Canadian Press. — At 1:10 this morning, the House of Commons divided upon Mr. McMaster's resolution, which was defeated by a vote of 142 to 59. All Progressives except 3, voted for the resolution, and the other two parties against with the exception of Mr. McMaster himself. A. W. Neill, Ind., and Messrs. McBride and Baubien, Progressives, voted aganst the resoluton.

Crowded galleries and a full attendance of members, demonstrated the interest taken in debate yesterday on the moton moved by the Liberal member for Brome, that in the opinion of this House it is desirable in the public interests that Ministers of the Crown on their appointment as such should resign all directorships held by them in banks, trust companies, insurance companies, transportation companies or public utility corporations.

STEAMER LAMBTON LOSS IS CONFIRMED.

SAULT STE. MARIE, April 25.—Canadian Press. — The light house tender Lambton, missing since last Wednesday, disappeared soon after the severe storm broke over Lake Superior, it was learned yesterday, when the steamer Midland Prince passed through the locks here.

Both vessels were in the vicinity of Caribou Island when the gale swept over them. The crew of the Midland Prince watched the small tender battle with the giant waves, but were unable to render any assistance and suddenly the craft disappeare. She carried a crew of 17. The tug G. R. Gray has left in search of the suvivors.

Baltimore Defeats Toronto With Ease

Bentley of Baltimore Hit a Homer With the Bases Full—Yankees Win Six Straight.

INTERNATIONAL

Baltimore 12—Toronto 3.

BALTIMORE, April 25 (Canadian Press). — Baltimore played its best game of the season yesterday afternoon, and had little difficulty in defeating Toronto, 12-3. Ogden pitched effectively throughout, and Bentley hit a homer in the eighth inning, with the bases full. Score:

Toronto	000100101—	3	7 0
Baltimore	01202304x—	12	17 1

Rapp, Johnson and Sanberg; Ogden and McAvoy.

Rochester 9—Reading 3.

READING, April 25 (Canadian Press). — Rochester evened up the series with Reading here yesterday by landing on Brown in the first inning and getting off to a lead which gave them the game by the score of 9 to 3. Score:

Rochester	420100002—	9	15 0
Reading	000100002—	3	8 0

Cox and Lake; Brown, Fedder, Sarsfield and Johnson, Kennedy.

Buffalo 8—Jersey City 5.

JERSEY CITY, April 25 (Canadian Press). — Buffalo reversed results with Jersey City yesterday afternoon, and came through with a victory by a score of 8 to 5. Lack of control by Lucey and Carruthers for the Skeeters, combined with the Bisons' timely batting, acounted for the visitors' success. Score:

Buffalo	011213000—	8	11 0
Jersey City	031000001—	5	7 4

Fisher and Bengough; Lucey, Carruthers, Hanson and Freitag.

Syracuse 5—Newark 3.

NEWARK, April 25 (Canadian Press). — Newark's ninth inning rally fell short yesterday, and Syracuse won, 5 to 3. Score:

Syracuse	201010100—	5	7 0
Newark	000010002—	3	10 4

Kirley, Kircher and Niebergall; L. Barnes, Kneisch, Fileshifter and Walker.

New York	20100100002—	6	9 0

Harris, Rommel, Heimach and Perkins, Fuhrman; Mays and Schang.

St. Louis 6—Detroit 2.

ST. LOUIS, April 25 (Canadian Urban Shocker pitched the Browns to a 6 to 2 victory over the Detroit Tigers in the first game of the season between the two teams yesterday. Kenneth Williams hit a home run with Severeid on in the second for his fifth circuit smash in three days. Jacobson hit another homer against Oldham with two on in the third. Score:

Detroit	000000020—	2	9 2
St. Louis	02301000x—	6	11 0

Dauss, Oldham, Johnson and Bassler, Manion; Shocker and Severeid.

NATIONAL.

Boston 8—Brooklyn 7.

BOSTON, April 25 (Canadian Press). — Boston took an erratic game from Brooklyn yesterday, 8 to 7. The heavy hitting of Powell, Boeckel, O'Neil, T. Griffith, and of Wheat featured. Boston pitchers were given excellent support. Kopf being especially brilliant. Score:

Brooklyn	000040102—	7	10 2
Boston	01310111x—	8	10 0

Mitchell, Mamaux and Hungling; Watson, McQuillan, Marquard and O'Neil.

Chicago 4—Pittsburg 2.

CHICAGO, April 25 (Canadian Press). — Vic Aldridge broke Pittsburg's wining streak after they had won six consecutive games, by holding the visitors to five hits, while he himself delivered a triple after two men had walked in the eighth inning, giving Chicago a 4 to 2 victory over the Pirates: Score:

Pittsburg	200000000—	2	5 0
Chicago	10000012x—	4	12 1

Cooper and Gooch; Aldridge and O'Farrell.

St. Louis 6—Cincinnati 4.

CINCINNATI, April 25 (Canadian Press). — Poor fielding back of Donohue was the main factor in giving St. Louis a 6 to 4 victory over Cincinnati yesterday. Pertica was wild, and was hit hard, and Barfoot also was pounded. Score:

SURE DEATH FOR MARY GARDEN IF SHE WAS A MAN

The French Singer Would Have Challenged Her to a Duel to "Defend His Honor."

CHICAGO, April 25.—(Canadian Press.)—One last fling at Mary Garden's management of the Chicago Opera Company was taken yesterday by Lucien Muratore, the French tenor, in which he said upon learning of Miss Gordon's resignation, that if she had been a man he would have killed her to defend my honor."

"Because she is a woman," he said, "I can and will do nothing."

Discussing the aftermath of the split between them in mid-season, Muratore said:

"To me, when we sing together, she hisses, 'Pretty boy,' but when I am on the stage, she talks to other members of the company about me. She calls me 'Pig'."

He shrugged his shoulders when asked if he would sing with the company next year and answered that he "didn't know whether there would be any company."

Samuel Insull, President of the Civic Opera Association, defended and praised Miss Garden and said her conduct of the company last year was "manly—that is the only word that describes it." He added that she would continue "as one of the most prominent members in the Chicago company."

"Under her direction Chicago has had grand opera that is unsurpassed anywhere in the world," he said.

Friends of Giorgio Polsoco, one of the principal conductors of the company, were confident that he would be appointed director later, despite Mr. Insull's announcement that a committee would manage all affairs for the time being. Polacco is the husband of Edith Mason.

RUSSIA AGAIN WORRIES THE CONFERENCE

Soviet Delegates Ask for Extraordinary Concessions in Financial Matters—Want Big Loan.

GENOA, April 25.—(Canadian Press)—Another new twist in the Russian tangle again causes inquietude in Conference circles. Seemingly the Russian delegates have developed a new set of proposals. It is understood that at the meeting of the experts on the Russian question yesturday afternoon the Soviet delegates argued for the complete wiping out of war debts and also the relinquishment of all arrears in interest on pre-war debts.

Simultaneously they asked for assurance that the Powers would grant loans sufficient to enable Russia to re-organize her national life.

As the Soviet had previously given the Allies to understand that a scaling down of the war debts would be accepted, the demand of the delegates for a protocol cancelling these debts caused great surprise to the representatives of the Powers, who reported to the Chiefs of their respective delegations that the trend of yesterday's meeting with the Bolsheviki indicated the possibility of insuperable difficulties in coming to arrangement with the Soviet.

loans caused dissatisfaction because

The Russian request for extensive it is recognized that it would be extremely dfficult to guarantee credits assurance that they would be handled by a truly responsible Russian Government.

The Allied chiefs last night frankly expressed their opinion that an arrangement with the Soviet will be extremely difficult unless the Russian delegates show a reason able attitude Sir Laming Worthington Evans, the Chairman of the Commission, said he could not discuss the matter further if the Soviets adopted such a impossible attitude, and therefore must refer the situation to the respective governments of the Allies

The experts adjourned sine die because of what they termed the excessive Russian demands which proposed also that the Powers accpt non-restitution of the private that they were willing to grant were condtional, first, on the recognition of their government, and second, receipt of a loan from foreign countries In addition to cancellation of arrears on the pre-war debts the Russians demanded a moratorium of thirty years on the pre-war debts themselves.

Th Russian stated that restitution tries because these countries were under a bourgeoise regime.

The breaking up of the experts' meeting has caused depression in Conference circles. It is realized that the new incident endangered good results of the Conference, especially after the French Minister's declaration that France would withdraw from the Confernce unless the Cannes resolutions were scrupluously adhered to.

KINGSTON BARBERS ARE CUTTING PRICES.

KINGSTON, Ont., April 25. — Canadian Press. — Resulting from what might very aptly be called a 'barbers' war,' the price of a haircut in Kingston has been reduced from 50 to 35c.

The 'war' started on Saturday morning when several barbers placed signs in their windows stating that hair cuts would be 40c. Other barbers went them one better and dropped the price to 35c. The result was that the first barbers to cut their prices also dropped to 35c, and several of them lowered the price of shaves to 15c.

J. W. CURRY SPEAKS IN DEFENCE OF THE O.T.A.

A Numter of Minor Bills Also Received Attention of the Provincial House

TORONTO, April 25. — Canadian Press. — A strong defence of the the enforcement of the Ontario Temperance Act, and support of Attorney General's Department in that act as bringing sobriety to the province. in spite of all the attacks made against it, were features of the budget speech of J. W. Curry, Liberal, (Toronto), yesterday afternoon and evening in the Legislature.

The Legislature showed itself as strongly oposed to giving the motorists any further privileges at this time in the matter of lights a car may carry when it promptly killed a proposal to allow a moveable spot light.

Hon. Howard Ferguson asked when the report of the Timber Commission would be ready. Attorney-General Raney stated that he understood that the report was in process of preparation but promised to make inquiries and give the House definite information.

City Bill Passed.

The City of Brantford bill, the Ottawa Civic Hospital Bill, the City of Ottawa bill and the Township of Nepean bill, passed through the committee of the house. Second readings were given the bills from the town of Preston, the town of Oakville, the town of Collingwood, and the City of Fort William. Considerable objection has been raised to the bill from the city of Galt and on the request of K. K. Helmuth it was sent back to the private bills committee so that opponents of it could explain their opposition.

A great deal of discussion arose over the second reading of a bill introduced by J. Joynt (Huron North), that would allow a member of a township council to sell gravel to the township. The need of the bill is that it frequently happened a member of the council is the only person in the locality who has gravel or road supplies available near where they are to be used. The bill was allowed to go to committee.

No Spot Lights.

The bill of R. Brackin (West Kent), to allow spot lights on motor cars, was killed. The reason urged by the motor leagues for a spot light on a pivot that can be turned in any direction is to flash it on road signs or the sides of the road. Hon. G. S. Henry (East York), Hon. F. C. Biggs, and Hon. Howard Ferguson all condemned any easing of the regulations in regard to auto lights this year, claiming that a light on a swivel would be flashed into the eyes of approaching drivers and in other ways its use would be abused.

Hon. Mr. Biggs pointed out that a light to shine on the side of the road and thus guard from driving driving into a ditch was permissable but it had to be in a fixed position. He announced that later in the session he proposed that a committee of the House be named to investigate the motor vehicles act. the highways act and other acts of a similar nature during the recess and advised against any change in the laws in the meantime. He agreed that the lights used on motor cars were often too strong, that was something that must be looked into.

Changes in the Game Laws.

Hon. Harry Mills introduced a number of amendments to the fish game laws, one being to make the open season of deer hunting north of the Transcontinental from Sept. 15 to Nov. 20. Restrictions are placed on the use of scines and pound nets.

J. W. Curry (Toronto), in resuming the debate on the budget, protested against what he termed "sneers on Christianity" which were at times heard in the Legislature, and read several quotations which he pointed to as examples. These included "Christianizing proclivities of the Attorney-General," --uplifters of the province," "my religious friend, the Attorney-General."

Defence of the O. T. A.

Mr. Curry insisted that there was a propaganda on foot to discredit the Ontario Temperance Act in the province. The propaganda was largely centred on the enforcement of the act, but this was the scheme adopted to attack the act itself. The people benind this propaganda sought to discredit the Attorney-General, sought to secure the defeat of the Drury government for having supported the O.T.A., as they claimed that they had defeated the Hearst Government for passing prohibition. Mr. Curry condemned this propaganda and clamed that men in high places in many parts of the province were not acting the part of good citizens in seeking to evade the Ontario Temperance Act.

He gave figures to show that prohibition had done much to reduce the number of drunkards, and instead of being opposed, the O.T.A. should have the support of the people of this province. He took issue with statements recently made that employees ot the department in he enforcement of the O.T.A. resorted to criminal methods to secure convictions and maintained that the Attorney-General could not be expected to personally investigate the characters of all those who were employed as "spotters." He claimed that Mr. Raney took all the precautions which could be expected to see that suitable men were employed.

ARGUMENT OVER PROHIBITION ENDS IN GRIM TRAGEDY

Rival Editors in Colorado Cannot Agree on Prohibition—Shooting Follows Argument.

DURANGO, Colo., April 25.—(Canadian Press) — William L. Wood, 35, City Editor of the Durango Herald, was shot and killed here yesterday by Rod S. Day, 47 editor of the Durango Democrat. The shooting, which occurred in the business district, is said to have grown out of an editorial fight over the 18th Amendment to the Constitution.

When Day and Wood met yesterday, authorities said they learned the latter is declared to haev started the argument. Wood is then alleged to have struck Day with a weapon, breaking Day's nose and inflicting other injuries. The shooting is said to have followed. Wood who was married, died in a hospital an hour later.

Day, who gave himself up, declined to make a statement.

CAPTAIN O'KELLY RELEASED ON HIS OWN RECOGNIZANCE.

MINNEAPOLIS, Minn., April 25. Canadian Press. — Following the deportation proceedings hearings which were held in private, Captain O'Kelly, . V.C. was released on his own recognizance. The evidence taken yesterday morning will be sent to Washington and O'Kelly was requested to remain in Minneapolis until a decision is returned.

The "Old Adam" is Apparent in Youth

BROCKVILLE, April 25.—(Canadian Press)—"I venture to say that there is not a man here who has not stolen during his boyhood days. If he says that he did not, then he is not normal", said Dr. Arthur S. Lamb, director of physical education at McGill university, Montreal, speaking to the Rotary Club yesterday. The increase in juvenile delinquency, Dr. Lamb attributed in part to the demand of the boy for excitement or vigorous exercise. If he did not secure it legimately, he would get it anyway. One of the solutions was the establishment of playgrounds under proper supervision, and the speaker said that he looked forward to the time when a system of state medicine would be introduced, making the individual responsible for keeping himself in a certain state of physical efficiency.

RUSSO-GERMAN TREATY DRAWN UP IN SECRET

Said to be the Result of Secret Negotiations in Moscow of Lenine and Admiral Von Hintze.

RIGA, April 25.—(Canadian Press)—The Russo-German Treaty which startled the Geona Economic Conference was agreed upon in Moscow after secret negogiations between Premier Lenine ,himself and Admiral Paul von Hintze, one of the leading diplomatists of former Emperor William's regime, it was stated here yesterday on good authority.

Admiral von Hintze, who acquired fame through his diplomatic activities in Mexico and China during the war, went to Moscow incognito a month ago, it was said, and held several audiences with the Soviet Premier, conducting his affairs so secretly that even Dr. August Bernhard Wiedenfeldt, Germany's representative, knew little of the actual progress of the negogiations. Admiral von Hintze, according to advices reaching Riga, will probably be the German Ambassador to Russia.

"Give Me Two if It's Shredded Wheat"

Of course he wants two Biscuits—some boys will eat five or six at a sitting and then ask for more—it is so deliciously satisfying and strengthening.

Shredded Wheat

is better than mushy porridges because the tasty crispness of the baked wheat encourages thorough chewing which develops sound teeth. Give the youngsters all they want. It is a real whole wheat food and is ready-cooked and ready-to-eat. So easy to prepare a delicious, nourishing meal in a few minutes.

Shredded Wheat Biscuit is delicious with hot or cold milk, sliced bananas, prunes or canned fruits. Triscuit is the Shredded Wheat wafer and is eaten with butter, cheese or marmalade.

AN EXPLANATION.

In these columns last evening appeared an article headed "Press and Pulpit," which was reprinted from The London Advertiser. Through an error, that paper was not credited as being the origin of the editorial which The Examiner thoroughly endorses, but for which it does not want to steal the credit. The Examiner suffers enough on its own account from newspapers which lift articles from its editorial columns and publish them without crediting them to save it from any desire to indulge in plagarism. We believe that our readers like to read what other papers are saying about the topics of the day, and therefore we each day reproduce an article from some journal of outstanding reputation, but these—unless an accident, such as that of yesterday, occurs—are credited to the newspaper from which they are taken. In this particular case we hope that Br'er 'Tiser will accept this explanation. His views are ours in regard to editorial pirates, and we hasten with our defence before his trenchant pen—or typewriter—has had time to indict us among the members who appropriate other people's opinions and print them as their own.

THE COST OF GOVERNMENT.

Interesting figures as to the expenditures of the various Provincial Governments in 1920 are given by a bulletin just received by The Examiner from the Citizens' Research Institute of Canada, which, in showing that increases in per capita expenditure were registered in almost every Province, asks the question, "Would the cutting down of these expenditures give to industry and commerce a new impetus?" It is of interest to note that Quebec was the only Province in Canada which did not increase its per capita expenditure in 1920, as compared with that of the preceeding year. The average general increase in the total per capita was $2.66, but Quebec showed a decrease of 18 cents per head. Ontario's increase amounts to $1.11 per capita. Every Province, Quebec included, spent more on education than in 1919, and all but Prince Edward Island had a much bigger expenditure on highways and bridges, reflecting the growth of the good roads movement. Ontario people had to provide at the rate o. 68 cents per head for highways and bridges, while it is a striking coincidence that the revenue derived from automobile taxes amounted to exactly the same per capita figure. British Columbia's per capita expenditure increase was the largest in Canada, but against this the liquor profits provided a revenue of 40 cents per capita. Ontario showed decreases in the cost of legislation and general government, and of the administration of justice, but in other departments an increase per capita was registered.

THE RICH GET RICHER.

And the poor get poorer—was the basic impression speakers endeavored to convey at the Labor-political Canadian convention on Good Friday, according to the press reports.

This kind of talk persistently repeated is finally regarded as true by many wage-earners and farmers, particularly in the West. There never was a time when farmers and workers in Canada were so well off or lived so well. It is true there have been some crop failures in the West and some farmers are suffering great deprivations. So, too, are a number of workers out of work, many of them because they refuse to accept a reasonable scale of wages and others because they will not work and many excellent workers because of economic conditions for which they are not personally responsible.

While labor was damning capital and wanting to receive full pay when out of work, on holidays or for the hours taken off to vote, arepresentative of The Post was visiting some houses recently erected in the suburbs for workers. The persons who will occupy them will have everything worth while in the way of conveniences, comforts and luxury that they will find in the homes of the majority of the so?called employers, capitalists or financiers. Even in the matter of food, spring lamb and asparagus now, and spring chicken and expensive California fruits later, are bought more by the masses than the classes—the classes who have made their money, built their businesses, providing employment by saving, saved by not indulging in luxuries. —Financial Post.

ANOTHER ROYAL COMMISSION?

It has been suggested that having had royal commissions on everything else, the Drury Government might be well advised to appoint a commission to investigate the whole question of nursery rhymes, with a special brief to study their relationship with the Ontario Temperance Act and in connection with the farming industry. Apparently the issue has been raised that some of these jingles of childhood days are out of joint with the times. The Attorney-General, it is rumoured, has his doubts as to the legality of some of them. For instance:

"Sing a song of six-pence,
A pocketful of rye."

The day for that sort of thing is passed. "A pocketful of rye" nowadays means a breach of the Ontario Temperance Act and a fine of $200. Temptation must be kept out of the way of the rising generation, and a jingle of the kind quoted is dangerous; it almost incites to crime, and the commission, if appointed, is expected to act promptly with regard to these lines.

And then there is old King Cole. Are the innocent children of Ontario to be allowed to hear about his calling for his bowl without a word of explanation as to whether he had a prescription for the same? Are they to be permitted to think that the merry old monarch was dealing with bootleggers? In this connection, too, it is understood that the Labour wing of the Government expects the commission to investigate the status of the "fiddlers three." Were they union musicians, with proper working conditions and time and a half for overtime?

Also to be investigated is little Miss Muffatt, who was eating her curds and whey. It is suggested that she comes within the scope of the Dairy Standard Act and the question is raised by Farmer members as to whether or not the whey in question was pasteurized. The commission may be counted upon to recommend that this rhyme be amended in this respect.

The adventures of Jack and Jill are suspicious enough to warrant some inquiry. It will be remembered that these young people started out ostensibly to get a pail of water, and then we are informed that "Jack fell down and broke his crown and Jill came tumbling after." Attorney-General Raney is known to be perturbed by the meagre details. He is anxious to learn what there was on that hill beside water. So far as is known no spotters accompanied the pair, so that the department is handicapped and the probing will have to be done by the commission.

Several Farmer Clubs have drawn the attention of the Government to the lines:

"Dickory, dickory, dock,
The mouse ran up the clock."

They suspect that this is daylight saving propaganda, cleverly disguised, of course, but nevertheless with its element of danger. The rhyme, it is true, does not accuse the mouse of changing the operations of the clock, but in its present form the clubs regard the verse as worth watching at least.

The nursery rhyme cow which jumped over the moon—there is a strong suspicion of moonshine here; Little Jack Horner who pulled out a plum—the patronage question again, you see—and the black sheep with his three bags of wool will also, it is believed, furnish fruitful ground for inquiry.

It is not expected that the commission, if appointed at all, will begin to function until W. D. Gregory, Minister of Special Commissions, has concluded his Chippawa probe. Any investigating body appointed by the Ontario Government that did not include Mr. Gregory would, of course, have no official standing.

Hon. G. H. Fergusor will likely press for a special committee of the Legislature to delve into the nursery rhyme problem, but his attempt is not likely to succeed.

AN AMERICAN TRIBUTE.

The high opinion that most of the people of the United States have of the fighting qualities of the Canadian soldiers as exemplified during the World War is indicated by the following eloquent tribute which, under the heading 'Canada's Crucification," appeared in The Cleveland (Ohio) Commercial on Saturday:

"North, over the border, today, in every community leal-hearted citizens of the Dominion are holding commemorative services for the sons of the maple, lying in Flanders' fields, who held the line for liberty from April 22 to April 24 seven years ago. In proud and loving memory mothers and fathers of these heroes recall the battle of battles of the World War, in which the picked conscripts of continental Europe hurled themselves for three consecutive days on the flower of youth of Canada and in the end retired baffled, leaving on the field thrice 10,000 dead.

"The true story of the world's salvation from militarism by that little band of stalwart souls, known as the First Canadian Division, history will tell. The battle of St. Julien was the start of a series of displays of Canadian heroism and efficiency that marked the Flanders and Picardy campaigns of the great war wherever emergency occurred, and which has added to the glory of patriotic achievement the events chronicled by the names of Festubert, Givenchy, Vimy, Cambrai and a score more.

"Untested men from farm and factory, numbering less than 10,000 had been placed between two French armies to block the enemy's determination to achieve the French channel ports. To Von Falkenhayn's command to his German troops to pulp the Canadians and break through, no matter the cost, an answer was given which ranks St. Julien with Thermopylae and The Alamo, with the difference that St. Julien had her messengers of victory, albeit they numbered but 400, all that was left of Canada's vanguard in the fight for civilization.

"Deserted by the Algerian corps on its left; its right bared by the retreat of the extreme eastern French wing, this pigmy army stood. Defying the repeated charges of the magnificent Prussian guard, 10 service battalions of which dissolved themselves against that unbreakable human wall; scorniul alike of gas and bomb these Canadians fought for 72 hours to achieve the result their commander curtly ordered in the words: 'The line across St. Julien wood must be held. The Canadians will hold it.'

"And when, after the three-day agony, the third British army came to the relief and the battered men of the western contingent marched out, no more inspiring sight was ever witnessed than the little army passing through infacing serried ranks of seasoned British warriors, each rigidly standing at 'the present.'

"The salute of St. Julien is Canada's forever!"

EDITORIAL NOTES AND COMMENT.

Clean-Up Week.

Make it a reality as well as a slogan.

The Legislature, like a famous product now officially banned in Ontario, is still going strong.

The session is now in its eleventh week, and the end is not in sight. The Genoa Conference, with all its big problems, is not likely to last as long.

The Hamilton strike is averted, thanks to the good sense of the majority of the workers. The present is no time for a strike.

EDITORIAL NOTES AND COMMENT

THE OLD SONGS.

Oh, sing me the songs I used to hear
In the days of long ago.
And do not smile if they cause a tear—
I have always loved them so.

"Do They Miss Me at Home?" "In the Hazel Dells,"
And the old "Sword of Bunker Hill."
With "Kathleen Mauvourneen" and "Sweet Kitty Wells,"
And "Effie, the Maid of the Mill."

They seem like the friends of other days
Returning to greet me again,
And the thrilling strains of these old-time lays
Give a pleasure that's almost pain.

"The Prairie Flower," "Fair Bell," "Annie of the Vale,"
"Annie Laurie" and "Beautiful Star,"
"My Old Kentucky Home" and "Sweet Lilly Dale,"
And "Beautiful Gates Ajar."

How sacredly sweet are the dear old songs
Engraven on memory's wall;
They have passed along with the moving throng,
Yet are not beyond recall.

"The Last Rose of Summer" and dear "Nellie Gray,"
With 'Mary, I'll Meet at the Stile."
While "Dreaming of Home," and "Old Dog Tray,"
"Joniata" and "Sweet Annie Lisle."

CASH GRAIN.

MONTREAL, April 25.— (Canadian Press.) —The tone of the spot market for oats was steady with prices unchanged yesterday. There was no improvement in the flour demand. A fair business is passing in mill feed and trade in rolled oats was quiet. There is a fair demand for baled hay and an active trade prevails for eggs. The potato market was quiet. A stronger feeling developed for butter with prices fractionally up. There was nothing new in the cheese market.

WINNIPEG CATTLE.

WINNIPEG, April 25.— (Canadian Press.)—Receipts yesterday totalled 616 cattle and calves, 315 hogs.

Trading on the cattle market this morning was generally active and brisk with a firm undertone.

A few good heavy steers made $8.00; best handyweight killing steers 7.75 to 8.00; butcher cows $4.00 to $5.00; a few good heifers sold up to 7.00. Choice veal calves weighed up from 10.00 to 11.00; stockers and feeders, choice, made 5.25 to 5.75.

Packers were bidding 12.00 for select hogs. No receipts or trading on sheep and lambs market.

CHICAGO CATTLE.

CHICAGO, April 25.—(Canadian Press.)—Cattle receipts 24,000; beef steers, 15 to 25c. lower; better grades off most: top yearlings 9.10; many unsold late; bulk of day's trading 7.35 and 8.35; she stock and bulls steady to weak; closed steady; calves and stockers fully steady; feeders weak; bulk beef cows and heifers 5.35 and 7.00; canners and cutters mostly 3.50 and 4.25; bulk bologna bulls 4.25 and 4.40; veal calves mostly around 7.00.

Hogs receipts 45,000; mostly 10 to 20c. lower than Saturday's average; in-between butchers off most; closing fairly active: shippers bought about 7,500; hold-over fairly liberal; top 10.65; bulk 9.00 and 10.60; pigs steady; mostly 9.25 and 10.00.

CHICAGO WHEAT.

CHICAGO, April 25.—(Canadian Press.)— Wheat underwent an all around setback in price yesterday owing largely to evidence that wheat imports from Canada, duty paid, had begun. The market here closed unsettled at 3-4 to 2c. net lower, with May $1.45 to $1.45 7-8, and July $1.28 3-8 to $1.28 1-2; corn finished a 1-4c. to 1-2 and 5-8c. down; oats off 1-4 and 3-8 to 1-2c., and provisions varying from 10c. decline to 7c. advance.

With arrivals of Canadian prices there which showed a profit, wheat traders here became somewhat skeptical about continued lack of supplies in Chicago to fill May contracts. This was especially the case inasmuch as liberal further shipments from Canada was predicted if high prices on this side of the border should warrant. Besides receipts in Chicago today totalled 200 carlaods, an amount far in excess of what has been the rule here of late. Under such circumstances an early advance in the price of May delivery here failed to last, and the market soon turned weak for that month as well as for July and September.

EGG MARKETS.

OTTAWA, April 25.— (Canadian Press.)—Receipts at consuming centres show considerable increase and while no marked decline in price has taken place during the last few days there has been a slight weakening in some of the prairie points. Ontario country shippers report paying 25 1-2 to 26 1-2 and making sales at 27 1-2 to 28 f.o.b. for current receipts cases returned and 32c. f.o.b. in car lots graded firsts, cases free.

Toronto local market firm with practically no change in price. Specials jobbing 35, extras 34, firsts 30 to 31.

Montreal receipts liberal, demand active, straight gathered jobbing 31, specials 34.

Winnipeg market firm, receipts increasing, dealers quoting country shippers 27c. f.o.b. for straight receipts, jobbing extras 35 to 36, firsts 33, seconds 27. 440 cases of U. S. eggs received during the past week.

A Danger Warning
—Bleeding Gums

Are your gums tender? Do they bleed when brushed? If so—watch out for Pyorrhea.

This disease of the gums, which afflicts four out of five people over forty, not only destroys the teeth, but often wrecks the health.

In Pyorrhea, the gums become spongy, then recede; the teeth decay, loosen and fall out—or must be extracted to rid the system of the infecting Pyorrhea germs which breed in pockets about them. These germs lower the body's vitality and cause many diseases.

You can keep Pyorrhea away. Visit your dentist often for tooth and gum inspection, and use Forhan's For the Gums.

Forhan's For the Gums prevents Pyorrhea—or checks its progress, if used in time and used consistently. Ordinary dentifrices cannot do this. Forhan's keeps the gums firm and healthy—the teeth white and clean.

Start using it today. If your gums have receded, use Forhan's according to directions, and consult a dentist immediately for special treatment.

A striking example—yet by no means an exceptional one. For it is not at all unusual for thin, nervous, overworked or run-down folks to gain five pounds and more on the *very first package of Ironized Yeast!*

Results in Half the Usual Time!

The reason Ironized Yeast brings such amazing results is because it not only contains just the right amount of all three essential vitamines, but in addition contains a type of yeast which has positively no equal as a reconstructive agent—a yeast which is cultured expressly for medicinal purposes, and which is entirely different from the yeast found in ordinary "yeast tablets."

But even more important than this is the fact that this yeast has been *ironized*—or treated through a scientific process with a special form of easily assimilated organic iron, similar to the iron found in spinach. When yeast is ironized in this manner it is found that results are not only more permanent, but are secured just twice as quickly!

"Our First Year"

(By a Bride.)

(Continued from yesterday).

YOU MAY BEGIN HERE.

Despite herself, and a pact with her husband, Peggy finds it hard to maintain complete independence of action after marriage. First her extravagances caused her husband to put her on a budget. Now she encounters difficulties in her contacts with Bart Elliot, her platonic friend, with whom she is cast in amateur theatricals.

* * *

CHAPTER XX.

Robbed of An Old Right.

Budget planning had fussed me more than I liked to admit.

Like all brides, I was determined to please my husband. I wanted him to think me capable. I knew very well that when a girl marries, she ought to be competent to carry out her part of the contract. And I was discovering daily that I was not equal to my job!

After Jack had gone to work, I sat down to figure out how much I could spend for meat for dinner. When you've set aside a certain sum for food, you've only begun with your budget. You've got to determine by calculation and experiment how much to pay for various articles of diet. And so I neglected my morning routine and sat me down to the arithmetic of home-making.

My problem was interrupted by a call to rehearse "Skoal." I had not set my house in order when the summons came. I left things as they were and hurried over to the Little Playhouse.

It was an irritating morning. The actors did not know their lines. I didn't know mine. Bart had committed only the sentimental stuff.

Bart Elliot was awfully glad to see me, but he never mentioned our late disagreeable half hour in my kitchen. Once he would have argued the matter all over with me. And I found myself regretting a chance to quarrel with him smartly—about nothing at all—as we had done all our lives.

Because I was now a married woman—one more harmless and pleasant familiarity was denied me.

Probably a viking was by nature a fierce and tempestuous lover. Bart certainly did that part of his rehearsal extremely well. Doubtless he had to be rude and compelling, so I didn't scold him for overacting. To remonstrate would have been to assume too much, as if I were taking personally what Bart intended for art.

After our rehearsal, I wished it were not too late for me to refuse to take the part of the viking's bride. I had always loved my work at the Little Playhouse.

I never had imagined that the time would come when I would not care to act. But suddenly I found myself woefully distressed by the business of my part, and positively annoyed because Bart was making love to me hotly, madly like a Norseman of the tenth century.

Marriage had made me self-conscious. What Jack would say when he saw the stage business in "Skoal" worried me. I couldn't get rid of my part for the simple reason that there was no other girl in the company who could take it.

After the rehearsal, came an afternoon of sewing on the costumes. I was tired enough when the work was done, so weary that I hoped Bart would take me home in his car, as he always had done—before I was married.

But he did not. And his neglect of an old custom astonished me. He drove off with his "queen mother." And I felt more than annoyed. Never had Bart put another girl's comfort before mine! Another of my girlhood privileges had been stripped from me by marriage.

Tears came to my eyes as I left the Playhouse and walked home alone.

This Is Better Than Laxatives

One NR Tablet Each Night For A Week Will Correct Your Constipation and Make Constant Dosing Unnecessary. Try It.

Poor digestion and assimilation mean a poorly nourished body and low vitality. Poor elimination means clogged bowels, fermentation, putrifaction and the formation of poisonous gases which are absorbed by the blood and carried through the body.

The result is weakness, headaches, dizziness, coated tongue, inactive liver, bilious attacks, loss of energy, nervousness, poor appetite, impoverished blood, sallow complexion, pimples, skin disease, and often times serious illness.

Ordinary laxatives, purges and cathartics—salts, oils, calomel and the like—may relieve for a few hours, but real, lasting benefit can only come through use of medicine that tones up and strengthens the digestive as well as the eliminative organs.

Get a 25c box of Nature's Remedy (NR Tablets) and take one tablet each night for a week. Relief will follow the very first dose, but a few days will elapse before you feel and realize the fullest benefit. When you get straightened out and feel just right again you need not take medicine every day—an occasional NR Tablet will then keep your system in good condition and you will always feel your best. Remember, keeping well is easier and cheaper than getting well.

Nature's Remedy (NR Tablets) are sold, guaranteed and recommended by your druggist.

Relief awaits you. St. Jacobs Oil is just as good for sciatica, neuralgia, lumbago, backache, sprains.

KING'S WHARF AND DISTRICT

The Prospects For a Good Harvest This Year Seem Bright, But Farm Help Scarce — Damage By Floods.

NEWS IN BRIEF.

KING'S WHARF, April 25.—Trappers are very busy around here now, and although the season will be short it promises to be a very good one.

Mr. Henry Sherman of the Scotch Line, is busy sawing for the people in this vicinity.

Syrup Season. 6

The maple syrup season is over and it proved very profitable for the residents here. Quite a number took advantage of the generous flow of sap.

Community Sympathy.

This community extend .o Mrs. Joseph Guiry their deepest sympathy in the loss of her mother, Mrs. Peter Flood, who died very suddenly last Sunday in Toronto, and who was buried in Ennismore during the past week.

Culverts Washed Away.

The roads have been very bad through here and have been impassable for the last week. Parts of the highways and all the culverts have been washed away during the heavy rains that fell 'ately.

Crop Outlook Bright.

The fall wheat and clover have came through the winter in very fine shape, and if the weather remains favorable the prospects look bright. There are several fields of alsike through here which never showed up better.

The outlook for farm help seems poor in this district, as no laborers are available. Farmers will have to try and do what they can lone-handed. Could help be obtained it promises to be a good year, as the ground never was in such good shape for working. They will be able to start farm work this week.

In the neighborng towns and cities the cry is "no work," and "hard times," but when the farmer wants help he is unable to get any from either town or city.

Social News.

Mrs. Richard Murtha has returned home from Lindsay after sperding a few days there owing to the death of her sister, the late Agnes O'Donnell.

Dr. Blanchard, of Lindsay, made a professional visit through here last week.

Miss Ella Foley spent the week end the guest of Miss Lillian Herlihey.

Mr. T. J. Perdue of Detroit, Mich., was the guest of friends here for a few days last week.

Miss Pearl Herlihey has returned home after spending last week, the guest of her sister, Mrs. Patrick Perdue.

Miss Ruby Perdue, a teacher in Douro, spent the Easter holidays with friends here.

Miss- Mary Twomey of Warkworth, spent the holidays with Mr. and Mrs. Thos. Twomey.

Laid at Rest.

The funeral of Mary Agnes O'Donnell took place from her late residence, 70 St. Paul street, Lindsay, on Sunday morning to St. Martin's church, Ennismore, thence to the parish cemetery.

The pallbearers were John Scollard, P. J. Scollard, Elmer Hickey, Leo Doran, Mack McAuliffe and Leonard McAuliffe, all of Ennismore.

Deceased has left to mourn her loss a sorrowing mother, four sisters and four brothers: Edward of Lindsay, John and Herbert of Winnipeg and William of Regina; Mrs. Dan Remond, Winnipeg, Mrs. Richard Murtha, Emily, Mrs. John Collin, Ops, and Mrs. Geo. Wilson at home.

Among those who attended from a distance were Messrs. James, Joseph and William O'Donnell and Edward and Patrick Phalen, all of Peterborough.

KINGSTON HONORS THOSE WHO DIED.

KINGSTON, April 25. Canadian Press. — The garrison parade in connection with the celebration by the army and navy veterans of Kingston, of Langemarck, was held yesterday at noon from the artillery park square, headed by the gentlemen cadets of the Royal Military College. The parade proceeded to the city park where it was drawn up in the form of a square surrounding the tree which was planted some time ago in memory of the late Lieut. Calvin Day of this city, and of those who died in the battle of Langemarck.

A beautiful wreath was placed on the tree by major general Sir A. C. MacDonnell, in memory of those who fell at Langemarck.

Following the placing of the wreath on the tree Rev. Major Kidd read the lesson and Captain Father Nicholson, M.C., and General King, delivered the addresses.

The last post was sounded by three trumpeters from the R.C.H.A. after which the playing of God Save the King by the R.C.H.A. band closed the service.

DYE FADED WRAP SKIRT, DRESS IN DIAMOND DYES

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old worn, faded things new. Even if she has never dyed before, she can put a rich, fadeless color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. But Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wood or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

SPRING FLOODS THREATEN MILL RACE LAKEFIELD

Otonabee River Invades Road and Lower Steps of Dock Are Below Water.

NEWS IN BRIEF.

LAKEFIELD, April 25. — The water in the river is unusually high this spring, and the mill race just below the bridge is in a rather precarious condition, and will probably be carried away. This race formerly belonged to the Dickson Company, of Peterborough.

Water Street, just behind Brown's boat house, is flooded, the road has entirely disappeared, and the lower steps of the dock are also under water.

The Government steamer Bessie Butler has been put in splendid shape for the season, having been thoroughly overhauled and repainted. She is moored at the entrance to the Canal, near Westore.

RICHARD HALL & SON LIMITED

CAMPBELLFORD AND DISTRICT

Presentation of "Why Smith Left Home" Reflects Credit on Local Comedy Talent. Return Engagement of "Oak Farm."

SOCIAL NEWS.

CAMPBELLFORD, April 25.—The play, "Why Smith Left Home" under the auspices of the Bowling Club, for two nights on April 20th and 21st drew crowded houses on both occasions, many being turned away. The entertainment was a sure cure for the blues, being brim full of humour from start to finish. Each participant took his or her part with such great credit that one could not particularize for each performer seemed especially adapted for the part taken. Between the acts charming music was dispensed by a seven piec orchestra.

The cast was as follows: (

John Smith (who loves his wife and lives in New York) Mr. I. A. Humphries; Gen. Belledoux (his wife's second husband) Mr. Elie Brunelle; Count Vonguggenheim (who made them twisted) Dr. O. C. Watson; Major Duncombe (with memories of last night) Mr. A. J. Jenkins; Robert Walton (Mrs. Smith's brother) Mr. J. M. Ferris; Mrs. John Smith (who loves her husband no matter where he lives) Miss G. Maynard; Mis Smith (Mr. Smiths sister, a lady in waiting) Miss L. Smith; Mrs. Billedoux (Mrs. Smiths aunt) Mrs. D. W .Douglas; Rose Walton (Robert's bride of a day) Miss M. Murray; Julia (touchingly clever) Mrs. I. A. Humphries; Elsie (a maid) Miss J. Graham; Lavina Daly (who is a lady and knows it) Miss D. Colville.

The comedy plot revealed that Mr. and Mrs. Smith, six months married, are visited by the laters' aunt (Mrs. Billedoux) and her husband whom she tries to tie to her apron strings, but who is a guile deceiver. Brother Robert and his bride of a day arrive, but are introduced by Mrs. Smith as her Italian music teacher and his wife. Their arrival is with difficulty concealed from the aunt, Lavina Daly, cook and a member of the lady cooks' union, and who is bribed by Mr. Smith to hasten the aunt's departure by her bad cooking. She is a lady who knows it all and threatens to strike involving much confusion in the household.

Mr. Smith (by mistake) embraces one of the servants and this of necessity demands much explanation. Major Duncombe, a suitor for 20 years for the hand of Miss Smith, is rejected when she is informed by her brother that Count Vonguggenheim attracted by her beauty is about to ask for her hand, which turns out to be a case of mistaken indentity on his part.

After the conclusion of the play on Firday evening, Mayor Meyers on behalf of the Bowling Club in a brief speech, congragulated those taking part in the play for the most excellent maner on which all had taken their parts, and for the excellent response the citizens had made in assisting the club by their attendance. The floors was then cleared for dancing, and many remained to enjoy the light fantastic.

The delightful little comedy 'Oak Farm" given here a few weeks ago and which was so largely attended and was an unqualified success, will be repeated on Thursday night, April 27th, under the auspices of the Lacrosse Club. On Friday night April 28th the Lacrosse Club will hive a dance in the Opera House. Excelent music will be provided and, a large crowd is anticipated on both evenings.

Three Lacrosse Teams.

Campbellford will have three Lacrosse teams this year: Juvenile, Junior and Intermediate. The local team won for themselves distinction last yar, and this season they are for the championship, which prize they should without doubt attain, with strong teams and a live executive.

Laid at Rest

There passed away on Tuseday, April 18th at his home, Centre Stree, Mr. Nathan Grills who has been ill for some months was one of the twon's best known and popular citizens and was known for his sterling integrity and honor. The dedeased who was a loving husband and father was born in Seymour East, son of the late Nathan Grills but for the past twenty years had resided in town. Surviving are his wife, formerly Miss Emma Hooper, and three sons, Howard of Peterboro Ian of Toronto, and Manley at home. Also thre brothers John of town, William S. of English Line, Richard of Morganston, and Mrs. W. Stephen of Seymour. The funeral was held on Thursday afternoon was largely attended and conducted by Rev. C. F. McIntosh pastor of St. Andrew's Church, of which the late Mr. Grills was a faithful member. The body was laid to rest in English Line Cemetery.

Personal Mention

MANITOBA GRITS WILL CONVENE IN WINNIPEG TODAY

Premier Norris Expected to Again Head the Party. No Other Aspirants.

AS LIBERALS.

WINNIPEG, April 25.—(Canadian Press)—Liberals of Manitoba are to meet in Winnipeg today, with delegates expected from every provincial constituency, to discuss the political situation in view of the election which is to be held this summer. Premier T C Norris, it is stated by a local paper, "will be in the running for continuance of his leadership of the Manitoba Liberals, and no other name for the leadership has been suggested.

'Premier Norris said his party would go to the Country as liberals if they entered the campaign" continues the newspaper story. In 1920 lection Mr. Norris and his followers did not use the word "Liberal" in their announcement.

Liberals and Conservatives in Bradon constituency are said to be considering a joint candidate to oppose A. E. Smith, the present labor member.

CROPS IN ALBERTA HELD UP BY SNOW.

LETHBRIDGE, Alta. April 25.—(Canadian Press)—Rain and snow over the week end is holding up seeding in Southern Alberta once more. The fall has not been heavy, but the top soil is left too wet to work. The rain is clearing off the snow of the recent storms rapidly and a general start on seeding all over the district wil be possible as soon as the present storm clears.

STRIKE AGAINST MILITARISM WAS NOT DISORDERLY

Day Passed Quietly in Ireland. All Transport and Wire Communication at a Standstill.

MASS MEETINGS.

LONDON, April 25.—(Canadian Press.)— It was after ten o'clock last night before messages from Southern Ireland, which had been plunged yesterday into complete silence by a one-day strike of labor in protest against the chaos threatening the country, allayed London's anxiety that the anniversary of the 1916 rising would be marked by extensive disorders.

The strike ended at nine o'clock last evening, the telegraph and telephone wires immediately began bringing in the comforting news from Dublin and Cork that there had been no disorders and nothing more untoward than the posting in Dublin of a bogus proclamation of an Irish workers' republic. From the standpoint of Labor, the strike was entirely successful, as all transport and wire communication ceased throughout the day and business was entirely suspended in Dublin and in Cork.

Mass meetings were held in both these cities to ratify the action of Labor in calling the strike against militarism in Ireland. In Cork a resolution was passed pledging the support of those present at the meeting to an action Labor may find necessary to end militarism. The chairman of the meeting declared the army should be controlled by the people and that armed terrorism should cease.

A late report received from Dublin says a body of armed irregulars took possession of Masonic Hall there at seven o'clock last evening. They brought bedding and food with them possibly indicating a protracted stay. The advices added it was understood the building was taken over on behalf of the Belfast boycott committee.

Eamon De Valera celebrated the anniversary of the Easter rising by addressing a large meeting at Boland Mills, which was his headquarters during the rebellion.

Sir Edmund Walker Tells Of Conditions in Canada

LONDON, April 25.—(Canadian Press.)—Sir Edmund Walker, president of the Canadian Bank of Commerce, addressing the Canadian club in London yesterday said that whether the Dominion of Canada believed in public ownership of railways or not she was forced to try the experiment. The trial would in any event be costly but he was not sure that in the long run the country might not benefit by its past mistakes, large as their scale might seem just now.

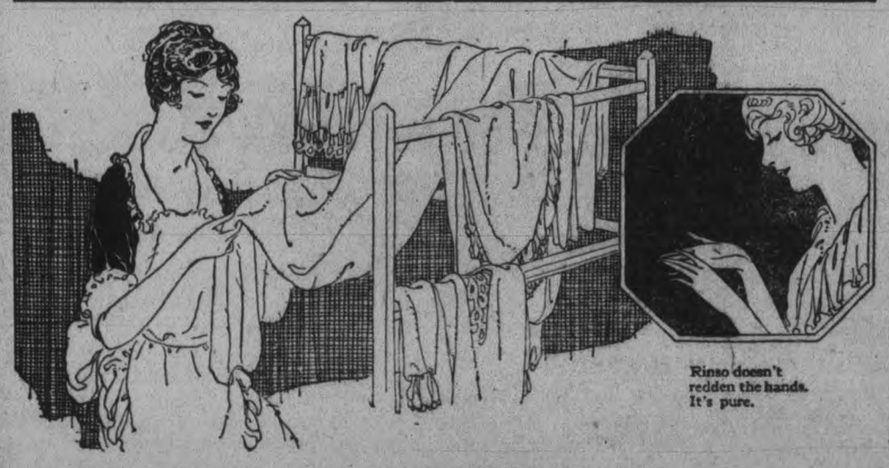
Public ownership, said Sir Edmund was not so much on trial in Canada as democracy. The test would be whether the people and their representatives would allow capable directors to manage the railways like a business enterprise.

Concerning the internal war debt, Sir Edmund declared that the super taxes as now levied in Canada, England and the United States were unfair taxation and were calculated to destroy enterprise. This taxation was a suicidal policy. Canada with sane taxation would be able quite readily to ebar her war burden as far as she owed it to herself. For her smaller portion due to othe countries, provincial and other debts owed abroad and for over-building readily to bear her war burden as far production, immigration and farm settlement.

Sir Edmund Walker paid high tribute to the soldier settlement work which had proved how successful could be even a government commission with devoted public servants.

"I was one of those," the speaker continued, "who, before the war was disturbed about our position in the Empire; not that we needed more autonomy, but that, having so much we should do more in co-operation. The war trouble drew us together and I am sure it would do so again. We are proud that we are Canadians and that we are British, but I wish every Canadian would put the Empire first. Our own future may or may not depend upon the Empire, but world civilization clearly does."

In spite of the increase in motor cars, riding in street cars is much heavier per person than it was five years ago.



Rinso doesn't redden the hands. It's pure.

Don't Rub—Just Soak Your Clothes Clean

RINSO is fine granules of soap essence, scientifically and completely different from ordinary soap, flakes or washing powder. It should be used differently too—for instance, to get the best results, do not pour the Rinso granules into the tub from the package.

Make the wonderful Rinso liquid *first*—take half a package of Rinso for each tub of clothes—stir it into a cream in a little cool water, add two quarts of boiling water, stir vigorously and put into the tub of cool or lukewarm water.

Put your clothes to soak for one hour, two hours, overnight, or as long as convenient in this rich Rinso suds, then just rinse thoroughly and the dirt runs away. Your clothes are ready for the line—snowy-white, clean and fresh.

If You Use a Washing Machine—follow the regular directions on the Rinso package and soak the clothes. Then before operating the machine, add fresh Rinso solution and proceed. No other preparation is needed when Rinso is used.

ADDRESS AT THE KIWANIS CLUB TODAY

Interesting Sidelights on the Extradition Law by Magistrate O.A. Langley

Some interesting sidelights on the extradition law of Canada were given to the Kiwanis Club by Magistrate O. A. Langley at noon to-day, and the 61-year-old case of John Anderson, an escaped slave, wanted for murder in the States, and paralleling the Matthew Bullock case of recent interest, was explained by the Magistrate to show the fundamentals of justice and equity that are the basis of Canadian law. Following a discussion of the Extradition Act and Fugitive Offenders' Act, past and present, His Worship told the story of John Anderson and the trial that attracted interest on both continents, stirred up feeling on both sides of the international boundary, and even drew notes from the Prime Minister of England to Canadian Courts.

Though Mr. Justice McLean dissenting in the judgment on the extradition proceedings in Osgoode Hall a writ of habeas corpus that eventually led to the negro being discharged on some flaw in the original warrant came about, and the John Anderson case has come down in history as one of the most interesting cases of the nineteenth century, Magistrate Langley said.

The case aroused a flame of feeling, as the Matthew Bullock case did recently in Canada and the United States, and the details that indicate the pitch of feeling over the case as supplied by Magistrate Langley were of great interest, in view of the sensational Bullock case, in which Judge Snider recently refused extradition.

W. E. Turley Spoke.

W. E. Turley, secretary-treasurer of the Provincial Command G. W. V. A., spoke briefly to the club, and in his remarks declared the ex-service men of Canada were to all intents and purposes unified. As in all other causes there were divisions, but they were all striving for the same cause. He said they recognised Kiwanis, Rotary, and kindred organisations as their best friends.

Dr. Edward Wod commended to the members the P.A.A.A. championship bouts again on this evening — which are being refereed by Mr. Turley.

The matter of representation at the International Convention was referred to the general meeting to be held on Friday night after some discussion.

Past President Fred Higgins, of Toronto, who was present, urged as many as possible to attend every day of the convention, and favoured Wednesday as the best day for the club to attend in a group. As they had previously figured on going on Thursday, the matter was left over till the general meeting.

The attendance to-day was above par, and the programme snappy.

Joe Worth presided. The booster was Ev. Taylor, and although there were many applications for prizes, Alec Dick proved his claim to a hammer and nails to be used in the construction of the dining-hall for the proteges of the Health Association in Jackson Park.

The following were guests at the luncheon: Walter Kidd, W. E. Turley, Toronto, Magistrate O. A. Langley, Walter Worth, and Past President Fred Higgins, of the Toronto Club.

Hoping to End Miners' Strike

WASHINGTON, April 25.—(Canadian Press).—The Government is working on a plan looking to the ending of the coal strike, which it will submit soon to both operators and union leaders, it was said to-day at the White House.

COULDN'T DO HOUSEWORK HEART WAS SO BAD

Many women get weak and run down and unable to do their after their household duties owing to the heart action becoming impaired or the nervous system unstrung.

Nature intended women to be strong, healthy and happy instead of sick and wretched. But how can a woman be strong and healthy when day in and day out she has to go through the same routine of work sweeping, dusting, cooking, washing, etc. Is it any wonder that the heart becomes effected and nervous, has hot flushes, faint and dizzy spells, smothering and sinking spells and can't sleep at night

MILBURN'S HEART AND NERVE PILLS

are the best remedy to tone up the system and strength the weakened organs.

Mrs. Daniel Bezanson, Loganville, N.S., writes:—"As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me.

"My heart was so bad at night I could not sleep, I would take smothering spells, and was so weak I could not do my housework. I tried two doctors, but no results. A friend advised me to try your pills. I used six boxes and am completely relieved. I think they are the best remedy for heart trouble there is."

Be Sure About Your Battery

No matter what kind of a car you drive or what kind of a battery there is on it you should keep informed about certain battery facts.

You should know whether your battery is charged to the proper point—whether it has enough water in it—whether each of the cells works properly.

Our most important duty as a Battery Station is to tell you these things. It doesn't make a bit of difference what make your battery is. Here at Battery Headquarters we give every make exactly the same attention.

onded by Ald. Stocker, and supported by Aldermen Gainey, Crowe and Hamilton, and the proposers. Those opposed were Aldermen Turner, Jones, Morrison, McIntyre and Phelan. This left the casting vote to Mayor Taylor, and as three or four amendments had failed, he turned the balance for the motion.

Local Men Eliminated.

In the preliminary survey of the list of applications the committee struck out the names of the local aspirants for the position, Bruce Menzies, Andrew Forrest and George Jamieson, and also John R. Dundas, now of Hamilton, all of whom had seen service on the Peterborough brigade. They next eliminated from their deliberations the applicants from small towns, and also those who stipulated salaries in excess of $2,000. By this process of attrition the list was quickly reduced to eleven and three other names were discarded in a final sifting of the possible candidates.

The favored eight were: Watson Davies, Edward McDaniel and John M. Gibson, of Toronto; W. A. Gilbert, of Hamilton; J. R. Coulbeck, of Brantford; Robt. A. Knighton, of Guelph, and P. Diamond and J. Hervey, of Montreal.

The Complete List.

The thirty-five applicants were as follows:

Mackenzie, R. P., Sault St. Marie, Assistant Chief since July, 1912; 14 months in Calgary Department; overseas; 32 years; $2,000.00. References — Chief Phillips, the Mayor, and General Insurance Agencies.

Cottenden, F. W., Sault St. Marie, Captain of station, 33 years; $1,8000.00. Refers to Chief Phillips.

Brady, G. M., North Bay; 26 years' experience; now Chief; 45 years; $2,400.00 and uniforms; would like personal interview.

Ald. Morrison's Query.

"Is any one of these better than the man you've got?" asked Ald. Morrison, after the list was first read. "Does any one know that?"

Several members replied that they had only the information in the applications.

Ald. McIntyre—I think we ought to consider the petition from the firemen in behalf of Chief Grange. I believe we'd have the people behind us.

The committee proceeded to discuss how they could get more definite knowledge of the personality and qualifications of the men they had selected as possibilities, and whether they should be asked to come to Peterborough or should be interviewed in their own departments.

"We don't want eight men coming in here at once," said Ald. Holloway, and Ald. Gainey said that way wouldn't help the Council to arrive at an intelligent conclusion.

Ald. Hamilton suggested that the committee to the Hydro delegation on Thursday might make enquiries from Chief Russell and Fire Marshal Heaton about the Toronto men.

"Chief Russell and Fire Marshal Heaton have both given our own Chief as good a recommendation as they give any of these," said Ald. Morrison.

"The Aldermen are not giving Grange credit for being a fire preventer as well as a fire fighter," said Ald. McIntyre. "Our fire losses have been low, due to preventive methods. I think it is a shame."

Amendment Defeated.

To Ald. Holloway's motion Ald. Phelan offered an amendment, seconded by Ald. Turner, that the Fire, Water and Light Committee, with Ald. Morrison, visit Toronto, Hamilton, Brantford and Guelph and see the men who had applied from those cities.

This amendment was defeated. Ald. McIntyre said he would have no part in it. If any committee was appointed he held that the Mayor and Ald. Crowe, chairman of the Fire Water and Light Committee should designate it.

Ald. Phelan next moved an amendment, seconded by Ald. Stocker, that the eight selected applicants be invited to meet the Council here, paying their own transportation. This also was lost.

After another equally ineffectual amendment, the motion was voted on and adopted by the margin of only the Mayor's decision.

Ald. Phelan then moved, seconded by Ald. Hamilton, that the deputation to Toronto on Thursday be the Fire, Water and Light Committee, with Ald. Morrison added, and again it fell to the lot of Mayor Taylor to cast the deciding vote.

Ald. Morrison's field night included successive brushes with Ald. Holloway, Ald. Stocker and Mayor Taylor, enlivening the debate to such an extent that Ald. Crowe interposed the remark that "whatever we do we should at least try to do it amicably."

THESE BABIES ARE WELL NOW

Remarkable effect of Dr. Caldwell's Laxative Syrup Pepsin on constipated babies.

Daughter of Mrs. E. Smith, Guelph, Ont.

The experienced mother quickly associates the baby's crying with constipation, biliousness, feverishness or sour stomach, and knows that a mild laxative will soon relieve the trouble.

Half a teaspoonful of Dr. Caldwell's Laxative Syrup Pepsin will work wonders with a crying, peevish baby. It is just a vegetable compound of Egyptian Senna and simple laxative herbs with pepsin that all druggists sell under the name of Dr. Caldwell's Laxative Syrup Pepsin. It has the largest sale in the world, and a dose costs less than a cent!

Mrs. E. Smith, 9 Harris St., Guelph, Ont., says Dr. Caldwell's Laxative Syrup Pepsin is just the remedy her little girl needs and she will never be without it. Mrs. A. F. Lithgow, 389 Northcliffe Av., Montreal, and Mrs. E. Whalley, 956 Alexander Av., Winnipeg, both use Syrup Pepsin for their babies and recommend it to all mothers. Mrs. Whalley writes her baby was constipated from birth. You will never again give harsh physics when you see how safe Dr. Caldwell's Laxative Syrup Pepsin is and how gently and mildly it acts. Try it in your family.

HALF-OUNCE BOTTLE FREE

Few escape constipation, so even if you do not need a laxative at this moment let me send you a Half-Ounce Trial Bottle of my Laxative Syrup Pepsin FREE OF CHARGE so that you will have it handy when needed. CALOMEL IS GREATEST MEDICINE IN WORLD FOR PEOPLE WHO ARE NOT WELL

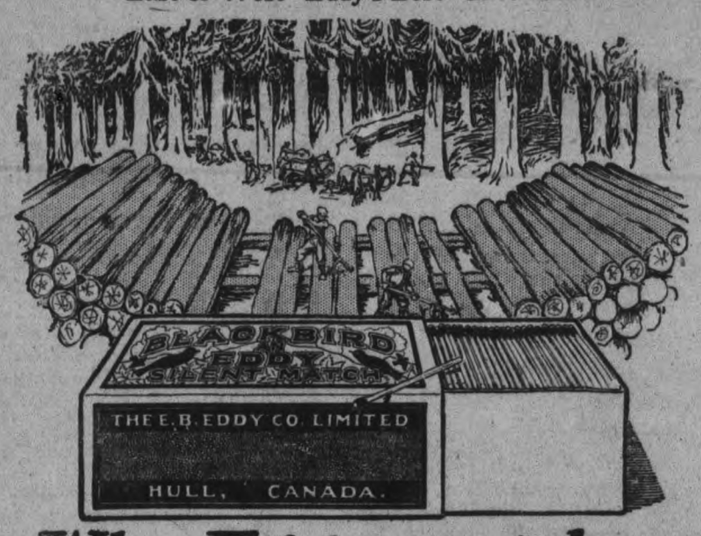
The Only Medicine That Acts Upon the Liver

People who suffer from Indigestion, Rheumatism, Headaches, Biliousness, Constipation and Kidney Pains will find almost instant relief by taking one Tanated Calomel Tablet before meals or two at bedtime. The secret of the success of this medicine is due to the fact that it is the only medicine that acts upon the liver. No salts, seidlitz or castor oil are necessary after taking Tanated Calomel, for it is self-eliminating. When the liver fails to excrete bile into the intestines they become filled with waste and the whole system becomes poisoned, causes all kinds of sickness. If you do not feel well get a small box of Tanated Calomel from the druggist and you will feel fine in a day or so. It is sold by F. C. Webber, Charlotte street.

East or West—Eddy's Best—*since 1851!*



Why Eddy matches are so uniform—

Some matches are different. Eddy's are all the same. Each Eddy is a sure, safe, reliable light.

Eddy matches *have* to be uniform—they can't help themselves. Made from close-grained Canadian white pine, kiln dried and carefully inspected, the powerful machines turn them out more uniform than soldiers on parade.

The water power harnessed at the great Chaudiere Falls which generates the electricity from their own modern Power House also ensures an unvarying uniformity in the running of the complex and highly specialized machinery of the Eddy factory.

Each Eddy match matches its fellow. And each and every day Eddy's great army of 120,000,000 matches advances into the multitudinous duties of another Canadian working day, each performing its functions of thrift, convenience, reliability.

Eddy matches light your way to happiness and comfort. This service Eddy's have been performing for over 70 years — matchlessly. Every Eddy will serve you as faithfully.

EDDY-TORIAL

The great industries and public utilities of to-day are the servants employed by modern society to serve itself.

Eddy's is an all-Canadian institution.

It is owned by Canadians, operated by Canadians, employs only Canadian capital, and its profits are kept in Canada for the development of other Canadian industries.

That it has attained national importance is proof that it has performed a needed service in an acceptable manner.

Always, everywhere in Canada ask for Eddy's Matches.

BASEBALL TRAINER IS JACK OF ALL TRADES

Ball clubs, with millions of dollars invested in the bodies of men, have never taken precaution to protect this investment in human flesh.

Colleges and universities, even high schools, whose athletic performers cost nothing, spend a great deal of money each year, fortunes in fact, protecting them.

Baseball has its trainers, but there is probably not a trainer in the entire game that has even a slight medical education. What trainers in baseball know about the human body is scraps of knowledge picked up here and there, scraps that often prove dangerous.

There is no position in baseball more badly misnamed than the trainers. Here is what the trainer of a major club does;

Checks the trunks, carrying uniforms and also the private wardrobe trunks of the players.

Sees that hand luggage is delivered to the rooms of the players.

Has charge of the bats and balls.

Provides drinking water for the players' bench.

Gathers up shoes, socks, shirts, pants and sweaters in the clubhouse after the players carelessly throw them about when through with the workout, and carefully places them in the lockers of the respective owners.

Provides soap, towels and sees that the showers have plenty of hot water.

Acts as rubber whenever any member of the team shows up with a sore muscle or imagines he has one.

Mends uniforms and sees that spiked shoes are cleaned and oiled after each workout.

Runs errands to shoe repairing shops and tailor shops.

Acts as valet for the players.

Always has a supply of chewing gum and chewing tobacco, cigarettes and cigars, articles demanded by the player during or after a workout, the former during and the latter after.

Does various other little errands such as mailing letters, carrying messages, starting the fire in the clubhouse stove, etc.

When one mentions a trainer in connection with baseball few persons would suspect the man holding the position doing such an amount of work and just that kind of work.

The college trainer is in command of the situation in athletics. He is responsible for the physical welfare of the athletes. He tells them when they shall go to bed and when to arise, what they can and what they cannot eat, when they can play and when they cannot play. His word is law over that of the coach.

But in baseball, with millions depending upon the physical welfare of the men playing the game, the trainer becomes merely a Gunga Din of Baldom.

HARD MILLING FEATURES THE CITY CHAMPIONSHIPS

Two Knockouts on Last Night's Bill — Dugan Wins the 145-Lb. Championship From Anthony —Finals To-Night.

BOXING.

100 pounds — Jordan, P.A.A.A., won from Corkery, P.A.A.A.

108 pounds — Rex, P.A.A.A., won from Lavery, P.A.A.A.

130 pounds — Combe, P.A.A.A., won from McAuliffe, Holy Name Society.

Irish Jordan, Holy Name Society, knocked out Vcenman, P.A.A.A., in the first round.

135 pound class—Legros, Lakeviews, knocked out Houghton, P.A.A.A., in the second round.

145 pound class (Final) — Dugan, P.A.A.A., won from Anthony, of the Lakeviews.

158 pound class (Final) — Simmons, P.A.A.A., won from Griffin, Holy Name Society, on the referee's decision, after an extra round.

WRESTLING.

125 pound class—Hopkins, Y.M.C.A., threw Bates, P.A.A.A.

135 pound class — Stott, Canadian Woollens, threw Simmons, PA.A.A.

Such were the results of the first night's programme at the Grand last night in connection with the city amateur boxing and wrestling championships conducted under the auspices of the P.A.A.A., which attracted a fairly large crowd, and provided an interesting evening's sport.

There was plenty of action, the proceedings including two knockouts and an extra round bout, and although several of the events carded failed to materialise because some of the boys could not make the weight necessary for the class in which they were entered there was a long programme, nevertheless, and the affair was splendidly handled by Referee "Bill" Turley, of Toronto, the well-known Ontario secretary of the G.W.V.A., while the judges, Messrs. Clifton and Rowan, caught the approval of the crowd by their decisions.

In two of the classes, the championships were decided last night—Edwin Dugan winning the 145 pound class from Babe Anthony, of the Lakeviews, while Simmons, of the P.A.A.A., won the decision over Griffin, of the Holy Name Society, in the 158 pound class.

Jordan and Corkery clashed in the 100 pound special, and the former youngster won an easy victory. He is a kid brother of Irish Jordan.

Rex, of the P.A.A.A., outpointed Lavery, of the same club, in the 108 pound class. He had the edge all the way, although both boys tired badly, and the final bell found them with scarcely strength enough left to swing their arms.

There were two bouts in the 130 pound class. In the first Combe, of the P.A.A.A., earned a decision over McAuliffe, of the Holy Name. It was a hard battle. Combe knocked McAuliffe off his feet twice in the first round, but he came back strong in the second, and took the lead on points, only to lose out in the final round when Combe rallied and pouded out a victory. The winner used a right swing to decided advantage, and it won for him.

Irish Jordan made short work of the second bout in this class. The Holy Name boy, with a long list of knockouts overseas to his credit, had far too much experience and punching ability for his opponent, Vcenman, of the P.A.A.A., although the latter had the advantage in weight. Jordan, however, knocked him dizzy right off the reel with a chop on the back of the neck, and followed up with a fusilade of gloves that soon ended in a "K. O." before the first round was finished. The crowd evidently thought the winner should have shown a little more mercy towards his green opponent, and "booed" Jordan as he left the ring.

Another Knockout.

The next bout in the 135 pound class between Legros, of the Lakeviews, and Houghton, of P.A.A.A., also produced knockout, Legros putting over a sleep-producing punch in the second round. The first round was fairly even, Houghton, if anything, having the lead on points, but Legros had exhibited a vicious upper cut that the wise ones predicted would eventually win for him. It did. Early in the second round he dropped Houghton to the floor, and P.A.A.A. man took a five count. The next time, however, Legros met him with a right upper cut that started from his heels. Houghton lost all interest in the proceedings.

The longest bout of the evening was the 158 pound class between Griffin, of the H. N. S., and Simmons, of the P.A.A.A. The former had 10 pounds in weight and several inches in reach on Simmons, but the latter used a left jab to the face with telling effect, scoring a lot of clean points. Griffin rallied several times, and won some of them back, and at the end of the third round the judges disagreed and Referee Turley ordered an extra round of two minutes. Both boys were nearly all in, but Simmons kept up his left jabs to the face, and had the fight well in hand until the last few seconds when he doubled up as a result of a jab in the abdomen during a mix-up. It was unintentional on Griffin's part.

Referee Turley gave Simmons the decision, and he had earned it by his good work with his left.

Dugan's Title.

There were only two entries in the 145 pound class, and Edwin Dugan, of the P.A.A.A., who is improving every time out, won the title by a clean-cut victory over Babe Anthony of the Lakeviews. Dugan is developing greater speed and a clever defence, and he scored enough points in the early part of the bout to put him on easy street. Anthony tried to cut down the lead by taking the aggressive in the last round, but Dugan's clever blocking kept the Lakeview boy from doing any damage, and the winner had a big margin on points when the final bell rang.

There were two wrestling bouts—"Cy" Hopkins, of the Y.M.C.A., throwing Bates, of the P.A.A.A., in the preliminary of the 125 pound class, while Stott, of the Canadian Woollens, took a fall out of Simmons, of the P.A.A.A., in the 135 pound class.

There should be some good milling in the finals to-night at the Grand.

BIG BOUTS FOR W. H. A. C. CARD

Ontario Champion Will Be Featured in the Main Bout.

The William Hamilton Athletic Club's big programme of boxing bouts in the Brock street rink next Monday, are already the talk of the sporting public, since it was announced yesterday that Walter Newton, of St. Helen's Club, Toronto, the 135-pound champion of Ontario, will figure in the main bout. Newton is one of the cleverest amateurs in the game, and the chance to see him in action against an opponent who will make him extend himself, should be enough to draw a record crowd. Either Tommy Coyne or Elderton of the Classic Club, Toronto, will be Newton's opponent here. Coyne and Newton have clashed several times with honors even, and there is great rivalry between the pair. Elderton, who will take on the job if Coyne is unable to come, gave Newton a great battle in the final during the Ontario championship last week, and is anxious for another crack at the champ.

The hard-hitting Irish Jordan of Peterboro, is drawn against Trickey of Toronto, who was just nosed out of the Ontario 125 championship at the Provincial tourney. The Queen City boy lives up to his name. He is fast as a streak of lightning and Jordan is liable to find him as difficut to hit as a shadow. Of course if Irish lands one of those haymakers of his, it is likely to be slow music for Trickey. But those who have seen the Toronto flash in action say Jordan will be lucky to lay a glove on him. Anyway it should be a real bout.

Ted Williams of Peterboro, and Rube Madocks of Toronto, are being matched in the 158 pounds class. Madocks has a great reputation but Williams is a good boy who will make him work all the way.

In addition to these three star bouts there will be five or six bouts between locals mat artists, so that altogether there will be a great night's meeting. Each bout will be fought to a decision.

The William Hamilton Club are putting on their show at popular prices. There are 350 ring seats at 50c and the rest of the house is sealed at two bits.

The Ring

DEMPSEY GAVE DECISION.

PARIS, April 25. — (Canadian Press.)—Billy Palzac last night won the middleweight championship of France on points over Maurice Prunier. The men fought twenty rounds and the decision was rendered by Jack Dempsey, world's champion heavyweight pugilist, who refereed the bout.

Dempsey furnished the only knockout of the evening—this, when he rose from the referee's chair and announced his decision in French.

BANTAMWEIGHT BELT OF ENGLAND CHANGES HANDS

LIVERPOOL, April 25.—(Canadian Press.)—Charley Ledoux, the French bantamweight pugilist, last night won the bantamweight championship of England by defeating Thomas Harrison on points in a 15-round bout. The Englishman was floored twice in both the first and second rounds and also was knocked down several times in later rounds.

WELLS COMES BACK.

LONDON, April 24.—(Canadian Press.)—Bombardier Wells, after an absence of more than 18 months from the ring, last night defeated Alfred Lloyd, an Aurtralian heavyweight pugilist, in the tenth round of a bout that was to have gone twenty rounds. The seconds of the Australian threw a towel into the ring in order to save their man from further puisnhment.

Lloyd took a count of eight in the seventh round and twice was downed for counts of seven and eight in the tenth round. The second time he was floored in this round he was knocked through the ropes.

"What's this 'Triplex' Stuff I Hear So Much About, Ed?"

"THAT'S it, right there on that bicycle.

"It's as simple as A. B. C.

"But it means as much to a bicycle as the whole alphabet does to the English language."

"How's that, Ed?"

"Just this way:—

"The crank hanger is

the power plant of your bicycle.

"If your crank hanger turns just a little stiff or hard, that means more effort for you.

"If the hanger develops those mean 'tight and loose' spots, it means more friction and less power.

"But the 'Triplex' was designed and is built to overcome those faults.

"It is made of such fine steel and to such close limits of accuracy that it always runs smoothly. It makes your bicycle run so easily you'd think you were riding down grade.

"It takes a lot more time and better workmanship to construct such an accurate hanger."

"Well, well! I never thought a crank hanger was so important. I see now that

it is really just as important to have a good crank hanger on a bicycle as a good engine in a car."

"That's right. The 'Triplex' is sure some power plant.

"Were you thinking of buying a new bike, Charlie?"

"Yes, I was thinking something about it, Ed. You know I bought a cheap one against your advice last year and I'm sick of pushing the old cart along. Besides, it's always wanting repairs."

"What you need is one of those new C. C. M. Bicycles. They're built to stay out of the repair shop. I know of many C. C. M.'s that are giving good service after ten to fifteen years riding over all kinds of roads."

MERCANTILE FIVE-PIN LEAGUE

Post Office Took 2 From C.G.E.

Last night, at the Water Street Alleys, the Stampers took a leading part in a most desperate battle, but they had the margin when they defeated the Generating bunch by 2 games out of three. In the first scene the players were a little off color, except Devey, who took the leading part with 218. During the next acts the management had different leaders, so as to keep harmony in both teams. Richardson and Metheral rolled some good scores, both hitting over the 600 mark. Staunton and Rightmeyer were in the 500 class. Though the Post Office took 2 games the C.G.E. boys beat them on the total pinnage. The following are the scores:

	Can.	Gen.	Elec.	
McLeish	81	217	83—	381
Staunton	153	223	155—	531
Rightmeyer	122	166	218—	500

SORES SPREAD ALL OVER FACES AND HANDS

Mrs. Howard Houlette, Waskatenau, Sask., writes:—"I wish to tell you of the benefit we have received by using your valuable medicine Burdock Blood Bitters.

My children started to break out on their faces in small white pimples which kept getting larger each day. Pus would form under the scabs and they would come off, and each time the sores would be larger; some were as large as a twenty-five cent piece and would spread all over their bodies. I was nearly in despair and sent to the village for a bottle of good blood medicine. The druggist sent me a bottle of Burdock Blood Bitters, which I commenced giving them at once.

In about ten days I saw an improvement and they grew steadily better each day, and in one month the sores had all disappeared."

All blood and skin diseases are caused by bad blood, and to get it pure and keep it pure you must remove every trace of the impure and morbid matter from the system by a blood cleansing medicine such as

BURDOCK BLOOD BITTERS

a remedy that has been on the market for the past forty-five years, and one without an equal for all diseases and disorders of the blood.

AT THE THEATRES

GRAND— Wednesday night, the most talked of musical play in the world, "Irene." The original Chicago and New York Company.

CAPITOL—Mark Twain's greatest comedy, "A Connecticut Yankee," the greatest screen production of the year. Also balance of a Capitol first-class programme.

REGENT—Very special, Dorothy Gish in "Flying Pat." Also Mabel Normand in "What Happened to Rose."

ROYAL—An exceptional bill, including "Two Minutes to Go," Vitagraph spectacular feature, "Received Payment," and the funny Toonerville comedy in which "The Skipper Gets a Surprise."

Capitol Entertainment

The Capitol Theatre has a particularly good bill for the beginning of the week. The voice of Cameron Geddes and the whimsical humour of the "Connecticut Yankee" make a combination that is hard to beat. Mr. Geddes has a superb bass voice, deep, rich, resonant, organ-like in quality, with the sweetness that is unusual in a voice of such depth. He was greeted with tumultous encores last night after his rendition of a splendid initial number and "The Bells of St. Mary's."

The feature picture is that "something different" in productions for the silver screen that strikes a note of fantastic humour, in its presentation of a 1922 Yankee, with his slang and his democratic outlook, transported into dream land to the mediaeval court of Tennyson's King Arthur and its Table Round. While not a caricature, it is just the Mark Twain idea of the fallacy of the notion that 'a' thing has only to be good to be old," done in the master humorist's own peculiar fashion.

Martin Cavendish, stunned by a fall on the night before his wedding to his unloved bride, the lady of noble birth and chilly manner, finds himself in the world of Britain, in the year 528, captured by Sir Sagramor, the Valiant Liar, one of the Knights of the legendary Round Tale, and haled before King Arthur. He is about to be burned to death at the stake as a sorcerer, through the jealousy of Merlin, the court magician, when a lucky eclipse of the sun provides him with a getaway, and finally he is knighted by the King, made "Sir Boss," and proceeds to get busy immediately. The introduction of telephones and electricity into factories where long-haired, leather-jerkin'd knaves punch a time clock and "rattle the bones" in spare minutes with true modern vigor are the least of his innovations.

The dining hal lof the King, the knights in full armor, the tapestried hangings of the draughty halls, the serrated battlements, the drawbridges and the moats of ancient days are faithfully reproduced in this picture, with the flippant-tongued hero strolling about in his velvet knee breeches, his rolled stockings, and his silk hat adorned with a tasty ostrich plume.

Sir Boss is sent to rescue Alisande, a fair maiden held by the King's sister, the wicked Queen Morgan le ay, and here are more scenes of splendid palaces and rich trappings. The Queen, who has a private torture chamber with varied modes of making life wretched for its inmates, falls in love with Sir Boss, and pursues him to the palace of the King, where he is engaged in a tournament with a lusty knight in armor. The absurdity of the tilting which takes place between the armoured knight and the modern version of chivalry, who rides a bucking pony, wears a cowboy outfit and lassoes his bewildered antagonist, is heightened by the mystic powers of the sorcerer, Merlin. The hero's automatic proves a better weapon than the magic blade, Excalibur, and his ingenuity proves itself victor in the final travesty, when knights in full armor and riding motor cycles, charge the spear-armed warriors, who flee before their approach. The fantastic dream ends with a dynamited castle, a thwarted Queen, the victor with his "Miss Sandy" looking on in triumph from a modern motor-car, and the waking up finale has a most satisfactory, whimsical ending.

There is a Snub Pollard comedy with this programme, and another installment of the "White Eagle" serial.

AT THE GRAND.

WONDER OF THE AGE

The Vanderbilt Producing Company will present "The World's Sweetheart", "Irene" at the Grand theatre on Wednesday, April 26, for an engagement of one performance only.

The piece proved to be the biggest surprise of the theatrical world when presented at the Vanderbilt theatre in New York over two years ago, and is still the wonder of the age, as far as its earning capacity is concerned.

"Irene" was written by James Montgomery, the lyrics by Joseph McCarthy and the score by Harry Tierney. It was staged by Edward Royce. Twenty big musical numbers punctate the action of the piece, among them being "Alice Blue Gown", "Castle of Dreams", "Hobbies", "The Talk of the Town", "To Be Worthy of You", "Irene", "We're Getting Away With It" "To Love You," "Skyrocket", "Last Part of Every Party", "There's Something in the Air and other gems. The seat sale is no open.

AT THE REGENT.

DOROTHY GISH IS A FLYING BRIDE

Dorothy Gish is a high fleyr in more ways than one in her new Paramount picture, "Flying Pat" at the Regent theatre today and tomorrow. The peppery comedienne has he role of an amaeur aviatrix in a rollicking story of young married life.

Miss Gish is Jane an Nuys, who maried Captain Bob Van Nuys, an aviator overseas. When they return from their honeymoon and Bob is settled down as an airplane manufacturer, he insists that his wife pick a career for herself too. She decides to be a champion lady flyer. Bob is too busy to teach her the game, but a Captain Endicott, his superintendent, is right on the job—several ways. There is an airplane accident that causes domestic crash also, with Jane leaving home in a huff. Then follows some disilusioning adventures out in cold, cold world, while friend husband searches frantically for her. The climax is deciared to be mirthful in the extreme, and, of course, brings about a reconciliation.

James Rennie, Miss Gish's leading man in a previous picture, fills a similar role in "Flying Pat". Kate Bruce and Morigan Wallace are also in the cast. Richard Jones, late of the Mac Skennett staff directed.

AT THE ROYAL.

Corinne Griffith, who appears tonight in the Vitagraph special feature, called "Received Payment," takes a role that brings her close to the hearts of an audience. "Received payment" is a story of universal merit, filed with human interest and strikes an emotional echo from the heart strings of all who see it. The story is that of a rich old man who, when his daughter married the man of her choice, an actor, turned her from his home, and tried to efface her from his memory. He has with his servants, an adopted girl, daughter of an old friend, his servants, and a ghostly crowd of old memories and his craving for his own flesh and blood. His old butler, whose daughter is on the stage, arrives home when her company disbands. The heart broken lonely old man, brooding over the way he treated his daughter, is rapidly breaking up in health and mind. The old butler, to save his master's piece of mind, presents his own daughter, a favorite of the footlights, to the old man as his granddaughter, the child of the girl he drove from home. The girl learned to love the old man but cannot stand the deception she is playing. She decides to go back to the stage so as not to live on the old man's money, but to save his peace of mind, still poses as his grand-daughter. The old man consents to her taking up her former profession again and attends her first appearance as premiere dansense at a roof garden. He is proud of her success, and learns that she is not the child of his own daughter. The story, which is an interwoven plot, when the old man's private secretary forges cheques on him, is an appealing one that terminates happily.

The six reel photo play, a masterpiece of the First National is called "Two Minutes to Go," is as its title suggests, a story of the Gridiron. It is essentially a story of college days, those days when youth and sport, hazing and hilarity seem the greatest thing in life. Charles Ray, who plays the leading role in this story of college football days, was three years full back on his own college days. It is a young man's story and it is a safe bet that the young man's best girl will like this picture. Billy Bevan in "The Patrol Squad," is a crackerjack comedian. In this comedy the parody on a police station third degree would bring laughter to the lips of an Egyptian mummy.

A PERSONAL GUARANTEE

Manager Phillips of the Grand Endorses "Irene" as Hit of Season.

The coming to the Grand tomorrow night of the Chicago production of "Irene" is the red letter musical comedy event of the season and Manager Phillips of the Grand personally guarantees this attraction. Everybody has heard of "Irene" which has established new records in attendance figures. Peterboro is getting tomorrow night the orchestra of 12 pieces which has been playing in the Windy City for fourteen months. Only five Canadian cities get this opportunity as the company is playing only Sarnia, London, Peterboro, Kingston and Ottawa on its way east, jumping from Ottawa to Albany, N.Y.

Social Calendar

Mr. and Mrs. Felix Brownscombe spent the week end at their summer cottage near Burleigh Falls. They report the water in Stoney Lake as being very high, in fact higher than at any time during the past ten years. A large number of wharves and boathouses have been damaged by the high water and shifting ice. Both Stoney and Clear Lakes are now entirely free of ice.

Mrs. Alex. Waddell and Miss Isabel returned home yesterday after spending Easter week with friends in Ottawa.

The Board of Directors of the Y.W.C.A. were "At Home" last evening in the Green Room to the girls who helped in the recent campaign for funds for the public department. There was a good attendance for a very jolly evening of fun and music.

Mrs. T. Cruikshank, president, and Mrs. E. E. Harvey received the guests, Mrs. R. M. Waddell poured coffee at the tea table, charmingly arranged with silver basket of daffodils and pussy willows, yellow tulle, and yellow candles, and Mrs. R. H. Turner, with Miss Florence Cameron, had charge of the refreshments.

A pleasant musical programme was rendered during the evening, with piano numbers by Mrs. S. H. Holden, Miss C. Layton, and Miss Faith Jones and vocal solos by Mrs. W. R. Widdess, Miss Florence Scott, and Miss Edna Borbridge.

REMAINS WERE IDENTIFIED AS THE LANDLORD

Harry Dent is Held on Charge of Brutal Murder in Brantford—Finding of Body.

STORY OF ACCUSED

BRANTFORD, April 26 (Special to The Examiner). — Harry Dent, stoutly protesting his innocence, is held in the police cells here, while this morning a coroner's jury sat to determine the fate of Peter Yeghazarian, his landlord, of 19 Darling Street, whose cut up remains were discovered last night—part in a pail, which Dent is alleged to have thrown into the canal, near Clarence Street crossing of the G. T. R., part in a suitcase which Dent was caught carrying at 11.30 last night, and part, the torso and chest, in the boarding-house which the deceased ran at 148 Darling Street.

The first discovery was made at 9.30, when the pail with the remains was found in the canal.

P. G. Knight, 282 Marlboro Street, a relief man in the employ of the G. T. R., was one of the first to discover that a crime had been committed, together with his brother-in-law, Al Christie, 132 Marlboro Street.

Knight was acting as crossing watchman at the intersection of the G. T. R. tracks and those of the Brantford and Hamilton radial tracks near Greenwich Street, close to the Mickle, Dyment & Sons' lumber yards adjoining the G.T.R. track running toward Tillsonburg.

Hauled the Pail Ashore.

They noticed the figure of a man coming along towards the canal. He was labouring under the weight of a big circular shaped pail or bucket about five times as large as an ordinary pail. The pedestrian walked along the G. T. R. tracks until he was well out in the centre of the bridge, and then Knight saw him throw the bucket over into the canal. It alighted with a splash, but did not sink.

Thus rid of his burden, the man slinked away, and being curious at the rather unusual action, Knight and Christie hauled the floating pail to the shore of the canal, where they were horrified to find, on opening the cover, the face of a dead person.

At first they believed it to be more of an infant or a young child, and later of a coloured man, and one of them immediately telephoned to the Police Station.

This was about 9.30 in the evening. Sergt. Borthwick was on duty, and he immediately left for the scene, accompanied by Sergt. Wallace, Acting Detective Stanley, and P. C. Ward.

The officers reached the spot as soon as the police car could get them there, and subsequently the discovery was made that it was not the remains of a baby or a negro, but of a middle-aged white man of dark complexion. The interior of the bucket revealed a shocking sight. The unfortunate man's head was severed from his body with a clean cut, while running back from the forehead to the back of his head was a deep slash which looked as if it might have been caused with a butcher's cleaver. It was quite deep enough to cause death immediately.

Apparently the fatal blow had been struck from directly in front. Besides the dead, other parts of the hands and arms were found, the whole wrapped up carefully in a back coat. Stove lids to weight this pail down were also found.

There was also another shallower cut alongside the right of the nose.

Located Dent.

Following the discovery the police commenced an immediate investigation. Presently they were supplied with a description of a person resembling the appearance of the man who was seen on the bridge, and acting on this the police went at once to the Dent flat at 148 Darling Street, only to find that the man answering the description furnished them was out of the house.

Later, John O'Connor, the watchman at the G. T. R. Colborne Street crossing, informed them that he had seen a man carrying a heavy suitcase, and that individual was somewhere in the neighbourhood of the lumber yards.

P. C. Brittenden and P. C. Dowling at once took up the search, and they were soon rewarded by the sight of the accused, Harry Dent (or Avedisian as he is also known) walking along Corborne Street, going west. They overtook him, and escorted him to the Police Station, where part of the murdered man's body was discovered in the suitcase as related.

In the meantime the remains of the slaughtered man had been positively identified as being those of

COLLAPSE OF TRADE RINGS

Cost of Building Houses in England Has Taken a Big Drop.

BRIEFS FROM WIRES

LONDON, April 26.—(Canadian Press).—The arrival of building supplies from Canada has helped to produce a palpable fall in the cost of house-building here. Contracts are being made at a reduction by four hundred pounds on houses which used to cost fourteen hundred pounds, and trade rings have also collapsed.

HIGH WATER TIDE HAS TURNED HERE

Has Not Passed 16 ft. 8 in. Level of Last Week

The Otonabee is beginning to recede from its high mark of 16 feet 8 inches below the Peterborough Lock, stop logs are being put in the dams at Fenelon and Bobcaygeon, and the level of water in Stoney Lake shows improvement to-day. All these are signs that the spring flood is subsiding, although there has not yet been any appreciable fall. The Little Lake in Peterborough is still very high, and the Otonabee River below the city is still spread over the street railway loop, but the tide has turned, and may become somewhat accelerated within the next week.

ALBERTA TURNS IN ANOTHER OIL PRODUCING WELL

Thirteen Hundred Feet of Oil Standing in a Seventeen Hundred Foot Well. Make Pump Test.

A GOOD QUALITY.

LETHBRIDGE, Alta., April 26.—(Special)—Last year the eyes of Canada were turned to the Mackenzie River basin where, at Fort Norman, 1,200 miles north of the end of steel at Peace River, the Imperial Oil Company brought in an oil well. Today the eyes of the world are turned to Northern Montana and Southern Alberta as a result of the bringing in near Kevin, Montana, just 18 miles south of the Canadian border, of a well by the Gordon Campbell Syndicate at a depth of 1750 feet. Today there is standing in the well about 1300 feet of oil. It is stated by Mr. Campbell that 1,000 barrels have been bailed out without lowering the standing of the oil. No real pump tests has been made owing to the fact that since the discovery was made, one blizzard has followed another until the roads are nigh impassable, and under the circumstances it has been impracticable to transport sufficient tankage to the spot to make the pump test feasible.

But there is oil in the well in good quanity even though the capping of the oil bearing sands has barely been pierced. Gordon Campbel state in his belief as an old operator in California, Wyoming and Southeastern Montana, the well will pump 50 barrels daily.

A RECITAL

The second annual recital by pupils of William McKee Bingham was given last evening at Mr. Bingham's residence, Burnham street, before an interested audience of parets and friends, with Miss Edwina Palmer, violiniste, and Mr. Tom Smith, violoncellist, assisting.

The artstic and well-balanced musical programme, just long enough to keep the interest sustained from start to finish, was a triumphant exposition of the excellence of Mr. Bingham's method of vocal instruction. The different lovely numbers were sung with a skill and finish remarkable in such youthful performers, with a clear, rounded vocalization, an ease and facility of attack and a tone production that showed no slightest trace of strain in the most difficult passages.

The Programme

The programe opeed with a duet rison; Miss Audrey Huycke sang Trucie Pearson and Florence Harrison; Mis Audrey Huckye sang "Where My Caravan has Rested" with violin obligato, and Miss Helen Wedlock the "Song of Florian". Miss Muriel Bridge had 'cello accompanment for her pretty, well-rendered number, "Siebel's Romance" from "Faust", and Miss Georgie Cuffe sang Meyers-Helmund's "Balgafluster."

Miss Mabel Honey of Millbrook had two selections, which brought out the fine timbre of her deep, rich contralto, in "Sombre Woods" from "Amadis" and Tchaikowsky's "Ah, Sad my Heart". Miss Trucie Pearson's clear soprano was heard to advantage in "Songs my Mother Taught Me", and "Delight", and Miss Florence Harrison's light, sweet voice rendered the "Flower Song" from "Faust", and florid solo with high-pitched intervals, in "My Noble Knight" from "Les Hugenots." Miss Ethel Kennedy had a 'cello obligato for her solo, "Lovely Night" from cycle "Summertime", a number that brought out with precision the pure, clear quality of her voice.

Mrs. Bingham gave two numbers, her warm, rich contralto doing full justice to the lovely Gavotte from "Mignon," and "Dear Love, Thine Aid," from "Samson and Delilah," the latter a most powerful interpretation of dramatic recitative singing, the sweet voice rising and falling in sustained waves of expressive melody.

Assisting Artists.

Miss Edwina Palmer gave a masterly rendition of Weiniawski's "Legende," the difficult fingering, and double-stopping of the interweaving melody repeated in a finale with muted strings and last, faint, harmonic notes, with an ease that held the rapt attention of her audience.

Mr. Tom Smith played the 'cello arrangement of Elgar's "Salut d Amour," with technical proficiency and restrained sweet tone. Miss Muriel Bridge played accompaniments for all numbers with her usual skill and sympathetic phrasing.

At the conclusion of the programe, Judge E. C. S. Huycke expressed his appreciation of the exhibition given of the "splendid training of that great teacher, Mr. Bingham, to whom the thanks of the citizens of Peterboro are due for his splendid work among us."

Dance Followed.

A dance in the large double drawing rooms followed the recital. Among those present were: Judge and Mrs. E. C. S. Huycke, Dr. and Mrs. R. C. Blagrave, Mr. and Mrs. F. D. Kerr, Mr. and Mrs. W. H. Dunsford, Dr. and Mrs. T. N. Greer, Mr. and Mrs. H. O. Fisk, Mr. and Mrs. W. H. Pretty, Mesdames A. Palmer, Cameron, S. Bridge, A. C. Gray, J. Harrison, the Misses Celia Dunsford, Rosamond and Audrey Huycke, Helen McGarry, of Niagara Falls, Helen Morrison, Kathleen Cuffe, Grace Primeau, Muriel Smith of Millbrook, Mamie Drope, Miss Gollop and Miss Garcon; and Messrs Dunsford, Huycke, Templett, Stewart, Poole, Pelton, Barraclough, Seager Burgess, Harrison and Turnbull.

POLICE ARE NOW ENFORCING TEAMSTERS' LICENSE BYLAW

Rounding Up a Number Who Have Not Yet Paid Their Registration Fee of $7 — City Men Idle, Out-of-Town Men Get Jobs.

The enforcement of regulations requiring the licensing of all teamsters is now engaging the attention of the police, much to the discomfiture of said teamsters and to the dissatisfaction of the contractors. "The contractors complain of a delay when the officers are checking the teams up. I can easily understand such a delay, but it is the contractors' own fault," said Chief Newhall. "They certainly make sure to ask if they are union or non-union. Why couldn't they ask at the same time if they are licensed? It would make them all get licenses. As it is, there are men coming in here from outside the town getting work while our own men are idle."

No matter what a teamster is hauling he is required by local by-law to have a license, and registration costs $7. "It isn't high," said the Chief. "In many places it is $10. It is a nominal fee." There are a number who are not licensed at present, and the police are taking steps to round them up. Chief Newhall has assigned several men to keeping tab on the licenses, and these men are inspecting teamster's outfits on different jobs to see if they have the numbered brass tag with each license. Last week Magistrate Langley reminded two offenders that the license is necessary by imposing a fine of $20 each, and unless others fall in line further summons will be issued. Taxi drivers are also reminded by the police that the time for renewal of licenses is at hand and they are liable to receive similar treatment to the teamsters.

EARLY BREAKDOWN GENOA CONFERENCE

This is More Than Hinted At in London Press—Meeting Already Declared a Failure by the Northcliffe Papers.

STYLES POINCARE'S SPEECH A "TONIC"

LONDON, April 26.—(Canadian Press).—A probable early breakdown of the Genoa Conference is more than hinted at in some of the newspapers today. Northcliffe papers, which have always opposed the conference, declare the meeting a failure.

The Times says it is daily becoming clearer that those splendid visions which the world was asked to expect as a result of the conference are falling away, and it is childish of the Premier to try to cover his mistakes and hide his disappointment by casting blame for his failures upon the press, whose only fault is that it has been too clear-sighted.

No Tears Needed.

The Daily Mail says the policy of "shaking hands with murder" has broken down, and no tears need be shed, while both newspapers declare Poincare's speech was a tonic for "overstrained nerves."

The Westminster Gazette regards the French attitude the result of honest conviction.

Endorses Premier.

The Daily Express, Lord Beaverbrook's paper, which admits that it has not always seen eye-to-eye with Premier Lloyd George, gives full support to the Premier's complaints of misrepresentation by some of the English newspapers or his actions at Genoa. His policy, The Express says, has been perfectly honorable and straightforward, and has been approved of by the vast majority of the British people.

Ultimatum Now.

LONDON, April 26.—(Canadian Press).—The Allied note to be presented to the Russian delegation tomorrow will be practically an ultimatum demanding unequivocal replies on the payment or war and pre-war debts, with a probable reduction and moratorium, indemnity for damages to foreigners and restitution of confiscated property.

IT IS DANGEROUS.

Why go on straining the eyes when the effect causes so much discomfort, and every day increases the danger of serious trouble. But glasses will make you see with the ease and clearness of youth. Consult W. H. Lacey, Optometist, 410 George Street.

Twenty Lose Lives In Disastrous Fire

MALAGA, Spain, April 26.—(Canadian Press).—Twenty persons are known to have lost their lives and thirty were injured in a fire which swept the Government Buildings last night, and was still burning at four o'clock this morning. It is believed that more bodies will be recovered when the ruins can be searched.

Property loss is also very large.

Art Johnston Receives An Account From a Flour and Feed Merchant of Oakville — A New Diet For Smoke.

HEARD OF BEFORE.

Art Johnston, proprietor of the Windsor Hotel, who has been managing Albert Smoke, the Chemong Indian runner who is now signed up with the Gladstone A.R.A. of Toronto believes he has again encountered some of the work of a Brantford Indian named Douglas. So it is alleged has posed as Smoke on more than one occasion. Yesterday he received an account from W. R. Wales, flour and feed merchant of Oakville, for goods secured on April 20 the day Smoke was somewhere between Boston and Peterboro on the way home from the Marathon. Mr. Johnston is sure Douglas has posed as Smoke and run an account in the flour and feed store. He has written the merchant to say that the real Smoke was never near Oakville on that date and he has been imposed upon by someone masquerading as Smoke.

The last time Smoke's manager ran into Douglas was in Toronto on New Year's Day. The Brantford Indian it is alleged asked fo funds from some of Johnstons own party in the Union station, and he told them when they asked who he was, said that he was Smoke. Art Johnston appeared on the scene with the real Smoke, Douglas it is said begged him not to call the police "which I had a mind to" says the Windsor Hotel proprietor Not only did Douglas masquerade in Toronto as Smoke but in Gooderich, Hamilton and other places, and he colecter considerable sums of money by misrepresentations it is alleged.

Albert Smoke in view of misunderstanding that might arise wishes it understood that he appreciates what the citizens of Peterboro have done for him, and hi affiliation with the Toronto club does not mean disloyalty to the city which started him in the running game.

A STIR IN MILLINERY!

Amazing Values at P. Black's—A Lucky Buy For the Ladies.

A millinery transaction occurred this week which should enable every woman who has not yet bought her spring hat, to procure one at less than wholesale cost. Mrs. Black, while in Toronto on Monday, cleared out a manufacturer's over-stock of millinery at a very small price, so small that will allow two hats to be sold for the original price of one. New Spring Sailor Hats, worth $5, are actually offered at from $1.98 to $2.98, all double brimmed. Many other shapes, shades and designs at amazingly low prices. Children's Hats from 98c up. Also a beautiful assortment of hat trimmings, in flowers, fruit and braids, at from 35c each up.

This is an opportunity that usually only comes once in a season, and ladies are advised to attend this sale as early as possible in the mornings and avoid the rush in the afternoons. Hundreds of different hats of fine make, handsomely trimmed, will be found among this surprising collection.

Renewed Efforts For Peace, South Ireland

DUBLIN, April 26.—(Canadian Press).—Efforts to secure peace in Southern Ireland were renewed today with the re-assembling of the conference between Free State and Republican leaders.

Three Labor delegates, Alderman O'Brien, Thomas Johnson and Cathal O'Shannon, were in attendance, and their presence is taken to mean that definite peace proposals would be submitted.

BUILDING GAINS OVER LAST YEAR

Work Already Under Way Totals $90,212.

City Hall figures indicate in a clear-cut way the increase in building this year over last year. Although there have been no large permits issued as during last season, the largest to date being that of D. Belleghem & Sons for $12,000, the gross amount of work started this year stands at $90,212, as against $81,292 in the same period a year ago. In April last year the figures were given a great boost by the $37,000 job of the Bank of Toronto, but this year the totals have been reached by a large number of permits for moderate amounts. In actual number of permits this year excells, too, with 80, as against 72, up to yesterday afternoon.

The construction work under way already should relieve the shortage of houses. Up to this time last year there were only six dwellings started, but this year there have been no less than 13, of which eleven have been begun this month. Most of the houses are six and seven-roomed and are estimated to cost around $3,500. Only one permit for a dwelling to cost more than that has been issued. Some estimates on dwellings are as low as $1,500. Recent permits are:

D. Belleghem & Sons, alterations to present premises, making store, chapel and two apartments; McIntyre Bros. contractors, W. H. Barrie architect; estimated cost $12,000; date to be completed, August 1st.

W. W. Welch, dwelling, Aylmer street, $3,500.

C. W. Matthews, 478 Elm street, verandah, $100.

A. Chernikoff, alterations, 213 Charlotte street, $150.

E. F. Mason, alterations to store, 682-4 George street, $400.

John M. Sargent, 524 Charlotte street, repairs, $100.

N. D. Seaton, garage, 313 Frederick avenue, 50.

Mrs. Fred. Legon, 182 Sophia street, garage, $50.

Peter Anderson, workshop, Reid street, $300.

R. Graham, garage, 793 George street, $75.

Emma Beauregard, verandah, 187 Sherbrooke street, $12.

Frank Goselin, garage, 113 Rubidge street, $35.

C. P. Hudson, 717 George street, alterations, $125.

Joseph Sauve, 885 Water street, verandah, $80.

J. Menogue, 495 Rogers street, kitchen, $600.

John Carroll, sun-room, 507 Bolivar street, $300.

NASSAU DAM IS SEVERELY TRIED BY FLOOD WATER

Part of the Foundation Has Been Washed Away But There is No Immediate Danger.

THE POWER SUPPLY

At 6.45 p.m. last night the side wall of the flume at Nassau dam, which as been threatening to give way since last Friday through the unusual flow of water, went to pieces, but the prompt action of the Trent canal employees, who had been watching it, prevented a destructive flood of water sweeping down the river. The Examiner was informed that the men dropped the stop logs into place almost as soon as the wall finally gave way, and as a result the force of water was barely felt at the dams below Nassau. At the Waterworks, which would have got the full blow, and where some alarm had been felt since last Friday, the rise of water was not appreciable, it is said, and the only damage suffered was the clogging of the sluices with old lumber released when the break came.

The C.G.E. power house on the west side of the river, was thrown out of commission immediately the break occurred. The work on the new power house had advanced to such a stage, however, that it was turned on, and the C.G.E. as a result is getting more power than ever. The new plant had been under test for a week so it was in a position to take over the full load and on account of the raise in the height of water above the dam is operating with a strong head.

Only 45 feet of the pier cribbing was washed out. It had been gradually undermining for a considerable time and the flood pressure intensified its weakness. This pier, which is below the new dam, would have been entirely removed eventually, but the freshet hastened its going. Mr. E. G. Patterson was the only eye-witness of the break, which has caused no damage except at the waterworks dam, where a gang of men are now lifting out the debris.

FELL SEVEN AND HALF FEET AT LIFT LOCKS

James R. Davis Sustains Injuries to Head and Broken Ribs.

While testing the fastening of iron bars which are being replaced on the gates at the Lift Locks, James R. Davis, one of the employees at the locks, stepped back off the scaffolding on which he was working at one o'clock yesterday, fell about seven and one-half feet to the concrete floor of the recess, and sustained injuries to his head and shoulders, two broken ribs and a general severe shaking-up.

The iron bars which hold the air-tubes at the back of the gates were removed this spring, while the gates were being painted, and were being replaced yesterday. In giving an extra strong pull to one of the bars, Mr. Davis lost his balance. He was removed at once to his home near the Locks, and Dr. Malcolm McCullough summoned.

QUICK SALE OF HAY

A well-known inspector of the City, who is fortunate in owning a good Farm, advertised in The Examiner on Saturday that he had a Quantity of Good Pressed Hay for Sale. By Monday afternoon he was "making hay while the sun shone," having disposed of nearly his whole stock.

He told The Examiner on Monday that "they were coming from all over after his hay. "I must have sold five tons today while eating my dinner." He said it showed that the little For Sale Advts. fill the bill. The inquiries came from different sections of the city and country, showing how generally well read these little Condensed Ads are that appear in

BANKS'

FORD TOURING WITH STARTER

The Model 4 Touring Car, which I purchased from you last spring, has given wonderful satisfaction. I have used it every day this winter in my business and can assure you that it is an ideal winter car.

What specially interested me this season, owing to the high price of gasoline, was the gasoline mileage that I have been getting from my car. At times during the past summer I have made over 30 miles to the gallon.

My car has never given me a minute's trouble.

Yours very truly,
G. R. WEAVES.

DIVISION OF HOUSE OVER RAILWAY CO.

Vote of 95 to 91 is the Closest Recorded in Many Years. Motion is Defeated

NO PARTY LINES.

OTTAWA, April 26.—(Canadian Press.)—Shortly after resumption of business, following dinner recess last night, the House divided on an almost even vote. The division, being on a private bill, struck across party lines, members of the Government even dividing among themselves. A bill was under consideration to grant the Esquimault and Nanaimo Railway Company an extension of time in which to construct its line, commencement to take place within two years and completion within five years.

In Railway Committee a few days ago, A. W. Neill, (Independent, Comex-Alberni) objected to the extension. He moved to have the line commenced within one year and finished within three. His motion was defeated. In the House last night, he renewed his motion and again was defeated but by a vote of only 95 to 91, one of the narrowest divisions in recent years. The Progressives were the only party to vote solidly. They supported Mr. Neill. Of Conservatives, W. F. MacLean, of York South, was the only one to give him support.

Mr. Neill said he had no hostility to the C.P.R., which owns the railway in question. "I would be very glad," he said, "to see them running the National Railway." He added that the Esquimault and Nanaimo Railway had been expected for fifty years. The line was now 140 miles long, but 75 miles of it had been built thirty-eight years ago. According to geometric progression, if the same rate of progress were to be maintained, the road would not be completed before 1946.

Good Weather In the West

WINNIPEG, April 26. — (Canadian Press.)—Since early last week the weather over the three prairie provinces has shown much improvement says the weekly crop report of the Grain Trade News issued here yesterday. Higher temperatures combined with drying winds have considerably dried up the surface soil and as the frost comes out, the moisture is slowly sinking into the ground. Reports are becoming more frequent of seeding operations getting under way, with Manitoba and Alberta points reporting the most progress, the report states.

WOMEN REFUSED ADMISSION

MONTREAL, April 26. — Canadian Press. — Admission of women as delegates to the Anglican Synod was denied by a narrow majority when the matter was discussed at the opening session of the Synod here yesterday, the vote being 38 against to 30 for.

RANEY INTRODUCES A BILL PROVIDING FOR A NUMBER OF CHANGES IN THE O.T.A.

Attorney-General Would Make It a Crime to Transport Liquor on Provincial Highways.

FINES REDUCED.

TORONTO, April 26. Canadian Press. — Two bills which make considerable changes in regards to temperance legislation were introduced by Attorney General Raney in the Ontario Legislature yesterday afternoon.

One is designed to prevent the transportation of liquor along the highways of the province. The Attorney General explained that it was to meet the danger of liquor taken from distilleries ostensibly to be shipped out of the province, later being switched with some point in Ontario as its destination.

Any person found guilty of carrying liquor along the roads of the province will be liable to a fine of not less than $200 and not more than $2000, and in addition may, at the discretion of the magistrate, be imprisoned for a period not exceeding three months. In the case of a second offence the fine will remain within the same limits but the imprisonment will be not less than three months and no more than six months.

The bill provides however that the license board may grant special permission to transport liquor over the highways.

The Attorney General explained that henceforth liquor shipped from distilleries must go by rail and in this way it would be easier to ascertain if the shipment is switched.

The bill will come into effect as soon as it gets the Royal assent.

The other bill is an amendment to the Ontario Temperance Act making additional punishments for the sale of adulterated or illegally manufactured liquor and also additional penalties where persons engaged in the enforcement of the O.T.A. are themselves found guilty of breaking it or persuading other persons to break it.

It also lightens the penalty for first offenders of having liquor in a public place. The changes include the following:

It provides that there shall be additional penalties for the sale of illegally manufactured whisky, or for adulterated whisky. This additional penalty will be not less than three months in jail. It also makes it an offence to use false labels on any bottle or other package of liquor. The clause in the O.T.A. which provides that a person "found drunk or disorderly" in a public place, may be imprisoned if it is the third offence within three months s changed to read "intoxicated" instead of "drunk and disorderly."

The bill eases up the penaltp for second offenders by providing that they shall be fined the same amount as for a first offence and in addition shall be imprisoned for a minimum of two months instead of the former penalty of six months in jail.

Any person employed in the enforcement of the O.T.A. will henceforth be liable to an additional one month or more in jail if found breaking the law which he is engaged to enforce. Any person who counsels or aids another to break the act, will be liable to the same penalties as the person who actually commits the offence.

Changes are made in the provisions for appeal from a magistrate's finding, including the deposit of $10- shall be made in the courts at the time the notice of appeal is filed.

The fine for first offenders of having liquor in a public place is reduced from $200 to $100.

The changes to the O.T.A. will also come into effect as soon as the bill receives Royal assent.

Another British Boat is Seized

NEW YOR, April 26.—(Canadian Press)—Captain Mathias S. Clark and his crew of seven, whose British speed boat Fidus ,formerly the United Staes Sub-Chaser 101, was seized here on Monday by U.S. Custom officials were formally arrested yesterday on a charge of conspiring to violate the Volstead Act and held in $1,000 bail each.

LLOYD GEORGE ASKS AID FROM BRITISH PRESS

Asserts That False and Misleading Statements Have Been Published in London.

RUSSIAN TREATY.

GENOA, April 25. — (Canadian Press.)—Premier Lloyd George yesterday requested the British press to appeal to the British public to disbelieve anything it reads in the London Times or the London Daily Mail concerning the Genoa Conference. The Premier asserted that the Daily Mail had printed a statement that he had conferred secretly with Leonid Krassin, one of the Russian delegates, and promised to wipe out the Russian war debts. This and many other statements, which Mr. Lloyd George alleges are untrue, have appeared, he declared, in the London Times and the Daily Mail and have misled the British and French public.

Mr. Lloyd George said that if the charges against him by the Times and Mail were presented in parliament, he would answer them and give the British public the full truth. The efforts of the British to get the French to understand the British attitude toward Russia, have in the opinion of the British delegates, been greatly hampered by a hostile press.

GRAIN DEALERS IN MANITOBA REFUSED TRADE AUTHORITY.

WINNIPEG, April 26.—(Canadian Press)—"In my opinion, the judgment as it stands takes away from the Board of Grain Commissioner's authority to license and bond dealers in grain', stated Matt Snow, a member of the Board of Grain Comisioners, in commenting on the judgment of the Manitoba Court of Appeals which declared, in the case of the Manitoba Grain Company, a section of the grain act, ultra vieres of the Federal Parliament in an offer as it deals with the bonding and granting of licenses to grain dealers.

There is no other interpretation he said.

Commissioner Snow in declaring that the judgment might lend to further ligitation and consequent confusion, intimated that the matter may be taken to a higher court.

GRAIN SHIPMENTS FROM MONTREAL.

MONTREAL, April 26. — Canadian Press. — It was stated at the Board of Trade here yesterday in reply to assertions by shipping men as to undue restrictions being made on shipments of grain which diverted grain traffic to other ports that there were no longer any such restrictive regulations and that the rules made for the port warden have been so amended that there will in future be no difficulty in the matter of bulk grain shipped from Montreal.

RUSSIANS AT CONFERENCE LIKE LIZARDS

Representatives Express Opinions of Russians With Great Freedom. Not Straightforward.

BRITISH POLICY.

GENOA, April 26. — (Canadian Press.)—"Oriental bargaining" is the way the British delegation describes the tactics of the Russian experts.

The Russians are like so many lizards," say the British; "they crawl into their holes and then come out in unexpected places. It isn't the written proposals which are so remarkable, but the amazing explanations and interpretations of these," added one of the British delegates, who urged that hope for a settlement of the Russian question should not be abandoned, as the Allied experts are drafting a report which will state exactly what the Allied terms are.

The Russian experts probably will be called into the meeting to-day.

The British delegation is seeking an open and human policy towards Russia so the British spokesman said and if Great Britain can persuade the Russian Government to accept the traditional conditions of international intercourse between civilized peoples, Britain hoped to better the conditions of the unhappy and starving Russian masses, which could not be held responsible for what had happened in Russia since the revolution.

Premier Poincare's Bar-Le-Duc address is looked upon in British circles as an amazing pronouncement to have been uttered without consultation with the Allies. Says the British spokesman again: "It is strange to threaten that France will act upon enforcing the Versailles terms if not assisted by the Allies. That is a queer way to encourage co-operation and good feeling.'

British official opinion is that M. Poincare was driven to this address through French public misinformation concerning the Genoa Conference and through the belief that England is dealing secretly with the Russians without consulting the Allies.

"Russian tactics when discussing any subject may be compared to the movement of an ant," said the Italian spokesman yesterday. "The ant goes slowly, wanders in different directions, but finally gets there. The Russians do likewise; they are the opposite of the business-like, straightforward Anglo-Saxons; therefore great patience and much time are necessary, but the ultimate object will be reached."

For these reasons the Italian delegation considers the wave of pessimism which spread over Conference circles Monday night much exaggerated. The Russians, continued the speaker, cannot help realizing that any accord would be useless unless such as to invite the capital of the world to return to Russia; therfore, above all, it is the interest of Russia that the conclusions reached here should offer plenty of guarantees, especially to former owners of property in Russia, who would be the first to return there.

POLAND REPROVED BY RUSSIANS FOR TREATY PROTEST

Action Causes Another Sensation at Genoa. Red Army Near the Polish Border.

TREATY OF RIGA.

GENOA, April 26. — (Canadian Press.)— Soviet Russia contributed another sensation to the Economic Conference yesterday by sending a note to the Polish delegation remonstrating against Poland's action in joining with the Allied Powers in protest agains a separate treaty between Russia and Germany. Russia claimed that the peace treaty between herself and Poland covers all relations between the two countries, so that Poland, like Germany, should not participate in the discussion of Rusian affairs, even intimating that Poland by her present action in the conference has abrogated the treaty signed at Riga on March 18, 1921.

Russia has a strong Red Army encamped near the Polish border and for this reason, the Russian remonstrances are regarded by some of the delegates as equivalent to almost a threat aaginst Poland.

PIONEER PASSES AWAY.

VANCOUVER, April 26. Canadian Press. — Thomas Ellis Ladner, father of Leon J. Ladner, M.P., for Vancouver South, died at his home here yesterday. Deceased, who is 85 years of age, was one of the early pioneers of the province, having come to British Columbia over 50 years ago.

COST OF HYDRO COMMISSION IS UNRESTRICTED

Question in House Brings Out Fact That No Restrictive Rules Have As Yet Been Made.

TO BE PUBLIC.

TORONTO, April 26.—(Canadian Press.)—J. R. Cooke (Hastings North) urged a provincial-wide uniform tax to pay all the teachers' salaries in the primary schools of Ontario, both public and separate, instead of each municipality fixing its own rate, when he continued the debate on the budget in the legislature yesterday afternoon. Minister of Agriculture Doherty introduced a bill to provide for the organization of a co-operative company for the sale of dairy products Two amendments were introduced by the attorney general to pay witnesses at coroners' inquests and preliminary hearings. They draw no pay at present. Hon. Howard Ferguson introduced a bill to prevent the use of any form of spot lights on automobiles and another to provide that owners of mining claims must do in three years the development work which under the present law they do in five years. He claimed that the five-year limit resulted in holding up mining in Northern Ontario.

Hydro Commission

Mr. Ferguson asked the premier if there was any restrictions on royal al commission appointed to probe the Chippewa project as to the employment of counsel, exerts, staffs, etc., the prime minister replying that there was no instructions in this regard the government had th right to advise the commission if it thought the commission was acting unwisely. Mr. Drury emphasised that it would be no hole-and corner probe but that as soon as the commission had an opportunity to size up the situation, the investigations would be open to the public.

H. H. Dewart said the government should exercise caution so that the present commission would not entail so great expenses as did the one conducting the raidial investigation. Mr. Drury agreed that economy should be practiced and said the probe would not cover so wide a field for entail so much expense as did the one into the radials.

Wellington Hay thought the first thing for the commission to do was to thoroughly inspect the work and expressed the hope that the royal commission and the hydro electric commission would co-operate to give the public complete information and he was convinced that this would show that the project had been conducted in a manner entirely safeguarding the inetersts of the provinces and the municipalities concerned.

Sale of Timber

J. R. Cooks n resuming the buget debate criticised the government of timber limits to the Backus interests claiming that it was equal in extent to a strip a mile wide clear across Canada and that the revenue to be derived would be only 4 cents an acre.

Taking up the school question, Mr Cooke claimed that the grants from the provincial treasury to separate schools were proportionately much greater than to public schools. He said that if all the public schools of the province were considered as a unit and the separate schools also as one school it would be found that of the 95 per cent of the grant which was given on a basis of salaries paid and the teachers' qualifications, the grants received by separate schools form a much greater proportion to the total salaries paid. than was the case with public schools. This, he argued, was in spite of the fact that on the average certificates of the public school teachers were considerably better than the separate schools. To illustrate this he said that in both systems the number holding first class certificates was about five per cent of total. However, 73 per cent of the public school teachers had second class certificates and only 27 per cent of the separate school teachers had this qualification.

He claimed it was no excuse that the Hearst government used the same system in making grants after 1917 as was being used now, and maintained, that the proper system would be to levy a flat rate all over the province for primary teachers' salaries along the same lines as the one mill levy during the war on the assessments of the province He estimated that a five mill levy would pay all the expenditures in both the public and separate schools and give of both systems an equal opportunity to the benefits of primary education. He did not agree with Minister of Education Grant's statement Monday night that the British Uorth American act, the separate schools were entitled to the grants they had received. Mr. Cooke claimed that it was a matter of interpretation and as proof of this said they had not been made the same basis from 1908 to 1917. He claimed Mr. Grant's statement was misleading unfair.

THE HUNTER ST. BRIDGE.

The sooner the roadway across Hunter St. Bridge and the approaches to that celebrated structure are paved the better it will be, not only for those who have to drive across the bridge, but for the much larger number who walk over it every day. The conditions just now are such as to call for fervent complaints. In the first place, the roadway itself is about as rough a piece of road as can be found within the city limits, and it must be admitted that is going up against some very strong competition. In the second place, pedestrians are either smothered in dust if the weather happens to be dry or deluged with mud from passing cars on wet days. The majority of the people of East City use the Hunter St. Bridge three or four times a day, and they feel that they are entitled to better treatment from the city fathers. The conditions on top of the bridge are a very shabby top dressing for the half-million dollars represented in the structure itself, and the feeling is general that having spent so much it might be advisable to expend a little more and complete the job. It is claimed that the old bridge could be crossed with much greater comfort than can the

SIMPLIFIED TRAFFIC RULES.

The proposal of Hon. Frank Biggs that a small committee of the Legislature should be appointed to consider between sessions the consolidation and simplification of the motor traffic laws of the Province is one that will be hailed with approval by motorists and the public generally. That there is need for such clarification of the existing laws is only too evident. The rapid development of motor traffic has resulted in so many amendments to the Motor Vehicles Act, the Highways Travel Act and the Loaded Vehicle Act that the average man has difficulty in finding them intelligible, and even the officials in charge of their enforcement have trouble in understanding and applying some of the sections. Mr. Biggs' plan is to have a small committee to take the three acts and the amendments that have been made from time to time and put them in such shape that they can easily be understood. This is an improvement that would be in the interests of every one, and a simplified code of traffic laws would be welcomed alike by officials and motorists.

INCOME TAX FIGURES.

The figures just given out at Ottawa in regard to the amount of income tax paid by the different classes of Canada's population last year are interesting. There was a surprisingly large increase in the total collections, which jumped from $20,264,419.43 in 1920 to $46,381,806.64. The total in 1919 was only $9,343,419.03. The latest statistics indicate that the Federal income tax does not press very heavily upon the agricultural industry, for the farmers of the Dominion only contributed $611,736.64 last year, which, while an increase over 1920, when the farmers only paid $525,836.74, is a very small percentage of the total collections from the Dominion. Employes as a class paid the largest amount of income tax last year, those who are woring for somebody else being responsible for one-quarter of the whole sum collected, or over $11,000,000. Manufacturers came next, with $8,217,730.09, while merchants, wholesalers and retailers contributed $7,689,512.23 to the funds of the Dominion. Professional men were next on the list, their contribution in the form of income tax being $2,642,585.66.

THE ARBOUR DAY MOVEMENT.

Arbour Day was celebrated in the United States a few days ago, making the fiftieth anniversary of the establishment of the annual observance, which took place in "till-less Nebraska" through the prompting of J. Sterling Morton, one-time United States Secretary of Agriculture. The people of Canada might well follow the example of their American neighbors in this respect. It is difficult to calculate the benefit which has resulted from the influence of Arbour Day, with its teaching of the importance of preserving forests and of planting trees. In Nebraska alone it is claimed that nearly a billion trees have been planted in the last fifty years, and as others States have followed the splendid example set by the mid-west State it would be almost impossible to estimate how many trees have been planted throughout the United States as a consequence of the Arbour Day movement. This year the celebration of the anniversary was nation-wide, President Harding setting aside April 22 as the date for the annual observance, while the Secretary of Agriculture broadcasted by radio a message urging all Americans to greater efforts in the protection and re-establishment of the forests. The attention of the people of Canada should be attracted in some such manner as this to the importance of reforestation on a large scale in this country, if our timber resources are not to be completely exhausted.

AN INSTRUCTIVE FOREIGN LOAN.

Czechoslovakia, which corresponds to some extent to that Bohemia which Shakespeare imagined, even with the access to the sea which the country of his dreams never had, as been able to borrow money on somewhat onerous terms, says Barron's. It says something for a Central European country's credit when it can borrow £10,000,000 in London and New York on any terms whatever. Interest arranged is 8 per cent., with an additional 1 per cent. a year for amortization. After deduction of the British stamp duty and other expenses the net price to the borrow works out about 90. The guaranty is the customs revenue, and if this proves insufficient, the tobacco monopoly. The method of repayment is uncompromisingly business-like, but beggars cannot be choosers.

The Czechoslovak Government guarantees to lodge with an approved native financial institution, named by the British lenders, a fifty-second part of the yearly interest in sinking fund every week. This is the instalment plan so popular with young couples who furnish their houses on credit. There will be no nonsense about running up a large deficit for ultimate repudiation. If "irregularities" occur the borrowing Government agrees upon the most practical methods for safeguarding the holders of the loan. But, on the other hand, the loan is payable in cash, without an obligation to take goods in part payment. This is a great step forward in Central European credit. We are all familiar with the money lender who only renewed his bills when the unfortunate debtor agreed to take worthless pictures as representing part of the sum borrowed. That was the last refuge of the desperate borrower, and there are plenty of potential borrowers in Europe who would consider those terms better than none. But Czechoslovakia is in the way of receiving a lesson which should ultimately be cheap at the price.

THE TIME OF BREAD GROWING.

The time is at hand when the husbandman goes forth to grow the bread of the people. That may seem like a thing of small concern to those who have pitched their tents in the cities; but it really concerns them very much. It is their bread which has to be grown, and therefore from all the great centres of population there should ascend a fervent prayer that the labor of the husbandman may be fruitful. We are rather hazy in our notions about this matter of invocation, putting off the occasion for national prayer until the harvest has been garnered, when we call it Thanksgiving. Now is the time to do the praying. About all that the bread consumers can do is to pray, and it would at least set up a pious bond of co-operation in the matter.

This industry of bread growing is a big thing, and Canada is a leader in it. We had sixteen million acres of land sown in wheat last year, and we will probably have as many this year. We grow in a normal year two hundred million bushels more than we consume. The selling of this staple breadstuff to those who cannot grow enough for their own needs brings a great deal of money into the country and keeps a great many wheels turning. Most of these wheels are in the cities; so that we who live in the centres not only need the bread which the husbandman is about to grow, but we need some of this money which comes from abroad in payment for his toil. We ought to be very much in earnest, therefore, in our prayers for the wheat grower. He and we are bound together in a very vital partnership, although neither of us appears to think very seriously about it.

As silent partners—or, let us say, praying partners—in this great enterprise of bread growing, we are concerned in knowing that the wheat grower is getting a smaller yield per acre each year, as compared with the time when he had the incomparably rich virgin soil of the prairies, or the uplands of the East, to draw upon for plant food. He is slowly but surely exhausting it. He is taking the fixed nitrogen and potash out of it, and, unless he restores these elements in some way, his crops will continue to dwindle. Right there the cities would come to his rescue if the thing could be arranged. If our wasted sewage could only be run over his land, the same thing would happen that happens when the silt-bearing waters of the Nile overflow the lowlands of Egypt. But that is impracticable.

The atmosphere consists of four-fifths nitrogen; but it is free nitrogen and useless. It must be joined to an alkaline base, like potash or soda, to be made available as plant food. By the use of high electrical energy the nitrogen of the atmosphere may be made to combine with a suitable base, and reduced to a form in which the wheat grower can use it. And this is what he has got to do. Before the war Germany was using 188 pounds of nitrates per acre, and getting tremendous crops in return. Great Britain was using 162 pounds. We were using scarcely any, and have not yet begun. We are losing heavily by the neglect. To use artificial fertilizers is like investing a dollar and getting back three dollars, which makes it a pretty profitable investment. By the co-operation of our Scientific Research Council with the farmers we may soon see the good business involved in harnessing some of our unused waterpowers and turning the nitrogen of the air into plant food; and then the same labor that produces fifteen bushels of wheat per acre would harvest forty-five. That would mean more money for the wheat grower and more for the wheat consumer in our cities. We haven't got started yet to realize on the possibilities of co-operation.—Ottawa Journal.

EDITORIAL NOTES AND COMMENT

Clean-Up Week.

Have you done your part?

Judging by the number of applicants for the position of Fire Chief, a lot of people seem to regard the job as a sinecure.

At least Mr. McMaster, M.P., accomplished something. He succeeded in getting the Liberals and Conservatives to vote together.

Business conditions may not be of the brightest, but the Otonabee has no reason to complain of the lack of a rush these days.

Whether a member of a Township Council who owns a gravel-pit should be allowed to sell gravel to the municipality or not, doubtless is an interesting question; but surely there are weightier matters that might engage the attention of the Legislature.

A record crop of Niagara fruit is reported. But wait until the marketing season draws near. The usual "blue ruin" story will doubtless materialize as an excuse for high prices.

Saying it with the radio seems to be the newest method.

There is one good thing to be said for home-brew. It gives many a family more of a chance to get acquainted with the head of the house.

LITERARY GEMS

COMING HOME AGAIN.

One of the pleasures of going abroad is that of coming home again; and one of its most important lessons is that no land under the sun furnishes for the average mortal happier conditions of existence than our own beloved Canada. Many of those old, historic lands of Europe are charming places to visit, but they are also excellent places to leave. The struggle for a bare livelihood is more keen, the chances of success are less assured, and educational and social advantages are less easily attainable than in our favored land. Untrammelled by the fetters of the past, with almost boundless extent and inexhaustible resources, it offers to its sons a fairer heritage than is, I think, to be found elsewhere on earth.—The late Rev. W. H. Withrow, in "A Canadian in Europe."

Jud Tunkins says people who get out and argue about whether marriage is a failure generally prove that in their own case it is.—Washington Star.

We spend one-third of our lives in bed, and at least another third in bad.—Birmingham News.

Wise and Otherwise

So are taxes, Sherman.

The Europeans may have another war some day, if we can afford it.

There will still be enough chronic kickers left when they're all gone.

An ounce of warm weather on the thermometer is worth a pound on the weather forecast.

Most of the literary critics praise Homer, but "Babe" Ruth knocks him nearly every day.

Modern fairy tale: Goldilocks and The Three Bares—Bare Chest, Bare Back, Bare Knees.

We doubt, however, whether a radiophone will ever be as interesting as a party line.

The modern young man may have music in his soul, but most of it seems to be in his sole.

If all the clothes in all the wardrobes of all the flappers were placed end to end they wouldn't reach.

Why is it that some man with real knowledge of the facts always has to butt in and spoil the conversation?

Depend upon it. The flapper who constantly boasts that she never has been kissed is out to break a record.

We've made a strange discovery. Re-arrange the letters in the word "baseball," and you have "all's Babe."

Mr. Edison has invented some more questions. The market was flooded already. What the world needs is answers.

Couldn't the boys of the stock exchange let crops alone and have as much fun with craps?

The Congressional record could be worse. Let's give the Congress men credit. They could print their pictures in it.

The printers of Germany's paper marks threatened to strike. Proving that some men will strike no matter how much money they're making.

A pessimist, again, is the man who doesn't bother with the rack under his restaurant chair, but throws his hat on the floor to start with.

It's rather dangerous, these days, to make a speech praising "the laws of the land." People may suspect that you're a bootlegger.

Advice to young men. If the color of her eyes and the number on her auto license tag start sticking in your memory, it's time to watch your step.

It would simplify matters for the short-term-marriage-and-divorce addicts if marriage licenses could be allowed to lapse and expire like other licenses.

CROP REPORT

Following is a summary of reports made by the Agricultural Representatives to the Ontario Department of Agriculture:

General cultivation and seeding was further delayed by the wet condition of the land during the week, especially on low lying fields. On high and well drained soils a little sowing was done. A considerable quantity of old oats will be used for sowing this spring, as most of last year's growth was of poor sample for seed.

Fall wheat is on the whole fairly promising, although Elgin and Norfolk say that the fields do not look as well as earlier in the season, being a little spotty from ice forming. Huron thinks the crop is in about average condition. Grey remarks that fall wheat never looked better. North Simcoe says that the fields are not too promising, while South Simcoe says that prospects are brighter. Brant and Perth speak of the crop as making good growth, and Waterloo says that it came through the winter well, and that fields now look dark green.

Clover has done fairly well in most cases, but will hardly equal fall wheat for wintering.

Hay has been purchased around $15 a ton in the Port Arthur district for shipment to Montreal.

Potatoes have been selling at discouraging prices in the northern part of the Province. Port Arthur reports sales at a dollar a bag, with very little demand. Six carloads were recently bought at Kakabeka Falls at 70 cents a bag.

Frontenac says: "Many farmers are intending to sow sweet clover over their new seeding with the hope of getting a better covering. Some are using ordinary grass seed and clovers for this purpose. Sweet clover and alfalfa are gaining in importance as hay crops among our farmers."

Judging by the fruit buds, orchards should be fairly generous in yield this season where they have not been neglected.

Speaking of the severe ice-storm of March 31st, Brant says: "In all the old unpruned orchards the storm did a great deal of damage, breaking the trees down very badly. In the healthier and better pruned orchards the damage was not so serious, however. Northern Spy trees split up pretty badly."

It would look as if the bulk of well finished cattle have been disposed of, and that most of those remaining are of the butcher type and will be finished on grass.

A carload of well fed cattle, averaging about 1,200 lbs., was shipped from the county of Grey during the week.

North Simcoe states that the highest price for pure-bred Shorthorn cows at a recent farm sale was $140.

Peel says that at a dispersion sale, good grade Holstein cows, in excellent condition, brought from $75 to $130.

Dufferin states that good grade dairy cows have sold at auction as high as $125, and Lanark says that some good milkers have gone over the $100 mark.

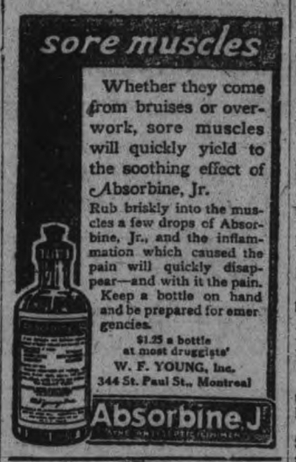
More farmers in Victoria are taking up milk testing.

Grey says that the general opinion in that county is that the grading of hogs will be a good thing for the producer.

Little pigs have been selling in North Simcoe and Frontenac at $10 a pair; in Brant at $12 a pair, and in Port Arthur as high as $8 each.

Grey claims that one man in Bentinck Township has twenty-nine lambs from ten ewes.

Good horses are selling around $175 each in Brant, and from $160 to $175 in Lanark. At an auction sale in Peel County a nice three-year-old grade Clydesdale mare sold for $207.50.



DOWNEYVILLE MAN HURT IN LINDSAY.

Thown Out of Rig to Pavement, Picked Up Unconscious.

DOWNEYVILLE, April 26.—While driving his team in Lindsay on Saturday, George O'Connell of Downeyville met with what might have proved a serious accident. When turning a corner of one of the streets, a wheel of his rig striking the curb, he was thrown headfirst to the hard pavement and picked up in an unconscious condition. His speedy recovery from the effects of the impact is hoped for.

Euchre Party.

A fairly good sized gathering enjoyed a pleasant evening at the euchre party in the parish hall, Friday evening.

Put on Play.

The St. Mary's Sodality of Lindsay will present a play in the parish hall here on Friday evening, April 28th.

Local Personals.

Miss Evelyn Sullivan is visiting her aunt, Mrs. Patrick Haliby.

Mrs. Henry Mathews and son, Michael, of Toronto attended the funeral here of the former's sister, the late Mrs. Alice Paul.

Mr. Neil Powers is visiting relatives here.

Miss Mary Collins was a Sunday visitor to Miss Isabella Clancey.

The Motorists of Canada made Dominion Tires

the standard by which all tires are judged

When Caruso died, the director of the Metropolitan Opera was asked if he would make a certain tenor Caruso's successor. He replied, "I cannot **make** anyone his successor. **The public** only can do that."

The car owners of Canada made DOMINION TIRES the tires by which all tires are judged.

When automobiles were a novelty, motorists had no standards. Tires, as well as cars, were taken on trust.

But to-day, values are based on performance. Tires have been tried out; mileage records have been kept; tire troubles have been checked; and motorists know—ABSOLUTELY KNOW — that DOMINION TIRES set the standard of mileage, service, comfort and economy.

Dominion Tires to-day are better than ever and prices average one-third less than pre-war prices.

DAMAGE IN DUMMER BY HEAVY RAIN

Meadows and Grains Are Affected. Flume at Payne's Saw Mill is Destroyed.

WARSAW NEWS.

WARSAW, April 26.—Cheese is being made at Warminster factory. Warsaw factory will not start until next Monday.

Too Much Rain.

Two weeks ago fall grains and meadows looked as well as they ever did. The recent heavy rains, followed by the frosts of the last few days, have begun to do a little damage.

The falls above Query Lake are very high this spring. Much more so than for many years. The force of water was so great that it broke the flume at Mr. Allan Payne's sawmill on Thursday morning.

First Football Clash.

The first football game of the season was played at Bethel on Friday evening between Warsaw and North Dummer teams. The game resulted in a tie.

In the Churches.

In the absence of Rev. G. Graham, Mr. Alex. Watts took the morning service in the Presbyterian Church. There was no service there in the evening.

Rev. G. Weir conducted the service in the Methodist Church.

There will be service in St. Mark's Church next Sunday.

News Briefs.

The egg circle in Warsaw seems to have fallen through.

The moving-picture management seems pleased with the attendance. The pictures are all good, generally some educational, some humorous and a serial.

Miss Ella Dewart left on Friday morning to be ready to resume her school duties Monday.

Miss Doris Lane is spending a few days with her aunt, Mrs. Wallace Anderson.

Mrs. Charles Bowen and Miss Laura Bowen spent a few days in Port Hope last week.

Miss Jennie Barrie was in Toronto last Tuesday, Wednesday and Thursday attending the O.E.A.

Mr. and Mrs. Alford, Lakefield, spent Sunday with Mr. and Mrs. P. Lloyd.

Mrs. Wm. Watts and children are visiting relatives in Warsaw.

Mrs. Archer, Fenelon Falls, has been called home on account of the serious illness of her mother, Mrs. James Clifford.

Mr. Wm. Aitken has secured a position as agent for the Fuller Co. in the Lindsay district.

The road commissioner is working on the boundary, south end. Many of the logs are being removed and the holes filled with stones.

The boundary from Dummer road to Mr. Anderson's corner is being graded today.

CHAPTER XXI.

KITCHEN CHAOS.

It was almost dinner time when I reached home after that trying day at the Little Playhouse. Not until I turned the key of my apartment did I remember in what a sad state I had left my suite.

The bed was unmade; Jack's pajamas adorned his shoe box; my house dress decorated a chair; the bathroom was strewn with damp towels; dust covered my handsome new davenport; and all the kitchen utensils I owned were piled in the sink side by side with my adorable Wedgwood dishes.

The cooking things had stood for 24 hours, since dinner the night before. And I positively hated them, as if they were at fault—and not I!

I rushed into my white uniform and hurried about my work. I hoped to put the place in some kind of order before my husband arrived. To add this chaos to our recent discussion of finances was unthinkable.

But where to begin? I turned to my kitchen. Never had a pile of pots and pans loomed so formidably!

I felt that there was some hitch between my intention as a wife and my accomplishment.

For example, from an artistic standpoint, my little kitchen is quite charming to me. It's a tiny room, with a Pullman table between high-backed benches.

Checked gingham curtains brighten my windows and my aluminum spoons and saucepans hang on the wall gaily and handily.

I love my pretty kitchen when it is in order. But when chaos prevails, it's an utterly depressing spectacle. Tired out by the rehearsal and the sewing, amazed by the confusion which confronted me wherever I turned, I began to cry.

With hot tears running down my nose, I took up my frying pan. Before scouring it, I melted the fat and inevitably burned my fingers, nearly dropped the pan, and spilled the grease down the front of my nicest white apron!

And that is exactly all I succeeded in accomplishing before my husband came home.

For Jack was early. He had been interviewing a "prospect" in our end of town and had rushed home to surprise me.

Surely Jack is the most adorable of husbands. Never from a glance or a word would I have suspected that he was either surprised or shocked by the state of our flat.

I threw off my greasy apron, wiped my eyes and smiled, and snuggled down on my grand davenport. And Jack held me close and neither of us spoke. Just being together, we seemed to rest each other.

Never had I seen Jack look so harassed. He shows a nervous strain more than most men. He shows it in his eyes and in two vertical wrinkles in his forehead.

I was glad that the back of the davenport was toward the kitchen door. I smoothed the horrid wrinkles from his brow while demanding the reason for them.

"Business going badly. Bryan, the prospect I told you about, is closing his factory," he explained. "And I was relying on my percentage to pay part of our furniture bill!"

I didn't like to be reminded of my extravagance. I stopped him with a kiss.

NIGHT COUGHS

Terribly wearing on the system is the cough that comes at night and prevents sleep.

The constant coughing keeps the lungs and bronchial tubes in such an irritated and inflamed condition that they get no chance to heal.

You will find in

DR. WOOD'S NORWAY PINE SYRUP

a remedy without an equal, for the soothing of the lungs, loosening the phlegm, strengthening the breathing organs and fortifying them against serious pulmonary disease.

Mrs. John McKerney, Lower Montague, P.E.I., writes: "About three years ago I caught a very bad cold accompanied with a sore throat and hoarseness, and was so hoarse you could hardly hear me speak. I could get no rest at night with the terrible annoying, hacking cough. I tried several remedies but they did me no good. Finally I saw Dr. Wood's Norway Pine Syrup advertised; got a bottle, and at once it gave me relief and after using four my cough had all gone. Now I always keep "Dr. Wood's" in the house, and shall recommend your wonderful remedy to others."

Price, 35c and 60c a bottle, at all dealers. Put up only by the T. Milburn Co., Limited, Toronto, Ont

VOICE OF THE PEOPLE

SMOKE THE RUNNER.

Editor Examiner,

Dear Sir,—This man has advertised the city of Peterborough more than any other person, has made a name for amateur sport and put Peterborough before any city in Canada. Our citizens should feel ashamed after his untiring efforts during the past few years that they do not acknowledge his work and ambition to secure the highest honors in the running world.

Peterborough is supposed to be a wealthy city; there are many wealthy residents here, without doubt, but they have no sporting blood in their make-up, or surely the small amount the Amateur Athletic Association needs to finance these efforts would be soon forthcoming. Nothing advertises a city more, builds up business or the health of its young people better than clean healthy sport. Peterborough certainly needs saving from 'dry-rot," so Council and all public bodies wake-up and give the young the necessaries to build up bodies and characters! Toronto is now taking away Peterborough's marathoner, owing to Peterborough's failure of support. This should not be said of our fair city.

FAIR-PLAY.

BEATTY AND HAIG RECEIVE FREEDOM OF PORTSMOUTH.

LONDON, April 26.—(Canadian Press)—There were warm scenes when the Portsmouth town council Monday night discussed the question of confering the freedom of the Borough on Earl Beatty and Earl Haig.

The local organization of the unemployed wrote a letter to council expressing dissent and the Labor members of council contended that the step was inopportune during the present distress among the unemployed in view of the fact that the proper recipients had been generously awarded by the state. The resolution however was subsequntly adopted.

ENGINEERING STRIKE NOW MORE HOPEFUL.

LONDON, April 26.—(Canadian Press)—As a result of negogiations looking to a settlement of the dispute in ship-building industry over wage reductions both sides are submitting proposals to their constituents hte details of which have not been divulged.

The situation is now regarded as slightly more hopeful for settlement.

TORONTO BOND ISSUE.

NEW YORK, April 26.—(Canadian Press.)—The City of Toronto advertised for bids here to-day for an issue of $6,000,000, 5 1-2 per cent. bonds. The award will be made next wek, the bonds will be issued serially and will be payable in Canadian dollars only.

WOMEN'S AUXILIARY OF MILLBROOK HELD SALE OF FANCY WORK

Excellent Program Provided. Millbrook News of Interest. Personals.

MILLBROOK, April 26.— The sale of fancy articles, baking, etc., held in the Armouries on Saturday afternoon by the Woman's Auxiliary, Girls' Branch, and Junior W.A., of St. Thomas' church, met with the usual success which has attended the many similar events given here during the fall and winter. Mrs. (Canon) Allen, and Miss Collins, played several piano duets during the afternoon, also Miss Collins and Mrs. H. Cummings (nee Miss Eleanor McBean), of Toronto, the music adding greatly to the pleasure and attractiveness of the occasion. The main room of the Armouries is admirably adapted for a sale of this kind, and the many dainty and useful articles on the various tables, together with the bright colors of the "orange tree," girls' sashes, etc., made a very pretty scene indeed, as the scores of buyers passed in and out, beginning immediately the doors were opened, and continuing until the last of the goods were disposed of.

The table of children's wear, towels, etc., was in charge of Mrs. C. Needler, and Mrs. H. Mulligan; the fancy work of Miss E. Needler, Mrs. C. McNeil, and Mrs. G. H. Harrington, The "orange tree" proved a novel feature, and its "fruit" was disposed of by Misses Gertie Gray, and Thelma Spencer; while the Junior W.A. delighted the children with their inviting display of dolls, doll clothes, black cats, etc., all being attentively waited on by Audrey Leach and Alixe Spencer; the "bran pie" was equally attractive, and the three girls, Kathleen Fowler, Elizabeth Russell, and Marian O'Brian, who were in charge of it, sold out more than once, and had to replenish its "filling" repeatedly so many boys and girls and grown-ups, too, desired to explore its mysterious depths. The "fish pond," as usual, drew a large number of "anglers," Misses Florence and Lillian Clarke, of the Girls' Branch, "baiting" the hook for all comers.

Mrs. J. Dawson and Mrs. W. D. Leach had no lack of customers for their counter of delicious home-made cakes, buns, biscuits, etc., nor was the candy table one whit less popular, Misses Janet Needler, May O'Brian, and Mrs. J. E. Allen, being the capable "sales ladies" in charge. The afternoon tea tables were filled again and again soon after 4 o'clock, the waitresses being Misses Hilda Spencer, Marjorie Smith, R. MacNamara and Francis Turner; the larger tables for the more substantial meal served from 5.30 to 7 p.m. were laden with good things, and were well patronized by the business men and many others at the regular tea hour. Mrs. John Allen was convener of the committee in charge; other members being Misses Grandy, Mrs. H. Russell, Mrs. G. Fowler, Mrs. J. Pitt, Mrs. Hilton, and Miss M. White. Mrs. E. Whyte acted as cashier and had few idle moments once the sale was well under way.

The proceeds were quite satisfactory, and practically all clear profit, as everything was donated; the money goes toward the renovation fund for the interior of the church.

Annual Meeting.

The "Sunshine" Mission Band, of the Methodist church, held their annual meeting on Friday evening, with a fair number of members and friends in attendance. The president, Miss Gladys Tucker, was in the chair for the opening exercises, and before vacating it previous to the election of the new officers, was presented with a Life Membership certificate ($5), by her mother, in recognition of her faithful attention to the duties of her position during her term of office. The retiring president also thanked the members for their loyal support in the work of the year. The pastor then took charge, and the secretary and treasurer presented their reports of the year's work.

The Mission Band money goes to the support of a cot, known as the "Millbrook Sunshine Cot," in the W. M.S. Hospital at Chentu, China, $30 being the amount required per year for this purpose. The Primary Department of the Sunday school gave the contents of their birthday box to the Band this year, and when the mite boxes were opened and other sources counted, it was found that a little over the total sum needed was on hand ready to be sent to the Branch Treasurer.

On motion it was decided to hold one meeting per month for the future instead of two as formerly, the second Friday of each month being the date chosen. A song by K. Freelove, G. Tucker and M. Sayles was much enjoyed, and the election of officers then took place, the following being th result:

President—Kathleen Freelove.
Vice-Pres.—Elsie Spence.
Secretary—Lawrence Rowland.
Corresponding Sec. —Jean Burnham.
Treasurer—Marjorie Sayles.
Organist—Gladys Tucker.
Asst. Organist—Nellie Rowland.
Room Committee—Convenor Hector Whyte, Walter Sayles and Jack Byam.

A very impressive installation service for the newly-elected officers was conducted by Mr. Tucker, and the meeting closed with the benediction. A treat of home-made candy was enjoyed during the social hour before the gathering dispersed.

William A. Fallis.

The late William A. Fallis, whose funeral took place on Wednesday to the Fallis' cemetery, Manvers, was born in the later township 80 years ago. Mr. Fallis came of sturdy, pioneer stock, his parents, Mr. and Mrs. William Fallis, who predeceased him many years ago, emigrated to this country from Ireland soon after their marriage, and by hard labour cleared the land upon which they settled. Seven children composed their family, including five daughters, only two of whom are now living, and two sons, Robert James and William A., both now deceased, the latter being the youngest born. The three sisters who predeceased their brother were: Mary, afterwards Mrs. Thos. Benson, Ballyduff, Sarah, Mrs. Frank Potts, Manitoba, Susie, Mrs. W. Fallis, Fallis Line, and the two still surviving are: Jane, Mrs. Jas. Abercrombie, Toronto, and Eliza, Mrs. Robert Fallis, Fallis Line.

The late Mr. Fallis, and his wife, who survives him, enjoyed the unusually long period of 55 years of married life together, living first on a farm near Bethany, afterwards in Winnipeg, and other points in Manitoba, returning from the west nine years ago and settling in Millbrook, where they have resided ever since. Their family consisted of only two children, a daughter, Louisa E., who died in her 18th year, and one son, Alfred, there years younger, who was called away by the "grim reaper" when but 17 years of age.

Deceased was a great sufferer during his declining years, having had several strokes of parlysis, and a very painful cancer in his right hand, but through it all, he was always patient, cheerful and uncomplaining. A lifelong and faithful member of the Methodist church, the funeral services were conducted by Rev. Mr. Tucker, and Rev. Joseph Wilks, a large numebr of friends and relatives gathering at the house to pay a last tribute of respect before his body was carried to its final resting place.

The pallbearers were all relatives bearing the family name: Messrs. Wesley, Hiram, Ernest, Wilfrid, Stewart and Harry Fallis, the first four being nephews of the deceased, and chosen at his special request.

Married— On Wednesday, April 19th, at the residence of Rev. C. R. Spencer, who performed the ceremony, Lavergne G. Fallis, son of Mrs. David Fallis, of Fallis Line, to Pearl, only daughter of Mr. William Tinney, of Cavan.

Mr. and Mrs. John McBride, of Millbrook, announce the marriage of their eldest daughter, Cassie Victoria, to Mr. Victor L. Olsen, on Saturday, April 22nd, in Lawton, Oklahoma, Mr. and Mrs. Olsen will be at home after May 1st, at 117 Broadway, Walters, Okla., U.S.A.

The local I.O.O.F., No. 308, will about 75 members in attendance, and accomapnied by the Millbrook band, were present at Grace Presbyterian church on Sunday evening, the congregation filling the sacred edifice to capacity. The following is the order of the service:

Doxology.
Invocation.
Hymn 399.
Scripture Lesson, 1st Corinthians, 13th Chapter, "The Psalm of Love," the middle link of the Order.
Anthem by the choir, Mr. H. W. Johnston taking the solo.
Prayer by the pastor, who is a member of the I.O.O.F.
Announcements and offering.
Quartette: "The Ivory Palaces," by Mr. and Mrs. Gervan and Mr. and Mrs. H. W. Johnston.
Hymn 398.
Sermon, text, 1st Cor. 14th chapter, 10th and 11th verses.
Subject, "Speaking with Tongues."
Closing Hymn.

Mrs. R. C. Thompson-Curry, of Peterborough, accompanied by her daughter, Miss Dorothy, were guests of Mr. W. G. and Miss Estelle Hetherington last week.

Mr. D. B. Nugent, and his sister, Mrs. G. F. Metzler, who were guests of Mr. and Mrs. W. Wilkinson during their stay here, returned to their respective homes at Ottawa, and Union Springs, N.Y. on Thursday.

The sale of the household effects of the late Mrs. W. D. Nugent, which took place on Tuesday of last week, was well attended, prices on the whole good, and everything was disposed of, the terms being cash. Mr. J. H. Wilson of Port Hope, acted as auctioneer.

The I.O.O.F. Lodge, at their meeting on Tuesday, May 2nd, will present veterans' jewels to five of their members who have been for twenty-five years connected with the local society. A social hour will follow, the "Golden Sheaf" Rebekah Lodge being guests for the latter part of the evening.

There passed away in Detroit last week, Mr. T. B. Jenkins, a former resident of Millbrook 28 years ago. Mr. Jenkins carried on a harness maker's business when here, his shop being where Mr. B. R. Raper's undertaking rooms now are. Deceased was a brother of the late Mrs. W. D. Nugent, whose death occurred only two weeks before. The late Mr. Jenkins was in business in Woodstock before moving to Detroit.

O'Neill's "The Hairy Ape" to Give Broadway Another Change From Drama

BY JOHN O'DONNELL.

NEW YORK, April 24. — Within the next few weeks more light will be shed of the unsolved theatrical problem of the relationship of enthusiastisc praise in Greenwich Village to commercial success in Times Square, New York.

A month ago Eugene O'Neill's eighth-episode tragedy, "The Hairy Ape," was produced by the Provincetown Players in their MacDougal Street theatre. By one academic expert it was pronounced the best play of the year; another called it the best play ever written by O'Neill.

Now the play is to be produced on Broadway by Arthur Hopkins in the hope that it will duplicate the New York success of "Anna Christie" and the continued road success of "Emperor Jones."

Eight Episodes.

It will probably fail in achieving the success of either of these plays, but "The Hairy Ape" is significant in that it may mark the definite departure of O'Neill from the established dramatic form to which Broadway audiences are accustomed.

In "The Hairy Ape" O'Neill tells the story of the awakening of a proletarian mind in eight episodes—episodes which are brilliant, at times melodramatic, and which in every case make a terrific assault on the attention of the audience.

The dramatic form is that of "Emperor Jones," and in adopting this form O'Neill's decision is analogous to a writer who has discarded the novel and seeks to gain his effect by a series of connected short stories.

In "The Hairy Ape" the eight dramatic short stories begin with the scene in the firemen's forecastle of an ocean liner when Yank Smith, the burly, ignorant stoker, proclaims his creed: the fact that "he belongs."

LOUIS WOLHEIM AS YANK SMITH IN "THE HAIRY APE."

Gloriously blasphemous, taking pride in his animal strength, he shouts his love for the machinery of his contempt for the passengers; "they're only baggage."

Tragedy Begins.

Yank Smith's tragedy begins with the discovery that he doesn't belong. A girl from the first cabin, slumming into the stoke hole, sees the human animals in action and with a shriek of revulsion cries out against the "hairy ape" when Yank, stripped to the waist and covered with sweat, approaches her.

Yank's realization that he doesn't belong, that the human race has rejected him and his kind steadily grows.

Fifth Avenue of Sunday morning, the cells on Blackwell's Island, the office of the I. W. W., where he is thrown out as a suspected agent provocateur, lead to the end — he wanders to the zoo, opens the cage of the great ape and dies in a struggle with the animal.

What Gilpin was to "Emperor Jones," Louis Wolheim is to "The Hairy Ape." As Yank Smith he bears the burden of the play. Physically suited for the part he carries it through with a somber naturalism and tragic force of one who is midway between man and beast and is rejected by both.

BETTER GARDEN TIPS

BY LUTHER BURBANK

If a more elaborate assortment of flowers than that already spoken of is desired, the gladiolus should be given a prominent place.

BURBANK.

It is hard to find a flower more profuse in worth-while blossoms, and they are to be had in an almost endless variety of color and form.

Gladioli will grow in almost any soil, but earth containing some sand seems best. The ground should be well spaded to the depth of about a foot. If bulbs are used, DO NOT USE FRESH MANURE. This often tends to produce disease in the bulb. Five or six inches below the surface is a proper depth for planting, although where the soil is particularly sandy it is well to plant even an inch deeper. Selection of an open spot where the sun strikes is important. Also water plentifully before the plant begins to flower. In cutting the flowers leave at least four full leaves on the bulb.

This matter of cutting brings up another mistake beginners make all too frequently. They make the mistake of cutting all the leaves away. This should be carefully guarded against as new bulbs grow after flowering and need the help of the leaves. Another point to remember in cutting is to insert the point of a knife sidewise into a stem and crack the stem over, rather than breaking it off. This aids the bulb in its natural growth.

COMB SAGE TEA IN FADED OR GRAY HAIR

If Mixed With Sulphur it Darkens so Naturally Nobody Can Tell.

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural colour and beauty to the hair.

A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural colour and looks glossy, soft and beautful.

CAMPBELLFORD, April 26. The at home given in the opera house on Monday evening under the auspices of St. Mary's Parish, was as their former at home a grand success, both in point of attendance and proceeds. Leonard's orchestra furnished charming music for dancing for the very large crowd present, which included many out of town guests from Hastings and Stirling, as well as a large number of local citizens. There were square dances and round dances to suit the tastes of all while some who did not care to trip the light fantastic indulged in cards. The ladies of the parish served very dainty refreshments and the gathering broke up about 2:30, all having enjoyed a most pleasant evening. The proceeds amounted to well over $200, which was very gratifying to those in charge.

Weekly Half Holiday.

The merchants and other business people of the town will enjoy their weekly half holiday beginning Friday, May 5th. The stores will close on Friday afternoons at 12:30, and remain closed until the next morning during the months of May, June, July, August, September and October.

"Dutch Market."

The Willing Workers of Christ Church are making great preparations for their Dutch market to be held on Thursday afternoon and evening. Afternoon tea will be served and there will be home cooking, plain sewing, fancy work, ice cream, booths, and a fish pond. An excellent programme will be rendered in the evening. The Blue Bird bazaar given last year, was such a grand success that those who attended will not fail to be on hand early this year. The event as its name implies, will have something special for old and young.

Alpha Club Banquet.

The banquet held in the Methodist church on Tuesday under the auspices of the Men's Alpha Club, was one of the most pleasant events of the season. Men to the number of over 83 sat down to a table which fairly groaned with good things and to which all did ample justice. The men who had charge of the entire repast evidently believed in the old adage, the way to a man's heart is through his stomach. Toasts were ably proposed and responded to by the following, Mr. Percy Denyes acting most acceptably as toast-master: The toast to the King, proposed by Mr. Denyes was responded to by all singing the National Anthem. The toast to the Alpha Club was proposed by Mr. Gerald Wilson and responded to by Mr. A. L. Malcolmn, B. A., Sc. The toast to Canada was proposed by Mr. Roy Miller and responded to by Mr. Everett Fairman. The toast to the bachelors by Rev. H. B. Kenney and responded to by Mr. Thomas Craighead. Our Guests, proposed by Messrs. P. Gould, Cecil Cassan and S. Hulton and responded to by Mr. G. A. Kingston, B. A., Mr. S. A. Maguire and Mr. Claude L. Duncalfe.

Rev. J. E. Glover was heard to advantage in an appropriate address, Solos were beautifully rendered by Messrs. George Thring, R. R. Hutton, George Lucy; also a euphonium solo by Mr. George Salter was heartily encored as was Mr. Lucy's piano solo. The orchestra delighted the guests with several numbers.

The banquet closed with the National Anthem and the doxology.

The members of the club as well as their teacher, Rev. Mr. Kenny, feel very gratified over their year's work as a Bible Class and look forward to making the banquet an annual event.

Miss Ruth Dunk has accepted a position in the Dominion store to succeed Miss Eva Smith, whose marriage took place recently.

Mr. and Mrs. William Blakely and family, having exchanged their house in town for their old farm, left yesterday to take up their residence at their new home a short distance south of the town.

Misses Mary Watson and Ora Haig and Mrs. Robert Bell returned last week from Ottawa where they were delegates from St. Andrew's church to the Provincial Missionary Convention, at which there were over five hundred delegates.

Mr. and Mrs. G. A. Payne, Miss Grace and Miss Hattie Redden returned on Monday evening from their trip to Washington, Philadelphia and New York.

MAGNESIA FINE FOR ACID STOMACH

Quickly Neutralizes Acidity. Stops Fermentation, Sweetens the Stomach

Nine people in ten, when food upsets the stomach causing distress, think they have indigestion. In reality, they are suffering from "acid stomach." An excess of acid in the stomach causes gas, heartburn, bloating and sourness.

To have a strong healthy stomach capable of easily and normally digesting three hearty meals a day you simply must keep these stomach acids neutralized and the stomach contents sweet. No artificial digestents necessary. Just ge a few ounces of Bisurated Magnesia from any good drug store and take a teaspoonful of the powder or two tablets in a half glass of water right after eating or whenever the slightest pain is felt. The result is amazing and you will be delighed with the almost instant relief it brings. This famous stomach sweetner combines Magnesia and Bismuth in desirable proportion and is not only splendidly effective but perfectly harmless. Its regular use keeps the stomach sweet strong and healthy all the time.

Bisurated Magnesia is well known to druggists everywhere and is used annually by more than a half million people who now eat as they please, in reason with no fear of indigestion.

Stops Pain Instantly

The simplest way to end a corn is Blue-jay. A touch stops the pain instantly. Then the corn loosens and comes out. Made in two forms—a colorless, clear liquid (one drop does it!) and in extra thin plasters. Use whichever form you prefer, plasters or the liquid—the action is the same. Safe, gentle. Made in a world-famed laboratory. Sold by all druggists.

BETHANY LADIES' ANNUAL MEETING.

Miss Irene Staples Will Head the Class For This Year. Bethany News.

BETHANY, April 26. — The annual meeting of the Young Ladies' Organised Class of Methodist Sunday School was held at the home of Miss Edna Fallis on Monday evening. The class was well represented. The reports of the treasurer and the secretary were given, showing that the class had met all obligations, had given $5.00 to missions, and had a nice balance in the treasury. The officers elected for the coming year are: President, Miss Irene Staples; vice-president, Miss Mabel Challice; secretary, Miss Olive Wake; treasurer, Miss Edna Fallis; teacher, Mrs. Otto Spencer; assistant teacher, Miss Lily Weatherilt.

A pleasant social time was spent, and refreshments of candy, etc., were enjoyed by the young ladies.

Adult Bible Class.

The anual meeting of the Adult Bible Class of the Methodist Sunday School was held in the Methodist Church on Monday, 24th April. Rev. J. E. Beckel occupied the chair. The reports of the year's work of the class were very satisfactory. The following officers were elected for the coming year: President, Mr. T. J. Jackson; secretary, Mrs. P. C. Brown; asst. secretary, Mrs. Alva Thorndyke; treasurer, Miss Jennie Lee; teacher, Mr. Walter Jakeman; assistant teachers, Mr. Thos. Rowan and Mrs. H. H. Ryley.

Personals.

Mr. George Spencer and son Otto were business visitors to Peterborough on Saturday.

Mr. A. A. Smith, of Millbrook, had his law office opened for business on Monday.

Mrs. J. R. Reynolds is spending a few days with friends in Cavanville.

Rev. A. L. Brown, of Lindsay, is visiting his brother, Mr. P. C. Brown.

Mrs. Smith, of Toronto, was the week-end visitor of her brother, Mr. Robert Crerar.

Mrs. Ann Jane Porteous is visiting with friends at Springville.

Mr. and Mrs. George Wake and baby, of Lindsay, motored to the village on Sunday to visit friends.

SOCIAL EVENING.

A very enjoyable evening was spent at the home of Mrs. J. Scott, Maria street where a large number of guests were invited to meet Mrs. C. Dummitt, of Toronto, who is visiting her sister, Mrs. J. Scott. Cards were indulged in. Some of the guests present were: Mr. T. B. Maniece, Miss Baxter, Mrs. Hickey, Mrs. J. Butcher, Mr. and Mrs. S. Jordan, Mr. and Mrs. W. S. Dodds, Mr. and Mrs. S. McAuley, Mr. and Mrs. H. Wickerden, Mr. Holland, Mrs. J. Grierson. The dainty refreshments were served. Table decorations were beautiful with calendulas, wall flower, sweet peas. The guests left in the wee sma' hours after a very jolly time.

A Sale of Silk Dresses

Presenting a Long-Looked-For Opportunity and Never-to-Be-Forgotten Prices

ONE can be prepared for most anything when dresses like these are marked down to $25 and $32.50. Their styles, their materials, their making—all set them apart from the commonplace and yet the prices are quite ordinary. It's a timely sale too, for right soon it will not be necessary to wear a coat and then the dress will be the most important garment in the wardrobe.

HERE is a fine array of styles, and many of them have just been with us a week or month or two. They express the ideas of many clever designers and the work of some fine garment makers. There are canton crepe, taffeta, charmeuse and tricolette and shades of navy, black, brown, taupe and light tones of grey. You'll be greatly impressed with their style and the unique ways they are trimmed.

Regular Up to $39.75, for - - $25.00

WHAT an impressive array these make! Nearly all are this season's models and express Fashion's latest fancies by way of trimming, materials and styles. The colors are confined to navy and black, but in most instances—but not all—the trimming gives them a dash of color. They are not at all the kind of Dresses you would expect to see selling for so little.

HASTINGS, April 26. — The illustrated lecture, "The Beter 'Ole," which was to have been given in the Town Hall on Friday evening, was postponed for a week or more, on account of the poor electric power.

Personal News.

Dr. J. H. and Mrs. Hess spent Saturday in Peterborough.

The many friends of Mr. E. Pettigrew will be sorry to learn of his illness.

Mrs. N. Beavis is in Colborne, visiting at the home of her son, Mr. Gordon Beavis.

Mr. Charles Graham, of Porcupine Hill, spent Sunday at his home here.

CAMPBELLFORD AND DISTRICT

St. Mary's "At Home" Greeted By Large and Enthusiastic Audience. Church Entertainments Score Success.

PERSONAL MENTION.

CAMPBELLFORD, April 26.—Mrs. P. J. Sarginson spent last week visiting friends in Peterborough.

Mr. Joseph White of Peterborough was in town for the "at home" given on Monday evening in the Opera House by St. Mary's parish.

Rev. M. L. Hinton was in town on Monday for the monthly ministerial meeting.

Mr. S. J. Moore was in Peterborough last week on business.

Miss Helen Kerr visited friends in Hastings last week.

Mr. J. L. Hoover and J. A. Irwin learned last week that their summer cottages at Bradley Bay had been broken into, the culprits having forced the locks on the door.

The regular meeting of the Ladies' Aid of the Methodist Church will be held on Thursday afternoon in the church parlour. There will be the annual election of officers and a good turnout is expected.

Afternoon Tea.

St. Andrew's afternoon tea and sale of cooking, aprons, children's dresses, etc., held on Saturday afternoon in the Public Library, was a grand success, the proceeds amounting to well over one hundred dollars. Those in charge of the various departments were:

Afternoon tea—Mrs. Walter Henson and Mrs. R. N. Morrison.

Home cooking—Mrs. James Alexander and Mrs. William Oliver.

Apron and sewing table—Mrs. R. Boyes, Mrs. Neil Thompson and Miss E. Buchanan.

The ladies feel very gratified over the results, and feel deeply indebted to all who contributed to its success.

Oddfellows at Church.

The members of the local society of Oddfellows and visiting brethren from Brighton and Springbrook, numbering over sixty, attended divine service in a body at St. Andrew's Church on Sunday morning. The pastor, Rev. C. F. McIntosh, preached a most inspiring, helpful and practical sermon from the words found in Galatians, chapter 6, verse 5 and 2, "For every man shall bear his own burden. Bear ye one another's burdens, and so fulfil the law of Christ." Very pleasing music was dispensed by the choir, in which Miss Meiklejohn took the solo.

Spring Work on Land.

Many farmers in Seymour Township have now begun work on the land, and if the springlike weather of yesterday continues, plowing and seeding will be very general this week.

THE APSLEY BEAUX-BELLES MINSTRELS DECIDED SUCCESS.

Russian Dance, Full of Graceful Movement, a Winning Feature—A. Y: P. A. Social.

APSLEY, April 26. — On Friday evening the Apsley Beaux-Belles (a minstrel troupe of both sexes) gave an entertainment in the Parish Room before a fairly large audience, and it was a decided success. Every number of the programme was well rendered, but special mention must be made of one or two outstanding features. A Russian dance, full of graceful movement, was exceedingly well executed by Misses Marjorie Spence and Myrtle Windsor. The song, "Ol' Car'lina," a sweet, haunting melody, was sympathetically sung by Miss Ella Brown, the company singing the chorus with good effect. As a contrast, Miss Brown also sang "It's All 'Er Comin' Right By and By," from the operetta "Pauling," the rollicking chorus making a great hit. Miss M. Spence sang exceptionally well a difficult plaintive Southern dialect song, "Ain' Yo' Comin' Roun' No Mo'," and also danced the sailor's hornpipe.

The numbers were interspersed with jokes and conundrums, some of which seemed to be above the heads of the audience.

The programme was as follows:

Overture—Comb Band.

Song and chorus—Miss M. Spence and Roy Brown.

Song—"Daisies"—The Company.

Dance—Irish Jig—The Company.

Song—"Coal Black Rose" — Miss M. Spence.

Recitation—Alma Jones.

Song—"Dixie Land"—Willie Hall.

Reading—Roy Brown.

Song—"Ol' Car'lina"—Miss E. Brown.

Song—"Nelie Gray"—Roy Brown.

Nigger tunes—Comb Band.

Song—"Bohunkus" — The Company.

Song—"Ain' Yo' Comin'" — Miss M. Spence.

Russian Dance—Misses Spence and M. Windsor.

Recitation—Wilbert Johnston.

Song—"Back to Dixie" — Vernal Windsor.

Violin solo—Miss M. Spence.

Song and chorus—Miss E. Brown.

Recitation—Cecil Wilson.

Song—"Looking for a Coon Like Me"—Roy Brown.

Sailor's Horpipe — Miss M. Spence.

Song—"Old Cabin Home"—Willie Hall.

Recitation—Herbert Lean.

Song (with mandolin acompaniment)—M. Spence.

Song—"School Days"—The Company.

Grand March—The Company.

The company consisted of Messrs. V. Windsor (middle man), H. Earnshaw, H. Lean, R. Spence, W. Johnston, R. Brown, C. Wilson, W. Hall, and Misses M., P., and C. Spence, M. Windsor, A. Jones, A. Lean, and E. Brown.

A.Y.P.A. Social.

Saturday was Social Night for the A.Y.P.A., and a good attendance spent a pleasant time in games of various kinds.

Suffered a Relapse.

Newton Downer, who was recovering from pneumonia, suffered a relapse on Sunday morning, and Dr. Loudon, of Peterborough, was again hurriedly called to attend him. The doctor returned to town in the afternoon, leaving the patient much easier, but he is still very weak. Mrs. Downer, who is tending her son—Nurse Parker having left last week—is herself almost incapacitated with a severe cut on her hand sustained two weeks ago, and for a time it was feared blood poisoning would result.

A BRUTAL MURDER IN BRANTFORD, ONT.

Foreigner Murdered and Body Cut to Pieces — One Arrest.

BRANTFORD, April 26.—(Canadian Press). — Peter Yegiazarias, Armenian, boarding-house keeper at 148 Darling Street, was brutally murdered here yesterday and his body dismembered and cut to pieces. Harry Dent, also an Armenian, and former member of the Royal Canadian regiment, is under arrest, suspected of complicity in the murder.

The crime first came to light when some fishermen saw a man throw a pail into the canal. The pail floated, and the fishermen found it contained pieces of a human body. The police were notified, and a search revealed the evidences of a gruesome crime. Dent was encountered by the police carrying a grip which, it is said, contained portions of the body of the murdered man. The trunk of the body was found at the boarding-house with the limbs lopped off at the joints.

PERCENTAGE OF LOYALISTS

DUBLIN, April 26—(Canadian Press)—General O'Duffy chief of staff of Free State troops stated last night that in twelve divisions of sixteen divisions, republican army 7 per cent were loyal to the Free State and that from thirty to forty per cent of the remaining four divisions were loyal . . .

UP TO UNITED STATES

NEW YORK April 26.—(Canadian Press)—Lady Astor declared at a luncheon of the Associate Press, yesterday morning, America can show the way to peace and that the United States would yet join conference at Geona.

A HEAVY LOSS FOR PARRY SOUND HOMES

PARRY SOUND, April 26 (Canadian Press). — This town will be badly hit if rumour that the tug Lambton has been lost in Lake Superior proves correct, for seven of the light tender's crew have their homes here. They are, Andrew Valyear, Harold and Andrew Christenson, Fred Cole, Fred Hayes, Charles Virgo, and another.

SAULT STE. MARE, April 26 (Canadian Press). — Up to a late hour last night nothing had transpired to encourage the few who still hope that the missing light tender Lambton will be found tucked away in some bay or cove along the north shore of Lake Superior, disabled, and keeping in shelter until rescued.

TOMMY CHURCH APPOINTED.

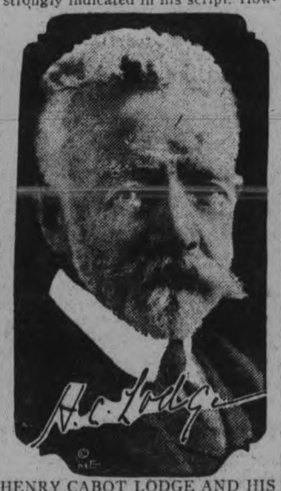
Analyzing Lodge's Writing

BY ALBERT J. SMITH.

The signature of Senator Cabot Lodge is not a true reflection of this man. It is a veil that shuts out the hidden faculties he possesses.

Examination of specimens of the Senator's handwriting indicate he does not sign his name wholly as he writes. He loses much of his individuality in his signature that is strongly indicated in his script. How-



HENRY CABOT LODGE AND HIS SIGNATURE.

ever, there are vestiges of his personality in his autograph.

Lodge's pen marks denote the amplitudes of the judicial mind, the astute investisgator, the drilled jurist. They also mark the adroit politicians. The strength of his capabilities lies in his powerful and deep discernment of men and things that most men of equal intelligence would fail to discover.

He is a veritable psychic in his intuitive discernment of unseen forces. He "feels" them; he senses the approach of trouble and discord. He deduces by instinct.

Disconnected Letters.

The graphologist gains this information from the unusual disconnections in the letters. These separations are due to the mental alertness of the individual, that move faster than the physical senses are able.

Men of the genius type all write the disconnected form. It denotes ripe, rapid and rhapsodic intelligence.

In Lodge's case, there is a slight modification of this rule, because of his practical training in life, but the essence of its force is manfested in most every advance made by him.

One of his modifying qualities is his great tenacity of purpose; the love of contest and the quick grasp of a problem. He has a quick and ready mind; he is nimble-witted; judgment of matters and people is dictated by an inner consciousness rather than by any process of reasoning. He is quick of comprehension, observant, critical; little escapes his notice.

Lodge is more inspirational than he is willing to admit. He is almost an idealist, for his acts and his words are largely inspirational. His oratorical powers are well developed and he is an interesting talker, with a smack of the dry humor possessed by men of dignified bearing.

The Hydro Cooking Demonstration

"Oh, don't they look lovely. They're so clean looking." was the exclamation of one lady who stepped into the Hydro-Electric Commission's George street store yesterday, to swell the crowd that has been patronizing their cooking demonstration for the last three days. The "clean look" of the different gas ranges on view is indeed one of the most outstanding features of the exhibition. Their bright, spotless appearance and the compact efficiency with which they supply every necessary gas stove convenience in a very small space should make them an attractive adjunct of the most particular housewife's kitchen.

A white-clad lady, described as an "A1 cook," was in charge of the cooking demonstration, with samples of her ability displayed in the toothsome-looking pies, cakes, cookies and tea biscuit which lined the two front windows. The different varieties of gas ranges on view are all the product of the Moffat Company's factories at Weston, the Hydro Commission specializing in goods of Canadian make, and they form an exhibit which leaves nothing to be desired in kitchen convenience.

The cabinet gas range, No. 201, has every possible accessory to stove comfort, a five-turner top, with adjustable valves, a warming-closet, canopy and shelf, and a convenient receptacle beneath the burner box for depositing sundry unwanted-dishes while cooking is in progress. Forty-eight inches of floor space is all that is required for this model, a glistening example of compact efficiency, with the decorative flowing lines that characterize all the Moffat gas stoves, the white porcelain broiler pans, dust trays and splashers that give it such a very clean look, the nickle-plated legs, door frames and manifolds, and the hard-baked, non-rustable black enamel that makes the foundation throughout, and allow of hearty application of soap and water with no fear of ill effects thereafter.

The combination gas and coal range is a splendid model, with attachments for using either coal or wood as fuel and gas at the same time, the gas range having a four-burner top and oven, equipped with thermometer and the very handy adjustable oven shelves, and the coal range with hot-water attachment. A novel device on this model to avoid burning in the oven is the specially-constructed flue to carry off superfluous warmth. There is also a five-burner single-oven model, with small coal annex.

The five-burner gas range, complete from its white poreclain space to accommodate its compact perfection, with the double oven bottom which prevents the heat from injuring the linoleum beneath.

With a few twists of the hand, the demonstrator in charge took the entire contents of one of the models out, in readiness for the scrubbing which makes a gas stove a thing of sanitary comfort. From the specially constructed lock-seat valves to the double bottom in the oven, each separate piece is removable and adjustable.

In connection with their demonstration of gas stoves, the Hydro Commission is also showing an automatic water-heater, made by the Royal people of Toronto, which remains lit with a pilot light, a heater which automatically brings the water back to a temperature of 130 degrees when it cools, shutting off later under its own pressure. There is also an ideal water-heater that is guaranteed to deliver the first gallon of hot water within four minutes' time and a gallon every minute thereafter.

W.M.S. DAY AT MARK STREET

Joseph Wearing Preached in the Morning and the Pastor at Night.

It was W. M. S. day on Sunday at Mark Street Church, and Mr. Wearing gave an excellent address in the morning. The pastor preached in the evening.

"Things That Abide Forever" was the subject of the evening sermon, and was founded on John vi., 12: "Gather up the fragments that remain." The following is a synopsis of the sermon;

Never, perhaps, in the history of the world, did such a multitude sit down at one time and in one place to such a feast. In a sparcely settled part of the country, east of Lake Galilee, there the motley crowd sat down on the grass, while the Son of God and His disciples catered to the famishing masses of humanity. Arranged in companies by fifties and hundreds, the work did not last long; and as the sun went down and the multitudes moved away, Jesus said, "Gather up the fragments that remain." It was no "bread line" or "soup kitchen" event, but a well-ordered and free picnic; and everybody was welcome.

Nothing By Halves.

The multitude was not only fed, but it was feasted. Food from the land and sea, Nature's best selected viands, bread and fish, was doled out in mighty abundance. One basket contained all that Jesus used in performing the miracle; but the fragments that remained filled twelve baskets. That is, there was twelve times as much food left after feasting the multitude as there was to begin with. But that is a fact that is illustrated throughout the whole realm of nature and of grace. Humanity's millions, since the race came upon the world, have been feasting from the hand of God, and still He says, "Gather up the fragments that remain." Light, and beauty, and bloom and melody, from sun, and landscape, and flowers, and feathered choir; and still there is abundance remaining. "Gather up the fragments that remain."

Those Fragments.

Crumbs, says the man who does not know God very well. No, the fragments were not crumbs. Let us not insult the generous Christ. The crumbs were left on the grass for the birds. These fragments were fresh from the hand of Jesus, and had not been used in feeding the people; but were by the side of the Master, Who broke up the loaves, or remained in the disciples' baskets after the people had been served. Nothing is ever warmed-over that God imparts to His people. New every morning are His gifts. The same dew shall never baptise these flowers again. Yesterday's sunbeams have entered into the plant, the flower, the tree, or the cold bosom of the earth. Yesterday's melody is sky-lost. Then gather up the fragments, for they are not stale supplies.

Spiritual Lessons.

Let us consider what remained after the feast, beside the material fragments. I cannot think that all that crowd followed Jesus for the sake of the loaves and fishes. No, it was His mighty miracles which attracted the people. You see they were so filled with enthusiasm and gratitude that they would take Him and make Him king. It took something greater than bread and fish to kindle such emotions in that mass of people.

Gratitude and Testimony.

Nothing becomes a man like gratitude, and the lack of it is our national and individual besettment. Appreciation is the mother of gratitude, but selfishness murders both. There was more left when that crowd was fed, a thousand fold, than was manifest at first. There was gratitude, appreciation, testimony, and enthusiasm. Listen to this testimony: "This is of a truth that prophet that should come into the world." The same hand feeds the masses to-day. This great world of ours is deluged with perennial sunshine, and we may drink in the beauty and melody of Nature to intoxication. Nature spreads her table for the race, and it sags beneath the weight of luxury and beauty, and yet men stumble on blindly and starve and die in the midst of God's abundance.

Faith, Hope and Love is Left.

When the feast is over and the crowd is gone, and the night drops down, and all the land is still, the disciples of Jesus hears the Master say, "Gather up the fragments that remain." What a priceless treasure faith is. Every man possesses it in some form. Houses and lands and money and friends may all take wings and fly away, but faith abides. Have faith in God, faith in yourself, faith in your fellow-men, faith in the forces of righteousness, and faith in the final triumph of truth. Fling your blessing on the passing breeze to-day, and to-morrow's winds will waft it back to you. Yes, and we must cherish hope. Look out into Nature. Look and listen and learn to hope. The buds in millions bursting along our path constitute a whispering gallery of hope. The morning ripple of the robin's song thrills with new life and courage, and is the drum-beat of a brighter day than yesterday. Then cheer up, for nothing is dying in these days, and the great heart of Nature throbs with joy. And we must remember that the force most mighty in the world is love. Life's burdens are lightened by love. In the train of our spiritual faculties love is the brightest, and it perfects all the rest.

The Unused Fragments.

Think of the treasures that remain ever in the possession of the son of toil. Faith, hope, love, joy, peace, friendship, and a spirit bubbling over with youth, are fragments that remain when things temporal are all gone. Who shall measure the value of memory, imagination, the sweep of thought, the grasp of truth, the up-reach after Christ, the outreach after men, and the unspeakable thrill of walking with God. Gather up the fragments of time, prayer, opportunity, talents, for such is our privilege. Remember, when all else is gone, Jesus and personality, and emotion, and immortality and heaven remain. Then lift thin eyes to the eternal hills, for they abide. Fling thine anchor of hope within the veil, for it will hold mid the rushing tempest. If you are Christ's disciple, then all is yours for time and eternity.

YOUR HOME TOWN FIRST.

Work for your own town.

Beautify it. Improve it. Make it attractive. The World War and the Treaty of Peace and all such things are important subjects; but what's the good of cleaning up the world unless you sweep your own doorsteps?

The city whose streets are dirty, sordid-loking, cluttered, uninviting, suffers much. Such a city wants to be cleaned, recreated, made a thing of beauty, so that people will come for miles to see it.

The best advertisement of your business is the town you live in.

Towns get reputations as well as men, make your town talked of all over the Dominion. It will thus draw people; and where the people come, there is prosperity.

Rid your town of one eyesore after another. Clean up the vacant lots and plant them in gardens. Make a cluttered yard a disgrace. Make public opinion too hot for those who will not help.

FIERY, ITCHY ECZEMA HEALED RIGHT UP BY APPLYING SULPHUR

Any breaking out of the skin, even fiery, itching eczema, can be quickly overcome by applying a little Mentho-Sulphur, says a noted skin specialist. Because of its germ destroying properties, this sulphur preparation instantly brings ease from skin irritation, soothes and heals the eczema right up and leaves the skin clear and smooth.

It seldom fails to relieve the torment and disfigurement. Sufferers skin trouble should get a little jar of Mentho-Sulphur from any good druggist and use it like a cold cream

WILL SUMMER IN ENGLAND

MRS. F. SCOTT FITZGERALD and Little daughter of the poular novelist of St. Paul The Fitzgerald's are preparing to spend the summer in England. Two of Fitzgerald's best known books are "The Beautiful and the Damned," and "This side of Paradise."

MRS. ALVAH H. McCREARY, of Philadelphia, who says nothing she could say for Tanlac would be half good enough after the way this remarkable medicine has brought back her health.

"It is just glorious to have my health back, and in my opinion there is nothing I can say about Tanlac would be half good enough," said Mrs. Alvah H. McCreary, 1531 Locust St., Philadelphia, Pa.:

"For two years I had all the miserable and agonizing symptoms that go with a bad case of stomach trouble. Although I lived on the strictest kind of diet, I suffered torture from indigestion and finally my whole system seemed to give way.

"I certainly know how to appreciate the wonderful blessing of good health and I have such confidence in Tanlac that I wish it was in my power to put a bottle of it in the hands of every sick man, woman and child so that they might take it and get well and strong, as I have done."

Tanlac is sold in Peterborough by Warne Drug Co., Ltd., and by leading druggists everywhere.

STUDY TOUR FOR BOYS

About the best thing a father can do for his boys is to encourage them to travel and see something of the world before they become too keenly engrossed in commercial life. Travel is a great educator—it enriches the mind and fits the youth to better fill his place in life. A normal boy is observant—he assimilates and retains knowledge. Travel gives him his opportunity—it fits him for every phase in life.

A tour of Europe is at present being organised under the personal supervision of Mr. T. H. Matthews, U.A., (Oxon), Assistant Professor of Mathematics, McGill University, and late Instructor-Lieutenant, Royal Navy. In addition, local guides will be secured to conduct excursions and give lectures on the artistic, historic, literary, and economic significance of the sights seen and the places visited.

A most carefully planned and interesting itinerary has been arranged, including visits to Montreal, Liverpool, Chester, Stratford-on-Avon, Oxford, London, Paris, Versailles, Fontainbleau, Rheims, Lyons, Marseilles, Cannes, Nice Monaco, Mentone, Genoa, Pisa, Rome, Naples, Sorrento, Capri, Pompeii, Vesuvius, Florence, Venice, Trent, Innsbruck, Munich, the Passion Play at Oberammergau, Nuremburg, Mayence, the Rhine, Cologne, Brussels, Louvain, and Ostend, returning through London and Liverpool.

This exceptional tour starts from Montreal on Saturday, 24th June, calling at Quebec, by the splendid White Star line steamship Canopic (12,100 tons). A period of approximately two months will be occupied by the tour, as by the itinerary the return trip is made from Liverpool by the fine steamship Regina (16,500 tons), arriving at Montreal on 26th August.

The arrangements for this tour are most complete, and the charge, which is a minimum one, covers everything in the way of transportation, hotel accommodation, with three meals a day, transfers, sightseeing fees, in brief, all necessary travelling expenses for the entire tour.

DISTRIBUTING CHARTS OF THE TRENT WATERWAY.

Treat Waterway Development Association Has Charge of Work.

Plans for the placing of the illustrated charts of the Trent waterway to yacht and motor boat clubs in Canada and the United States are being completed by Secretary L. Fraser of the Trent Waterway Development Association. A large number of these charts have been sent out and others were despatched to-day. The secretary has started by sending one to each of the municipalities along the route and to several Canadian clubs, including the Royal Canadian Yacht Club, Hamilton, and Toronto Motor Boat Club. Mr. G. N. Gordon, K.C., M.P., is asking the Department of Railways and Canals for a further lot of fifty of these maps, and when these arrive the secretary will be ready to begin covering a large field. For several days one of the charts was displayed in the window of Mathias Studio, and attracted considerable attention. The relation of the Trent to other bodies of water is clearly set out by a red ink tracing from Georgian Bay to Trenton.

It is hoped to secure a sufficient number of charts so that they can be sold to enthusiasts who are asking and ready to pay for information about the route. The most recent letter asking for particulars about the maximum size of boat that can make the trip, the length of the route, etc., comes from H. D. Moreland, Chicago. Mr. Moreland remarks that he is a Canadian and was born in this district, so has a sentimental reason in wishing to make the trip from Chicago by boat.

BICYCLE WEEK

Special Features for Week from April 24 to May 6

The Seventh Annual National Bicycle Week is being observed throughout the Dominion of Canada from Saturday, April 29, to Saturday, May 6, inclusive, as a country-wide demonstration of the many and varied benefits and advantages to be obtained by old and young people through the use of a bicycle.

This is the seventh successive year in which the joys and blessings of wheeling have been brought to the attention of the general public in effective and more or less spectacular manner. "Bicycle Week" was practically the forerunner of the special week idea for the emphasizing of the sterling characteristics of a commodity, and the present wide cycling activity in the Dominion is due to a considerable degree to this annual soring demonstration.

"Bicycle Week" serves as the special period of the year when bicycle enthusiasts advance the many arguments in favor of wheeling for economy, health, pleasure, sport and general utility. The importance of the bicycle as an independent form of individual transportation is undoubtedly appreciated now more than ever before. The natural desire is for some form of individual vehicle that adds to convenience, saves minutes, improves health and is generally useful seven days in the week. This is where the bicycle comes in. The bicycle is now more popular than ever before from the utility standpoint.

The trusty bicycle has always formed the cheapest vehicle of transportation. In this respect it is hardly likely that the bicycle will ever be supplanted by any other means of personal transportation. Authorities on the subject point out that even walking is expensive when compared with wheeling. Moreover, cycling is twice as easy as walking and three times faster. The bicycle will never pass out.

Grand Trunk Make Fine Record.

A summary of the operations of passenger trains for month of March, 1922, on the Grand Trunk Railway System, east of the St. Clair and Detroit Rivers, shows that out of 9,000 trains 94.2 per cent. reached the terminal station on time. This is a very gratifying record, and one that is regarded as evidence of the efficiency with which the passenger service of the Grand Trunk is being operated.

SPECIAL SERVICES AT ST. GEORGE'S.

England's Patron Saint's Day Fittingly Celebrated.

Sunday being St. George's Day, special services were held in St. George's church, South Peterborough. Rev. Wallis of St. Baranbas' church, Toronto, was the special preacher for both the morning and evening service, and he pointed out, in his sermon, how the spirit of sacrifice was typified in a different manner by Jesus Christ, and by England's patron saint, St. George.

At the evening service the special anthem was, "Jesus Lover of My Soul," the duet parts being taken very creditably by Messrs. H. Rew and Sowden. The processional hymn was "God Save the King."

"I Thought I Would Die of Shame"

The Very Tragic Situation Which Faced the Granddaughter of a British Duke in New York -One Awful Night

A DIRECT descendant of Gerald Fitz Gerald, Baron of Offaly, upon whom the title was conferred in 1205—the daughter of Lady Eileen Fitz Gerald, lady-in-waiting to Queen Victoria—a cousin of Viscount Gort, V. C.—she was dragged out of a motion picture theatre in New York and accused of the most deadly misconduct that can smirch a woman's reputation.

"I thought I should die of shame!" says Betty White, whose full name is Mrs. Katherine M. B. E. White, and who is the young and charming widow of Lieutenant Henry Thompson White, killed at the taking of High Wood, in the battle of the Somme.

Her experience was as though taken from Alexander Black's novel, "The Seventh Angel." In that book, Ann Forrest accosts a man on the street, thinking that she knows him. A moment later she is in the grip of a plain-clothes man—dragged literally to the Jefferson Market police station, that malodorous woman's prison, where many a girl's reputation has been wrecked through the perjured testimony of some more or less truthful detective.

Ann Forrest was too much astonished to fight back. So was Mrs. White. Ann Forrest grew curious and determined to see it through. So did Mrs. White. Ann Forrest triumphed in the end. Mrs. White has brought suit for $50,000 against the theatre manager, and the case is yet to be tried.

Ann Forrest faced the woman judge and obtained fair play. Mrs. White faced her accuser, who berated her and would not listen—not even to the three men who had accompanied Mrs. White to the theatre, one of the men her own cousin, Major Everett Barter, of the British Army. Ann Forrest had the satisfaction of seeing her accuser humiliated. Mrs. White declined to have her friends "knock her accuser's head off." And there the similarity ends.

It was at dinner that Mrs. White, the major and another male friend decided to go to the movies. They selected a neighborhood house on upper Broadway, for Mrs. White had acted before the camera in England and desired to acquaint herself with American methods of production.

But a woman friend called and detained her and so the men went to the theatre, with the understanding that Mrs. White should follow so soon as her caller had departed. An hour elapsed and then Mrs. White was free. She went to the theatre, paid her admission fee and entered. In the semi-darkness she could make out the six-foot figure of the major. There was no seat in the same row, and so she took one directaly behind him. Then she settled down to the enjoyment of the picture.

The drama reached an end and announcements were flashed on the screen. The auditorium grew lighter. Mrs. White talked to the major over his shoulder. As he turned, he recognized a male friend, an elderly man, sitting next to Mrs. White. He addressed him and soon the trio were in animated conversation. Then another picture began.

Five minutes passed. Mrs. White was oblivious to all save the picture. A tap on the shoulder startled her. She turned and behehld an usher.

"The manager wants to see you outside," said the usher.

"To see me?" asked Mrs. White in astonishment. "What can he want of me?"

Rising quietly, she left her seat and was shown into the manager's office. He was walking up and down, giving a feeble imitation of a caged and irritated lion.

"So, you're here, eh!" he exclaimed. Mrs. White looked at him with open-eyed astonishment.

"I've got you this time, you——" he growled. "You can't come in here and pick up men. This is a respectable house." He raised his voice in anger until it reverberated through the auditorium. Mrs. White grew as colorless as her name. Her temper had reached the boiling-over point. At first she had not understood the accusation. Slowly the import of the man's words had filtered through her confused thoughts. He had accused her of—Mrs. White turned on the man.

"Send for my friends—my cousin—send quickly, or you'll be sorry," she exclaimed, looking her accuser full in the face. He took a step backward, for he saw the danger for him that lurked in her blue eyes. A minute later, the major and the elderly man were with Mrs. White. The major is just six feet high. He has been in half a dozen campaigns. He has a fiery temper and a strong right arm.

"What's the trouble?" he asked. Mrs. White explained. The major measured the distance between his right fist and her accuser's jaw. The fist shot out, but Mrs. White was quicker. Her arm went up and deflected the blow.

"This is my cousin, Mrs. White," explained the major, when self-control returned. "You have insulted her and unless you apologize fully I'll knock——"

"I'll call the police," yelled the manager.

"Don't do anything," expostulated Mrs. White, who had regained her senses, realizing that public scandal would result. But the major was too thoroughly incensed to acquiesce. He growled and swore and stormed.

The loud talking had attracted the attention of others and soon there was a curious crowd to listen in. Mrs. White now was the calmest of the lot. She reasoned that perhaps, after all, the man had mistaken her for some other woman.

"Are you sure that I am the woman under suspicion?" she asked.

"Sure?" Of course I'm sure. I've watched you for more than two weeks carrying on with strange men."

"But I've never been in this theatre before," remonstrated Mrs. White. By this time the major was becoming unmanageable and Mrs. White fairly dragged him out of the theatre. The next morning she consulted her lawyer and brought suit for $50,000, charging defamation of character against the theatre manager.

The Crest of the Duke of Leinster, Which Mrs. White Is Entitled to Display.

"I thought that I should die of shame," Mrs. White said afterward in relating her experience to her friends. "It was my first visit to the house. The man next to me, was an acquaintance. He knew my name and I knew his. In front of me sat my cousin and a man friend. They testified for me, yet that manager refused to listen. But he will have to listen in court.

"What I felt then, no words can express. The humiliation did not dawn on me at once. I was too stunned to think straight. I knew that I was accused of some horrible thing, but of what? What? that echoed through my brain. Then I heard the accusation repeated. I, of good family—honored by my friends—respected by those who know me—I accused of SUCH a thing!

"I wonder now that I did not kill the person. Cold shudders shook me. I trembled—my brain became numb. No, I did not faint. I served in France and am not of the fainting, clinging vine type. First, there was a feeling of outraged womanhood. Then came a desire to slay the thing facing me—this alleged man.

"The terrible thing is not so much that I was accused, though that is bad enough, but that any innocent woman is apt to undergo the same horrible experience. Suppose that a woman, in all innocence, asks the man next to her the time. Suppose that an usher sees the incident and reports it to the manager. Then a woman's reputation is blasted—and why? I know that there are men pests in all theatres who annoy women. But I have never heard of a woman being accused by any man. The man next to me certainly never complained. We were acquainted. Then why should I have been accused?"

Mrs. White was pale with anger as she spoke. Twice her friends have dissuaded her from taking the law into her own hands.

"I have brought suit against the manager, not only for my own sake," she continued. "Of course I want my accuser to suffer, for I am angry enough to demand an eye for an eye. But more important is that in making an example of my accuser I may save some other woman from the ignomy of a similar humiliation."

Mrs. White was born in Paris, while her parents were returning from Egypt. At the mature age of one, she was taken to India, where her father was stationed with his regiment. From her sixth to her thirteenth year she lived in Ireland. Then came a spell in a convent in France. At eighteen she returned to Ireland to take her rightful position in society, as the granddaughter of the Duke of Leinster. While in Devonshire on a visit, she met Lieutenant White, to whom she was married shortly before the outbreak of the war. Lieutenant White was attached to a Welsh regiment, which saw action from the very first day it landed in France.

In the meantime, Mrs. White had entered the service with an ambulance unit. She, too, saw actual service, and was under fire a number of times. After the death of her husband Mrs. White traveled—to forget. India saw her again—so did Ireland—so did Spain. Then came a longing for America, the land of the tolerably free. So she came to this country, to be followed from the other side of the world—from India, by the major. He had been invalided because of his wounds and had visited India.

Since then Mrs. White has been traveling about the country, admiring all its institutions save motion picture managers. She praises everything American.

And Ann Forrest in real life still walks the streets—visits the theatres, the restaurants—the possible victim of mistaken identity—of a vicious detective—of blackmailers. Just how to prevent contretemps of this type proves puzzling.

Perhaps Mrs. White, with her experience to gaide her, can solve the conundrum, that in the future innocent women may not be accused wrongfully—and shamefully!

NEARLY ALL THE BOXING TITLES GO BY DEFAULT

Entrants Fail to Show Up for Finals and the City Champions Have Easy Road to the Honours—Some Cold Feet in Evidence.

Through various causes, for none of which the management were responsible, the finals in the city boxing championships, under the auspices of the P.A.A.A., at the Grand last night were more or less of a fizzle. Several of the boys in the various classes were unable to compete on account of injuries, and in other cases there was considerable suspicion of cold feet. At all events, most of the titles went by default, and the programme consisted chiefly of matched bouts that had no bearing on the championships.

Here is a list of the title-holders, some of whom did not have to compete at all to earn the honours:

100 pounds—Jerry McGill.

Joe Jordan hurt his arm on Monday night, and could not go on.

108 pounds—Alex. Armstrong.

Cutt, who was expected to put up a battle for this title, declared the issue, and Rex, who won in the preliminary round on Monday night, also refused to go on against Armstrong.

115 pounds—Geo. Sturgeon, the only entrant to make the weight in this class who was ready to compete.

125 pounds—Irish Jordan.

Smith, Combe, and McMahon defaulted, the knockout scored by Jordan on Monday being one of the reasons. Combe won two bouts in this class.

135 pounds—Albert Legros.

Chartren, who was to have met Legros in this class, hurt his arm in Toronto, and could not compete. Cole and Murphy refused to go on.

15 pounds—Edwin Dugan.

158 pounds—G. Simmons.

160 pounds—Ted Williams.

Wrestling.

120 pounds—T. Minnicola.

135 pounds—J. Stott.

158 pounds—A. Milliard.

Mander, who was entered in the 15 pound class, was unable to get off work to compete.

Last Night's Programme.

Combe and Woodcock, of the P.A.A.A., were the first pair to go on last night, and Combe earned his second victory of the tourney by cleanly beating his club mate. Incidentally he was the only boxer to win two bouts, and although there was no use in sending him against Jordan for the class title, the youngster showed much promise, and will be heard from later on.

Jerry McGill, who won the 100 pound title by default, clashed with Milliard in a special bout, and was beaten after looking good for the first couple of minutes. The youngsters put on a godo bout.

Pethick and McAuliffe, of the Holy Name squad were also matched in a special bout. It was a tame affair.

Tony Minicola won the 125-pound wrestling honours in quick style from Hopkins of the Y.M.C.A., getting two falls in short order.

Stott, the 135-pound titleholder, and Milliard, who entered at 158 pounds, wrestled fifteen minutes without a fall. There was no decision in this bout.

The last item on the card was an exhibition bout between Ted Williams and Wilfrid Jones. The two gave a clever, fast exhibition of scientific boxing and got a big hand when they finished.

SHIFTS STYLE; FAILS TO SHOW.

Howard Ehmke of Detroit Is the Mystery Pitcher.

No brainier pitcher ever threw a ball than Christy Mathewson. He once said that a pitcher in order to be successful must develop a certain style and stick to it.

"If you find that you are most effective as a side-arm pitcher, use that style; if you can get more on the ball over-head, use that method. Of all things don't switch from one style to another as the fancy strikes you." That is the way Mathewson puts it.

That is why Howard Ehmke of Detroit isn't rated as one of the game's greatest pitchers.

Ehmke has no set style, he is under-hand, side-arm or over-head, and as a result usually lacks control and is forced to let up to get the ball over.

BRITISH LACROSSE TEAM THE VICTORS.

Meted Out a 5 to 2 Defeat to Harvard.

CAMBRIDGE, Mass., April 26.—(Canadian Press)—The Oxford-Cambridge lacrose team yesterday meted out a five to two defeat to h Harvard team. The play of Lord Wansbrough, who scored two goals for the invaders, and the work of his teammates Neylan, Pearson and Clark were the features of the game.

The Oxford-Cambridge team has four more games to play on North American soil before leaving for England on Moday. Their total scores for the international trophy own stand at 54 to 48 for American teams.

UMPIRE KLEM HOLDS RECORD.

National League Arbitrator Once Banished 22 Players.

The other day in a game at Cincinnati, Umpire Bill Klem of the National League chased 14 of the Chicago players from the bench to the clubhouse. With only 11 men available Chicago won the game 5 to 1. The wholesale banishment came in the first inning.

Someone suggested to Klem that sending 14 players to the clubhouse was a record, but the umpire says nothing doing if the count of the newspapermen in a game at New York was correct.

"In a game at the Polo Grounds several years ago I cleared the bench as the result of a decision that failed to please. The official count was given as 22.

"It looked to me as if there were 100, as the players went to the clubhouse using the lock-step and taking plenty of time."

UPSETS THE DOPE

PAT O'HARA.

Pat O'Hara, the professional of the Richmond Country Club of Staten Island, N. Y., sprang something of a golfing sensation at the recent north and south open championship at Pinehurst, N. C., by winning the title from a very classy field.

O'Hara turned in a score of 220 for 54 holes. The tourney was originally a 72-hole event.

O'Hara had turned in a 69 for his second 18 holes. Shortly after completing his rounds a terrific rain storm set in, preventing a number of other players from finishing their round. It was decided to throw all scores made in the second 18 holes into the discard.

Had the scores made in the second round stood O'Hara would have broken all records at Pinehurst with a 289 for the 72 holes.

In winning the north and south title, O'Hara turned back a great field, including such cracks as Jim Barnes, Jock Hutchison, Walter Hagen, Mike Brady and Joe Kirkwood.

IF THIS PLAY COMES UP HERE'S YOUR DECISION

If with runners on first, first and second or second, the batter interferes with the catch in fielding or throwing a ball, the batsman shall be declared out for so doing. No bases shall be run on such a play as the ball becomes dead when the batsman so interferes with the catcher.

BASEBALL

A Lucky Dog Baseball League will be organized at the Y.M.C.A. on Thursday evening at 7.30. Open to all boy teams (16 years and under) in Peterboro and district, (boys of 17 years of age in 1922 not eligible). Games to be played on any available ground. Two representatives wanted at this meeting, with names of teams and players.

The ball furnished by White Bros. 174 Hunter Street, Peterboro, to be used. A beautiful trophy or medals will be presented to the winners in this league by Frank White.

The Fire Hal Falcons ushered in the basebal season last night with a victory over the 'Campers", the score being 6 to 4.

Both teams were right on the erdge and evenly matched. The feature of the game was Cheu's great pitching for the Firemen. He was in mid-season form.

Batteries:—

Fire Hall:—Cheu and G. Le Barr.

Campers—Feely and Griffin.

EAST PETERBOROUGH.

Clubs in the East Peterborough Baseball League are been advised to appoint delegates for attendance at the annual meeting, which will be held here early next week.

Hopes to Equal Gridiron Feats on Track

CAMBRIDGE, Mass., April 26.—Fiske Brown, All-America guard and captain of the Harvard track team, aims to establish his name as prominently in the track world this spring as it is in the annals of college football.

Brown was good enough to trail along in the weight events during his prep school days at Andover and as a member of the freshman track team.

But the young giant never took the weight-throwing game seriously enough until Bill Bingham and Jim Tolbert took him in hand.

Bingham, Harvard's track coach provided the enthusiasm; Tolbert, the Crimson's best weight-thrower, on the eve of graduation, which would leave his college without a man in these events, supplied the technical knowledge.

No one took Brown as a serious factor in Harvard's track and field athletics until the Harvard-Yale athletes met those of Oxford and Cambridge last summer. Then he stepped into the ring, gazed upon the marks set by his competitors, and lazily heaved the 16-pound hammer 159 feet.

The Harvard tracksters selected Brown to lead them after his performance in the international college meet. He was already captain of the wrestling team, but resigned from that job to take charge of the major sport.

Brown's ambitions in football were realized when Walter Camp named him the best guard in the east. He's planning now to have the same fame at the close of the track season.

COBB IS POSITIVE RIGNEY WILL MAKE GOOD

Ty Cobb is positive the weak spot on the Detroit infield, shortstop, has finally been taken care of.

The Tiger leader is certain that "Topper" Rigney is destined to become a fixture and will develop into a real star.

Cobb goes even further, and says that inside of two months the baseball experts will be saying a lot of nice things about the young man.

"Rigney is certain to make good in the American League," says Cobb. "The youngster got away to a rather bad start in the Cleveland series, but that doesn't mean a thing.

"Rigney is a youngster who has never been above the Mason and Dixon line for any great length of time, and everything is new to him.

"Just as soon as he gets acclimated, gets to know his batters, and realizes that the big league brand of baseball is played just the same as in the Texas League, watch his smoke.

"Rigney is fast, can go equally well to either his left or right, and has plenty of nerve.

"Unless I am a poor judge of ball players, this young man is one of the best infield recruits that has broken into the major leagues in years."

If Rigney comes through as Cobb believes he will, Detroit will have a mighty fine infield before the season is over.

Lu Blue at first and Bobby Jones at third are both great players who have already proved their worth. They can field, hit, throw and are fast. In fact, do everything well.

Cutshaw at second is a veteran player who has slowed up considerable, yet he will be of great aid in schooling Rigney.

WHEN YOU SCORE A BALL GAME REMEMBER—

If in the last half of the final inning or extra innings with the winning run on base, the batsman drives home that run, he shall be given credit for as many bases on his hit as the runner who scores the winning run advances; except, however, that in case of the batsman hitting the ball over the fence and it is ruled a fair ball by the umpire, he shall receive credit for a home run and all runners on the bases shall score.

ED. LEWIS SUCCESSFULLY DEFENDED HIS TITLE

KANSAS CITY, April 26.—(Canadian Press.)—Ed. Lewis successfully defended his wrestling title here last night when he defeated Stanislaus Zybszko in the first and last of three falls.

CERTIFICATES READY.

All clubs in the intermediate and junior series of the City Baseball League are requested to be represented at a league meeting at the Chamber of Commerce at eight o'clock tonight, when players' certificates will be distributed.

BICYCLE CLUB.

Local cyclists will organize Thursday night into a club of men and ladies for club outings and track and road racing. All interested are invited to attend this meeting at the Y.M.C.A. at 8.30 p.m.

C. O. B. LEAGUE GAINS PRESTIGE

Brighton Sees a Successful Season Ahead

The Ensign of the town of Brighton, noted for producing winning baseball iteams, has this to say of the C.O.B.L.:

"Perhaps a lot of people don't realize it, but nevertheless the Central Ontario League is just about the fastest amateur league in Ontario, and Ontario takes in the Toronto teams at that. Belleville, the 1919 champions, won the Provincial championship, and in 1920 Peterborough champions went right to the finals. Oshawa, champions last year, were eliminated in the semi-finals.

The competition is going to be very keen this year, and as players in residence by May 15 are eligible the clubs are now engaged in a mad hunt for star performers. Bowmanville is said to have three players who wore Lindsay uniforms last year, and Port Hope has their star pitcher, Deer, again in the fold. As we have previously said, Cobourg and Oshawa are very strong. News from the Peterborough and Lindsay camps seems to show strife between management and players. Leaside is too near Toronto not to have some good ones, and Belleville can always be counted upon to be a contender. The 1922 C. O. L. champions should be Ontario champions next October.

PETES CHALLENGE.

The Post: 'The Lindsay Football Club has prospects of a game with a strong Peterborough team in the arrangements are completed. The game would be played on a Saturday and would be a hard struggle.

Don't Neglect a Cold

Mothers, don't let colds get underway; at the first cough or sniffle rub Musterole on the throat and chest.

LIVER TROUBLE

BAD BILIOUS ATTACKS

When your liver becomes sluggish and inactive your whole health suffers. Your bowels become constipated, the tongue coated, the breath bad, the stomach foul and sick, and bilious spells occur on account of the liver holding back the bile which is so essential to promote the movement of the bowels, and the bile gets into the blood instead of passing out through the usual channel.

The only way to keep the liver active and working properly, and thus get rid of the nasty bilious attacks, is to keep the bowels regular by using

MILBURN'S LAXA-LIVER PILLS.

They are purely vegetable, small and easy to take, work smoothly and gently, and there is nothing of the griping, weakening and sickening effects of the old fashioned purgatives.

Mr. John S. Caron, Tanavon, S writes: "I was troubled with my liver and had severe bilious attacks. A friend advised me to try Milburn's Laxa-Liver Pills, so I took two vials and have had no more attacks."

Outfielder E. Roush Fails to Get Terms.

CINCINNATI, April 26.—(Canadian Press.)—Eddie Roush, hold-out outfielder of the Cincinnati National League team, returned to his home at Oakland City, Ind., yesterday, after a futile effort to come to terms with officials of the Cincinnati club. His final conference to-day with President August Herrmann lasted five minutes.

IF THIS PLAY COMES UP

Heres' Your Decision.

An infield fly is any fairly batted fly ball that in the opinion of the umpire can eb handled by an infielder. The infield fly rule applies with first and second or first, second and third base occupied and less than two out. The umpire always rules the batsman out on such a play.

A ROOKIE MAKES A GREAT DEBUT.

McMillan Honored By Fourth Place in Yankee Lineup.

It is doubtful if a rookie ball player has ever had the honor conferred on him that goes to "Bub" McMillan of the New York Yankees.

Unheralded in the spring, given only slight consideration as a major league possibility, McMillan is holding down the clean-up position of the Yankees, fourth place in the batting order.

McMillan is a third baseman. He was with Rochester last year and hit .319. His ability to hit, and the failure of other outfield prospects to come through, caused Manager Huggins to shift him to the outfield.

McMillan bats right-handed and takes a mean cut at the ball. He has had only one year of professional experience, coming to the Yankees from Clemson College last year, and was sent to Rochester for development.

MARION ZINDERSTEIN JESSOP.

Mrs. Marion Jessop, better known to the tennis world as Marion Zinderstein, has again captured the championship honors of the women's north and south tournament, recently completed at Pinehurst, N. C. Mrs. Jessop won the same title four years ago. In the finals she defeated Martha Bayard, 6-1, 6-1.

BICYCLE RIDERS MUST KEEP OFF THE TRACKS

Efforts To Warn Them Has Not Been Very Effective—Police Court Next.

W. H. Howard, G.T.R. detective here, has spent several days in an effort to persuade bicycle riders to use the regular highway instead of the G.T.R. right-of-way, as many of them do below Wolfe street. The next warning will come in the form of a summons to appear in Police Court, where the results will doubtless be more permanent and effective.

GOLF HELPED SCHAEFER WIN OVER HOPE

Discarding Tradition, the Billiard Champ Takes Up Golf and Claims it Greatly Aided Him in Capturing Title From Classy Field.

By BILLY EVANS.

Golf seems to be a conditioner for every other line of sport.

Jack Dempsey, heavyweight champion, is strong for golf. While far from a Jock Hutchison, Dempsey plays a pretty fair game.

During spring training trips most of the athletes play as much golf as baseball. As a matter of fact, some managers are of the opinion that golf is being overdone by the ball players.

Jake Schaefer, billiard champ, is the latest titleholder to sing the praises of golf.

While most of the star golf players are expert at billiards, Schaefer is the first billiard player of note to risk his hands swinging golf clubs.

Schaefer insists that the use of the wooden and iron clubs improves his long game of billiards and that the short golf game, putting and pitching, is helpful to his short cushion work, nurse and masse shots.

"My father always advised that I stay away from all outdoor sports to protect my hands. When I took up golf many billiard players shook their heads. They figured my billiard game would be ruined.

"A billiard player, like a golfer, must have extremely supple wrists and fingers and free working shoulder joints. Golf has improved my billiard game.

"The only danger to a billiardist in golf is that his fingers might stiffen a little. But I have never been bothered that way."

Willie Hoppe, who tried in his recent match with Schaefer to regain the title that he held for a dozen years, is a great lover of baseball.

Hoppe once told me that he greatly regretted that he didn't go in for baseball as a kid rather than billiards. Hoppe always regarded billiards as a business rather than a sport.

Really no game is more dangerous on the hands than baseball, yet Hoppe used to take all kinds of chances. When playing exhibitions in a major league city he usually worked out with one of the teams prior to the start of the game.

In this respect Hoppe used to make all kinds of worry for his manager. Fortunately, however, his love for baseball never in any way slowed up his billiard game.

SPORT NOTES.

Poor old Belleville is having her troubles. Freddy Goyer has gone to Guelph and Peeney Mills, the best back-stop in the league, has taken on to himself a blushing young bride. From here it looks as if that enthusiastic rooter, Mr. Tice, will not have much opportunity of developing his lungs this summer.—Port Hope Guide.

NEWTON AND COYNE TO MEET

Toronto and Ontario Champions to Clash in Peterboro on Monday

All doubts as to who would oppose Walter Newton of Toronto, the Ontario 135 pound champion in the feature bout of the Wm. Hamilton Athletic Club's big card in Brock street rink next Monday night were set at rest yesterday when a telegram was received that Tommy Coyne, of the Classics, who is the city champion of Toronto, will clash with Newton. It promises to be a memorable engagement. The two boys are rivals and each has had a decision over the other, so that the mill between the two will attract a lot of attention in Toronto as well as here. They are listed among the best amateurs in Canada and Newton's fame is international.

Trickey, of Toronto, who came within an ace of winning the 125 lb. Ontario title, will be sent against Irish Jordan. The Peterborough boy has the wallop, but Trickey is scienced and fast and his speed may win him the decision so long as he keeps out of the way of Jordan's haymakers. It will be a slugger against a clever boxer and that always makes an exciting bout.

Ted Williams, whose work against Jones last night pleased the crowd, will meet Rube Maddeux of the Classics, and the two middleweights should give an exhibition that will please the fans.

Five or six local bouts will complete the card. All the bouts are slated to go three rounds, with Sid Simmons, formerly of Toronto, as referee. There will be a decision in each class.

MERCANTILE FIVE-PIN LEAGUE

Linemen Take 3 Straight From the Prudential Life.

The Linemen came back strong after their out-of-town spree at Agincourt, winning 3 straight games. They thought it nothing knocking down the small five pins after wrestling with telephone poles. Ward says that he thinks he had too much exercise in that village not far away or he would have hit over the 900 mark. Oh my! what an imagination. Jack Robinson sure did murder the pins, hanging up a grand total of 685. J. J. Cocks was a companion in crime with 649. Others who hit them strong were Flaherty, Jory and D. White, all hitting over 500. The first game was very close, the Linemen winning by one pin. The following are the scores:

Linemen.

A. White	132	113	116— 361
D. White	161	255	166— 582
Ward	175	177	132— 484

(Contined from page 1.)

Peter Veghazarian, proprietor of a boarding-house at 148 Darling Street, where Dent and his wife and family lived. Yeghazarian has lived in the city for about fourteen years, it is believed.

Dent, the suspected murderer, is a short, stocky individual, possessing a swarthy complexion, about 40 years old. The police believe that he has been away from the city for several months, coming back here a few weeks ago. He is a butcher by trade, according to information obtained at the Police Office, and has been wearing his Canadian army infantry uniform of khaki while seen walking about the city streets. This was on him when he was arrested, though it was a private's uniform and not that of a corporal as a tunic found in the Dent flat showed, or that of a sergeant-major. A tunic with this insignia on one of the sleeves was also found at the Darling Street house.

Was a Butcher.

Considerable importance is attached by the police to the fact that Dent is a butcher, and this may help to fasten a web of guilt around the accused from the reason that only a butcher or a person well versed in a knowledge of the human anatomy could have severed the different portions of the slaughtered man's body in such expert fashion.

Bits of the victim's person show this clearly, and in a close examination of the remains, it was found, too, that the internal organs had been removed cleanly and without any trace. All of these are missing, and have not yet been recovered. Parts of both legs are also not to be found.

Dent Cross-Examined.

In the Police Station, Dent was put through a cross-examination by Chief Slemin, Crown Attorney W. M. Charlton, and members of the police force, in which the man stoutly protested his innocence of the crime.

During the examination, Dent was shown the remains of the murdered man, and he stated that he was not able to see or identify him.

"The place is dark," he commented when asked by one of the constables who the murdered man was.

A match was struck and placed near the face of the murdered man, and at once the face of the suspect lit up as he said, "Why, that is Pete."

Dent was taken into the Chief's office, where the examination was continued behind closed doors, under the direction of Crown Attorney Charlton.

No further information was gleaned from the examination in the Chief's office, and the man was taken away to the cells.
Ad Brantford murder

Had An Alibi.

John Carmainian, the man who resides at the residence of the murdered man and the suspect, was then taken into the Chief's office, where he was questioned and he presented a perfect alibi. He stated that he had been working until about 7.30 and he had then taken a walk around the streets and wended his way home, having just retired for the night when the police arrived at his door demanding admittance. He was allowed to return to his home as the crown did not consider that he was a material witness at the present time. The police then made a second visit to the house and they made a thorough examination of all the surroundings. It was noted by Acting Detective Stanley that one patch of ground had been spaded only recently and he had at once started to dig, but he did not find anything. One thing that is registered as peculiar by the police is that the garbage can was about half filled with fresh earth. This led the police to believe that some of the remains had been buried and then exhumed.

The wife of the suspect was taken to the police station with her youngster, a child of a few weeks, and as she was a material witness she was kept there for the balance of the night.

In the mother's absence the kiddies at home, of which there were two, started to go and look for their mother on the street, and it was only by the quick work of P. C. Brittenden that the youngsters were taken back to their home and sent to bed. Later the mother was sent for and she was ordered to dress the kiddies and take them to the police station.

Officers advance the theory that one bundle may have been dumped in the canal before Dent was seen and with this in view it is more than likely that the canal at that point will be dragged in an effort to locate the missing parts of the murdered man.

P. C. Brittenden was left in charge of the house for the remainder of the night.

A SUCCESSFUL TEA BY YOUNG LADIES' SODALITY

Pretty Decorations and an Excellent Programme

A very pretty tea, attended by over 200 people, took place yesterday afternoon in the recently-constructed ground hall at St. Alphonsus' Lyceum, under the auspices of the Young Ladies' Sodality of St. Peter's parish.

The hall was attractivey arranged with high screens adorned with foliage, while white lattice work against the rounded pillars held strands of pussy willow and large cornucopias filled with spring-like artificial pink cherry blossoms and snapdragon. A bowl of cut pink and white carnations centred the large table, with vases of the fragrant blooms on dainty individual tables, and pretty blue and white menu cards. Blue and white streamers also symbolized the colors of the Association. The fern-banked piano on the prettily-arranged stage supplied music for the afternoon, played by members of the society, with a phonograph filling in gaps in the programme, to which Miss Ernestine McManus and the Misses Murray contributed vocal solos.

Miss Marion Hayes was convenor of arrangements. The Misses May Kelly, Norah Shevlin, Aileen Ahearn and Myrtle Shaver received the guests, with Miss Kathleen Clancy at the door. Miss Katie Sharpe had charge of the salads, and Miss Margaret McGrath of the tea. Assistants at the various tables were the Misses E. McCabe, R. Maher, H. Lane, A. Kelly, M. Galvin, M. O'Brien, Edith Thompson, Veronica Egan and Frances Clancy.

AGAINST WHEAT BOARD.

OTTAWA, April 26.—(Canadian Press)—Wheat prices in Canada must be governed by world values and world crop conditions declared James A. Richardson, Winnipeg Grain exporter to the House Committee on Agriculture today. To try and enchance the Canadian wheat prices above world value "would be to hold a umbrella for other wheat producing countries to sit under., He believed an attemp to continue the wheat board would evenually "land us in rouble."

GAS UP ONE CENT.

NEW YORK, April 26.—(Canadian Press)—Standard Oil Company of New Jersey today announced an increase of one cent per gallon in the export price or gasoline for the New England district.

"IRENE" AND HER FAMOUS "ALICE BLUE GOWN" WHICH WILL BE THE ATTRACTION AT THE GRAND, TONIGHT.

AT THE THEATRES

GRAND—This evening, the most talked of musical play in the world, "Irene." The original Chicago and New York company.

CAPITOL—Mark Twain's greatest comedy, "A Connecticut Yankee," the greatest screen production of the year. Also balance of a Capitol first-class programme.

REGENT—Very special, Dorothy Gish in "Flying Pat." Also Mabel Normand in "What Happened to Rose."

ROYAL—An exceptional bill, including "Two Minutes to Go," Vitagraph spectacular feature, "Received Payment," and the funny Toonerville comedy in which "The Skipper Gets a Surprise."

AT THE GRAND.

"IRENE" TONIGHT.

With its lilting tunes, its pungent satire and amusing situations to say nothing of its romantic love story, "Irene" the musical play by James Montgomery, wth music by Harry Tierney and lyrics by Joseph McCarthy which astounded the entire world by its phenomenal success, will be presented by the Vanderbilt producing Company at the Grand tonight, in the same lavish manner it was as during its unprecedented run at the Vanderbilt theatre, New York, and with a company and production worthy of the work, for this is one of the few big metropolitan hits which have not been founded out to be hackneyed by cheap companies and poor casts, the entire organization being under the management and control of its original sponsors, ensuring the amusement lovers of Peterboro a performance equal to any seen in New York City

AT THE ROYAL.

It is customary, in writing a review of a picture programme, to leave the light comedy for a last and perfunctory notice. However, in tonight's programme there is a bright two-reel comedy called "The Patrol Squad" that is worth a better place than "among the also ran," as they say at a race meeting. In this comedy Jack Bevan, an actor designed by nature for burlesque, as Sir Henry Irving was for tragedy, plays the leading role. He begins as janitor in the Police Commissioner's office and ends as a police detective. When a policeman, a peteman (burglar) robs a safe in which the police pay money is stored and suspicion fixes on the cop, as being the thief. A burlesque in the third degree is worked on the suspected cop to get him to confess. However, he eventually proves his innocence, captures the real thief, and also captures the heart and hand of the stenographer, his "candy kid." A very funny comedy farce and one guaranteed to chase away discontent and the blues. Charles Ray in "Two Minutes To Go" plays to perfection the part of an ambitious college student, who is not too proud to drive a milk waggon to pay for his college course. His girl, a member of the 400, admires a man not too proud to work, but despises a man who is ashamed of such work. The play is esentially one of college days and student life. The "motif" of the plot lies in the hero's winning an inter-college football match for his Alma Mater. A safe estimate of the crowd present at the big football game in this picture would be full twenty thousand. It is a picture for young people and for old people who want once more to feel young. Corinne Griffith in "Received Payment" displays her superior forensic ability. The story deals with a rich old man, who in his declining days suffers mental torture because he drove his daughter, when she married an actor, from his home and life. However, his old age is rendered happy when his granddaughter comes to his home and heart, even though she insists on following her profession as premiere danseuse on a roof garden. A plot in which pathos, emotion, love, crime, and humour combine to the development of a happy termination.

Capitol Entertainment

Beginning tomorrow for the last three days of the week the feature picture will be "The Man From Lost River" with House Peters. The latest Christie comedy—"Falling for Fanny" with Eddie Barry. Cameron Geddes noted bassoProfundo, who last night charmed Capitol audiences with his singing, will be held over for the last three day. Mr. Geddes is one of the most out standing singers that has yet appeared on the Captiol stage, and music lovers should ot miss the opportunity of hearing his splendid voce.

"THE MAN FROM LOST RIVER", NEW POWERFUL GOLDWYN PHOTOPLAY

The latest Goldwyn production from the pen of Katherine Newlin Burt, who made a spontaneous success with her two previous stories, "The Branding Iron' and "Snow-blind", is 'The Man From Lost River." Like her previous stories, Mrs. Burt's latest photoplay has the far West for its setting.

The sory tells of the triumph of a strong foreman in a lumber camp over a weak bu charming character who settles in the camp. The heroine is at first dazzled by the glibness of the new arrival. And until a time of crisis, she is unaware of the sterling qualities that exist beneath the stern exterior and the tongue-tied manner of the man who can control men but is helpless in the presence of women.

House Peters, as the foreman, powerful in physique and firm of character; plays the leading role in The Man From Lost River" which will be shown at the Capitol Theatre for three days, beginning tomorrow The girl in the story is beautifully impersonated by Fritzi Brunette, while the third angle of the triangle is upheld by Allan Forrest.

Most of the scenes in the picture were taken on a government forest reservation at Lake Hutington, in the Sierras; and one of the most powerful incidents shows a gigantic tree being felled by the lumberjacks The government gave the Goldwyn company permission to fell three trees and lent several of its forestrs to assist the actor-woodsmen in filming his part of the picture. The story is not only one of acion, but involves a play of character upon character. It is a picture that should not be missed.

THE MARKETS

NEW YORK, April 26.—(Canadian Press)—Tone of stock market was iregular at opening of today's session. Issues of same decription showed confusing gains and losses. Cheaper domestic oil continued to strength on further advances in prices of refined products but foreign issues, notably Mexican Petoleum were heavy. Barnsdall A, soon rose 2 1-2 points, Cosden making similar gain. U.S. steel was firm but but Kindred shares eased moderately.

Oils comprised fully 30 per cent of 375,000 shares traded in first hour. There were many substantial accessions to early advance in this goup. Standard oils of New Jersey and California, Pacific Oil, California Petroleum, Houston, Associated and Pierce prefered rose one to three points. Among rails, steels, equipments and motors further selling was in evidence. Louisville and Nashville fell 1 1-2 points and the Transcontinental Grangers, coalers, Leigh Valley expected fractionally lower. Call money opened at 3 1-2 per cent.

Realizing sales in specialties and active bear selling had an unsettling effect on sentiment and stocks were poured out in liberal fashion for a while after midday. Many shares suffered losses of one to two points, comprising Railroads, Studebaker, Mexican Petroleum, General Asphalt, American Locomotive, American Sugar, Marine Preferred and Retail Stores. Republic mounted 2¼, U.S. Steel Preferred, Sloss Sheffield, Gulf States and Lackawanna 1¼ to 1½, and Standard Oil of New Jersey four points.

CHICAGO GRAIN MARKETS.

CHICAGO, April 26.—(Canadian Press).—Opening wheat prices were varied from 1-8 to ¼ higher, with May 1.42 to 1.43 and July 1.27½ to 1.23¾, which followed by a re-action to about yesterday's close in some cases, but then by a fresh advance. Corn and oats averaged higher with wheat. After opening ¼ to 3-8 off to 1-8 gain, July 63 7-8 to 64 1-8, the corn market sagged a little all around, but then scored a general upturn. Oats started unchanged to 3-8 to ½ higher, July 40¼ to 40 3-8, and continued to show strength.

TORONTO STOCK MARKET.

TORONTO, April 26.—(Canadian Press).—Declines were more pronounced than advances in listed stocks on the Toronto Stock Exchange this morning. C.P.R. headed a downward movement with a net loss of 1 3-4 from yesterday, with the close at 144½. Atlantic Sugar lost 7-8 at 21 5-8, Brazilian and Steamship Preferred lost ½ each at 44½ and 50 respectively on the close. Gains of from ½ to 1-8 were made by the Toronto Railway, Bell Telephone, Barcelona and Mackay. Bonds were quiet.

West Virginians Say She's Country's Champion Speller

MISS MADELINE BARNES.

FAIRMONT, W. Va., April 22.—The champion speller in the elementary schools of the United States!

That's the title which the people of West Virginia claim for Madeline Barnes, 16, who missed only one word out of 300, in a district spelling match, and only four out of 400 in a county spelling match here. She is already the acknowledged champion speller of West Virginia.

Miss Barnes is the daughter of Mr. and Mrs. G. W. Barnes, of Colfax, Marion County.

"If anyone thinks he can equal Miss Barnes' record, he should try some of the words she spelled without the slightest idea of what they woud be," says the superintendent of the schools of Marion County.

"Just have someone read a few of these words which she was correct on, and you try and spell them correctly:"

Allegiance, disastrous, calipers, apologise, moccasin (snake), exuded, tureen, perspiration, coupe, omnibus, conveyed, consensus, venomous, galvanising, corroding, occurrence.

In the district contest Miss Barnes missed what was regarded as one of the easiest words—automobile. And it's a word she says she knew how to spell before she entered school.

57TH CHAPTER OF I.O.D.E. TO HOLD MILITARY EUCHRE

The regular monthly meeting of the 57th Regimental Chapter, I.O.D.E. was held yesterday afternoon.

The Chapter decided to ask Mrs. Burkholder of Hamilton to represent it at the annual convention of the I.O.D.E. in Vancouver in June. The forthcoming lecture under the auspices of the Rotary Club at which Dr. Barker will speak, was also discussed, and it was decided to hold a military euchre and afternoon tea in the Armories, on May 17th. The Chapter will decorate the graves as usual on Empire Day.

POSTAL EMPLOYEES RECEIVE SURPRISE

Action of Government in Cutting Off the Bonus Causes Foment at Post Office.

Expressions of discontent among the postal service employees over the discontinuance of the bonus are becoming loud and the dissatisfaction around the post office is increasing, according to authentic information. Like a bolt from the blue, the men say, the bonus was cut off on April 1st, and their pay envelopes received on April 15th contained aounts varying from $15 to $25 less than previously.

Had their salaries been advanced during the war in keeping with the cost of living the retirement of the bonus might have been considered justified, the employees claim, but during the war they received no permanent increase, and it was not until 1918, when the situation became desperate, that the bonus was put on. The letter carriers declare they received during the war only $2.85 a day, while other government employees were drawing salaries far in excess of that amount.

Twenty three letter carriers have been affected by the cut here, and the married men are particularly raising up their voices in protest, as the single men will now receive the same salary as they do. The bonus to married letter carriers who start at $740 and have a maximum salary fixed at $1260, has been $315, while single men have received $187. The bonus of the postal clerks has been the same as the letter carriers, and the office men are affected locally in the same way as the men who deliver the mail. Only the executive officers have escaped the avalanche, it is said.

There are hopes that the cessation of the bonus has been only temporary and that the government will re-establish it. Employees in the postal service here claim that they had no notice of the cut they were in for on April 1st and until they received their cheques were not aware of any change in the government policy. Since April 15th the Post Office has seethed with dissatisfaction and the Dominion-wide situation is said to be the same on a larger scale.

FIRST ACCESSORY FOR A MOTORIST.

Hazards So Great That All Should Carry Insurance.

So great is the hazard of a motorist becoming a prey to an accident, sooner or later, no matter how vigilant and cautious he may be nor how completely guarded by preventive measures and devices, that one is amazed that practically all motorists do not carry automobile insurance. A back-fire in the carburetor, a short circuit in the ignition wire, spontaneous combustion in oil soaked waste of rags may cause a fire that will destroy a five thousand dollar car in "no time." Or perchance a garage is razed by fire—and with it many cars. Many cars have been stolen despite the ingenuity of locksmiths—and sometimes locks are inadvertently left "unlocked," and some locks yield to a hair pins' touch. Many a motorist has returned to his parked car to find it has been damaged in his absence—or its equipment stolen. Seldom do the vandals in such cases leave a trace. Daily through no fault of the drivers, cars do damage to property and persons—and thousands of motorists have learned to their disgust and loss that juries are infallible in placing onus in these cases. Thousands of motorists, too, have had recourse to the courts in an effort to collect damages, their cars or persons have suffered by reason of the carelessness or recklessness of others, sometimes to have their cases dismissed, sometimte to have judgments given against them and sometimes to get judgments against insolvent, irresponsible parties. Sadder, wiser and poorer men they realize that judgments are not negotiable paper, let alone legal tender and do not make even attractive decorations when framed. Time may make them an asset—but seldom does.

A cotton pin dropping out of the brake linkage, a tie rod pin fracturing, a broken ball bearing, a blow out, at times may result, as many times they have, in an accident costing thousands of dollars in damage. There are a multitude of accidents what the utmost caution and precaution have not averted and will not avert. To those motorists who prefer to underwrite some of their car insurance, be it said that the greatest of these coverages, the most important are public liability and property damage. Some motorists can afford to carry the hazard of damage to or loss of their own property through collision, theft, fire or transportation, but few can afford to liquidate a judgment of five, ten, or twenty thousand dollars as a result of damage to another person or persons or to property not their own. It is true a millionaire can—but millionaires don't.

Quite aside from the indemnity feature, obviation to large extent of court proceeding, (for seldom does an insurance company have recourse to the court), and other obvious advantages automobile insurance is a big investment—in peace of mind. And so, considered by and large, we deem automobile insurance the best, the most invaluable accessory on the market and the first in which a motorist should invest.—Canadian Motorist.

Which Way Are You Going?

If you wish to reach health it will be to your advantage to investigate the science of CHIROPRACTIC. It teaches that behind all spiritual, intellectual and physical expression there is an INNATE INTELLIGENCE that expresses itself in all functions and faculties, and that this intelligence is expressed through the medium of the brain and nervous system.

THE PROBLEM OF LIFE

Life is a problem. Something about it always demands a solution of its importance and meaning to us. The question comes up, what is life? Answer this question in every way and you will admit that the right answer is: Life is bodily health. Life, then, is in us only in degree as we are healthy.

NATURE IS THE AUTHOR OF HEALTH

Nature's life-giving forces coursing uninterruptedly through the body will afford health. Chiropractic is a science which is in harmony with Nature, because it is in agreement with the principles of Nature's laws as they apply to the mechanism of the human body. CHIROPRACTIC VERTEBRAL ADJUSTMENTS restore the misaligned vertebrae of the spine to normal position and relieve nerve pressure.

THE GERMAN TREATY

GENOA, April 27— (Canadian Press)—Representatives of big and litle ententes and Portugal expected to have before them in final form to-day statement to be presented to Russian delegates in answer to their counter proposals which Allies found unacceptable.

Statement is being drawn up primarily to satisfy Britain, France and Belgium, who are heaviest creditors of Russia. In answer to Allies, Russians appear to have made no reference whatever to war debts which Allies said they were ready to "scale down".

ADVISORY COMMITTEE PASS BUILDING BYLAW

Fire Limits Are Extended South and West

Council's Property Committee, with an advisory committee from the Peterborough Builders and Supply Association, considered the proposed new building by-law which City Engineer Parsons has been working on for some time, at a special meeting last night. The conclave was an amicable one, and the suggestions of the builders were given every consideration.

By eleven o'clock the by-law had been gone over and passed on to the Council with several recommendations, of which the most important was that of enlarging the fire limits. The committee recommended that the limits be extended from the present centre line of King Street on the south to Dalhousie, and also extended one block further west from midway between Aylmer and Bethune to midway between Bethune and Stewart Streets.

The following represented the builders: President G. H. Duncan, James Bogue, George Sloan, Thos. Ephgrave and Robert G. Sturgeon.

Seeding Operations General by Saturday

Although the opinion seems to be general that spring farm work is considerably behind its schedule, an Otonabee farmer who has kept a record of his first day's sowing since 1898, told The Examiner that the average for that period was 22nd April.

According to that basis, the present season is only a few days late. Sowing is expected to be in full swing in Otonabee by Saturday, and farmers are said to be generally satisfied with this season's conditions.

The clover crop is said to have come through the winter in good condition, and fall wheat is also looking good, although some patches appear to have been touched by recent frosts. But on the whole, the outlook is encouraging and satisfactory.

DOUGHTY WORKING IN THE SHOE SHOP

Warden Claims Prisoner is Not Being Given the 3rd Degree at Kingston

KINGSTON, April 27.—(Special). —J. C. Ponsford, warden of Kingston Penitentiary, interviewed to-day in regard to the published statement in a Toronto paper that the prison authorities were "trying to breakdown" John Doughty, now serving six years for the theft of Ambrose J. Small's victory bonds, said:

"That is a dirty, low-down lie. That story is manufactured. There is no foundation for it. Doughty has not been on the stone pile. He has been employed in the shoe shop."

"Is he in good health?"

"Yes, he seems to be in good condition. Such a story as that is a malicious lie. What interest have we here in breaking a man down? Our business is to build him up."

"We have nothing to hide here," added the Warden warmly. "Doughty is being given good treatment. He has been employed in the shoe shop for some time. We have no interest in the Small case, and no reason for trying to 'break him down' as is alleged. We are here to take care of our prisoners."

When informed that Doughty's brother was said to have visited the prisoner a week or so ago, the Warden said that if it were so that the brother was responsible for such a story being circulated, he would never be allowed to see Doughty.

Embargo on Asbestos Export

MONTREAL, April 27 (Canadian Press). — That an embargo on the export of new asbestos, which has been persistently suggested from certain quarters lately, would sound the death-knell of the asbestos mining industry of Quebec, was the warning issued here yesterday by President W .C. Ross, at the tenth annual meeting of the Asbestos Corporation of Canada, Limited.

Buiness at the meeting was of a routine nature, the financial report being adopted and the retiring board elected without change.

CONVERSATION BY RADIO IS COMPARED WITH 'PHONE

ROCHESTER, April 27.—Talking by radio may become as private as talking by line telephone.

Earl C. Karker, instructor at the University of Rochester, says it is possible. He has already worked out a method of guiding short wave lengths.

Scientists are trying further to give radio waves a sense of direction that will keep hit-and-miss radiation out of the air. If they succeed, private radio conversation will be possible.

Still Inefficient.

"Radio transmission," says Karker, "even at best, is still a very inefficient system of communication because it lacks directional properties. Radiation occurs practically in all directions.

"Someone soon will undoubtedly evolve a means of directing these waves in a beam similar to the effect produced by using a reflector with a source of light. By this means, the entire energy of the light may be directed without great decrease in intensity in a given direction for a considerable distance.

"Radio transmission by such a device will be accomplished with much less expenditure of energy.

"Antennae are directional to some extent. But nothing much has yet been done in the way of reflecting radio waves. Of course, the magnitude of the reflector would have to be enormous if we keep on using the same wave lengths that we use now.

"But may it not become possible by the use of a reflector to produce sufficient radiation in a given direction at a much shorter wave length?

EARL C. KARKER.

"One can now reflect short radio waves by merely placing a metallic reflector behind them. I have done it.

"The waves are sent out in parallel beams, caught by a similar reflector and brought to a focus with a corresponding increase in energy at the focal point."

Sounds easy.

"Some day," adds Karker, "the large transmitting and receiving stations may find that it works out just as easy as it sounds."

HORTICULTURAL WEEK THIS CITY ANNUAL FIXTURE

May 1st to 6th Set Aside For This Year's Efforts, For Which Offers of Co-operation Pouring In.

BEAUTIFY THE CITY.

Recognizing the part that horticulture plays in developing a city beautiful the Horticultural Society has set aside next week, May 1st to 6th, as Hortitcultural Week. In every way, with the co-operation of the citizens generally, it is hoped to make the initial effort in this regard successful, and following in natural sequence on Clean-up Week it is hoped to make it an annual fixture. Through consistent hammering of the idea of clean-u in all sections of the country great improvements have come about, and the Horticultural Society hopes to have just as happy results in the new venture.

Drive For Members.

There are now 256 members in the Horticultural Society, and during next week each member is to bring in another. In this way it is felt the objective of 500 members can be easily attained. Although the idea has only just been brought to the front, offers of co-operation are coming in from all sides. Grafton company have kindly consented to allow the Society to place a display of options in their large centre window for the whole of the week. Turnbull's have promised to place a real life-size garden in their window, such as attracted a great deal of attention last year. The Society is anxious for suggestions that will make the week a big success, for the members feel that the joy of planting and growing is something they cannot hold selfishly, but must go out and tell as many on the sidelines about it as possible. The co-operation of the schools is being sought, and the Society is fully aware of the importance of getting the youngsters in the schools interested.

Flowers For Hospitals.

The exhibit at the Motor Show proved quite successful, 21 new members being enrolled. An indication of the work the Society is endeavouring to do is found in their initiating a movement to have flowers placed in the public wards of the two hospitals during the summer months by the Kiwanis and Rotary clubs. The co-oepration of the clubs is anticipated and the Peter Robinson Chapter, I.O.D.E., is being asked to take the responsibility for a flower bed at the Children's Shelter. Letters are being written to all of the churches, drawing to their attention the desirability of beautifying church grounds with one or several flower beds.

Last Fall's Work.

The results of careful work last fall is being seen in the fine rows of tulips that are up at the plots in Central Park and at the triangular plot at Inverlea Park. A full bloom should colour the landscape

GET TRUTH OF HYDRO AFFAIRS

Premier Drury Assures Deputation No Changes Contemplated in Power Act.

TORONTO, April 27 (Canadian Press). — The Government will consider the appointment of a representative of the municipalities to the Chippawa Investigating Commission providing it is given a list of six or eight nominees from whom to choose.

Municipal representation on the Hydro-Electric Power Commission is receiving careful consideration, and may become an accomplished fact in the near future.

Government assistance to secondary Hydro lines in rural districts is desirable, but financially impracticable at the present time. No changesin the Hydro-Electric Power Act are contemplated by the Government. These assurances were given by Premier Drury early this afternoon to a large deputation from the Hydro-Electric Association of Ontario.

"For the sake of Hydro development, the Government intends to get down to the truth," the Prime Minister declared, in touching on the discussion of the Chippawa investigation.

HAVE NOT DECIDED ON FIRE CHIEF FOR PETERBORO

TORONTO, April 27. (Cpecial.) Members of the Fire, Water and Light Committee of Peterboro City Council, went into session in the Carls-Rite Hotel at 2 p.m. to-day to consider the appointment of a fire chief for Peterboro.

Several aplications for the position are being examined.

At 2:30 Mayor Taylor of Peterboro, announced that no decision would be reached until late this afternoon.

QUICK SALE OF HAY

A well-known inspector of the City, who is fortunate in owning a good Farm, advertised in The Examiner on Saturday that he had a Quantity of Good Pressed Hay for Sale. By Monday afternoon he was "making hay while the sun shone," having disposed of nearly his whole stock.

He told The Examiner on Monday that "they were coming from all over after his hay. "I must have sold five tons today while eating my dinner." He said it showed that the little For Sale Advts. fill the bill. The inquiries came from different sections of the city and country, showing how generally well read these little Condensed Ads are that appear in

THE HISTORY OF METHODISM IN PETERBORO CITY

Revs. Malott and Young Give Interest - Holding Addresses at Methodist Social Union.

THE FIRST CHURCH

The annual meeting of the Methodist Social Union took place last evening in Reid street hall, with a good attendance. Rev. H. M. Manning presided, and representatives were present from the four Methodist churches of the city. Reports were received from the Church Extension committee, and election of directors took place. The directors, who meet later to appoint their chairman, include: Rev. H. M. Manning, Dr. M. A. Morrison, Dr. J. E. Middleton, Messrs. A. W. Cressman, B. F. Ackerman, A. E. Prest, Jno. Speer, Thos. Brown.

Addresses on "The Past and Future of Methodism in Peterborough," were given by Rev. F. E. Malott and Rev. Harold W. Young, the former reviewing the past history of the church in this community, and the latter its prospects in the future.

The Early Days.

Mr. Malott spoke of the first Methodist church built in this city in 1834, on the site directly opposite the present George street church, on land granted by the Legislative Council. During successive decades, the church was enlarged, and removed to its present location. In the 88 years of its history, George street church has had 38 superintendent ministers. In the early days, it formed part of a cricuit extending to Millbrook, which was made an independent pastorate in 1848.

Trinity Church.

Trinity church, which recently celebrated its golden jubilee, was instituted in 1872, and was built on the site originally granted by the Government for St. John's church, traded by that church to Methodist authorities.

In 1872, Mark street church had its beginning in Peterborough, and in 1908, St. James church was inaugurated. To-day, these four churches have a total number of communicants, 2,735, and minister to 1,480 families. Last year, nearly $10,000 was given in the four churches for missionary work alone, and total givings for all purposes totalled $78,-595.

Future of Church.

Rev. Mr. Young's address dealt with the future of the Methodist church in Peterborough. Prefacing his discourse with the remark that the future of this church might be regarded as problematical, in view of the apparent nearness of church union, Mr. Young said that the duty of the church, in the event of union, was to lose itself in the new body, and the duty of every Methodist would be to be loyal to the new body.

The future of the church in Peterborough depended on four things. First, on the preaching given in the Methodist churches, as the presence of a strong and able preacher was becoming an increasingly powerful factor in Protestant churches. Second, on the fidelity of the Methodist people to the task of evangelism, with reference particularly to the work of religious education. The overwhelming majority of church members came from the Sunday school, which was one of the most important units in church work. Third, on the way in which the congregations were interested in, and prepared to help with, church work. A tedency in many churches was to allow ten per cent. of the congregation to do ninety per cent. of the work. Fourth, on the extent to which the spirit of co-operation was manifested in the four city churches, so that they should work more as a unit than as individuals.

Mr. Young's address concluded with an inspirational message to renewed faith, courage, hopefulness and consecration.

Mr. G. H. King presided at the piano for the hymn service.

STORM IN DAIL EIREANN.

DUBLIN, April 27. — (Canadan Press.)—The debate in the Dail Eireann to-day provoked stormy scenes. Arthur Griffith asserted that at the end of the London negotiations resulting in the Anglo-Irish Treaty, De Valera had asked him to extricate him from the straight jacket of the Republic. Mr. De Valera described this as a "lie" and turmoil followed.

Gunnery practice and naval maneuvers in the Firth of Forth have been suspended by the British admiralty in order to improve the sea fishing.

A watch on exhibition at Washington, D. C., is 9 1-2 inches in diameter and 1 1-2 inches thick.

"Pineapple Week" Is Due Next Week

Although housewives will be in the midst of the housecleaning next week, it is the proper time to "do"pineapples, according to Walter Oke, wholesale fruit merchant. The Cuban crop will be at its best next week and the week after, he said. Thereafter the fruit is not likely to be of such a good quality. The retail price, he said, should be down to $2.50 or $3.00 a dozen as compared with $4.00 and $5.00 now. The second week in May, he said, he figured a 25 per cent. loss on pineapples through the heat.

Mr. Oke reported a good demand for seed potatoes and so far, he said, he had disposed of 500 bags of New Brunswick Irish Cobblers. These sold at $2.50 a bag. The situation with regard to storage potatoes is not so satisfactory, however, and Mr. Oke said he had suffered heavy losses on Prince Edward Island potatoes bought last fall at $1.40, and now going slowly at 75c and 85c a bag. The loss has been made greater by d y. "I will be lucky if I get the freight," said Mr. Oke. The onion market has been eased by the arrival of the Texan crop, and onion prices that went to unusual levels are falling off.

THE MARKETS

TORONTO STOCK MARKET.

TORONTO, April 27.—(Canadian Press).—The local Stock Market suffered somewhat of a set-back this morning with the general trend of prices downward. Steamship Common, opening at 20½, sold off to 18¼ at the close, while Preferred lost 1 3-4 at its close of 48¼. C.P.R. lost two points at 142, Canada Bread 7-8 at 29 5-8, Bell Telephone ½ at 107¼, Brazilian 1¼ at 43 1-8, Abitibi 5-8 at 50 3-8, and Toronto Railway ½ at 63½. In the unlisted stocks, Brompton was off 1 1-8 at 28 7-8, and International Petroleum closed 1-4 lower at 20 1-4. Government bonds quiet.

EXCHANGE IS EASY.

NEW YORK, April 27.—(Canadian Press).—Sterling exchange easy; demand rates, Great Britain 4.42 1-2; Canadian dollar, 1 3-4 per cent. discount.

CHICAGO WHEAT MARKET.

CHICAGO, April 27.—(Canadian Press). — Opening wheat prices, which varied from unchanged figures to 1¼c higher, with May 1.40 to 1.41 and July 1.24 3-4 to 1.25¼, was followed by declines all around to well below yesterday's finish. Unfavorable weather gave comparative firmness to corn and oats. After opening unchanged to ¼c lower, July 63 7-8 to 64, the corn market scored slight further gains.

Oats started unchanged to ¼ off, July 39 3-4 to 39 7-8, and then rallied a little.

NEW YORK MARKET.

NEW YORK, April 27.—(Canadian Press).—Lake Erie and Western Preferred extended its rise to five points on reports that Cleveland interests are seeking control of the road. Other Rails showed greater heaviness, however, losses of one to three points being sustained by Chicago and Eastern Illinois Preferred, Chicago and Alton Preferred, Illinois Central, St. Paul Preferred, Colorado Southern, Pittsburgh and West Virginia and Atlantic Coast Line. Motors, Steels, Equipments, Utilities, Tobaccos and Food Specialties continued their downward course but Oils showed temporary improvement on a rally by Mexican Petroleum.

Initial dealings in the Stock Market to-day were characterized by further free selling of Rails, Oils, Steels and Utilities. Canadian Pacific lost 2 3-8 in the first few transactions and declines of one to two points accompanied the offerings of Illinois Central, Wabash A, Mexican Petroleum, Bethlehem Steel, Kelsey Wheel, Manhattan Elevated and Pierce Arrow. The market's stronger side was represented by New York Airbrake at a six-point gain. Moderate unsettlement was shown by foreign exchange on over-night changes.

MONTREAL STOCK MARKET.

MONTREAL, April 27.—(Canadian Press).—Prices were again on the downward trend during early trading on the local Stock Exchange this morning. Abitibi was down 3-4 to 50 3-4, Laurentide ⅜ to 85, and Price Bros. ⅜ to 42. Atlantic Sugar sold ¼ lower at 19 3-4, while Brazilian showed most weakness by descending to 42 7-8, after closing at 44 yesterday.

TORONTO CATTLE MARKET.

TORONTO, April 27.—(Canadian Press).—Receipts, 136; trade brisk. Heavy beef steers, $7.50 to $8.50; butcher cows, medium, $4 to $5.50; butcher steers, choice $7.75 to $8.25; calves, $9 to $10; hogs, selects, $13.25.

CITY'S PROPERTY COM. PASSES $75 BILL FOR TRAVEL

Plumbing Inspector Metheral Allowed Transportation Expense While fn Discharge of Duties.

OTHER BUSINESS

The Property Committee at a meeting last night allowed Plumbing Inspector A.. Metheral $75 for the use this year of his automobile in connection with his work. This is the same amount as he received last year. Owing to the large number of inspections, he said the work could not be carried on satisfactorily unless he had some means of transportation. He suggested that they either allow him for the use of his own car or purchase street car tickets.

"Well, he received $75 last year", said Ald. Jones.

"I don't like that Ald. Jones", declared Ald. McIntyre, chairman of the committee, "when he got the job it was understood he was to get transportation".

"I don't know if it was in writing but it was understood. Peter Thompson, former Inspector was allowed tickets", declared Ald. Jones.. "Metheral has travelled from one end of the city to the other and I think it's better to give him the transportation like last year".

There was no opposition to the allowance for the car and on motion of Ald. Jones, seconded by the Mayor the sum of $75 was set aside for this purpose.

Award Ice Contract

The tender of the Sanitary Ice Company for supplying the fountain in Central Park, the fountain on Water street and the city clerk's office during the summer months, of $130, was accepted over that of the Allin Ice Company of $32 a month. Ald. Holloway thought the word season indefinite but the other members decided it covered the months in which ice was necessary. On motion of Ald. Jones and Hollo way the Sanitary Ice Company's tender was accepted.

Builders' Suggestions

In a letter the Peterboro Builders' and Supply Association suggested all tenders on work called for by the city council be published, and also that a warning be printed on all building permits for the protection of owners, and work men, and in justice to legitimate contractors that the owner be responsible for any claims due to injuries received by workmen if the contractor is not covered by the Compensation Act.

President C. H. Duncan said that they requested the Council to take action in this matter, so that people starting jobs would be under no delusion as to who had to pay if there was an accident. President Duncan also pointed out that school boards as an example were under the Act liable for injuries to workmen on their buildings, but in many cases the situation was not thoroughly understood.

Warning on Permits.

The discussion on the matter was not prolonged long in committee. Ald. Jones and Ald. McIntyre, both builders, commended it to the others as a protection of the ownerand contractor, and the committee, on motion of Ald. Jone and Hollway, adopted the suggestion. The warning will be printed on the permits in black faced type so there will be no excuse for it not being seen.

To Sell Scales.

Ald. McIntyre wanted to know what he had better do with a set of scales at the market that had been out of commission for two years. He said they were broken and he had been offered $5 and $10 for them. Ald Jones, chairman of the committee last year, said that if they were repaired they would be worth $75 or $80. The chairman was left to act on his own initative.

Those present were Ald. Malcolm McIntyre, Mayor W. H. Taylor Ald. R. N. Jones, Ald. Robt. Morrison and Ald. Dr. Hollowa/

COUNTRY CLUB OVERLAND AT A BARGAIN

FORD COUPE LIKE NEW
AN ALL-YEAR CAR

Mr. J. F. Lymburn, of Lymburn & Reid, Barristers, Edmonton, in a letter written in February, says: "Since I purchased my Overland Touring car in June of last year it has given me good satisfaction. I have found it reliable, and economical as to gas and oil. The car has run over 3,500 miles and I have had no tire trouble. If this winter can be taken as a fair specimen of weather, then the car can be used all the year round."

$12 Per Day For Miners

BANKHEAD, Alta., April 27. — (Canadian Press.) — The condition at the Bankhead mining camp, property of the Canadian Pacific Railway, were excellent as compared with other fields in district 18, Frank Wheatley, secretary of the Bankhead local, staed at yesterday morning's session of the board of concilation investigating mining conditions in the district. He said contract miners worked 255 days last year compared with 155 days in outside camps, and had received an average wage of $12 a day.

The witness also said housing conditions were good in comparison with other camps.

Mr. Wheatley advocated the abolition of the contract system and contended that a six hour day would have a tendency to bring about better conditions in the mines. Although stating the time was not ripe for nationalization of mines, he declared all mines should be placed under one executive control. The witness also stated he would approve of legislation that would prevent the opening of new mines and which would close some of those already in existence.

IMPORTATION OF BEES PROHIBITED

Neither Bees Nor Hives May Be Brought From England — To Check Contagious Disease.

OTTAWA, April 27.— (Canadian Press.)—The importation into Canada from Euroep of bees, used or second hand hives, or raw hive goods or products, excepting honey, is prohibited on and after the first day of May, 1922, according to an order issued by the Federal Minister of Agriculture yesterday. The order, a statement issued by the Department of Agriculture says, is necessary owing to the danger of introducing a contagious disease of bees known as the "Isle of Wight disease."

AUSTRALIA WANTS MEN.

LONDON, April 27.—(Canadian Press.)—H. S. W. Lawson, premier of the state of Victoria, addressing a conference of the New Settlers' League yesterday, says a Reuter despatch from Melbourne, said, "Come over here" was the slogan to be addressed to men in Great Britain.

Premier Lawson added that industrial organizations should co-operate with the government to provide for a steady flow of immigrants.

TOM CHURCH IN FAVOR OF SHIP CANAL

Offers Motion Proposing International Agreement For Construction of St. Lawrence Ship Canal.

IS OPPOSED.

OTTAWA, April 27.—(Canadian Press).. — Arguments on the St. Lawrence deep waterway scheme, both in favor and in criticism, were heard in the House of Commons yesterday during a debate which occupied the entire sitting. T. L. Church, Conservative, of North Toronto, had a motion calling upon the Government to give "early and favorable consideration" to the report of the International Joint Commission, and "request the Government of the United States to join with Canada in making an international agreement for carrying out the work so recommended.' Mr. Church strongly supported the project. "The greatest hope of civilization today," declared Mr. Church, "lies in the Union of English speaking peoples, especially Canada and the United States, and this scheme will prove one of the greatest factors in bringing such a union about."

John Millar, a Progressive from Qu'Appelle, Saskatchewan, opposed the project on the ground that it would tend to develop cities while the country was still under-developed. Fernand Rinfret, of St. James Montreal, and E. A. Lapierre, of Nippissing, Ont., both Liberals, likewise opposed the scheme.

Hon. R. J. Manion who was a member of the Meighen Government, held on the other hand, that all Canada, on investigation, would be in favor of the project being carried out.

The debate continued till six o'clock(when it was automatically adjourned..

Mr. Church's motion now goes on the order paper, to the bottom of public bills and orders and is not likely to be reached again for some time, if at all this session.

THIRTY LOSE LIVES AS STEAMER SINKS.

BREST, France, April 27.—(Canadian Press.)—Thirty-two lives were lost when the French steamer Deputy Albert Taillandier, a vessel of 3,000 tons, bound from Rotterdam for Brest with a cargo of coal, foundered Tuesday night off the northern coast of Brittany during a violent storm. The captain of the ship, the sole survivor, was picked up yesterday by the Greek setamer Pelagia.

New Sport Page Inaugurated in This Edition of the Examiner

Commencing today, the regular sport page of The Examiner will become a part of the "Noon Mail Edition." Besides the local sport, it will include all lines of sport news from various parts of the district as well as the progress of the big leagues. This will enable us to consolidate the sport on one page and will give our district readers a daily sport service covering all branches of athletics. This is one of the many changes that The Examiner is planning in an effort to improve the service to all our readers.

PROVINCIAL TREASURER IS CRITICISED IN HOUSE

W. E. Sinclair Maintains That Returns Presented Did Not Show the True Financial Standing of the Province.

HYDRO MATTERS.

TORONTO, April 27 (Canadian Press). — The afternoon sitting of the Legislature yesterday was chiefly occupied in a debate on a motion of W. E. Sinclair, Liberal member for South Ontario, asking for particulars of receipts and expenditures for the months of August, September, and October of the years 1919 to 1921.

Mr. Sinclair, speaking on his motion, subjected the Government to a financial criticism.

Provincial Treasurer Peter Smith said that the Government could not get the entire return down this session, and suggested that only a portion of it be accepted as sufficient.

H. H. Dewart took sides with Mr. Sinclair in demanding the entire return, and criticising the Government for not getting started on it sooner.

Hon. Howard Ferguson read the correspondence concerning the delay in having tabled the return of the Hurdman scale.

Premier Drury on more than one occasion sought by suggestions to bring the debate to a close. He said once that speakers, chiefly on the Opposition side, took a great deal of time in the House in debate, even when speaking in order.

There was considerable crossfire as a result of this statement.

Mr. Sinclair steadfastly refused to drop a portion of his notice of motion, and it finally carried. He claimed the purpose of his motion is to seek to show that the Government hurried up payments to the various departments, such as succession duties, but delayed paying bills the Government owed around the end of the last fiscal year in order to show a surplus.

The debate on the Budget was not resumed until the evening sitting.

Gregory's Letter.

Hon. Howard Ferguson read the letter which W. D. Gregory, chairman of the Royal Commission investigating the Chippawa project, sent to Sir Adam Beck, chairman of the Hydro-Electric Commission, in which Mr. Gregory announced that the Royal Commission deemed it inadvisable to intervene in the Hydro Commission's plans in regard to dredging the Welland River and Power Canal, and also in connection with the entrance to the Welland River at Hog Island.

Mr. Ferguson claimed that in this letter Mr. Gregory assumed that his Commission had power to intervene in connection with the Chipawa project, thus superceding the Hydro-Electric Commission. He thought this was not the intention of the House. It never intended to give the Royal Commissionauthority to reconstruct this great public enterprise as it may think advisable. It should be made plain to Mr. Gregory that it was to investigate and report to the House, but it was not to take over control from the Hydro-Electric Commission or interfere with the plans of that Commission.

Powers Defined.

Premier Drury agreed with Mr. Ferguson's interpretation of the powers of that Royal Commission, that it was not to supercede the Hydro-Electric Commission, and he did not think the letter contained anything which would indicate any desire to do so. However, he would take the matter up with Mr. Gregory and see that there was no misunderstanding in this regard.

Treasury Returns.

W. E. H. Sinclair (Ontario South) gave notice of motion on the first day of the session that returns be made showing the receipts by the Treasury Department of the Province during August, September, and October of 1919, 1920, and 1921. It also asked for a return of amounts paid out during the same months, also the amounts of bills due, but not paid by the Province at the end of the last fiscal year, 31st October.

Mr. Sinclair explained that he had received a letter last autumn asking him to make payments on secession duties, which he said were not required to be paid until February of this year, and he had been informed that 51 similar letters were sent to indicate that the Treasurer had sought to collect all the money possible in order to show his surplus. He also wanted the returns of moneys paid out during the same periods to seek information as to whether the Provincial Treasurer had held up these payments over the end of the fiscal year, and with the same object of making his surplus greater.

Books Are Open.

Hon. Peter Smith, Provincial Treasurer, said that the books of his Department were open to the members, that he was always ready to give them any information practical, but to give the returns as asked for by Mr. Sinclair would entail a great deal of work, and it would be impossible to complete it before the session closed. He was willing to give the returns in regard to the bills unpaid at the close of the year, also copies of letters or telegrams sent out to speed up payments, but asked that the demand for the receipts and expenditures by months be not pressed, as books were not kept in a way to give totals by months, and it would be almost impossible to give the information exactly correct, particularly as the capital and ordinary revenues and expenditures would have to be divided.

Should Be Available.

H. H. Dewart criticised the Government for not calling the motion sooner, Mr. Smith pointing out that it was called previously, but Mr. Sinclair was not in his seat.

Mr. Dewart continued that the information should be available, and the Department should have started preparing it long ago.

J. C. Tolmie, Windsor, criticised the Government for not calling this notice of motion sooner. It was information that the members of the House were entitled to know.

Dr. H. A. Stevenson, London, sharply criticised what he termed were tales of woe by Opposition members regarding the finances of the Province as liable to hurt its credit.

The Bill of Charles Swayze, Niagara Falls, making it compulsory for vehicles to have front and rear lights was defeated.

VERDICT OF MURDER.

ATHLONE, April 27.—(Canadian Press.) — Coroner's jury yesterday rendered a verdict that Brigadier Adamson, who was shot Tuesday in Athlone, was murdered by person or persons unknown, and expressed abhorrence of crime.

PRES. MILLERAND DEFINES FRENCH FOREIGN POLICY

French President Says France Does Not Wish to Sacrifice Europe For Selfish Ends.

FRENCH ATTITUDE.

PHILLIPERVILLE, Algeria, April 27.— (Canadian Presss.) — President Millerand of France, who is on a tour of French possessions in Morocco, explained yesterday that the French foreign policy was in nowise intended to sacrifice European reconstruction to French interests, but reaffirmed that the French policy was based on the theory that French reconstruction was essential to European rehabilitation.

The French President said France's only condition for resumption of commercial relations with the Germans, as discussed at the Genoa conference, was that disarmament and reparations should become realities.

The French attitude towards Soviet Russia, President Millerand said, continues to be that agreed upon jointly by the Allies for the recognition of pre-war debts, reparations for foreigners' property, guarantys of property rights and the protection of foreigners. He defended the aid given to General Baron Wrangel in military activities in Russia, saying they were designed solely to save Poland.

President Millerand expressed confidence that the Allies would continue to collaborate at Genoa in finding a way to brush whatever conflicts of opinion there might be relative to the Treaty of Versailles and bring about peace.

LOWER FREIGHTS FOR MENNONITES.

EL PASO, Texas, April 27.—(Canadian Press).—To enable Canadian Mennonites to continue their migration to colonizing Western Chuhuahua by way of El Paso, the El Paso and Southwestern Railroad notified interested railroads yesterday that it would publish a freight rate of $1.05 1-2 from Canadian border points to this city.

The special rate represents a cut of 15 1-2 cents per hundred pounds on immigrant freight.

MISS PICKTHALL'S FUNERAL IS HELD.

TORONTO, April 27.—(Canadian Press).—To the solemn strains of the Dead March in Saul the body of Marjorie Pickthall was carried from the Church of St. Mary the Virgin this afternoon to be laid in St. James' Cemetery beside her mother and baby brother. The floral tributes included beautiful wreaths and sprays from the Canadian Women's Press Club, the Toronto, Montreal and Vancouver branches of the Canadian Authors' Association, Hodder and Stoughton, Mrs. Isabel Ecclestone McKay of Vancouver and many personal friends.

LLOYD GEORGE PREDICTS WAR IN EUROPE IF THE CONFERENCE DOESN'T ARRANGE PEACE PACT

Europe is Compared to Seething Racial Lava. Need of America at Genoa is Stressed. Asks For Patience.

RUSSIA'S STRENGTH.

GENOA, April 27. — (Canadian Press.) — Premier Lloyd George drew an alarmist picture of Europe last night. In addressing the British and United States press representatives he declared that the object at Genoa was to clear up political difficulties, which were full of menace.

He compared Europe to seething racial lava, which, like the earth's crust, was seeking a proper level. This adjustment was full of peril. He emphasized that Europe must take cognizance of hungry Russia, which would be equipped by any angry Germany.

"The world must recognize the fact," he said, 'that Russia and Germany combined contain over two-thirds of the people of Europe. Their voice will be heard, and the Russo-German Treaty is the first warning of it."

As proof of the danger he cited the fact that there was no frontier line from the Baltic to the Black Sea, including the Rumanian, Galician, Polish and Lithuanian frontiers, which have been accepted.

"I wish America were here," he exclaimed. "Some people think we want the United States for some selfish purpose. This is not true. We want America because she exercises a peculiar authority. Her very aloofness gives her the right to speak.

"America could exert an influence no other country could command. She could come here free and disentangled, and with the prestige which comes from her independent position, she would come with the voice of peace.

'But America is not here; so Europe must do her best to solve the problems in her own way."

Mr. Lloyd George gave it as his opinion that the disorganization of Europe would affect the entire world, including the United States. He was amazed at people who ignored the portentious fact facing Europe today. Unless Europe reorganized, in other words, unless the Genoa Conference succeeded in arranging a pact of peace, he was confident that

GRAIN DEALERS ARE CRITICISED

Agricultural Committee Will Investigate Alleged Practices of Western Financiers.

OTTAWA, April 27 —(Canadian Press). — The alleged practice of gain dealers financing their operatons on their customers' contracts is expected to come before the Agriculture committee of the commons at this morning's sitting when when the committee will continue its investigation into the Wheat Board question. Evidence reported from a recent case in Regina had to do with the alleged practice of hypothecating customers' securities by the grain dealers in order that the latter might secure capital with which to carry on their business. Some of the farmer members are strongly opposed to this practice and have indicated that to day they intend to question some of the Winnipeg Grain Exchange witnesses to try and find out whether or not the practice is widespread.

MANY LOANS TO ONT. FARMERS

About 3,000 Applications Have Been Received in the Last Four Months. $571,570 Advanced.

TORONTO, April 27.—(Canadian Press).—In four months, the Provincial Agricultural Development Board has made loans aggregating $571,570, plus $25,000 in short term advances. Of about 3,000 applications, requests for long and short term loans were about the same. Advances have numbered about 150 "longs," averaging some $4,000, and 40 "shorts," of around $600 each. Seventy-five per cent. of the applicants want the money for building purposes, and most of the others for buying land.

Some applications are from city men anxious to go to the land. Three street railway conductors have been among these. One farmer wanted $8,000 to buy an adjoining farm to keep his four sons at home.

One-third of the applications are from New Ontario, but difficulties of winter inspection have minimized the grants. Inspection fees are $12, with legal fees of $10 to $20, and disbursements of $5. Short term loans are available only through farm loan associations of thirty farmers each. Ten of these are now organized and a dozen others forming. Short loans are usually to buy seed or livestock.

DISCUSSION OF MILITIA MONEY IS POSTPONED

A Reduction of Over a Million Is Proposed By C. C. Power, But No Vote Is Taken.

TO-DAY'S WORK.

OTTAWA, April 27. — (Canadian Press). —Further consideration of the contested militia estimates has been postponed for the time being. When the estimates were under consideration on Tuesday night, C. C. Power, Liberal of Quebec South, seconded by Roch Lanctot, also a Liberal, moved a reduction of over a million dollars in the vote for annual militia drill. Mr. Power's motion was strongly opposed by Hon. G. P. Graham, Minister of Militia and the discussion was adjourned without a vote being reached. It was scheduled to come up again yesterday, following private members' business and public bills, but, as was expected, was not reached. Normally, militia estimates would have come up again to-day. But at adjournment yesterday the Prime Minister announced that the estimates to be taken up to-day would be the departments of Indian affairs, mines and public works. There was no mention of militia estimates.

PROBABILITIES.

GET THE RIGHT MAN.

The selection of a capable Fire Chief seems to be in some danger of being made difficult by false ideas of economy on the part of some of the Aldermen. It is all very well to be saving, but there is such a thing as being penny wise, pound foolish. And to regard a low salary as one of the principal factors in the situation is a line of thought of doubtful value. It will pay in the long run to pay salary enough to attract the right kind of a Chief; the wrong kind is not cheap at any price.

ACTION IS NEEDED.

Clean-up week would be a very appropriate time for the city's health authorities to stage a drive upon those houses in the heart of the city which have not yet been connected with the sewer. The time has gone by for leniency in this regard, and the general interest demands that action shall be taken to compel property owners who have not yet complied with the regulations to adopt modern methods. There is absolutely no excuse nor justification for winking at conditions that belong to yesterday—not to-day. The number of dwellings in the centre of Peterborough which are deficient so far as this important feature of sanitation is concerned is surprisingly large. And it is high time that the owners were dealt with firmly and made to understand that the day for primitive methods has gone by, and that so far as Peterborough is concerned, the health authorities are determined that every possible menace to the health of the citizens is to be removed. There should be no more delay permitted, for the coming of good weather has made it possible for the work to be undertaken. The Board of Health has the remedy in its own hands; it should order every offending owner to have his property connected with the sewer within a specified time limit. The conditions call for vigorous action.

SHOULD BE RECOGNIZED.

It is to be sincerely hoped that the presence of mind and bravery shown by John Murphy, Smith Street, in the saving of a young boy from the Otonabee River the other day will be brought to the attention of the proper authorities, and that the heroic rescue will be officially recognized. When the boy and a young companion were thrown into the water by the capsizing of a punt, and were clinging to a post, with the prospect of soon being swept off by the rushing river, Murphy, who saw their plight, ran across Smith Street Bridge and, without waiting for a boat, rope or any other safeguard, plunged into the icy swift-moving water and brought one of the boys safely to the shore, and the other was eventually rescued. Had it not been for Mr. Murphy's fearless and quick action, there would undoubtedly have been a tragedy. Incidentally it is not the first rescue of a drowning person that is to Mr. Murphy's credit, while his son Fred. was the centre figure in a rescue of two girls who were caught by the current and were being carried away, when the younger Murphy jumped into the water, fully dressed, and saved both girls. It is not to the credit of the community that his bravery was not recognized by the gift of the Royal Humane Society's medal, and now that his father has added another rescue to the list, it would be a shame indeed if this latest exhibition of courage were also to pass unnoticed.

THE CANADIAN MILITIA.

The Militia estimates are causing a considerable difference of opinion in the House, and doubtless throughout the country. There are those who argue for total disarmament so far as Canada is concerned. That is an extreme view, and by no means a wise one. There must be a certain amount of preparedness; the country must have at least the foundation upon which to build an army in the case of need. We are claiming a new status as a nation within the British Empire; it becomes all the more necessary then that we should not throw the whole burden of protecting Canada upon the Mother Country. It is not necessary to be extravagant, and doubtless there is room for reducing the expenditures for Militia purposes to some extent, but to abandon the Militia scheme completely would be a dangerous proceeding. The old Militia regiments proved their worth when the world war came. They provided the framework upon which Canada's overseas army was built. True there were thousands of men in that army who had had no training in the Canadian Militia, but nevertheless had it not been for the organization that existed the Dominion's war effort could never have been so effective. It is a self-evident truth that without the officers provided by the Militia regiments and the facilities for organization furnished by the active Militia of Canada, the Canadians would not have "saved the situation" in the second battle of Ypres for, without the Militia machinery, it would have been impossible to raise, equip and train a division in anything like the time that was sufficient for Canada's first contingent. There would have been no Canadian army in France in time to block the German rush to the Channel ports if it had been necessary to wait and build up an organization after the hostilities had commenced.

Sneers at gold lace parades and other reflections of a similar kind upon the officers and men of Canada's Militia units are in poor taste and indicative of a bad memory, to say the least. Nobody who knows how the volunteer machinery served Canada in her hour of need has any wish to ridicule the Militia.

The Still Small Voice.

New York Evening Post: The extremely young have been roasted a good deal for their volatile conduct. But let us examine: are the elderly behaving with any more dignity? Young ladies bob their hair, wear sporting tweeds and violent-colored scarves, show charming parallels of biscuit-colored stocking (and very gay, gallant and charming, they look, too). Why is that more disreputable than famous publishing houses wearing bright purple blurbs and using a lipstick of nonsence in their advertising? One of the most honored literary firms in this country uses two quotations to advertise a recent novel—"Like zooming along in an airplaine" and "A whale of a book." That sort of thing gives us a horrid sensation of nausea. Even assuming that the book is a fine and powerful work, do such preposterous slogans help it with the judicious? Is there no department of life, sweet patrons, in which the still small voice of moderate statement can yet be heard?

THEY ARE GETTING WISDOM.

A Montreal despatch reporting that the Licensed Victuallers' Association of that city had determined to prohibit blasphemy and swearing in the taverns and restaurants conducted by its members, speaks of the organisation as having "stepped into the Sunday School field," says the Ottawa Journal. It is quite unlikely that anything resembling a Sunday School spirit has prompted the organised victuallers to take this action. Probably it is due to an appreciation of what their business interests require and of what the license system under which they operate demands for its continuance. They have probablye come to see that the beer and wine system of Quebec will find its best chance of surviving if those who are licensed under it conduct reputable and orderly places of entertainment. Self-interest is sufficient incentive for such a step on the part of the license-holders of Montreal, but it is encouraging to see them realising it.

Swearing and foul language is no more in place in a tavern or licensed restaurant than in a tobacco store, a grocery store, or ay public centre. The more the wine and beer business of Quebec is dissociated from conditions that are at least repugnant the greater will be its chances of succeeding. Had the hotel-keepers of pre-Prohibition days paused to consider the effect upon the public conscience of conditions which they permitted to attach to their business, then opposition to the Prohibition movement might have been more effective.

EDITORIAL NOTES AND COMMENT

Clean-up week.

How many people have acted according to the spirit of the Mayor's proclamation?

The Northcliffe papers prophesy that the Genoa Conference will soon break down. In this case the wish is father to the thought.

The weather seems to be about the only thing with any change in it these days.

A member of the House of Commons is handicapped in criticising the Senate by the thought that one day he may be able to get into the Upper Chamber himself.

The city authorities have a chance to inaugurate a little tree planting campaign in the north-east section of Victoria Park, where most of the old trees have been cut down.

At least the Chippawa Probe Commission cannot possibly be any longer in getting down to business than is the Legislature.

It looks as if a fund to secure warm socks for a number of Peterborough boxers was in order.

It might have been expected that if Albert Smoke wanted to make a change of residence he would have selected Pittsburg.

The only trouble about a radio argument is that it is likely to be a little one-sided.

So far at least the Drury Government has not been blamed for the poor showing of the Toronto Ball Club. The Telegram has overlooked this opportunity.

MARK OF ORIGIN

The Canadian Manufacturers' Association has issued a booklet setting forth the views of its members on matters connected with trade and commerce, as presented to the Canadian government a few weeks ago by a deputation appointed for the purpose. The association declares that "these statements express the official views of the association on the various subjects mentioned." These particular subjects were eight in number, but we are now only concerned with one of them, the marking of country of origin on imported goods, upon which Mr. J. H. Fortier, of the firm of P. T. Legare Co., Quebec, addressed the government officials who received the deputation. It was pointed out that the United States first instituted marking provisions in the Tariff act of 1890. In 1909, amendments were made to that act, which is the law as it stands to-day. The Canadian act "seems to have been modelled on it." These marking provisions were never debated in the United States congress, and they were apparently accepted by all parties. Many other countries, the government is reminded, have markings regulations against imports which are more drastic than the United States provisions.

Though there is logic in the claim that Canadian products also should be marked, in order that the purchsaer might know just exactly the origin of the goods he is buying, the association asserts that it would be impossible to enforce a domestic marking act to apply to all commodities. Canadian exporting firms, however, have to conform to the provision of foreign marking acts, and it is not difficult for these exporting companies to observe such requirements. The deputation submitted "that any marking act should be applied along practical lines so as to avoid useless expense or injury to goods, and should not interfere with Canadian domestic production or production for expert." It was also recommended that the government should waive the 10 per cent. penalty duty under the provision of the present act.

The present administration has postponed the operation of the marking act until the end of this session. It is anticipated that many amendments will be introduced before the lapse of that interval, and in cases where its application might cause real inconvenience, the act may be entirely suspended. But there is a widespread demand for such a measure. One industry especially is most anxious to see the provisions of this act put into force without delay, and that is the printing and engraving industry, which would like to be established in at least equal terms with the business in the United States. There the marking law with regard to printing material is rigidly enforced. The simplest form of circular passing into the United States must be marked with the country of origin: why should not the same requirements be demanded of American printers who sell their wares to Canadians? It is reported that over twelve million dollars' worth of printed matter was imported into Canada last year, mainly from the United States. There would be no impediment placed in the way of these importations by the imposition of marking provisions, which are very easy of application in the case of printed material, but purchasers would be given the opportunity of knowing just what national industries they were patronizing. It is felt that the natural desire to support native industries would manifest itself if the act were put into force; there for is at present no means of making any such discrimination.—Hamilton Spectator.

Mr. Chamberlain's Attitude

London Morning Post: Mr. Chamberlain's sincerity in his private life, is of course, unimpeachable. We are the more at a loss to understand how he can reconcile his fulfilment of his trust as the leader of a party with political integrity. If Mr. Chamberlain, like the Lord Chancellor, had changed his mind that is his affair; but whereas Lord Birkenhead is nobody's leader—nor ever will be—Mr. Chamberlain has an obligation to observe. If he no longer holds Conservative principles, surely his only course must be to state the fact, and let the party decide whether or not it desires to continue under his leadership. We know of no instance in which a political leader attempted to commit his party behind its back. Even Mr. Gladstone, when he became a Home Ruler, made no secret of his conversion—or perversion. Becoming Prime Minister in February, 1886, he brought in his Home Rule Bill in April; and when he was defeated he instantly appealed to the country. Mr. Chamberlain's conversion is equally complete and even more extensive; yet he makes no remark on the subject; and so far he is from appealing to the country he does not even deign to inform the Conservative Party. That he lacks neither courage nor honesty he has proved alike in his resignation from big office and in his support of Sir George Younger. Mr. Chamberlain's present attitude is, indeed, inexplicable.

FIRST AID TALK TO BELL 'PHONE MEN

Peterborough Team in Competition For the Championship.

The importance of first aid and accident prevention measures was emphasized by J. H. Martin, Division Plant Superintendant of the Bell Telephone Company, Toronto, to the male staff of the Peterboro District in a talk in the Chamber of Commerce rooms last night. About twenty-five employees and their guests were on hand to hear the address which employees say they had looked forward to for a long time.

Mr. Martin pointed out what had been accomplished in first aid instruction in Pennsylvania and he outlined the plans for the Canadian company whereby in each station instruction will be given by a local doctor. Teams of five men compete to decide which shall represent Peterboro at the final competition for the district championship first aid team and district winners will compete for the division championship. The experience of the Bell Telephone company has been that by creating an interest and arousing a sporting spirit in this way the men take to what otherwise would probably be dull and prosaic instruction. Peterboro should be he thought, show up well in this district.

Accident Prevention

The speaker dealt with the subject of accident prevention in a thoroughly comprehensive manner. As in first aid the Pennsylvania company has been pioneers in this work, he said, but an active campaign was only started in Canada last July. The result was, however, that the number of accidents fell below the number for 1920, up to which date there had been a steady increase. Since 1913, in Pennsylvania the number of accidents has been declining. An active education among the employees has been highly successful and a plan now to be adopted here is expected to give the men more zest to further prevention measures.

To Award Buttons

It is planned to award buttons and other prizes to foremen who lead their gangs through two, three or four years without an accident In his address Mr. Martin outlined many causes for accidents, and he stressed the fact that telephone employees must constantly have their wits about them. A careless move is apt to lead to a fatal accident. One feature of putting a little competition into the accident prevention he pointed out was that it discouraged men laying off work for most trifling mishaps.

For some reason he said most accidents in telephone work happen between 9.30 and 10.30 in the morning. The next most fatal period is from 2.30 to 3.30. Unless safety signs are changed every few weeks their purpose is lost, Mr. Martin said: "Familiarity breeds contempt" and once a sign becomes a part of the landscape it is useless. The company has found the continual changing of signs successful, especially among the car drivers. Every few weeks a new sign is placed on the windshield and that there were no motor accidents the last six months of 1921 and none so far as he knew this year in District 6 spoke well for the policy, he thought.

The speaker urged the men to be always on the watch for hazards of any kind, their own or in other places and that they be reported without fail to the plant chief, whose duty it is to investigate the dangerous condition. Mr. Martin, had scant consideration for workers who refused to listen to caution and acted in a wilfully dangerous way, endangering their own lives and those of the citizens generally. Happily he said their numbers in their company were few.

Other speakers were: J. A. Brown, District Plant Superintendant, Toronto; H. O. Fisk, Manager Utilities Commission, Ald. Walter Stocker, J. M. McHardy and A. A. Smith. Charles Thornton, Secretary of the plant council, who was responsible for the meeting presided.

How Many Pounds Will You Gain

On Your First Package of IRONIZED YEAST?

Do you need more flesh? Are you pale, lacking in energy—or is your complexion blemished by humiliating pimples, blackheads, or boils? If so, simply go to your druggist's and get a package of IRONIZED YEAST tablets. Take these remarkably effective tablets—two with each meal. Then watch the results! Very likely you will be actually astonished at the improvement shown in you even after the first 48 hours. For IRONIZED YEAST embodies a remarkable new scientific process—a process which enables yeast to bring its splendid results often in just *half* the usual time.

How New Process Makes Yeast Doubly Effective

While Science admits that yeast is of wonderful value in building flesh, clearing the skin, and increasing energy, it is found that yeast alone is not enough to bring 100 per cent results. For while yeast contains certain vital elements—lacking in diet, yet essential to health—experiments prove that some other agent is needed in order to quickly CONVERT these important yeast elements into new firm tissue, energy and health.

Everyone knows the great value of iron in changing our food into living cells. So working on this problem, our scientists finally discovered the amazing process of ironization—the scientific process which enables you to derive from yeast ALL of the wonderful benefits it holds for you.

Beware of Substitutes

This remarkable process of ironization is embodied ONLY in IRONIZED YEAST, the one scientifically correct yeast treatment. IRONIZED YEAST is superior, therefore it is widely imitated. You are cautioned against accepting cheap inferior imitations, which in most cases are merely mixtures of ordinary yeast and iron. Always insist upon the genuine IRONIZED YEAST. It is the only way you can be sure of getting the *best*. Get IRONIZED YEAST today. $1.00 a package.

"Gains 10 Pounds"

"I have taken only 1½ packages of IRONIZED YEAST, yet have gained 10 pounds in 15 days."
—Rev. L. W. V.

"Gains 6 Pounds"

"The improvement in me since taking IRONIZED YEAST is just wonderful. Now I eat heartily, never have that tired-out feeling, and I have gained six pounds."
—Mr. E. B. C.

"Gains 8 Pounds"

"After one box of IRONIZED YEAST I have gained 8 pounds, my skin is clear, I now sleep soundly every night. It is the greatest tonic I ever heard of."
—Mr. A. G. B.

"Gains 10 Pounds"

"I think IRONIZED YEAST is a wonderful flesh-builder and fine for the complexion. I have gained 10 pounds after 1½ packages."
—Mrs. J. K. B.

"Gains 7 Pounds"

"Before taking IRONIZED YEAST I weighed myself. Then I weighed myself two weeks later and to my surprise I have gained 7 pounds."—Miss M. G. W.

SYNOD RECOMMENDS LIQUOR EXPERIMENT BE GIVEN FAIR TRIAL.

MONTREAL, April 27 (Canadian Press). — Members of the Diocesan Synod, now in session here, acquiesced in the recommendation of the Committee on Social Service, as embodied in the report presented by the chairman, Rev. James E. Fee, yesterday that the present liquor experiment of the Provincial Government should be given a fair trial.

The report further urged the importance of giving special training to clergy who were likely to spend most of their lives in rural parishes.

CONSERVATISM

ANOTHER distinguishing feature of osteopathy, is it's steadfast conservatism: it's policy of first making sure and then going ahead.

TO THIS end the osteopath first of all devotes a good deal of time and thought to the diagnosis of his cases.

HE MUST KNOW the case history; the results of the laboratory examination of the various fluids and secretions of the body; and all the symptoms in detail, together with the physical diagnosis as determined by the skilled use of his senses of sight, hearing and touch.

IN THIS WAY he seeks to arrive at a solution of the question of what ailment he has to deal with. Then, using his peculiar osteopathic methods of diagnosis and spinal analysis, he determines the probable cause and proceeds to the correction thereof by means of adjustive measures **THAT ARE PECULIAR TO OSTEOPATHY.**

FURTHERMORE, the osteopath is guarded and conservative in his prognosis and promises; does not wish to arouse unwarranted hopes in doubtful cases; knows that all known methods of diagnosis and treatment, as well as all diagnosticians and physicians are fallible.

THE OSTEOPATH is not ashamed to sometimes say: "I don't know." Does not consider it a reflection upon his ability as a physician to have to confess himself at the end of his resources, in some given case.

THAT IS WHY it has come to pass that in all those parts of the country where osteopathy has become well known, osteopathy holds a position in the public confidence and esteem that is not surpassed by any other system of healing.

THAT IS WHY people are coming more and more to say: "Go see the osteopath! I believe he can help you; but if he cannot, he will not encourage you to take treatment."

POISON.

If it is absolutely necessary that you have bottles in your medicine cabinet that contains poison you should plainly mark these "Poison."

HEART WOULD BEAT LIKE A TRIP HAMMER

Heart trouble has of late years become very prevalent. Sometimes a pain catches you in the region of the heart, now and then your heart skips beats, palpitates, throbs, or beats with such rapidity and violence you think it is going to burst.

You have weak and dizzy spells, sinking sensations, are nervous irritable and depressed, and if you attempt to walk up stairs or any distance you get all out of breath.

We know of no remedy that will do so much to make the heart regain strength and vigor, regulate its beat and restore it to a healthy and normal condition as will

MILBURN'S HEART AND NERVE PILLS.

Mrs. Chadwick, Delhi, Ont., writes, "I had palpitation of the heart, and the least exercise such as going upstairs or up a hill, my heart would beat like a trip hammer and at times I was dizzy-headed and had a sinking sensation as if my time were near.

A friend suggested I try Milburn's Heart and Nerve Pills so I procured three boxes and by the time the first one was used I began to improve. In all I took six boxes, and now, although in my 66th year I feel like a young girl; no dizziness or heart-thumping and can walk miles without fatigue. At time of sickness I weighed 120 pounds, now I weigh 150."

Price, 50c a box at all dealers, or mailed direct on receipt of price by the T. Milburn Co., Limited, Toronto, Ont.

EAT LESS AND TAKE SALTS FOR KIDNEYS

Take a Glass of Salts if your Back Hurts or Bladder Bothers.

The American men and women must guard constantly against Kidney trouble, because we eat too much and all our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out, they weaken from overwork, become sluggish, the eliminative tissues clog, and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment or you are obliged to seek relief two or three times during the night; if you suffer with sick headaches or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your pharmacist about four ounces of Jad Salts take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys; to neutralize the acids in the urine so it no longer is a source of irritation, thus ending bladder disorders.

Jad Salts is inexpensive; cannot injure, makes a delightful effervescent lithia-water beverage, and belongs in every home because nobody can make a mistake by having a good kidney flushing any time.

"Our First Year"

(By a Bride.)

(Continued from yesterday.)

START THIS SERIES HERE.

The bride and groom are trying to maintain individual freedom. But the groom comes home, after a bad business day, and is chained to a dish towel.

"Certainly this is not a cheerful home for my tired hubby to come to", I whispered. "Jack, dearest I'm sorry!"

I know that I have the grandest husband in this world. Jack at last became conscious of the confusion about him. There wasn't a restful spot for his eyes to rest upon and it was 6 p.m. He must have flinched inwardly. For his mother is a descendant of New England housewives, one who has profited by modern inventions. Her home is the perfect combination of inherited housewifery with vacuum cleaners and mangles.

But my adorbale husband refused to be irritated by the upheaval in our little home.

"Come on, Peggins!" he exclaimed. "Le's fix it up together!" Let's make it a adventure."

And things would have been all right if Mary Smith had not stopped with a bundle of novels for me.

"Aren't husbands angels!" I glowed, too enthusiastically in order to conceal my humiliation.

'Some of them are!" Mary shook her finger fetchingly at Jack. Mary Smith is one of those devoted wives who schemes to get away from home once in a while to talk with other girls' husbands. She's too genuinely Victorian that she dares to come close to coquetry, sometimes.

"Jack with a dish towel in his hand! Have I lived to see that! Why man alive, you're spoiling Peg! Don't do your work and hers too."

Then Mary turned to me with:

"Peg! Take it from me. You can get away with it once in a year! If it's your first year But be careful how often you repeat the little joke! Keep it up—and see what comes of it!"

I knew perfectly well what would come of it: Jack would find out that his wift was not holding up her end of the housekeeping business as Mary Smith and his mother surely did.

Perhaps it was as well that Mary caught me in the depths of my disgrace. For then and there I resolved never again to mack such an exhibition of my own inefficiency.

I guess what I need is more will power. It's easy enough for me to promise myself to do big things. Jack is different He seems never to make himself do anything. He never has to make a deliberate choice betwen right and wrong.

And because he is so right, normally, he has such boundles sfaith in me. Never once did he hold me responsible for the disorder in my apartment. He simply concluded that I had done the best I could, and that I wasn't to blame, that it was unavoidable.

"Better hire a woman to help you Peggins." Get her several days a week," he suggested.

"But we can't afford her—if we abide by our budget," I reminded him. "I can have her two days a wek and no more!" And I ought to have added that that was enough in a family of two in a flat of three rooms and a bath.

"Can't you afford her while the rehearsals last?"

Oh, Jack is so thoughtful, so dear He must not discover how indolent I can be, "by fits and starts."

HYDRO RADIAL BILL IS NOW COMING UP.

TORONTO, Ont., April 27.—(Canadian Press.)—Mr. Drury intimated to the Legislature last night that after the budget debate is disposed of the next big order of the programme will be the Hydro Radial bill. Contributions were made to the budget debate by John Joynt, North Huron and A. C. Lewis, of North Toronto. Latter adjourned debate.

Mr. Joynt startled the members when he suggested that members should receive regular salary they used to get, fourteen hundred dollars, instead of two thousand, "which I have been told is the sum for this year."

LAKEFIELD CEMENT COMPANY PROTESTS HIGH ASSESSMENT

Meeting of Ratepayers Discuss Question and Hear Arguments. Submit By-Law to Extend Time For Production.

LAKEFIELD NEWS.

LAKEFIELD, April 27.—A large and representative number of ratepayers were present in the Council Chamber on Tuesday evening to discuss the cement bylaw. The meeting was called by the Board of Trade at the request of many citizens, who were under the impression that owing to over assessment the Canada Cement Co. were going to suspend operations in Lakefield. Mr. J. F. Lillicrap, President of the Board of Trade presided.

Mr. E. W. Bailey, manager of the Lakefield plant of the Canada Cement Co., stated the company's case plainly. On September 27th, 1920, the ratepayers approved a bylaw whereby the company would enjoy a fixed assessment of $50,000, except for school taxes, while the company agreed to produce from January, 1921, 600 barrels of cement per day, or 200,000 barrels per year. Failing this, they would pay the difference between the fixed assessment and the school tax assessment. In 1921 the school assessment was $50,000, precisely the same as their fixed assessment.

The company at first planned to make some necessary changes in the old plant whereby cement could be manufactured by the dry process instead of the wet as heretofore, but the management later saw fit to change the plant to one of greater capacity, and a new building was being erected. Now, while the company failed in its obligation to produce a certain given quantity of cement, it had provided work in construction to at least an equivalent value, and, after all, work and not a large quantity of stored cement was what the ratepayers wanted. In spite of the high prices of labor and material, the company carried on construction till the middle of December, 1921, when four months was lost owing to weather conditions, making further construction out of the question this winter. Their school assessment this year is $200,000, which the company feel is ridiculously high, and which they intend to appeal. Owing to a change of plans, the company ask for a further extension of time, till the end of 1923, before beginning production, as at present the market is poor, and the cement market, like all others, is in a very depressed condition. In the meantime, a modern plant will be built during the building season, and the ratepayers can see how much greater an asset to the town the new modern buildings will be. If the assessment was made satisfactory, work could be started at once, and the men would have employment.

In reply to a question as to the results of the assessment being confirmed, Mr. Bailey replied that this summer the work would be one of destruction of the old plant—not construction till better times came.

Matter of Opinion.

Dr. Fraser, while assuring the meeting of his believe that the Assessor had acted according to his best judgment, felt that after all it was a matter of opinion, and he felt the assessment was too high, as the plant was not yet a going concern, but a building under construction; and while under construction he advised caution till the plant was complete. There is a great depression in every line, and the Canada Cement Co. were spending a great deal of money preparing for better times. While the old plant as running there was considerable kicking, but as a matter of fact we knew its real value only when we lost it. The company now will build a bigger plant, and it is poor policy to show the spirit of greed, exacting the last cent. When the plant is complete there will be time enough to raise the assessment. Last year's school tax was liberal, and, in the doctor's opinion, last year's assessment was ample.

The Assessor Explains.

Mr. Robert Webster, the Assessor, stated clearly that he had gone over the bylaw very carefully, and in making his assessment at $200,000 he considered it lawful and fair. He had taken a solemn oath to act conscientiously and fairly, and he had done so. Whether the Court of Revision would change the assessment was not his business. Any one wishing to appeal their assessment could do so, he said, by filling in the blank form on the back of the assessment paper. The matter then remains for action by the Court of Revision. In the matter of the assessment, he had acted on his own judgment, as the Council never intimated what they thought it should be, and he was willing to abide by the decision of the Court of Revision.

Need the Company.

Mr. Casement briefly went over the case and stated that the village needed the cement company and would do well not to lose sight of the benefits which would come in the future when the plant was complete. He was sure the matter would be amicably settled.

Regarding a bylaw for the extension of time for production, Mr. J. E. Richardson moved that a resolution be sent to the Council asking that a bylaw be submitted to the village asking that extension of time till the end of 1923 be given the cement company before production starts.

Mr. J. A. Porter seconded the motion, which carried.

A Resolution.
Lights on the Dock.

Mr. A. G. Lawless addressed the meeting re the question of lights on the dock and canal. This matter was referred to the Secretary to get in touch with Mr. Killaly and the members for East and West Peterborough. Also the question of a chain on the dock as a protection against accidents.

The Secretary read communications re Trent valley waterways development, which would advertise this district more widely than ever.

For Consumptives.

The matter of raising funds for the National Sanitarium Association was brought up, and the ways and means of getting donations was left to a committee to make suitable arrangements.

The meeting then adjourned.

Successful Card Party.

The Ladies' Auxiliary of the G.W.V.A. gave a very successful card party in the Oddfellows' hall on Tuesday night. There was a good attendance in spite of various other attractions, and a very pleasant evening was spent. These card parties have become a feature in the social life of the village, and are looked forward to as a delightful way to spend an evening.

The committee varied the usual procedure this time by introducing a short programme after the cards, before the supper was served. The innovation proved very popular, Miss Alice Hunter and Miss Lilia Burgess contributed piano selections and Mrs. Osborne and Miss Effie Webster sang solos. All these numbers were well received, all being well known and popular artists.

The prizes for cards were presented by Miss Webster, President of the Ladies' Auxiliary, Mrs. Gordon Ridpath winning the ladies' first prize (a tempting box of candy), Mr. Robert Duff won the gentlemen's prize and Mrs. R. H. Alford the consolation prize.

Dainty refreshments were served.

PRESIDENTIAL ADDRESS.

DUBLIN, April 27.— (Canadian Press.)—Feature of Presidential address of Arthur Griffith before the Dail Eireann yesterday was directness of its attack on opponents of the Provisional government and throwing of responsibility on these men for the seriously disturbed condition of the country and especially renewal of pogroms in Belfast. He added that the constitution would be submitted to the electors in June.

in his own life, certainly in the life of the younger men present, Europe would again welter in blood.

"We triumphed in the war," he said, "but our triumph will not last forever. If our victory develops into oppression, vengeance will follow, just as Germany's action which started the world war was followed by vengeance.

"We must be just and equitable and show strength; we must realize that Europe is not on good terms and that storms are arising which we must deal with. We had hoped that the end of the great war meant the end of brute force, but unless Europe's problems are solved there is no assurance that force has given way to right."

The British Prime Minister solemnly urged the press to instil patience, good will and fellowship throughout the world. "You are here," he concluded, 'to instruct, to sustain, to guide, and I beg of you in the interests of the world's future not to add to the obstacles which are in the way, but to use your influence to help in the solution of difficulties which are full of menace."

NEWS OF BETHANY AND THE DISTRICT.

Aged Resident of Village Passed Away. Personals.

BETHANY, April 27. — On Tuesday morning at the residence of his son, Mr. P. C. Brown, there passed away an aged resident of the village in the person of Mr. Theodore Brown. The deceased, who was 83 years old, was up until a short time ago quite active, although ailing he was not considered seriously ill until Sunday evening when a sudden weak turn alarmed the family.

Mr. Brown has only resided in the village about three years, coming here with his son, Mr. P. C. Brown, who is the agent at the G.T.R. station. Mr. Brown was a member of the Methodist church, and attended Sunday school when ever able. In his younger days before coming to the village he was superintendent of the Sunday school at Rosehill near Picton. The funeral service which was held on Wednesday afternoon at 2.30 at the home of his son, Mr. P. C. Brown, was in charge of Rev. J. E. Beckel, pastor of the Methodist church, assisted by Rev. A. J. Weir, the Anlican minister.

Rev. Mr. Beckel read the 90th Psalm and spoke very feelingly in regard to the deceased. The choir sang a very touching anthem, "Some Day We'll Understand." The funeral cortege left via the G. T. R. at 6.30 Thursday morning for Wellington, where burial will be in Wellington cemetery.

Left to mourn a kind and loving parent is Rev. A. L. Brown of the Queen street Methodist church, Lindsay, Mr. P. C. Brown, Grand Trunk Station Agent, and Mr. Fred Brown of Saskatchewan.

Personal Mention.

Rev. A. L. Brown, Mrs. Brown and Mr. Vernon Brown, all of Lindsay, attended the funeral of their father and grandfather, the late Mr. Theodore Brown, on Wednesday last.

Mrs. T. J. Jackson is at present visiting withh er sister, Mrs. Elmer Rowan, Reaboro.

Mr. William Joint of Millbrook is relieving Mr P. C. Brown at the G.T.R. station for a few days.

The different merchants of the village wish the public to know that each Wednesday sharp at 12 o'clock the different places of business will be closed during the summer months.

Present Play.

The members of the Presbyterain Church have been very fortunate as to secure the young people of ballyduff to present their play "The Country Minister," here in the town hall on May the 5th.

Mr. M. L. Panton, manager of the Bank of Toronto, has received a call to Toronto. Mr. Panton will be greatly missed in the athletic assocaition as he was a very prominent member. He left on Thursday morning for his new charge.

An excellent programme was given on Wednesday evening at the league. There were over 40 young people present. Rev. J. E. Beckel occupied the chair in the absence of the president and conducted the devotional exercises. As was announced the programme was in the charge of the Tuxis Square boys. Mr. Monk, one of the Mentors. was chairman for the programme part, and the following numbers were given:

Mr. W. A. Brown gave a splendid talk on the subject "What the Church means to the Community," a chorus entitled "Jesus Loves Even the Waifs of the Street," was given by Mildred Davis, Marion Fallis, Jean Thorndyke and Hazel Jackson. Recitation by Karl Monk, "Will and the Bee," violin solo and encore by Mr. Otto Spencer, accom anied by Mrs. Spencer; recitation entitled "Spring." by Margaret Jackson; solo, "Memories," by Harold Monk. Recitation, "Aunt Tabitha," by Hazel Jackson. This recitaton was repeated from last week by request. Vocal duet by Miss Violet Jackson and Miss Olive Wake entitled "When you know Hi..." Next W'nesday will be the last meeting for the season when the election of officers will take place; also reports of the year's work given.

Mr. P. C. Brown, who is mentor of the Square, was unable to be present on Wednesday evening owing to the death of his father. Mr. Theodore Brown.

The Bethany brass band is busily engaged in practicing for the coming garden parties, also the 12th of July.

STIRLING METHODIST CHOIR GAVE CONCERT

An Interesting Program. Stirling News of Interest.

STIRLING, April 27.—The Stirling Methodist choir scored another triumph last night, Monday 24th inst., when they rendered Gaul's beautiful oratorio 'Ruth" in the Methodist church.

Ferns and deep pink carnations constituted the scheme of decoration. These were artistically displayed around the pulpit and choir stalls. Under the careful tuition of the choir leader, Mr. Gerald L. Clute, the choir had received careful training for some weeks past and their excellent performance reflects great credit on him.

Prior to "Ruth," a short programme of songs by local talent was gone through. The choir sang with great fervour, "There's a Land," a stirring patriotic composition by Allister. Miss Bessie Conley, in fine voice, next sang two short songs, "If Heaven I Win" by Rudd, and "Winter Lullaby" by Dekoven. "Daddy" was next sung by young Stewart Elliot in a delightfully boyish manner. A pretty duet by the Kirn sisters, Gracie and Dorothy Conor "Life's Dream is O'er," received appreciative applause.

Mr. Gerald Clute next appeared, and in splendid style sang "Sunshine and Rain," by Blumenthal. He followed this up by the "Years at Spring" by Beech. This brought the first part of the programme to a close.

The characters in "Ruth' were ably taken as follows: "Ruth," Miss Mae Sarles; "Naomi" Miss Strethel Walton; "Orpal," Miss Kate Kennedy; "Boas," Mr. Jas. Booth.

Mr. Chas. Allen presided at the organ throughout the oratorio, with skill, his subdued accompaniments during the solos adding much to the general success.

The principals were all in splendid voice, the local artists, Messrs. Sarles and Kennedy, and the visiting soloists from Belleville, Miss Walton and Mr. Booth also gave a good account of themselves.

The chorus work by the choir of some thirty voices was excellent, the expression and attack was noticeably good throughout, the crescendos were firmly graded, a climax being reached in a really splendid interpretation of the wedding chorus, a most difficult number. The harmonious chorus, "Nightfall," too, deserves special mention.

Judging by the persistent applause throughout the evening, the very large audience was both appreciative and congratulatory.

Oddfellows Gather.

On Monday night about twenty members of Stirling degree team of Encampment No. 80 visited Trenton to put on a Golden Rule degree. The Patriarchal degree was introduced by the Belleville degree team and the Royal Purple degree by the Trenton degree team.

There were seventeen candidates on whom were conferred degrees, some of whom were from Belleville, Stirling and Trenton. Following this ceremony a fine banquet was given.

Stomach Full of Gas Destroys Appetite

If stomach is filled with gas from undigested food, the whole system is poinoned, causing tired, nervous feeling and no appetite. Simple buckthorn bark, glycerine, etc., as mixed in Adlerika, expels gas and poisons almost INSTANTLY and gives you better appetite. Adlerika removes surprising matter from BOTH upper and lower bowel which poisoned stomach. EXCELLENT to guard against appendicitis.

THE BOY'S SUIT FOR SPRING

Maybe you havn't been thinking very long about the kind of a Suit the boy should have for Spring. We have been thinking about it for weeks though. We figured that just as soon as the days would get warmer the boy would be out more and would play harder. So we were mighty careful to see that every Suit we bought was made to stand "treat 'em rough" wear.

Gingham Frocks

Feature the First Showings of Summer Modes

YOU may not come down town intending to buy a gingham frock. But when you see these we believe you will not go home without one. They are refreshing in brisk little ways. Colors are attractively youthful in effective plaids and checks. Contrast trimmings of organdy or plain ginghams, and some moire ribbon ties, are a few things you will notice. And you will find keen delight in the prices.

At $10.50 there is a charming model that comes in black and white, mauve and white or pink and white checks. Just below the [illegible] a deep band of white organdy on which are diamond-shaped squares of the gingham. There is a little round organdy collar with a ribbon tie and a neat little square yoke formed of pleats.

At $10.75 there is an unusual model of plaid gingham in mauve or green. It is unusual because of the double row of diamond lattice-like shaped scrolls that trim the skirt, the sleeves and edge the collar of white organdy.

At $8.50 there is a youthful creation of blue and white checked gingham. It is a long-waisted basque effect with a soft girdle of the material. Just beneath the girdle are patch pockets, trimmed with pearl buttons and white gingham, and below the pockets is a deep band of white organdy, and beneath the organdy is a band of gingham. The front of the bodice, on both sides, is edged with a row of pearl buttons.

New Little Charms of Tub Blouses

ACCENUATING little collars, cuffs and fronts. By these the Tub Blouses emphasize their importance for spring wear. You will feel the urgency of owning several—to wear with the suit, the swagger cape, skirt or sweater. Sheer styles complete with those that show hits of color—some very recent ones have touches of checked gingham for collars, cuffs and odd little fronts.

At $2.95 a real handsome long sleeve Voile Blouse can be had. It is made in regulation style with a square yoke, tuxedo collar and front. Collar and cuffs are adorned with fine lace and hemstitching.

At $4.25, $4.75 and $4.95 there is an amazing number of voiles, and no two are the same. You could ask for most anything and find it in this assortment. Some cunning little Over-Blouses are of white voile with an all-over embroidered pattern of sprays. A narrow piece of lace edges the round neck and forms a tiny collar that is tied together with a narrow turquoise ribbon. The price is **$4.25.**

At $3.19 and $3.95 the Dimity Blouses express some charming tailored effects. For business wear or as a companion for the suit we believe there is nothing to equal these. A variety of models. It will be difficult to decide just which is the prettiest.

EGG MARKETS.

OTTAWA, April 27. — Canadian Press. — The market on eggs is well maintained owing to the keen competition in buying at Ontario points. A number of the smaller dealers are reported to be storing on their own account. This is an added feature in making competition keen. It is evident that the larger packers are now in the market for storage purposes from the number of requests for local shipments. It is stated that a number of cables have been received from British buyers enquiring for chickens. The indications are that some business will result.

New York dealers are also enquiring for frozen turkeys.

Toronto firm with little change in price, specials jobbing 35c; extras, 34c; first 30 to 31c; seconds 25c. Track shippers in Ontario are reported paying stores 26 to 27c and are offering carlot graded extras at 33c f.o.b. bases free.

Montreal prices unchanged with a slightly easier undertone. On the mercantile exchange 450 case Ontario extras were offered at 33c f.o.b. Ontario shipping point, bid 32c not sold; 75 cases Ontario straight receipts 30c, wanted at 27-21 bid not sold; 50 cases P.E.I. candled cases returnable 30 1-2c asked, 29 1-4c, net sold.

Winnipeg firm. Dealers quoting country 26 to 27 for straight receipts.

STERLING RATES.

MONTREAL, April 25. — Canadian Press. — Sterling exchange rates were quoted here yesterday as follows:

Sterling, demand, 4.4898; sterling cables 4.4936.

CHICAGO CATTLE.

CHICAGO, April 27. Canadian Press. — Cattle receipts 8,000; beef steers and she stock 10 and 15c higher; spots on yearlings up more; top yearlings $9.25; matured steers, $9.00; bulk beef steers, $7.50 and $8.65; bulls, stockers and feeders, strong to 15c higher; calves steady; bulk beef cows and heifers, $5.50 to $7.15; canners and cutters, mostly $3.65 to $4.50; bologna bulls, largely $4.35 to $4.50; veal calves to packers, mostly $7.50 to $8; choice handyweight to outsiders $8.50 to $9.

Hogs, receipts 16,000, opened mostly 5c higher; closing 5c higher on lightweights; others steady to strong; shippers bought about 4500 holdover modern; top 0.165, bulk 10 to 10.65; pigs strong to higher.

CASH GRAIN.

MONTREAL, April 27. Canadian Press. — The domestic cash grain market was quiet yesterday. There were no new developments in the flour situation. The market for all kinds of millfeed was steady. Trade in rolled oats was low. A fair business is passing in baled hay. The market in egg was active but for potatoes dull. The tone of the butter market was firm under a steady demand. There is little doing in cheese.

CHICAGO WHEAT.

CHICAGO, April 27. Canadian Press. — Favorable crop reports from the southwest together with word of much rain breaking a long drought in Australia did much yesterday to bring about a fresh downturn of the wheat prices here. The market closed heavy at -8 to7 3 3-8c net lower, with May at $1.39 3-4 to $1.40 and July $1.24 to $1.24 3-4. Corn finished unchanged to 1-8 to 1-4c off; oats unchanged to 1-2c down and provisions at an advance of 5c to 25c.

WINNIPEG CATTLE.

WINNIPEG, April 27. Canadian Press. — Receipts 920 cattle and calves, 785 hogs and 29 sheep and lambs.

The cattle market displayed a weaker tone this morning. Choice lightweight killing cattle were firm but medium butcher's and heavy steers on a light demand, looked 25c lower. The bulk of the stockers and feeders changed hands at steady prices, packers were bidding $1200 for elects on the hog market with odd sales completed at a premium of 25c.

The sheep and lamb market was steady at $14.50 for good lambs and $8.50 for fair sheep.

WINNIPEG WHEAT.

WINNIPEG, April 27. — Canadian Press. — Cash prices:

The Human Clock

"IT has long been a favorite idea of mine to compare the human body with my old clock here.

"Without proper attention the old clock gets run down and stops until I wind it up again, and then it ticks away just as heartily and regularly as ever.

"And so it is with the human body, but the great difference I find is that the human clock usually breaks down instead of runs down, because people neglect to take proper care of their health.

"Through all these years I have managed to keep well and to keep young by using restorative treatment whenever there are indications of the system becoming run down.

"Fortunately I learned the value some years ago of Dr. Chase's Nerve Food, and to its use I largely attribute my healthful condition at this age.

"When I hear people talking about being unable to sleep, or of suffering from nervous headaches, indigestion or worn-out feelings, I ask them, 'Why do you not use Dr. Chase's Nerve Food to increase your nervous energy?'"

A POPULAR TONIC

One That Enriches the Blood and Strengthens the Nerves.

Proper food, fresh air and a good tonic will keep most people in good health. Hurried meals, indoor confinement in badly ventilated rooms, and lack of exercise causes anaemia. In this condition Dr. Williams' Pink Pills are a popular tonic. They contain no habit-forming drugs, and always have a beneficial effect through enriching the blood and strengthening the nerves. For growing girls, who become thin and pale, for pale, tired women and for old people who fail in strength, Dr. Williams' Pink Pills are an ideal tonic. Their benefit in anaemic conditions is shown by the case of Miss Lucy A. Steeves, Hillsboro, N.B., who says: "Last spring I was in very poor health, and completely run down. I had severe headaches, the least exertion would cause my heart to palpitate violently, my appetite was poor, and at times I had fainting spells. This went on for some months, and although I was taking medicine, I seemed to be growing weaker, and the least exertion would leave me worn out. Then on the advice of a friend, I changed the treatment to Dr. Williams' Pink Pills, and I have great cause to be thankful that I did so, as they have made a wonderful improvement in my condition. I can now work without fatigue, go upstairs without becoming breathless, and have gained in weight. I think these pills are an ideal medicine in cases like mine."

You can get Dr. Williams' Pink Pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Members of the assembly now receive a salary of £875 per annum.

Try Doing Next Week's Washing with Rinso

Find out for yourself why hundreds of thousands of women say that they could not face another wash day without it. The two easy steps below will save *you* hours of back breaking rubbing.

First: For each tub of clothes dissolve a half a package of Rinso into a little cool water until it is like thick cream, then stir in two quarts of boiling water. If the water is hard, or the clothes extra dirty, use more Rinso.

Then, pour into tub—of cool or lukewarm water. Mix well. Keep adding the solution until you get a rich, lasting, soapy suds, even after the clothes have been put in. *Do not pour the Rinso direct from the package into the tub.*

Soak the clothes for one hour, two hours, overnight, or as long as convenient. Then rinse to remove the loosened dirt, until the water runs clear. Hang them out to dry.

There's no rubbing—no boiling. Rinso is not a washing powder, but a scientific combination of pure cleansing materials that loosen and dissolve the dirt from even the heaviest pieces. It *soaks* clothes clean in a few hours without injury to a single fabric.

IF YOU USE A WASHING MACHINE

Follow the regular directions given here. Soak the clothes. Then, before operating the machine, add fresh Rinso solution using the same amount of Rinso as you used for soaking. No other product is needed when Rinso is used.

STUDY TOUR FOR BOYS

About the best thing a father can do for his boys is to encourage them to travel and see something of the world before they become too keenly engrossed in commercial life. Travel is a great educator—it enriches the mind and fits the youth to better fill his place in life. A normal boy is observant—he assimilates and retains knowledge. Travel gives him his opportunity—it fits him for every phase in life.

A tour of Europe is at present being organised under the personal supervision of Mr. T. H. Matthews, U.A., (Oxon), Assistant Professor of Mathematics, McGill University, and late Instructor-Lieutenant, Royal Navy. In addition, local guides will be secured to conduct excursions and give lectures on the artistic, historic, literary, and economic significance of the sights seen and the places visited.

A most carefully planned and interesting itinerary has been arranged, including visits to Montreal, Liverpool, Chester, Stratford-on-Avon, Oxford, London, Paris, Versailles, Fontainbleau, Rheims, Lyons, Marseilles, Cannes, Nice Monaco, Mentone, Genoa, Pisa, Rome, Naples, Sorrento, Capri, Pompeii, Vesuvius, Florence, Venice, Trent, Innsbruck, Munich, the Passion Play at Oberammergau, Nuremburg, Mayence, the Rhine, Cologne, Brussels, Louvain, and Ostend, returning through London and Liverpool.

This exceptional tour starts from Montreal on Saturday, 24th June, calling at Quebec, by the splendid White Star line steamship Canopic (12,100 tons). A period of approximately two months will be occupied by the tour, as by the itinerary the return trip is made from Liverpool by the fine steamship Regina (16,500 tons), arriving at Montreal on 26th August.

The arrangements for this tour are most complete, and the charge, which is a minimum one, covers everything in the way of transportation, hotel accommodation, with three meals a day, transfers, sightseeing fees, in brief, all necessary travelling expenses for the entire tour.

Apply to any agent of the Canadian National Railways for further particulars. 4d-24-27-2-6

HAVELOCK SCHOOL BOARD IN SESSION.

Roof on South Wing of School Reported in a Dangerous Condition.

HAVELOCK, April 27. — The regular April meeting of the School Board was held on the 20 instant. All the members were present except Trustees Carter and Jas. Barlow. Little business was transacted except to discuss the proposed repairs of the roof of the north wing of the school and finally the Secretary was instructed to invite Architect Blackwell of Peterboro, to come and examine the roof.

Mr. Blackwell came down on Monday afternoon and after examining the roof declared that it was in a dangerous condition, could not be repaired satisfactorily, and he advised that it be remodelled in keeping with the roof on the south wing according to the original when the south wing was erected. He will report later to the Board the probable cost.

Mr. Jenkins Took a Cracked Club To Tame Lions

The exhibition ended rather badly. It very nearly was a big day for the lions and a sad day for Mr. Jenkins—all for want of proper care in getting ready.

Many a man who has business to do and a living to make and a job to fill is as careless how he feeds his body as Mr. Jenkins was in picking out a club.

Some foods are too heavy, some are too starchy, many lack necessary elements and so starve the body — and many load the system down with fermentation and auto-intoxication.

Grape-Nuts helps build health and strength. It contains the full richness of wheat and malted barley, including the vital mineral elements, without which the body cannot be fully sustained. Grape-Nuts digests quickly and wholesomely. Served with cream or good milk, it is a complete food — crisp and delicious.

Grape-Nuts is just the food for those who care to meet life's situations well prepared in health. Order Grape-Nuts from your grocer today. Try it with cream or milk for breakfast or lunch, or made into a delightful pudding for dinner.

IN OMEMEE AND DISTRICT

Epworth League Methodist Church Elect Officers—$60 For the Forward Movement.

SOCIAL ACTIVITIES.

OMEMEE, April 27. — The annual meeting of the Epworth League of the Methodist Church was held on Monday evening, when the officers for the year were elected:

Hon. president—Rev. Mr. Stillman.
President—Miss Lila Parsons.
1st Vice-president—Mrs. Boyd.
2nd Vice-president — Miss Eva Race.
3rd Vice-president — Miss Hilda Sanderson.
4th Vice-president — Mr. Irwin Connell.
Secretary—Miss Lilian Race.
Cor. Secretary—Miss Vivian Parsons.
Treasurer—Miss Ruth Stillman.
Pianist—Miss Mabel Weir.

During the past year the League raised ...60.00 for the Forward Movement, leaving a balance of $60.00 in the bank.

Laid at Rest.

The funeral of the late Mrs. Ellen Germain, who passed away in Moose Jaw, Sask., on 18th April, was held on Sunday afternoon from the home of Mr. T. J. Parsons, Omemee, and was very largely attended. The funeral service was conducted by the Rev. R. F. Stillman, pastor of the Methodist Church. The deceased had lived in Omemee practically all her life until a few years ago, when the lure of the West beckoned, and with her only son she went to reside in Moose Jaw, Sask. Rendered helpless by paralysis two and a half years ago, she has been a patient sufferer until called by death one week ago. She was fifty-nine years of age. Sincere sympathy is extended to the bereaved son, Mossom, also to the only surviving brother, Mr. Tom Lowes, of Roland, Man. The remains were borne to their last resting-place by relatives—Messrs. James Magee, Stewart Bannon, T. McConnell, J. Widdis, W. Fee, and J. Lowes.

Supper a Success.

The hot supper provided by the ladies of the Presbyterian Church on Friday evening last proved a decided success. The scalloped potatoes, baked beans, etc., seemed to touch the spot of a goodly number on a cool evening, after which a number of games were played, followed by community singing. The proceeds of the supper amounted to $39.10.

Miscellaneous Shower.

The young people of the Anglican Church gathered at the home of Mr. and Mrs. Harry Griffin (nee Miss Ina Rowan) on Monday evening, and presented them with a miscellaneous shower.

An Attraction.

The attraction in town on Tuesday afternoon was a new Durant car from Peterborough, which was demonstrated by a representative from that city.

HEADS THAT ACHE AND PAIN

It is hard to drag along with a head that aches and pains all the time.

In nine cases out of ten, persistent headaches are due to poisoned blood, the blood being rendered impure through some derangement of the stomach, liver or bowels, but no matter which organ is to blame the cause must be removed before permanent relief can be obtained.

BURDOCK BLOOD BITTERS,

which has been on the market for the past forty five years, removes the cause of the headache by starting the organs of elimination acting freely, and when the impurities are carried off from the system, purified blood circulates in the brain cells, and the aches and pains vanish.

Miss Clara Murphy, Centre Dummer, Ont., writes: "My system was greatly run down and my blood out of order. I suffered a great deal from severe pains in my head which made me feel very miserable. After having tried other remedies I purchased a bottle of Burdock Blood Bitters, and was very glad to notice a decided improvement in my health. I took another bottle and it has done me an enormous amount of good. I have recommended it to some of my friends who were in a similar condition and they all say it is a wonderful remedy."

A Presentation.

About eighteen of the bachelor friends of Mr. Lavergne Fallis gathered at his home on Fallis' Line last Friday evening, and presented him with a handsome oak chair, as a token of their esteem and friendship now that he has joined the ranks of the Benedicts.

Mr. Leonard Harrison read the address, and Mr. James Widdis made the presentation:

To Mr. Lavergne Fallis,
Fallis' Line.

Dear Friend,

We, your bachelor friends of the 5th and 6th Lines, Cavan, have gathered here to-night to wish you and your bride many years of happy married life. We make no apology for coming here this evening, for we were sure of a whole-hearted welcome, because you have always been one of the boys, and have entered heartily into anything we took part in.

We present you with this chair, not on account of its value, but as a slight token of our appreciation of your good fellowship amongst us; and it is the sincere hope of all present that you may live long to enjoy it.

Signed on behalf of the bashful bachelors,

James Widdis,
Leonard Henderson.

You Have a Right to Expect More

You pay a good deal of attention to your choice of tires—perhaps because you see them all the time. Have you also determined which is the one best battery for your car?

Be critical of batteries, particularly of the Exide. You have a right to expect more than the ordinary lasting-power from an Exide Battery. It was the first starting and lighting battery for automobiles, and is today standard equipment on more new cars leaving the factory than any other battery.

The Exide is a powerful battery; it will not get out of order unless badly abused, and it will last a very long time. That is the kind of a battery you have a right to expect in the new car you choose and in the battery you buy to replace a fagged out battery. For the Exide is a true economy on account of its long life and freedom from repairs.

It is well worth your while to insist on an Exide. If you should have any trouble in getting one, write us or our nearest district distributor.

Interesting Talk Given at Last Meeting of Well Babies Clinic

Home Building and Housekeeping Occupy an Important Place—Caring For the Health of Children.

At last week's regular meeting of the Well Babies' Clinic, an interesting talk was given by Mrs. Robert Harstone, explaining the second of the series of illustrated booklets sent recently to the Clinic, entitled "Building a House and Making a Home."

The ideal of all young married people, said the speaker, if they do not already own a home, is to make one for themselves. For the house itself, location should be considered, its nearness to church and schools, the people who live in adjoining houses, the facilities for flower and vegetable garden. The house may be small, but it should be compact, with especial attention paid to roof and cellar.

The kitchen is the centre of the house, because it is the mother's workshop, factory and laboratory, where much of her day is spent, and should be constructed with an eye to her comfort and convenience, in the placing of its fixtures.

So much for the house, which should be tidy, attractive, sanitary, comfortable and convenient, but does not constitute the whole of the home. "To make a home is the greatest thing a man or woman can do, but each must be prepared to take his or her share in the partnership of home life. Perhaps the greatest responsibility rests with the wife in this regard, as, while the husband undertakes to support the home, the wife undertaakes to manage it." The mother should know all about the values of good food, how to prepare and serve it in appetizing ways, she should understand how to sew and mend, she should keep herself in touch with the affairs of the community in which she lives, and with the life of her country, as anything tending to develop the mind will make her a better wife and home-builder. Above all, she should understand the care of children, which are the crown and completion of the home, and in whose lives parents, more than anyone else, do most to mould the character and conduct. The future life of the child and its happiness depend upon the influences exerted by home life in its tender years, and children should be taught obedience and unselfishness, not through fear, but through love, as the conduct of all after life depends to a great extent on the standards learned in early childhood.

Sun and Wind Bring Out Ugly Spots. How to Remove Easily.

Here's a chance, Miss Freckle-face, to try a remedy for freckles with the guarantee of a reliable concern that it will not cost you a penny unless it removes the freckles; while if it does give you a clear complexion the expense is trifling.

Simply get an ounce of Othine—double strength—from any druggist and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case.

Be sure to ask the druggist for the double strength Othine as this strength is sold under guarantee of money back if it fails to remove freckles.

During the fourth Liberty loan campaign in the United States, he was with the Minneapolis Symphony, touring from Chicago to the Coast. He has sung in many of the leading picture houses of Denver, Los Angeles, San Francisco, Portland, Seattle, and Vancouver. His repertoire for to-day includes the "Armourer's Song" from Robin Hood, and "Annie Laurie."

What Clean-up Week Means to The Community

Describing the advantages of clean-up week in any community, a Brantford paper says: It beautifies the city; Is a preventive of disease; Tends to keep down the disease-carrying fly; Promotes thrift; Encourages employement; Furthers fire prevention; Stimulates civic pride; Makes the city more appealing to visitors.

Among the enterprises to be undertaken, it recommends: cleaning outhouses, sheds, cellars and windows; raking lawns; splitting, sawing and carrying wood; taking out ashes; polishing floors; painting generally; taking off storm doors and windows and sash; cleaning yards, general repairing and carpentering.

Marjorie Rambeau a Decided Hit, But Her Latest Play Lacks

By JOHN O'DONNELL.

The colorful "God knows" which Marjorie Rambeau of New York intoned early this season at the conclusion of each act of Zoe Atkins' "Daddy's Gone A-Hunting" must leap to her lips when anyone inquires why "The Goldfish" was selected at her present vehicle.

Fairer than ever is Marjorie—at first as Jenny Jones, a gamin who is vaguely suggestive of Kiki; then as Genevieve, a lady who toils not, neither does she spin; and finally, in a scene siruppy with sentiment, as the incipient duchess who rejects the lure of titled ease to go back to Coney Island and the song plugger she loved.

She's Satisfactory

Again Miss Rambeau charms with her beauty; she blends ability as a comedienne with keen sense of characterization. In every way she is satisfactory. But the play—

In bringing 'The Goldfish" from France they had forgotten to change the water!

It was another sad case of a French farce on the American stage: the cocktail served in the soupbowl: the once light and airy bit of nonsense reshaped into a heavy-footed, short-winded affair which laboriously tried to force laughs by a mixture of burlesque, satire and sentiment; a heroine purified by the introduction of marriage licenses and divorce decrees.

Thus the story of "L'Ecole des Cocottes," first christened "Her Three Husbands" by American godfathers, then given several other titles and finally presented as "The Goldfish."

The Plot.

"The Goldfish" is the story of the social advancement of Jenny Jones, first married to the slim composer of "I Loved Her Till She Moved Away," a song plugger in New York and Coney Island cabarets. Both are temperamental. They are divorced and Jenny takes her first step up th social ladder on the arm of a middle-aged and sober business man.

Then follows the real captain of industry, Hamilton J. Powers. Powers dies opportunely and Jenny, now a rich metropolitan widow, decides to cement her social position with lessons in deportment and conversation. She employs a Polish nobleman and learns about manners from him.

In the denouement, the author said it with sirup. About to surrender to the importunities of the Duke of Middlesex, Jenny finds that she longs for the jazz and temperament of the song plugger.

Back to Old Love.

"Perhaps," cries lovely Guinevere, "perhaps, in the glare and blare of Roseland I could recapture my lighthearted, care-free self of six long years ago."

Her first love returns, barely escaping from the arms of the Detroit heiress who is waiting for him at the Ritz. Together they go out into the night back to where they had met, six long years ago, in Coney Island.

MARJORIE RAMBEAU AND WILFORD LYTELL IN "THE GOLDFISH."

RECIPES

REPEATING the same old way of cooking fish is tiresome. "Something different" is a relief.

Or maybe you always buy the same kind of fish. Try varying your choice of fish. Herring is one of the cheapest of fishes and one of the best. They can be boned and are very desirable for children on that account.

Sea bass is another inexpensive fish. This bass no small bones. All the fish steaks are without small bones and can be cooked in a number of ways.

Baked Herring.

Two medium sized herring, 2 tablespoons butter, 1 teaspoon lemon juice, flour, salt and pepper, few gratings nutmeg, 1 cup milk.

Have herring dressed and boned. Let stand in cold water half an hour when they come from market. Drain and dry between towels. Sprinkle with lemon juice and let stand a few minutes. Dip in flour. Season with salt and pepper and a few gratings of nutmeg.

If you have a shallow baking dish that can be sent to the table bake the fish in it.

If not, bake in a dripping pan. Oil baking dish and put in fish.

Spread with butter and pour over part of the milk. Bake in a moderate oven for half an hour. Add remaining milk after the first 15 minutes of baking.

Baked Sea Bass.

Two or three-pound sea bass, 1½ cups cracker crumbs, 2 tablespoons melted butter, 1 tablespoon minced onion, 1 teaspoon minced parsley, ½ teaspoon salt, ¼ teaspoon pepper, 1 egg, thin slices salt pork.

Have the fish thoroughly cleaned. Rub with salt on the inside and let stand in cold water half an hour. Wash and drain. Dry carefully. Stuff and sew. Put slices of salt pork on baking sheet. Lay fish on salt pork.

Cover with more slices of the pork. Add one-half cup boiling water. Bake 50 minutes in a hot oven. Baste frequently with drippings in the pan. To make the stuffing mix dry ingredients, add melted butter and egg slightly beaten. Mix well and use as needed.

Baked Halibut Steaks.

Two halibut steaks, salt and pepper, lemon juice, thin slices salt pork, 2 cups coarse bread crumbs from soft part of loaf, 4 tablespoons melted butter, 1 teaspoon minced onion, milk.

Have steaks cut about one and one-half inches thick. Put salt pork in a baking dish or dripping pan. Place one steak on the pork. Sprinkle with salt and pepper and lemon juice. Cover with one cup bread crumbs. Sprinkle with half the minced onion and pour over half the melted butter.

Sprinkle with enough milk to make moist. Put the other steak on top of the first. Add remaining ingredients. Bake three-quarters of an hour in a moderate oven. Baste frequently with the drippings in the pan. Remove to platter and serve with Hollandaise sauce.

Halibut Steak Baked With Tomatoes.

One halibut steak, 2 cups tomatoes, 1 tablespoon minced onion, 3 tablespoons butter, flour, salt and pepper.

Mix onion with tomatoes. The steak should be cut about two inches thick. Sprinkle fish with salt and pepper. Roll in flour. Put in a baking dish and spread with butter. Pour over tomatoes. Bake 50 minutes in a hot oven. Serve in the same dish in which the fish was baked.

U.F.Y.P.O. CLUBS DEBATE FOR A CUP

Six of the nine U.F.Y.P.O. clubs of East Peterobrough County are debating for a cup to be presented at the annual County U.F.O. picnic in June. Sixteen debates have already been held, in different parts of the county, on subjects that included discussion of the tariff, of consolidated schools, the relative importance in the Dominion of eastern and western Canada, restriction of the franchise, and lighter questions, concerning the chances of success in life of a single man as compared with a married gentleman, the deserving qualities of capital punishment, the school's influence on character as compared with the home's influence and the favorable aspects of country life as opposed to an urban existence.

The summary of results to date shows Peterborough club with nine debates discussed, 4 won and 5 lost; Norwood with 4 debated, 3 won and 1 lost ;Rush Point has debated 5, winning 3 and losing 2; Lakefield 5, winning 3 and losing 2; Zion 4, winning 3 and losing 1, and Havelock 4, with no wins.

Some of the debates, with their subjects, which will take place soon, are: Zion vs. Havelock, at Havelock, April 28th; Mavelock vs. Peterborough, at Peterborough, May 16th; Resolved, that the single tax system is preferable to our present system of taxation. Havelock vs. Lakefield, at Lakefield, May 17th; Resolved, that the Protective Tariff builds up industries. Zion vs. Rush Point at Rush Point, May 30th; Resolved, that exhibitions do more to develop agriculture than do agricultural colleges.

Is Now a Healthy Boy

"From a puny, delicate child, my little Johnny has become a strong sturdy boy."

One mother writes:—"If you had seen my little Johnny four months ago and you were to see him to-day, you would never believe that he is the same boy. Then he weighed only 49 pounds. To-day he weighs 90 pounds, almost double what he weighed four months ago. His trouble first started with a cold, which we never noticed because he was strong and like all boys of his age occasionally caught cold. After a while we began to notice that his cough, instead of getting better, was getting worse, that he was looking pale and losing weight. He seemed to be tired all the time, had no energy to do anything. Before he caught this cold he had no trouble with his lessons and remained at the head of his class without much study. But we began to notice a change. He didn't seem to care whether he knew his lessons or not and nothing seemed to interest him. He coughed so much and so hard at times that his face would become purple and we thought he would surely burst a blood vessel. Medicines and cough mixtures didn't do him any good. Finally, in desperation and as a last resort, we tried Carnol. In a short time his cough had almost disappeared. His appetite was returning and he was beginning to take an interest in his studies. And, thanks to Carnol, he has become as strong and healthy as he has ever been."

Carnol is sold by your druggist and if you can conscientiously say, after you have tried it, that it has'nt done you any good, return the empty bottle and he will refund your money. 1-122

THE FAMILY CAT ON MISSING LIST

It was a big pet cat, and it liked to roam. They often do, but they usually "come back." This one took a notion that it wanted to view the town from the top of an electric light pole, and then, when it had successfully accomplished its purpose, decided that it couldn't get down again in safety, which was very probable. Although it had luckily missed the high voltage wires on its way up, it couldn't see its way clear to navigate in a downward direction, and some queer feline instinct forbade it to try.

So it stayed at the top of the pole for three days and three nights, meatless and drinkless, its pitiful meows getting fainter and fainter, and the children in the catless house growing more frantic over its pitiful appeals for help.

Soft-hearted firemen made vain attempts to dislodge the luckless pussy, and neighbors tried every device to induce it to forsake its lofty perch and attempt the 'passage perilous.' All efforts were in vain, until arrangeemnts weer made with a certain south end factory to shut off its power long enough to enable a man to climb up and get the cat, telephoning for resumption of operations when the rescue had been effected, and an empty but much wiser mouser had been returned to its Charlotte street home.

SPRING

I heard a laugh, so low, so light,
It seemed the winds were bringing
Sweet echoes from the flower bells
Down in the meadows ringing.

At last where willows gently droop
I found a little maiden
All dressed in robes of trailing green,
With vines and blossoms laden.

I rubbed my eyes and looked at her,
I thought I must be dreaming,
For while she laughed, down dimpled cheeks
Great glistening tears were streaming.

"You must not mind," said she to me,
Her voice my whole heart ruling,
"I cannot help my many moods,
I'm only April-fooling."

Princess Zara At Grand This Week

The production of the operetta, "Princess Zara" at the Grand Opera House on Friday and Saturday evenings of this week, will no doubt be of much interest to most of the school-going population of the city, as well as to the parents and friends of those taking part. The general public also might well take an interest in a presentation which is the work of 150 of the pupils of the Collegiate Institute.

"Princess Zara" is an English composition. The music was written by Arthur Somerville, an inspecter of music in British schools, and is said to be eminently suited to the abilities of young people. Mr. M. Chenhall, A.R.C.O., whose wide experience and unusual capabilities ensure the success of the venture, is the director.

For use in washing machines shave or slice a portion of the "SURPRISE" bar direct to the machine.—It will do fine work.

THRILLS OF MELODRAMA TAKE PLACE OF FRILLS OF COMEDY ON BROADWAY

BY JOHN O'DONNELL

An audience which would rather shudder than shimmy and which prefers the thrills of melodrama to the frills of comedy has come to the front with a vengeance in the current Broadway season, New York

At a time when a lean season is petering out into a growing list of dark theatres, slashed salaries, a steadily increasing volume of tickets on the cut price mat, and with only a limited number of unquestionable hits holding their own—at this time the drama of shriek and horror, shudder and fiendishness, continues to pack the theatres.

The Crime Wave

The obvious explanation is the New York crime wave; the Broadway theatregoer is fond of the crook melodrama because he likes to see the familiar incidents of daily life portrayed on the stage.

"The Bat," "The Cat and the Canary", and "Bull Dog Drummond' are the leaders in the current melodrama. The first of these is now the oldest Broadway attraction, and at the completion of 18 months is easily capable of finishing out two years.

FLORENCE ELRIDGE IN "THE CAT AND THE CANARY"

"The Cat and Canary" a shivery affair of spooky, mystery, and Bull Dog Drummond", an out-and-out melodrama of the old school imported from England have settled down for long runs. "The Hindu" has succeeded 'The Green Goddess" in meeting the demand for oriental fiedishness and "Whispering Wires" is a melodrama based on radio.

Desire To Hiss.

It is in 'Bull Dog Drummond" that the frankest appeal has been made to the old-fashioned desire to hiss the beetle-browed and unrelenting villan and to cheer to victory the cool chaste and athletic hero.

Warmed over and ocer and served in new dishes, this is the dramatic pap that the last generation applauded during on nigh stands in tank-towo opera houses.

But in Times Square the hiss the villian and piercing feminine shrieks echo across Broadway as walls open and a clutching hand advances toward a sleeping heroine.

Perhaps theatrical managers are taking lessons from movie kings. "Why Girls Leave Home" and "Ten Nights in a Bar Room" are now successful movies; "Nellie the Beautiful Cloak Model' and 'Bertha the Sewing Machine Girl" are soon to be released.

Sophistication?

SCRATCHES.

It is well to dust furniture before applying polish. Otherwise, little pareicles of dust may result in scratches when they are rubbed over.

DRESSING.

Home-made salad dressing will keep much longer, and not cake at the top, if kept in a closed top container. This holds in the moisture.

LOUIS FIRPO LOOKING FOR TITLE BOUT

Big Boxer From Argentine Hopes to Take the Championship Crown From Dempsey.

HIS STORY.

NEW YORK, April 27.—Louis Firpo, Argentine boxer, recently come to the United States with the laudable object of separating Jack Dempsey from his crown, probably possesses the most colorful personality of any fighter in the ring today.

Though he is taller and heavier than Dempsey, the more one talks with him the more one is impressed with their resemblance.

Firpo is handicapped at present by the fact that he doesn't speak English, but he is studying hard to remedy that. Conversing through his secretary, Jose Guiu, he gives the impression that with the proper kind of handling in a year or two he may give Mr. Dempsey a very busy afternoon.

Here is Firpo's own story of how he took up the fight game:

"I was going to college when Harry Wills, Sam Langford and other American fighters came to Buenos Aires to give boxing exhibitions. I went to most of the bouts and became so enthusiastic that I couldn't stay out of the game.

"After graduating from college I took lessons in boxing, and finally entered the ring as a professional.

"My family, which is well known in Buenos Aires, objected at first to my becoming a pugilist, but my success won them over. My four brothers have become regular fight fans.

"I have been in some thirty fights in my own country, 20 of which I won by knockouts. There is no future there for a fighter. Here in the United States are all the champions.

"Not that I want to meet Mr. Dempsey today or tomorrow. I know that I am too green. In a year, maybe two, I will know enough, and then I honestly believe that I can beat the champion.

"Meanwhile I shall take on heavyweights in my class and hope to work my way to the top of the division, gaining the necessary mental and physical equipment to fit me for a match with the champion.

"I am half Italian, half Spanish. I never heard of that combination in the ring before, but I hope that it will be as good as the Irish.

"I intend to stay in the United States until the chance comes to meet America's super-man, who they say cannot be beaten, and then perhaps I shall return to beautiful Buenos Aires—but not before."

The rather grim look on Firpo's face again made me think that perhaps—some day—Jack Dempsey would be in for a rather busy afternoon.

AN INTER-COUNTY LEAGUE UNDER WAY.

League Formed at Hastings and Schedule Is Arranged—The Officers.

HAVELOCK, April 27. — At a meeting held in Hastings recently, a league was formed, known as the Inter-County League. The new league consists of teams from Havelock, Hastings, Norwood, and Warkworth, and a double schedule will be drawn up.

The league opens at Hastings on 24th May, when Warkworth will meet the Hastings team.

Havelock's first game will be on 26th May, when Norwood will play.

Officers Elected.

The officers elected are as follow:

President—Frank Hawkins, Hastings.

Vice-President—H. F. McNicholl, Havelock.

Secretary—H. L. Walker, Warkworth.

Treasurer — Alex. Kempt, Norwood.

The executive, which will consist of the officers and representatives from each club, will be named later.

Schedule of Games.

Folowing is the schedule for the first part of the season:

May 24—Warkworth at Hastings.
May 26—Norwood at Havelock.
May 31—Havelock at Warkworth.
May 31—Hastings at Norwood.
June 7—Warkworth at Havelock.
June 9—Havelock at Hastings.
June 14—Hastings at Warkworth.
June 14—Havelock at Norwood.
June 21—Norwood at Hastings.
June 23—Hastings at Havelock.
June 28—Norwood at Warkworth.
July 1—Warkworth at Norwood.

IF THIS PLAY COMES UP

Here Is Your Decision—

If with a runner on third and less than two out, the batsman interfere with the catcher in an effort to get the runner trying to score from third, the runner shall be declared out. If two are out and such a play comes up the batsman is declared out.

OWLS TO MEET.

Owls F. C. will meet at the Oval on Saturday afternoon at 2.30. Team as follows:

McFadden, Hardie, Rawlston, Burrows, Hosker, Frost, Burgess, Hotston, Davey, Hannah, Hotston (Reserves, Edwards and Bills).

WOODSTOCK BOY GOES TO FRANCE FOR EHE RACING

Al Cormack, Well Known Jockey, Will Be in the Saddle Again This Season.

FORMER RECORD.

WOODSTOCK, April 27 (Canadian Press). — Al Cormack, the local boy who a few years ago was one of the most successful jockeys in America, sails from New York today on his way to France, and his plans for the future depend to a large extent on racing conditions in Europe.

Cormack broke into the jockeying game in 1902, and made a fine record for himself during the next fourteen years. In 1904 he was rated as one of the most successful jockeys in America, carrying the colours of the late H. C. Schultz.

Following his successes here, he went to France and Spain, where he sported the colours of the Rothschilds under the trainership of Vici Picard, the famous French trainer of race horses. There he continued his successes, and finally he retired in 1916. He is a native of this district, and for some years had been living in this city.

He is going to France on the invitation of his former trainer, and if he can make weight will likely be in the saddle again this season.

SPORT QUERIES

By BILLY EVANS.

What is your opinion of the new football rule which eliminated the goal after touchdown and substituted a scrimmage play on the five-yard line?

* * *

The goal after touchdown play has never appealed to me, therefore its elimination was pleasing.

The goal after touchdown was not a difficult play and there was little of the element of uncertainty about it.

Like the foul rule in basketball, it called for the development of a specialist. The element of teamwork in no way entered into the play.

Eleven men assist in making a touchdown, and the goal after touchdown is put up to one man. The new rule putting the ball into play from scrimmage opens up possibilities for the entire team to swing into action.

Certainly it should contain the element of surprise, and that is always interesting.

Those who condemn the play should wait until it is tried out. Progress is never made by standing still, and football as a game is not so perfect that it cannot be improved.

WHEN YOU SCORE A BALL GAME

Remember—

A wild pitch is a legally delivered ball so high, low or wide of the plate that the catcher cannot or does not stop and control it with ordinary effort, and as a result the batsman, who becomes a base runner on such pitched ball, is enabled to reach first or a base runner advances.

HOBOKEN, N.J., April 27 (Canadian Press). — The Oxford-Cambridge lacrosse team yesterday defeated the Stevens Institute of Technology by a score of 8 to 4.

ASK FOR THE SERVICES OF W. SMAILL

The Lacrosse Club decided last night to ask the P.A.A.A. for the services of Walter Smaill as coach for the local Junior and Juvenile O.A.L.A. teams. His interest in organising a league among the school boys are fully appreciated, but in view of the fact that he may have time to devote to the teams which the club intends to enter in this district, it was felt that he would be the best choice for the position of coach will not make unduly heavy demands on his time.

It was also decided to hold an exhibition game at Central Park on Saturday, 6th May, between the Junior O.A.L.A. team and another team which will be picked from the other players in the City League.

The first practice of the Junior and Juvenile O.A.L.A. squads has been arranged for Saturday afternoon at the Central Park. All the candidates for these teams are requested to turn out promptly at two o'clock, and Bert Todd will take charge of the workout. Sides will be chosen after warming up, and a lively session should make a good start for a season which has been retarded by unfavourable weather. It is hoped that the posts which have been set up in front of the Armoury will be removed shortly, providing sufficient grounds for the practices which will be held there.

Reports last night indicated that the Athletics are well organised, and the Riversides are getting into good, sound position.

Crescents and Strathconas are expected to complete their preliminary organisation, especially their financing by next week.

Last night's meeting was held in Dr. Sutton's office, and was attended by most of the members of the executive. The president reported that he had interviewed some of the prospective referees, and had been promised their assistance when the games are started. Others will be requested to co-operate with the club in this important detail of reviving the game.

Practices will become general next week, especially if the weather loses some of the frost that has been hanging on as if March hadn't been long since torn from the calendar.

Representatives of the Crescents stated that Eddie Foley might leave the city soon, and would be lost to their team and to the O.A.L.A. Juniors, with whom he was a valuable defence man.

SCULLING CHAMPIONSHIP.

LONDON, April 27 (Canadian Press). — According to a Reuter despatch from Wellington, New Zealand, James Paddon, who won the world's sculling championship on 18th April, when he defeated D'Arcy Hadfield in New Zealand, has agreed to row Richard Arnst for the championship and £500, the event to take place within three months.

Arnst lost the world's championship to Hadfield on 5th January last.

Rowdy Fan Has No Place in Baseball

President Johnson of the American League, who has sponsored practically every worthwhile reform in baseball, is not content to rest on his laurels.

The American League intends to enforce a rule this year that will meet with the approval of every fair-minded fan. Incidentally women patrons of the game will say "amen."

The rules of baseball ordain that no spectator shall have the right to abuse either the home or visiting players. Such a tirade is always annoying to the fans who stand for fair play.

Nothing is more tiresome to the real fan, the fellow who is there four or five days a week, than the boisterous, troublesome fan, who, as a rule, gets very personal.

In both major leagues last season there were certain cities that suffered greatly from such a nuisance. In two or three of the cities the abuse was usually fired at the visiting team. Often some thin-skinned player would be the target for a lot of personal abuse with a hope that his play would be affected.

A number of players in both major leagues have seriously objected to the treatment accorded them in certain cities. They have insisted that some consideration be given their objections.

It is understood that both major leagues will see that the boisterous, personal fan will soon be extinct. The American League has already taken the initiative.

It is understood that the park and regular police will co-operate with the umpire in remedying the evil. If present plans carry it is the intention to have some official whose duty will be to spot the offenders. They will first be politely asked to desist. If they refuse the management will tender them their admission fee with a request that they vacate.

Baseball is not a parlor sport. It calls for wild rooting, partisan cheering, criticism when deserved and applause when merited. However, it has no place for the enthusiast who seeks to profit through personalities are sometimes stronger abuse. Such individuals are to get the gate.

BABE RUTH IS NOT HITTING SO MANY HOMERS

Premier Swatter Does Not Show Up So Well in Exhibition Games This Spring.

ONLY FOUR.

Unless Judge Landis relents, Babe Ruth will not do any more hitting against major league pitching until May 20.

Ruth had just begun to hit the ball a la Babe style when the season opened. There is much doubt as to whether or not he will be able to hold his condition, due to an enforced absence of five weeks from actual competition.

Ruth played in all 14 games between the Yankees and the Brooklyn Dodgers on the spring training trip. He fell just below the .300 mark, compiling a .298 total off the Brooklyn pitchers.

Ruth was at bat 47 times and made 14 hits, eight of them for extra bases. His record was four home runs, one triple, three doubles and six singles.

The fact that Ruth made only four homers disappointed a lot of the minor league fans who turned out in large numbers everywhere.

A TIP FOR SCORERS.

If the catcher's throw to intercept a base runner arrives in plenty of time to retire the runner, but the fielder loses the decision because of a palpable muff, the fielder is charged with an error and the base runner is not credited with a stolen base.

THE REGION OF ROMANCE

The Lake of Bays is one of the scenic gems of the Dominion of Canada which is so richly starred with lovely lakes. It has a shoreline indented in such a manner that it affords constant delights and surprises, and is designated as "the lake of a thousand bays." On sites overlooking these bays have been erected charming cottage homes with, here and there, hotels that are in keeping with their setting of wistful waters and brooding woods. To spend a summer vacation here is to be near to Nature in her most fascinating mood. An entire season may be spent in exploring the Lake of Bays and her sister lakes and you may choose for your excursions, according to personal desire, canoe, sailing craft, motorboat or steamer. There is also the widest choice of vacation pastimes — bathing, golfing, fishing, boating, bowling, tennis, etc. Perfumed by millions of pines, invigorating breezes blow across the lakes providing a real tonic that is "easy to take." The average altitude is about one thousand feet above the sea level. The Lake of Bays is reached through Huntsville on the Grand Trunk, 148 miles north of Toronto. A handsomely illustrated booklet telling you all about this lovely district sent free on application to any Grand Trunk Ticket agent or C. E.

The shortage of nickel coins in France is said to be due to the peasants hoarding them in preference to paper money.

THREE FEATURE BOUTS ON CARD

Big Boxing Programme For Monday Night

With three feature bouts and a half dozen local mills as preliminaries, the Wm. Hamilton A. C. are surely giving Peterborough boxing fans a worth-while card at Brock Street Rink next Monday.

The clash between the old rivals, Walter Newton, Ontario, 138-pound champion, and Tommy Coyne, Toronto champion at the same weight, is regarded by those who follow the mitt game as alone worth the admission. The pair will box three rounds to a decision, and as there is no love lost between them, the Newton-Coyne bout should provide some fireworks.

Irish Jordan, the Peterborough 125-pound champion, who carries a wallop in both hands, will try to slip a K. O. to Trickey, of Toronto. If he lands one of his vicious swings on the right spot he'll make good, but Trickey is said to be fast enough to keep out of the way of haymakers, and at the same time hand out a lot of jabs besides.

Rube Maddeaux, of the Classics, who bumps into Ted Williams, of Peterborough, is a scienced battler, and the local boy will have to be at his best to hold him even. They meet at 158 pounds.

There will be a flock of preliminary bouts in addition to the trio of feature "gos."

Looks like a great race in the Intermediate and Junior divisions of the City Baseball League. Four well-balanced teams have been rounded out for each series, and all clubs will have the benefit of good managerial material.

The City Leaguers held a meeting last night at the Chamber of Commerce, and there was no lack of enthusiasm. Certificates issued to the clubs must be filled in and signed by the players, and returned to the League secretary not later than Monday, 22nd May.

The championship season will open on 24th May, with one game in the morning and a double bill after dinner, at Riverside Park. The flood has spent its fury at the ball lot, and the water is receding. To-day the upper part of the park is making a gallant effort to come forth and further progress, while it may be slow, will be sure and certain.

Another meeting of the League will be held on Wednesday night, 3rd May, to make arrangements for the opening games. This meeting will receive applications from clubs wishing to enter the juvenile series.

RE LEBEL LODE ISSUES

To Whom it May Concern:—

The Company Executive authorized issue of 300,000 shares of its Treasury Stock, beginning on Monday, April 3rd inst., with the intention of using it for development purposes only on their then holdings. A neat little folder containing concise and correct information of their properties and possibilities had been published and circulated announcing this issue and price of 15 cents. There had been a number of arrangements made with publishers scattered over the country and actual copy sent forward to them by the evening of the 4th with instructions to run these advertisements as agreed upon. Some of these ads. carried the words, in referring to their then holdings, "no money paid for property" and "all money goes into mine-making—your mine and ours."

It will be noticed on our map, that there are two claims interlocking Lebel Lode claims marked "LaPresle." Ever since the company was formed last June, there has been more or less desultory negotiations carried on between the company and LaPresle interests, whereby these claims might be incorporated into the holdings of the company, so that the company's development of the interlocking vein-system—at the company's expense—might accrue to the benefit of our shareholders.

In March, all negotiations with LaPresle were abandoned on account of impossible conditions required, and the Company Executive decided upon the course it pursued without the desired addition of the two claims, and decided to make price of this issue 15 cents and accordingly so announced.

About three days after public announcement of present issue, etc., a new proposition was presented by LaPresle interests much better than previously, accordingly the executive of the company met and the new proposition accepted and first payment voted and paid. A meeting of the shareholders has been called for the 25th inst. to ratify this deal and sufficient proxies have already expressed themselves to insure the completion of purchase.

A new question arose at this moment, inasmuch as the value of the companies property and shares were easily enhanced 50 per cent—extention of vein-system for ¾ mile instead of ½ mile as before—it was felt that the company should receive more for its shares than 15 cents. But owing to the fact that the issue had been announced and advertsied the company seemed forced to go through to end of April with their espressed intention and fill all subscriptions up to and including 1st day of May at advertised price of 15 cents.

Owing to the before mentioned phrases in our first advertisements, and possible misinterpretation of later expression and reference to option, and purchase price, $8,000 yet to be paid, etc., this explanation seemed advisable by way of making our position clear.

This will also clear up any doubts of our seriousness of intentions and reasons for raising the price of our stock to 25 cents after the first day of May next.

The total cost to the company of the LaPresle claims will not involve over 100,000 shares of the treasury all told, part cash at due rates and part shares. Any interested shareholder can have the exact information for return self-addressed envelope.—Yours, W. J. Posr, President.

HORTICULTURAL WEEK

(Continued on page 13.)

next week. Secretary L. Fraser is securing prices and designs on the urn that will be placed on the Inverlea plot as soon as the tulips are done. Mr. J. J. Turner has promised to raise $60 for this purpose, and his assistance is appreciated, as are the donations of many other friends of horticulture.

The plot at the corner of Park and Reid street will be made higher bp the addition of about eight more loads of fine loam and the result is expected to be very satisfactory. A committee composed of Dr. J. J. Middleton, Secretary Fraser, I. Boddison and G. Land will make the arrangements for building up the plot. In connection with Horticultural Week views of this corner "before and after" will be shown in the Capitol Theatre, and one phase of the Society's improvement work presented to a large number of people.

Subscriptions to Hand.

The Society takes this opportunity of expressing their appreciation and acknowledgment of the following subscriptions, which will be devoted to the beautification of unsightly corners throughout the city: J. J. Turner $5.00, Mrs. H. M. Yelland $5.00, L. D. W. Magie $5.00, Cressman Co. Ltd., $5.00, W. R. L. Blackwell $5.00, Mrs. Jas. Wood $5.00, W. G. Shiner $1.00, E. H. D. Hall $3.00, H. M. Manning $2.00, Miss A. Halliday $2.00, H. A. Morrow $4.00, J. W. Worth $1.00, A. W. Cressman $5.00, Mrs. Geo. Hardwick $1.00, Miss Lanacster $1.00, Mrs. T. A. S. Hay $1.00, Geo. T. Melton $1.00, A. J. Madill $1.00, R. W. Cormack $3.00, A. S. Zavitz $1.00, J. W. Kingsbury $100, J. H. Callander $3.00, Miss C. I. Edwards $1.00, E. A. Peck $1.00 Total $63.50.

Mr. J. J. Turner was responsible for six subscribers in the above, aggregating $30.00, which will be used this year for the specific purpose of placing a stone urn at the south-west corner of Inverlea Park.

Any citizen wishing to assist the Society in this work of beautification should forward their subscriptions to the President, Dr. J. E. Middleton, or the Secretary, at 358 George street.

SANITARY ICE GUARANTEED FREE FROM ALL BACTERIA

Famous Chemists Examine Sample—40 Tons of Ice Can Be Manufactured Daily and Big Demand is Expected.

The old saying that there is nothing in a name is refuted by the Sanitary Ice Supply, as a visit to the splendid plant on Water Street North will quickly prove. The company has not been misnamed, for the ice manufactured by them is in truth "sanitary" ice, and the immaculate cleanliness of the plant from top to bottom cannot help but impress the visitor.

It is expected that Sanitary Ice will be in great demand this summer. The people of Peterborough will undoubtedly welcome the opportunity of securing a supply of ice, about the purity of which there is no doubt, ice that is germless and safe; ice that leaves no dirt-clogged refrigerator pipes, and finally, ice that lasts. On all these points Sanitary Ice makes good.

In the first place, it is made from pure spring water, pumped from deep artesian wells. Before going into the ice cans to be frozen, however, the water goes through a filtration process, passing through felt, a metallic filtration, and coke and gravel. So Sanitary Ice is made not only from pure spring water, but assurance is made doubly sure by having the water effectively filtered.

That these precautions are absolutely successful is shown by the following report from the Milton Hersey Company, of Montreal, the famous industrial chemists:

Sanitary Ice Supply,
Peterborough, Ont.

Gentlemen,—We have made a bacteriological examination of the 25lb. sample of ice which you sent to us for test.

The results of the tests indicate THE ICE TO BE FREE FROM HARMFUL BACTERIA, and in good condition for domestic consumption.

Yours very truly,
Milton Hersey Company, Limited.

You are thus taking no chances with Sanitary Ice. It is free from germs, and is absolutely safe for consumption or to be brought into contact with food.

Another feature is that Sanitary Ice is what is technically known as marble ice—that is, it is made without air, and therefore cannot honeycomb. That ensures the ice lasting, so that it is economical as well as absolutely pure.

The big plant on Water Street is capable of turning out 40 tons of ice a day, so that Peterborough has no need to worry about an ice supply.

Agencies for Sanitary Ice have been established in Belleville and Lindsay, so that the plant will not only take care of Peterborough, but other centres as well. A big storage building has been added to the plant, in which there is room for storing 600 tons of ice. This particular section of the building is well worth a visit. No sawdust is used, and the sight of hundreds of blocks of pure, Sanitary Ice is impressive.

The management cordially invite the people of Peterborough to inspect the plant and to bring their visitors with them. They will be interested in the process of manufacture, and will be impressed by the spotless cleanliness of the whole establishment, which compares in neatness to any private house.

The Sanitary Ice Supply is a splendid addition to Peterborough's industries, and the enterprise of the management should be recognised.

As an indication of the growth of the business, it is interesting to note that the company has installed over one hundred refrigerators in the past few weeks in the homes of people who have taken advantage of the Sanitary Ice Supply's system of cheap monthly payments and Free Ice Service. Delivery of ice under this system will commence on Monday, so that those who want to secure refrigerators and get the full benefit of this unusual offer, are advised to get in touch with the Sanitary Ice Supply at once. A full line of refrigerators is carried by the company.

Service is a strong point with the new ice firm. They have five delivery trucks in commission, and all orders are promptly filled.

Sanitary Ice is sold by ticket, so that the customer only pays for what he needs—a great saving over the old method.

In addition to their ice service, Sanitary Ice Supply also are prepared to furnish pure spring water for drinking purposes to stores, factories, and private residences, and also have distilled water for sale for various purposes.

AT THE THEATRES

CAPITOL—Feature picture presentation, "The Man From Lost River," with House Peters. The latest Christie comedy, "Falling For Fanny," with Eddie Barry.

ROYAL—Edna Murphy and Johnnie Walker in "The Jolt." Also Sunshine comedy, "Business is Business."

REGENT—Herbert Rawlinson in "The Scrapper," Olive Tell in "Love Without Question." Also Christie comedy, "Back From the Front."

Capitol Entertainment

The management announces another big programme to-day, "The Man from Lost River", with House Peters is the feature picture offering the latest Christie Comedy "Falling for Fanny", short reels of quality. Cameron Geddes, famous basso, is one of the most outstanding singers that has yet appeared on the Capitol stage. His repertoire for to-day includes:—"Armourer's" from Robin Hood and "Annie Laurie".

House Peters, whose splendid performance in Goldwyn's "The Invisible Power" has been hailed as one of the best characterizations of the new season, will be seen in the leading role of "The Man From Lost River", when the new photoplay by Katharine Newlin Burt is presented at the Capitol Theatre today. Mr. Peters has long been known for his portrayal of powerful

Scene from "The Man From Lost River," at the Capitol Theatre for the balance of the week.

characters; and as the lumber camp foreman in his latest Goldwyn picture, he is given every opportunity to reveal that manliness and suppressed tenderness which make him an ideal screen hero.

Fritzi Brunette plays the leading feminine role opposite Mr. Peters. As the girl who doesn't know her true feelings, Miss Brunette's performance is subtle and appealing. The third angle of the triangle is ably upheld by Allan Forrest.

Frank Lloyd, who directed "The Man From Lost River", believes it to be one of his best productions. It is a thrilling picture of life in the northwestern lumber camps and one that should not be missed.

NOVEL FORMULA FOR GETTING MARRIED TRIED IN COMEDY

It is easy to get married if you follow a certain formula, says the scenario for "Falling for Fanny," a new Educational Christie Comedy. According to the happily married husband, if the bride seeker will just put a few banana peels carefully under the toes of the lady he has picked out and then rescue her at the proper time all will be well and the lady will fall in more ways than one.

But before you try this method you'd better see what happened to a certain man who experimented in "Falling For Fanny", which comes to the Capitol Theatre today.

Eddie Barry, the star, is said to try the "falling system" in this comedy, which is the fourth in the new series being made under a big contract with Educational Film Exchanges. He found it did not always work. Helen Darling plays the part of the young woman on whom Barry sought to try the method.

AT THE ROYAL.

To-night we have two specially selected Fox feature pictures of unusual interest. William Farnum, the greatest exponent of western life in the movies, appears in "The Rainbow Trail," which, although a complete story in itself, is really a continuation of that wonderful photoplay called "Riders of the Purple Sage." It begins with John Lassiter, Jane Withersteen and a child, Fay Larkin, shut in a fertile valley by a high rock they rolled from a precipice when pursued by Mormon "avengers." The child Fay has in eighteen years grown into a beautiful girl. A landslide occurs which opens a passage to the valley. Lassiter's enemies discover the entrance and attempt to get Fay for wife to a leading Mormon. Fay has objections to being one of a family of one man's wives. The story shows her escape from Mormon persecution and ultimate marriage to the man of her choice. A thrilling plot laid amid magnificent scenery. Then there is another Fox feature called "The Jolt," starring Edna Murphy and Johnnie Walker. This is the story of a soldier who left one arm in Flanders. He is beset with hard luck and temptations in his struggle to make an honest living on his return from France, but succeeds in the long run. A story throbbing with human and heart interest in which luck and Dan Cupid play a prominent part. The Sunshine comedy called "Business is Business," is a crackerjack full of pep and laughter.

AT THE REGENT.

LOVE WITHOUT QUESTION, WITH OLIVE TELL

A crime committed in the abandoned room with the doors and windows locked on the inside forms the basis of the plot of "Love Without Question," the feature attraction appearing at the Regent Theatre for 3 days, beginning to-day.

"Love Without Question" is adapted from the novel "The Abandoned Room," by C. Wadsworth Camp, produced under the personal supervision of B. A. Rolfe for Jans Pictures, Inc., Olive Tell is starred supported by a strong cast.

Those that enjoy real mystery stories will find this production to fill every want and, according to the management, the suspense has been so well maintained and the story so well worked out that a person will be unable to solve the mystery until the very last scene.

It is understood that Olive Tell is seen in a strong dramatic part assisted by such well known screen players as James Morrison, Mario Marjaroni, Ivo Dawson, Charles Mackay, Gordon Hamilton, Peggy Parr, George S. Stevens and Floyd Buckley.

AT THE GRAND.

The two adjectives that seem to be the most fitting to be applied to the musical comedy success, "Irene," which delighted a big audience at the Grand last night are "winsome" and "wholesome." "Irene" strikes a new note in the musical comedy field for it has a delightful story that would make the production a success without any musical features at all. The romance of the little shop girl, who, yearning for an opportunity to get away from her depressing environments and have what luckier women have always possessed, plenty of nice clothes and fine raiment, suddenly finds herself in a position to realize her dreams, is one that tugs at the heart strings so that "Irene" is something besides laughs and music, although there are plenty of both. It is not difficult to understand the secret of the great popularity of the production, for it is as refreshing as a drink of spring water and as pleasing as a bouquet of freshly-cut violets.

Peterborough had an opportunity of seeing "Irene" at its best, for the Vanderbilt Producing Company sent us the Chicago company fresh from a run of over a year in the windy city, an organization well balanced and capable, and with a wealth of handsome gowns and a striking scenic investiture. The company is headed by Irene Dunne, who scores a triumph in the title roll. She made the part of Irene O'Dare one that last night's audience will long remember. Miss Dunne's acting was perhaps more striking than her singing, for her voice is not big, although it was clear and true, and her rendition of the popular "Alice Blue Gown" was most effective. But her delineation of the shop girl was a masterpiece. Busby Berkley had the chief comedy role, that of "Madame" Lucy, and he scored heavily in an unusual part. Incidentally he contributed some very effective eccentric dancing. Beatrice O'Connor and Mary Moore added much to the success of the production. Emma De Weale contributed a clever bit as Mrs. O'Dare, and Roliin Grimes was an impressive hero. Probably the best voice in the caste was that of Charles Jerome Massinger, who unfortunately was heard only in one number. There is a wealth of lilting music, "Alice Blue Gown," "Castle of Dreams," "The Sky Rocket," "To Be Worthy of You," and "To Love You" being the most popular. The ensemble numbers were remarkable, not only for the wealth of pretty gowns, but for the splendid dancing of the chorus.

Altogether "Irene" was by long odds the best musical comedy offering of the season.

About Storing Your Furs

Care of your Furs is essential in keeping them fit. Expensive Furs should be examined by a reliable Furrier every year, and should in summer be stored and insured in rooms where the conditions prevent deposit and breeding of moths' eggs. Scientific treatment is thus assured, for the Furs are taken out at regular intervals, gone over, aired, treated when necessary and kept in perfect condition.

It is the best time to have Furs repaired and altered in style, if necessary, for the lowest rates compatible with good workmanship are charged at this time.

Wear at the neck and elsewhere can be repaired. Such Furs as Beaver, Nutria and Seal should be whipped, combed and sawdust-cleaned to freshen them. The skins of Dyed Furs, if eaten by acids, should be repaired and reinforced to prevent rips and tears. Foxes, especially the finer ones, should have the scruff next the wearer's neck repaired. Sable, Marten and Mink are particularly susceptible to moths, but if moth-eaten can be cleaned and repaired. And so on—one can run the full gamut of Furs and find the same story.

As soon as the season for wearing Winter Furs is over, get in touch with us by 'phoning 340, or by dropping a line by mail, and your Furs will be called for and taken away. They will be carefully examined and the exact condition reported, so that the necessary attention may be given them. If so desired, the repairs will be done, but if you decide to do no repairing or alteration, the Furs will be thoroughly beaten and cleaned, then placed in the Storage Rooms. A receipt will be forwarded to you stating valuation and covering insurance as a voucher for the Furs received. The charges are moderate.

New styles in Spring and Summer Furs—Chokers, Scarfs, Capes, Shawls and Coatees.

Also the new models in Fur Garments for next winter's wear can now be had.

Social Calendar

Mrs. John Toole and son Francis have returned to Peterborough after spending the week end with her sister, Mrs. John Herr, of Norwood.

A very attractive tea was held yesterday afternoon, at the home of Mrs. G. L. Stevens, 208 McDonell street, under the auspices of the Flower committee of the Ladies' Aid Society of George street Methodist church, with a large attendance.

The pretty rooms were charmingly decorated in the springtime manner, the living room with pink sweet peas and the dining room in vernal green and yellow. The table was centred with large silver basket filled with daffodils, with yellow and green tulle and yellow candleabra.

Mrs. Stevens, with Mrs. George Mather, received the guests, and Mrs. H. Foote and Mrs. B. Shortley poured tea, assisted by the Misses E. Higgins, M. Elliott and E. Morrow.

An enjoyable musical programme was rendered, with vocal solos by Mrs. Ford Turner, Mrs. T. E. Curvin, Miss Doris Pilling and Miss Elva McIntyre; readings by Miss Marjorie Ingall and Miss Muriel Harvey; and violin solo by Arnold Spencer, Miss Ida Sanderson acting as accompanist.

Mrs. James Meagher, Aylmer Street, is visiting in Toronto for a few days.

Mr. W. A. Howson has moved into his new and modern apartments over the Chevrolet Garage, 388 Water Street.

Mrs. John James, of the Y.M.C.A., Mrs. James Richardson, Rubidge Street, and Mrs. Frederick Gandy, London Street, spent yesterday in Lakefield, and on their return, Mrs. James surprised a number of her friends with a delightful supper at the Paris Cafe, in honour of her birthday.

The condition of Miss Helen Rogers, Weller Street, who has been seriously ill for the past two days, s improving. Attending physicians regard the critical stage as being over.

A meeting of the Girls' Work Board of Peterborough was held last evening in the Green Room of the Y.W.C.A., with the chairman, Miss Charlotte Layton, presiding. A devotional period, with the roll-call and the reading of the minutes of the last meeting by Miss Mary Elliott, secretary, preceded the discussion of sundry business.

Miss Taggart, of Toronto, Girls' Work Secretary for the Ontario Religious Education Council, wrote asking the support of the Peterborough Board for the "Go To Sunday School Sunday," which will be observed on 28th May. The dual object in view is to have every member of Sunday School at the Sunday School on that day, with every member of the family enrolled in some one of the different departments of the Sunday School, and to provide a liberal offering for the furtherance of the work of the Ontario Religious Education Council. 'Teen age girls are asked to co-operate, and the Board decided to help the movement in every possible way.

Light refreshments were served at the conclusion of the business session.

Miss T. H. Clementi, 4.. Stewart street, is the guest o: Mr. and Mrs. Leonard Pattrick, Belleville.

Miss Helen Hurley of Belleville, has returnd hom aftr a visit with the Misses McCarthy, Hunter St.

Mrs. M. O'Connor of Wainwright Alberta, is the guest of her sister, Mrs. J. A. MacPherson, Patterson Street.

Mrs. A. E. Dawson, of Lakefield, who has recently been suffering from a nervous breakdown, following upon worry caused by the recent illness of her infant daughter, has to-day been removed to the hospital for a few weeks' rest and recovery.

The card party held at the G.W.V.A. hall last evening, under the auspices of the Catholic Women's League, was well attended. The hall was prettily decorated with streamers and balloons. Prizes for cards were won as follows: Euchre: Miss Lila O'Keefe and Mr. F. Fairen. Five hundred: Miss N. Shevlin and Mr. W. Fitzgerald. Bridge: Miss Kingan and Mr. J. E. Sullivan. Mrs. Jas. Doris acted as convenor of arrangements.

Miss Irene Craig left for Toronto to-day to visit her mother.

Miss Eva Doherty, who has been spending the Easter vacation in Otonabee returned Monday to Courtland.

Miss Anna Fitzgerald left this morning for Clydesdale.

SAY THE TWO RACES IN CANADA ARE ESSENTIAL

TORONTO, April 27.—(Canadian Press.)— Addressing the Empire Club, here, to-day on "the habitant" Premier L. A. Taschereau of Quebec, in referring to Canadians and how it is understood and practised in his province, said, the two races in Canada, were essential to Canadian life with their traditions, ethnical customs and loyalty.

The habitant was the bulwark of their nationality because he retained all ancestral virtues, and because ill winds of unrest foreign penetration, luxury and Bolshevist preachings pas over his head..

"I may surprise you", said the Quebec Premier, "but the French Canadian habitant wishes to tie to the Motherland as much as any of you. You are British by birth, surroundings and sentiment, he is British by reason and interest."

NORWOOD ROAD HOUSE BURNED

Landmark of the Pioneer Days Falls Victim to the Flames.

A small house of log construction on the Norwood Road, about two miles out of the city, was completely destroyed by fire this afternoon. The house, which has been occupied by David Hunter and his family, is one of the oldest landmarks of this section. The fire started about 1 o'clock, and gained headway so rapidly that the efforts of the owner and his neighbors to save the place were unavailing, and the entire structure was destroyed by the flames. Some of the furniture, however, was saved.

OBITUARY

MRS. JAMES MEEK.

Mrs. James Meek, of Port Arthur, who died at the home of her sister, Mrs. Cameron, of Los Angeles, on Sunday, 9th April, was a sister of Mrs. A. McFarlane, 509 Homewood Avenue, this city, and of Mrs. M. Connor, who resides with Mrs. McFarlane.

Mrs. Meek, widow of James Meek (for several years Registrar of the High Court of Justice in Thunder Bay District), had been ailing for several months, and went to Los Angeles from Port Arthur in the hope of benefiting by a warmer climate. Two daughters also survive: Mrs. Millican, of Calgary, and Mrs. (Dr.) G. A. Eakins, of Port Arthur, both of whom were with her during her last moments.

COUNCIL WILL HEAR REPORTS MONDAY NIGHT

Five Men Interviewed by the Fire, Water and Light Committee for Position of Fire Chief.

IMPRESSED BY TWO

The Fire, Water and Light committee appointed by the Council to interview proscective fire chiefs in Toronto, yesterday saw their men, and on Monday night will make their report to Council. Mayor W. H. Taylor said to-day that the committee would report on the qualifications of the men and the way they impressed them, but would not go so far as to recommend any one man. As he interpreted their duties, according to the resolution passed in Council, they were to size up the men and leave the decision to the Council.

The deputaiton that went to Toronto was made up of the Mayor, Ald. Malcolm McIntyre, Ald. Robert Morrison, Ald. R. N. Jones, Ald. James Hamilton, and Ald. Harry Gainey. In the afternoon they interviewed five men who applied for the position. With the exception of Edward McDaniel of Toronto ,the other applicants were on hand. Two of the five interviewed impressed the committee very favourably, but Mayor Taylor declined to say who these were until Monday night.

Fire Chief Russell, of Toronto, the Mayor said, gave them some good advice about the salary question and he recommended one of the men eliminated by the Council because he asked $2400 a year. The highest recommendations for this applicant were given by the Toronto chief, and as a result it is likely that the Council will not pay so much attention to the matter of remuneration Monday night. Chief Russell's recommendation will be passed on to the Council the Mayor said, for what it is worth.

The following were the men interviewed and some of the particulars recorded by the committee:

W. A. Gilbert, Hamilton, 49 years of age, not been in active service for ten years, previously with the Hamilton department 19 years, four years captain of the Central station and Chief at Saskatoon one year.

James R. Colbeck, Brantford, 31 years of age, well-built, 6 feet in height, ten years on Brantford department.

Robert Knighton, Guelph, 53 years old, English, two years chief at Guelph, overseas, 25 years' police and fire service in England.

John Gibson, Toronto(40 years of age, six years with Winnipeg Fire Department, assistant chief Edmonton, overseas, eight years out of force while in business in Toronto.

Watson Davies, Toronto, 36 years of age, eleven and one-half years' experience in Toronto, overseas, army instructor.

Run for Governor

MRS. W. D. MOWRY.

KANSAS CITY, Kas., April 28.—Mrs. W. D. Mowry has entered the race for the Republican nomination for governor of Kansas. Her girl oppononet, on the same ticket, is Mill Helen Pettigrew, who recently declared in favor of the return of light wine and beer.

Mrs. Mowry is opposed to any loosening up of the prohibition laws. Both candidates live in Kansas City.

ELECT OFFICERS OF GLEANERS' CLASS

Address of Appreciation of Two Members

The Gleaners Bible Class of St. James Sunday School met at the home of their teacher, Mrs. Tos. Brown, last evening. After spending a pleasant time in games and music the following address was read by Miss Nettie Davis.

Mrs. Little and Miss Annie Bailey:—

Dear Girls,—It is with very deep regret that we have learned that you are about to leave our church and community for the far West and we cannot allow you to thus separate yourselves from us, and sever the very close ties of Christian friendship and fellowship without conveying to you our very warm appreciation of your friendship and service which we have received and enjoyed for the last few years. By your consistent and devoted Christian walk and service, you have greatly helped to build up, our church and Sunday School leaving a lasting impression upon the young people and proving an inspiration to those who are older. We earnestly pray that God's blessing may rest upon you both, and that in your new surroundings, you may find warm friends, health, success and ample opportunity for the exercise of your gifts and graces.

(Signed on behalf of the class),
NETTIE DAVIS
WINNIE SAUNDERS."
Officers for 1922

Light refreshments were served. At the close of the evening the annual election of officers for the class took place resulting as follows:

President — Miss. Nettie Davis; Secretary—Miss Winnie Saunders; Treasurer, Mrs. McMahon; Social Convenor, Mrs. Johnson; 1st Vice President, Miss E. Stevens.

HEAD OF FRENCH DELEGATION TO LEAVE FOR HOME

Louis Barthou Starts from Genoa To-morrow for Paris to Confer With Prem. Poincare.

NEWS OF WORLD

GENOA, April 28. — (Canadian Press.)—Louis Barthou, head of the French delegation to the Conference, plans to leave here to-morrow morning for Paris to confer with Premier Poincare regarding developments at the Conference, according to Havas Agency. He will return from Paris next Wednesday.

PARIS, April 28. — (Canadian Press.)— The proposition to hold a meeting of the Allied Supreme Council in Genoa is regarded here as disposed of because of the attitude adopted by Premier Poincare of France that reparations could not be properly discussed by the Allies at present.

THREE MINERS SLAIN.

APOLLO, Pa., April 28.—(Canadian Press.) — Three miners were killed and one seriously injured when a bomb was thrown early to-day into the bunk house at the Patterson mine on the Kiski Coal Company, near here.

Those kiled were Stanley Meilke, Andrew Borniak and Frank Ridgaki, and the injured man was Frank Gogaski. They were employed on non-union basis after the coal strike was called on April 1, and were asleep in the bunk house when the bomb was thrown.

NEWSPRINT STRIKE?

NEW YORK, April 28.— (Canadian Press.)—A crisis in the negotiations to avert a general strike in newsprint paper industries of the United States and Canada will be reached to-day when Labor delegates will reply to the manufacturers' demand that unskilled labor be left out of any contract for an International wage scale. It is stated that labor men will seek to split the issue by offering counter proposals.

DEFENDS LLOYD GEORGE.

LONDON, April 28.— (Canadian Press.)— Lord Birkenhead's recent condemnation of members of the Judiciary for making oratorical incursions into politics may, perhaps, be opponent, on the same ticket, is Chief Justice, Sir Gordon Hewart, who last night in making his first out-of-court speech since his appointment, delivered vigorous defence of Premier Lloyd George.

The speech was made in behalf of funds of the newspaper organization. In his early days Sir Gordon was a newspaperman.

LADY ASHLEY DEAD.

LONDON, April 28.— (Canadian Press Cable.)—Lady Ashley, wife of Sir William James Ashley, Professor of Political Economy in the University of Toronto 1888-1892, died here to-day.

Peterborough Health Association

The Peterborough Health Association desire to take this opportunity of thanking the under-mentioned for their kindness in assisting to make the recent Motor Show a success.

We particularly offer our thanks to the Advisory Board of the Red Cross for their kindness in assuming the entire management of the Show. For four years now, they have managed the Motor Show and turned the receipts over to our Association. MONTREAL, April 28 (Canadian Press). — The Anglican Synod here to-day, alarmed at the increasing number of applications for divorce, recommended that action be taken to oppose the granting by Parliament of additional grounds for divorce.

KIDDIES' PARADISE! IS WHAT FLATS WILL BE

HARRY I. DALSEY.

BY ROY GIBBONS.

CHICAGO, April 28.— Harry I. Dalsey had 12 reasons for building a $300,000 apartment house here which he designed especially for families having large numbers of children.

He was one of them, and his brothers and sisters constituted the remaining 11.

Dalsey to-day is a prosperous architect. But 25 years ago, when he was just a youngster, he remembers countless landlords refusing his own parents a place to rent merely because they had a large family.

Plans Revenge.

"Wait till I get big," Dalsey frequently remarked during those days, "I'll fix them."

His threat was intended for all landlords in general.

"And now I am going to have my revenge," he says.

The "kid castle" which he designed and is erecting for both "love and spite" will have special "perambulator garages," roof play gardens, rocking horses, permanent see-saws and other delights for his juvenile tenants.

And what is more, Dalsey stipulates in the lease that for every time Mr. Stork leaves one new baby there'll be a cash bonus of $25 and double that amount for twins.

The apartment house is going up in an exclusive section of the town from which children are usually barred.

More the Merrier.

"There's be 33 flats in the place and I hope I draw couples with at least five children each," Dalsey says.

"The more the merrier. I just love kids. They make a place look human.

"I hope the neighbors holler. It'll do 'em good. I've waited 30 years to put this over and now's my chance."

Dalsey isnt married.

WORRIES OF AN O. T. A. OFFICER

Told by E. D. L. Hammond to Public Accounts Committee of Legislature.

TORONTO, April 28—(Canadian Press).—The worries and vicissitudes of an officer in charge of enforcing the O.T.A. was told to the public accounts committee of the Legislature by E. D. L. Hammond who had charge of enforcement of the act in this city. It was a long narration of this operator and that operator under him proving himself unworthy of confidence placed in him..

Mr. Hammond expressed the opinion that there had been deep laid plans and propaganda to discredit the enforcement of the act by bootleggers. One of the methods followed by bootleggers was to foist on the deartment men as employees who would tip bootleggers off as to when a raid was to be made.

Fur Buyer Says He Has Played Straight

T. E. Curvin, local fur buyer, who, on the statement of Inspector M. J. Woodcock, has "played straight" with the Department of Game and Fisheries right along, and has been "one of their best men," found himself prosecuted in Police Court this morning for having last December royalty coupons to be used on fur pelts in his possession. Crown Attorney G. W. Hatton, K.C., made it clear to the Magistrate that the prosecution had not originatel locally, but had been directed from Toronto. Curvin claims he is being prosecuted while trying to live up to the law.

In addition to his commercial trappers' license, he secured a general trappers' license in order to receive the coupons to use on pelts held by Indian trappers who had been unable to get the regular "identity" coupons. An unusual situation was relieved and four of the coupons were never used. Four months later, however, the buyer finds himself caught up on a technicality. Inspector Woodcock gave evidence in Police Court to-day and T. E. Curvin out in his defence. Magistrate Langley reserved judgment until Thursday next.

THE WEATHER

We had a temperature last night of 2 degrees below the freezing point. Thursday morning showed 3 degrees of frost the preceding night. Warm weather seems late in arriving, and the season is undoubtedly a little late.—W. P.

ENGINEERS ARE TOLD OF WORK OF SCIENTISTS

Col. F. M. Gaudet Tells Need of Scientists in the Development of Canada's Resources.

RESOLUTION PASSED.

A lecture was delivered before the local Enginering Institute last evening in the Board of Trade Rooms by Colonel F. M. Gaudet, C.M.G., M.E.I.C., representing the Research Council of Canada, on the application of science for the advancement of Canadian Industries and the development of our vast natural resources in agriculture, mining and fisheries.

At the close of the lecture a resolution was offered and passed with acclaim to the effect that the local insitute felt that the establishment and maintanence of a National Research Institute would be in the best interest of Canada and it was urged that the government take such action as might be deemed necessary to create a National Research Institute. Copies of the resolution will be prepared by the secretary and forwarded to Premier King, G. N. Gordon, N.P., and other members of the Dominion government.

The speaker told of the work which has eben done by the Honorary Advisory Council for Scientific and Industrial Research in the past four years. The work and discoveries of this organization have been of almost inestimable value to the agricultural, industrial and mining industries of Canada, among the subjects now under consideration, the secrets of which are being uncovered by the persistent and painstaking application of scientific knowledge are; the secret of exterminating wheat rust; the conversion of the vast lignite deposits of the west into fuel to supply the demand of the western provinces who are now importing their coal; what can be done with straw to make it a commercial asset instead of a waste product; what can be done with the saw mill wastes, and many other important economic problems.

He pointed out very forcibly that Canadians are practically forced to go to a foreign country when any scientific research is necessary. This work should be done in Canada by Canadians and the establishment of the National Research Institute is the solution.

R. A. Ross, well known locally, is chairman of the Research Council and has personally conducted many of its most important investigations. The Council is composed of eleven of the leading scientists of the Dominion and they receive no pay for the valuable work done.

"The future of any nation depends in a large measure upon the degree to which fundamental principles are developed and applied to the solution of its national economic and industrial problems, great and small," said the lecturer. "Canada, in common with other countries, is reaping the aftermath of war; the cost of living and the National Debt have assumed alarming proportions; taxation is onerous and immigration upon which the country depends for the devlopment of its resources has come to a standstill. How will Canada pay this debt The answer to this question lies in the experience of other countries who have found that the most efficient and intensive method of increasing the national wealth, is by the application of scientific research and experiment. Increased production does not mean more or harder work for the indiviual, but it does mean more efficiency and a new attitude toward work.

The speaker quoted numerous and convincing examples both in Europe and America, proving that millions had been made and saved by the adoption of scientific methods. He strongly advocated the creation of a National Research Institute in which science will cooperate with industry, finance and labour for the good of Canada.

At the conclusion of the lecture, a moving picture film entitled 'Refining Nickel-Coper Ore' at the International Nickel Refinery, Port Colborne, was shown as an example of an important Canadian industry, which was built up on the results of scientific research in chemistry and engineering. This film showed the process by which the ore is taken from the ground and converted into pure nickel. It was also pointed out that over 85 per cent of the world's supply of this valuable and necessary metal comes from this province.

It was announced at the close of the meeting that the next regular meeting, which will be held on May 11, will be the final meeting of the season. The annual election of officers will be held at this time and an interesting program will be presented.

Good News for the Peterboro' Posties

OTTAWA, April 28 (Special to The Examiner). — G. N. Gordon, Deputy-Speaker of the House of Commons, made very strong and vigorous representation to the Postmaster-General, protesting against any cut in the bonus of postal clerk carriers or other civil servants, claiming that the cost of living has not dropped sufficiently to warrant it. The Meighen Government, Mr. Gordon claimed, cut 25 per cent. off the bonus last year, and any other cut now could not be warranted.

To-day Mr. Gordon informed The Examiner's Ottawa correspondent that he hoped to be able to have a definite assurance that no cut would be made.

PLEASANT AFTERNOON MUSICALE AND TEA

The Anglican Sunday School workers of the city met on Tuesday of this week in St. Luke's Sunday School. After tea had been partaken of in the Primary class-room Those present adjourned to the main S.S. room for the evening's programme.

Miss Denne demonstrated a model lesson for junior pupils' which was listened to with much interest by the teachers. The practical suggestion given during the course of the lesson should prove particularly helpful to the teachers of junior pupils.

An address by Dr. Blagrave on "Order in the Sunday School" was very much enjoyed. Various methods for preserving order were dealt with by the reverend gentleman. Interesting discussion pertaining to this important topic followed, in which Mr. Coch[illegible], Mrs. Bell and Mr. Rush took part.

A vocal solo by Miss Edna Borbidge and a musical selection 'cello, violin and piano, by Messrs. Farthing and Rousseau and Mrs. Evans added greatly to the enjoyment of the evening.

PANTRY BOY SENTENCED TO DEATH FOR MURDER

LONDON, April 28.—(Canadian Press.)—Henry Jacobi, the nineteen year old hotel pantry boy, was found guilty to-day for the murder of Lady Alice White, widow of Sir Edward White, former chairman London County Council, on March 14. He was sentenced to death.

GOOD SUPPER AND PROGRAM TO-NIGHT.

The Religious Educational Council of City Will Meet.

The Religious Educational Council, made up of Sunday School workers from the different Protestant churches of the city excepting the Anglican Church, is giving a programme in Reid Street Hall tonight that commences with a supper and finishes with addresses, and an outline of plans by President John Edgar. It is expected that 200 Sunday School workers will be in attendance. T. H. Blanchard, Superintendent of Trinity Sunday School, will preside. R. F. Downey will be in charge of the singing and Trinity orchestra will provide orchestral numbers.

The programme as arranged, following the supper, which is scheduled from 6.15 to 7.15, is as follows: Hymn, prayer, Rev. F. E. Malott; address, by Malcolm Clark, "Preparation Necessary to Make a Successful S. S. Teacher"; fill out question slips for question box; demonstration of the C.G.I.T. work, by the Girls' Work Board; solo, Mrs. Doig, "The Ninety and Nine"; demonstration of the C.S.E.T. programme, by Mentors' Club; hymn, address, by H. B. Cowan, 'How the Organized Adult Bible Class Can Help the Sunday School"; answers to questions; President's remarks and plans, by Mr. John Edgar; benediction.

FISH POACHING IN THIS DISTRICT GROWS SERIOUS

Inspector Woodcock Receives Instructions to Urge New Overseers to Bestir Themselves.

A FLYING VISIT

Fish poaching in this district has become so serious that Inspector M. J. Woodcock has received instructions from Toronto to "jazz up" the recently appointed overseers who are stationed at points from the Trent to Bobcaygeon. He said this morning he had planned a flying visit over the territory to see that they are doing the work they were appointed to do.

Worse Than Ever.

Reports that come to him, he said, indicate there has been more poaching this year than heretofore. Having decided that a gaff is a trap and illegal under the Act, he intends leading a war upon "gaffers" in general. While they may be to all intents and purposes only catching suckers, there are a great many bass and 'lunge pulled in as well, he asserted, and having now learned they can be brought to court on the grounds of trapping, successful prosecution is looked for.

Inspector Woodcock also reports unusual numbers of ducks in the river and in Rice Lake. From Wallace's Point to the mouth of the river there are millions of black ducks, mallards and all the other kinds, he said. No complaints of any out-of-season gunning have come to him.

Are Gun-Playing Again on Streets in Ireland.

SKIBBEREEN, County Cork, April 28.—(Canadian Press).—Arriving in Dunman-Way, near here, Wednesday night a party of armed men started firing rifles and revolvers in the streets and after several hours of terror daylight revealed the bodies of three prominent citizens, Francis Fitz-Maurice, T. Buttimer and D. Gray.

TAX RACE TRACKS.

TORONTO, April 28.—(Canadian Press.)—Provincial Treasurer Hon. Peter Smith announced in the Legislature this morning a proposal of the Government to impose a tax of five per cent. of total amounts wagered on Ontario race tracks. Government presumed, he said, a resultant revenue would be two and a half million dollars.

The person who wins will pay a portion of the tax. Nothing will be paid by the loser.

Treasurer announced that during the year the government would find it necessary to raise approximately forty-five million dollars by bond floatation. Ten of the forty-five million, it was proposed to borrow, he added, would be for refunding loans.

HIGHWAYS SUPERINTENDENT'S OPINION

Mr. Fred. McDougall, Regina, writes: "I purchased one of your Overland Model Fours from the Ryan Motors, Ltd., on May 1st, 1920, and I am pleased to be able to write you this letter telling you that I have had the very best of service from this car.

"I have driven the car over nine thousand miles, and I feel that I am safe in saying to you that the car has averaged over twenty-six miles to the gallon.

"I have had exceptional mileage out of the tires, having run them over nine thousand miles.

"I have no hesitation in recommending this car as a car of economy, easy riding, and roadability. My work has been hard as I am District Superintendent of Highways and I am using this car in a country where road conditions are not at all ideal."

Accusation of Murder Made in the House by A.C. Lewis

DID EDWARDS BOY AND ABE FILION QUARREL?

Witness at Adjourned Inquest Alleged Deceased Told Her That His Mother and Edwards Were Not Acting Right, and He Mentioned a "Spat" Between the Two and Him — Analysis of the Contents of Stomach Not Ready — Proceedings Adjourned Two Weeks.

That Abe Filion and the late Ernest Edwards, and his widowed mother, Mrs. Emma Jane Edwards, had quarrelled over alleged relations between the latter and Filion, was the testimony of Mrs. Daniel Grieves of Norwood, at the adjourned inquest last night into the death of Ernest Edwards. This rather important witness in her deposition unhesitatingly swore that deceased had on March 24 talked to her about his mother in a manner "that wasn't very nice." This happened she said at her home in Norwood, where the dead boy told her "they had had a racket the day before, when he put Filion out of the house. He (Ernest) and his mother then had a spat and the latter had followed Filion to Norwood. Mrs. Grieves further alleged that deceased had also said "his mother and Filion bedded together, an he knew that she and Abe would kill him for telling on them." He admitted that it was not proper to talk about his mother in that way, but he couldn't help it, as "they were not carrying on right at all." Fillion, it is alleged, was a frequent vsitor at the Edwards' house, where he stayed over night.

Unequivocal Corroboration.

This testimony was in part unequivocally corroborated by Verna Martin, aged 16, the adopted daughter of Mrs. Grieves, and to whom deceased had been paying attention. She also testified to having heard Ernest tell her aunt, Mrs. Grieves, that the couple "were not acting right," adding that "he supposed his mother and Filion yould kill him some day for telling things."

The testimony adduced in examination of Mrs. Edwards, Abraham Fillion, the mother's two sons, Roland and John, and the daughter, Jennie, was, however, while showing slight discrepancy here and there strikingly corroborative in affirming that friendly relations existed between all parties in question. And no cross-examination could secure admissions of quarrelling between Ernest and the others or of questionable relations between Mrs. Edwards and Fillion. These material witnesses also were unshaken in agreement as to the movements of the mother and Filion on and between Saturday ,April 8th and April 12th, the day deceased's body was found. Ernest Edwards was found life extinct lying face downward in the barn yard of his home on the 9th line of Dummer, on Wednesday afternoon, April 12th. The body was discovered by John Williamson of Norwood, who owns the property, and from the mother's own evidence, seems to have lain there since some time after dinner the Monday previously.

No Analysis Yet.

Owing to the fact that the contents of the stomach of the dead boy has not been analyzed yet, although sent to Toronto nearly a month ago, inquest was adjourned for two weeks. County Crown Attorney G. W. Hatton was notified yesterday by Provincial Health Officer Dr. McCullough that the organ and its contents had only been given into the hands of Chief Analyst L. J. Rogers on Wednesday —owing, it is assumed to departmental red tape under the present Provincial administraion.

The Mother's Evidence.

Mrs. Emma Jane Edwards, mother of deceased deposed that she moved to Dummer last July from Peterborough, and rented the house only on the Williamson farm last November, which she has left since the death of her son Ernest. On Monday, April 10, she left home at 4 o'clock p.m., for her father's, half a mile away, leaving there with her baby for Russell Hill's, five miles distant, where she stayed until Wednesday. She left Ernest, Jennie, 14 years old,

CAPTAIN O. HOUSTON MURDER OR SUICIDE?

Startling Announcement Made Regarding Tragedy Which Occurred in Fort Frances.

WILL INVESTIGATE.

TORONTO, April 28. (Canadian Press). — Attorney-General Raney announced in the Legislature yesterday afternoon that he would at once order another investigation into the death of Captain Orville Huston, whose body, with a bullet through his heart, was found in Fort Frances on 16th December last.

The Attorney-General further stated that he intended having A. C. Lewis, M.L.A. for South-East Toronto, sumoned as a witness.

The announcement followed a startling speech by Nr. Lewis in the Legislature on the Budget, in which he accused the Attorney-General's Department of "culpable negligence" in the conduct of the former probe, claimed there had been active efforts on the part of certain persons in Fort Francis to spread the report that Huston had suicided, gave a number of details which he claimed were grounds for strong suspicions that Huston had been murdered. He alleged that there had been an agreement between Huston and E. W. Backus for the purchase of pulpwood, and he claimed "the man who was interested in gaining possession of certain papers which Mr. Huston was supposed to have had in his possession was Mr. Backus."

It was an afternoon featured by many tense situations, particularly when Attorney-General Raney asked if Mr. Lewis, speaking under the protection of the House, was accusing anyone of being guilty of bringing about the death if this young man.

Mr. Lewis first said, "I am not responsible for the interpretation which the Attorney-General places on my remarks."

Subsequently, however, he claimed he did not mean to make any such accusation. The seriousness of the statements Mr. Lewis had made were commented upon by the Premier and other members, to which Mr. Lewis replied that no one appreciated more than he did the seriousness of the statements.

Some of the Evidence.

Mr. Lewis said that when the body had been found lying in the snow, Huston's revolver was found at his side with four cartridges exploded, although only one bullet had hit him. Papers from his pocket were scattered along the path leading to the hotel, against the direction the wind was blowing at that time. A woman had stated that she heard three shots, a cry for help, another shot, and then silence. He said Huston was left-handed, and yet he was shot through the heart, the flesh of his left hand was lacerated. All this he claimed to be contrary to the report that he had suicided. The jury at the inquest brought in an open verdict.

An Investigation.

He accused the Department with not using sufficient vigour in starting the investigation at once, claimed there had been no real investigation for six weeks when Inspector James Jeffery was sent up. He later agreed that Mr. Jeffery had made an earlier visit to the scene.

Mr. Raney interrupted to point out that an officer of the Department on the ground started an investigation at once. Mr. Lewis said this officer named Campbell still thought Huston had been murdered.

Mr. Lewis continued that Inspector Jeffery had stated as soon as he arrived at Fort Francis that he had come to investigate "that suicide case." This, he claimed, indicated that this officer had made up his mind before he arrived that it was suicide. He blamed Chief of Police Wall of Fort Francis for sending out notification to Huston's relatives very soon after the body was found that Huston had suicided.

Agreement with Backus.

Referring to an alleged agreement between Mr. Backus and Mr. Huston, Mr. Lewis claimed it was for 25,000 to 50,000 cords of pulpwood to be shipped from Northern Manitoba to the Backus mills.. Mr. Huston was to endeavour to get a lower freight rate for transporting this, and was able to do so. Mr. Backus later using this reduction as a precedent, got the Railway Commission, Mr. Lewis claimed, to lower the rates on pulpwood from Mr. Backus' own limits to the mills. A dispute arose, Mr. Lewis continued, between Mr. Backus and Captain Huston, due, it was claimed, to the millowner's refusal to take more than 10,000 cords, which was said to have embarrassed Captain Huston, who had contracted with farmers in Northern Manitoba for the wood.

Huston Threatened.

A number of letters and telephone conversations passed between the two, Mr. Lewis said. At the conclusion of a telephone conversation with some party in Fort Francis, Captain Huston, who was in a hotel in Winnipeg, said to a friend there, "I am threatened with rough stuff if I go to Fort Francis," Mr. Lewis stated.

"Captain Huston, before leaving for Fort Francis," Mr. Lewis went on, "threatened to publish the whole circumstances in a Winnipeg newspaper."

Had Plenty of Money.

Captain Huston went to Fort Frances, and shortly afterwards was found dead. Mr. Lewis read portions of a letter from Captain Huston's sister to the effect that she did not see how her brother was without money, as had been given, as a cause for his suicide, that he had some $21,000 a year before in the bank. Another thing which is given as a basis for the assumption that it was suicide, was the claim that Captain Huston's war service had weakened his mind. This Mr. Lewis did not think was a fact.

Attorney-General Raney set forth his Department's position in regard to the matter, claiming there had been no undue delays. He explained that Inspector Jeffery, after his investigation, had come to the conclusion that it was a suicide.

"Where is Jeffery now?" asked Mr. Dewart.

"That has already been answered in this House," Mr. Raney replied.

It was subsequently explained by the Attorney-General that Jeffery was accused "by certain bootleggers of accepting bribes." Investigation into these charges was started, but had not been completed owing to the illness of General Elliott, who was one of the officers conducting it. Inspector Jeffery had since left the employ of the Government and gone to England.

Reward Offered.

Mr. Raney pointed out that the Department had offered a reward of $1,000 for information to show that anyone had murdered Captain Huston. He said the papers had published considerable concerning the death, but the direct and startling statements of Mr. Lewis came as a surprise to him, and would be investigated.

Budget Debate.

Folowing these speeches, the House proceeded on the budget debate, with W. D. Black criticising the road building policy of the Government.

J. A. Pinard (East Ottawa), who came next, claimed the Separate schools of the Province were not getting their share of the Government grants, and argued that the Protestant minority in Quebec got more consideration in school matters from the Government there than did the Catholic minority in Ontario.

CHURCH PRESENTS MOTION IN HOUSE.

OTTAWA, April 28.—(Canadian Press.)—T. L. Church (North Toronto) has given notice in the House of a motion that "the practice of superior court or county court judges appointed by the Government of Canada serving on provisional Government commissions of various kinds is wrong in principle and not in the public interest or the interests of the administration of justice in this country, and that judges who so do should be compelled by an amendment to law to resign their judicial office."

BOARD OF TRADE WOULD CHANGE THE INCOME TAX

Ottawa Board Says the Present System Is Illogical. Resolution Is Passed.

CIVIC DEBTS.

OTTAWA, April 28.—(Canadian Press)..—The Ottawa Board of Trade at a well-attended luncheon yesterday passed the following resolution on motion of George F. Henderson, K.C., seconded by John Bingham.

In the pinion of the Ottawa Board of Trade the present system of business and income taxation in Ontario is illogical and not in the best interests of the Province and the whole question should receive very carful consideration before any further changes are made in the assessment act.

The resolution was unanimously agreed to and followed a somewhat animated debate in which a pretty thorough survey of civic affairs took place.

Two schools of thought clearly manifested themselves, the one, led by Hamnet P. Hill M.L.A., the chief speaker for the day, who again outlined his views were the exemption of dividends from joint stock companies from municipal income tax, and who claimed that municipalities were piling up debts and expenditures had got to be curbed. The other school maintained that while it was true civic debts were increasing, certain services and improvements were being demanded by the people and these must of necessity be paid for.

IRREGULARS HOLD VALUABLE PAPERS.

Irish Faction in Control of Four Courts Building Threaten to Burn Documents If Molested.

DUBLIN, April 28. — (Canadian Press.) — Machine guns have been added to the defence of the Four Courts Building in Dublin, which was occupied by irregulars some time ago, and the occupants threaten to burn the place if any attempt is made to expel them by force.

Inquiry regarding the safety of certain valuable documents yesterday elicited the reply that so long as the garrison was not molested these papers would not be injured.

The Provisional Government has announced that the whole work of the Public Record Office has been held up on account of occupation of the building. People of Irish birth all over the world have had constant recourse to this office for evidence concerning old age pensions, insurance and other matters. An important order has arrived from New York genealogical experts asking for copies of 41 wills ranging in dates from 1516 to 1788. This and similar orders cannot be dealt with until the original documents become accessible.

N. S. MINERS OFFER HELP TO RUSSIANS.

GLACE BAY, N.S., April 28.—(Canadian Press.)—J. B. McLachlan, Secretary-Treasurer of the United Mine Workers, sent last night to Nikolai Lenine, head of the Russian Government, the following cablegram:

"Will Russian people guarantee repayment when possible of $15,000,000 distress loan by Canadian Government, loan to be spent in Canada, to buy wheat seed and food for Volga, and distributed under Nansen Agreement?"

Cape Breton miners are passing resolutions demanding that the Federal Government immediately make a $15,000,000 loan to the starving Russians.

THREAT OF WAR.

MOSCOW, April 28.—(Canadian Press.)— The Izvestia asserts that the "decision of the French Council of Ministers to occupy the Ruhr region in Gerany," will tend not only to the breaking up of the Genoa Conference, but to disruption of European peace and the threat of a new war, which the French are "provoking by throwing sparks in the powder magazine."

RUSSIANS SAY THEY ARE NOT BEING HEEDED

Soviet Delegates Send Note to Powers Complaining of the Treatment They Receive.

THE NOTE.

GENOA, April 28 Canadian Press) —While the Powers were yesterday preparing the details of a document informing the Soviet delegates what the Powers expected of them and what the Powers on their part were ready to do for Russia, the Russian delegates issued an open statement which pertinently expressed their discontent because they were not being kept informed of what the Powers intended to do.

Their statement insisted that Russia would protect her sovereign rights, and contended that she alone was following the fundamental ideas of the Cannes resolution touching the questions of reciprocity and economic reconstruction. The text of the statement follows:

"After the meeting of the experts, at which the Russian viewpoint on the first seven articles of the London experts' proposal was presented in detail, no news has come to us concerning the attitude which the Powers will pursue. Russia has not the least desire for a rupture, but she is determined to safeguard the principle of her sovereign rights and the principle of reciprocity, which is the only possible basis of a community of peoples and economic reconstruction.

"Such, indeed, constitutes the fundamental idea of the Cannes resolutions, and we believe that it is Russia alone which remains entirety faithful to the Cannes resolutions in all their essentials."

The document of the Powers, which is to be handed to the Russian delegates was considered yesterday by Premier Lloyd-George, Signor Schanzer, M. Barthou, M. Jasper, and Baron Hayashi at Mr. Lloyd-George's villa. It will be submitted

MEIGHEN WANTS MORE ECONOMY

Objection to the Amount Wanted For Books, Etc. Causes Estimate to Be Reduced.

OTTAWA, April 28. Canadian Press. — Mr. Meighen objected to a vote of $40,000 for the publication of reports and the purchase of books and laboratory supplies in connection with the investigation of mineral resources. The late government had saved a great deal of money in connection with printing through the work of the editorial committee. It was to be hoped that the present government would maintain this supervision.

The Prime Minister intimated that the committee would be kept at work and that it was possible the editorial committee would be composed of permanent offcals.

Mr. Meighen replied that the difficult part of the committee's work was already done well and thoroughly. There were other things which could be looked into with better advantage than the work of the editorial committee. He was not in favor of permanent appointments to this committee.

Hon. Mr. Meighen then moved to reduce the estimate from $40,000 to $32,000. The item carried as amended.

SCRUB CATTLE TO BE ELIMINATED.

WOODSTOCK, April 28.—(Canadian Press.)—Returns from the assessor's department of the various townships in Oxford county show that a reduction of over 50 per cent in the number of grade and scrubs at the heads of Oxford dairy herds has been accomplished during the last year. The campaign to get rid of these undesirables which was first received rather dubiously is now being enthusiastically supported in all parts of the county.

EFFORT WILL BE MADE TO SETTLE BRITISH LOCKOUT

Sir William Mackenzie Appointed to Hold a Court of Inquiry in the Case.

POWERS OF COURT.

LONDON, April 28.—(Canadian Press). — Sir William Warrender Mackenzie, who has been appointed to hold a court of inquiry into the lockout of the engineering trades, is permanent President of the Industrial Court. Under the Industrial Courts Act inquiries may be instituted either by one person appointed by the Government or three persons drawn from separate panels namely a representative of the employers, a repesentative of the employees and a chairman.. In this instance the former course has been adopted.

The Court of Inquiry has no power to make an award, but it can present a report, with recommendations, to be laid on the table of the House of Commons.

Sir W. W. Mackenzie is a prominent barrister. He has been connected with a number of important inquiries on industries, besides having acted as arbitrator and conciliator in industrial differences for the Board of Trade and Minister of Labor. In addition to his position as President of the Industrial Court he is chairman of the Railway National Wages Board. He is the author of several works.

THE HORTICULTURAL SOCIETY.

From a selfish standpoint alone—putting aside the opportunity afforded of working for a more beautiful city—the advantages offered by membership in the Peterborough Horticultural Society are so manifest that it is surprising to read that a membership drive is to be held. It might naturally be thought that with the options that are offered the members, the majority of citizens would be glad to join the society—which should have at least one thousand members.

The objective of the membership campaign, however, is only half that number, and it should be easily reached during the coming week, which will be known in Peterborough as Horticultural Week. The society had a good record of achievement to its credit last year, and further improvements are being planned for this year, tending to make the appearance of the city more attractive. It is a work in which the Horticultural Society should have the support and encouragement of everyone who takes a pride in Peterborough, and who realises the impression that is made upon visitors by a city that is attractive in appearance. The membership fee is not high, and there seems no reason why the society should not succeed in getting five hundred members on its roll this year.

THE BUILDING BY-LAW.

In consulting with an advisory committee from the Builders' and Supply Association over the question of a new building by-law for Peterborough, the Property Committee of the City Council has acted in a business-like manner that affords ground for hope that a modern by-law will soon be in force in this city. Included in the recommendations to the Council is one advocating the extending of the fire limits, both south and west. The old limits were doubtless not large enough, and there will not be much objection to the extension suggested. The need of an effective building by-law has been felt in Peterborough for some time, and the action of the committee in bringing the regulations up-to-date is a progressive step. At the same time, the city fathers should resolve that the new by-law will be rigidly enforced, and that its effect will not be negatived by concessions that defeat the purpose of themeasure. In the past there has been too much leniency shown in this respect. Previous Councils have not hesitated to authorise work being done that violated the existing regulations. Conditions that should have been insisted upon in the case of buildings within the fire limits have been allowed to go by default, with the result that many people have come to regard the building regulations as a dead letter. The new by-law, if it is to be of real value, must be administered strictly and impartially—and there must be no special privileges for any one.

GIVE THEM REPRESENTATION.

The Ontario Government could do much to dissipate the impression that prevails in many quarters that it is hostile to the Hydro enterprises by two steps, neither of which seems to present any difficulty. In the first place, the municipalities of Ontario who are partners in the Hydro-Electric power scheme should be given direct representation on Hydro-Electric Power Commission, and secondly, Government might do well to add to membership of the Commission which has been appointed to investigate the Chippawa power development scheme, a representative of the municipalities. Undoubtedly these two appointments would do much to disarm suspicion and to assure the cities and towns which are linked up in the Hydro-Electric Association of Ontario, that the Ontario Government is actuated, not by hostility to the public-owned power scheme, but by a desire to see that the interests of the people are protected. The municipalities have by their enthusiastic support of and co-operation in the Hydro scheme, made the wonderful project a success. They feel that their investment in the project entitles them to representation on the Hydro Commission and also on the Chippawa Probe Board, and Premier Drury would strengthen his position appreciably by meeting their wishes in so far as these two things are concerned.

A BILL THAT FAILED.

The Legislature has turned down a Bill to make all vehicles carry lights at night. It was expected that there would be opposition to the measure from some of the farmer members of the House, but it was hoped that the necessity of the safety legislation would appeal to the good sense of the majority of the legislators. The unlighted vehicle on the highway at night is a source of danger. Every motorist has a story to tell of a narrow escape as the result of a near collision with a waggon or a buggy that was not seen until almost too late to avert an accident.

Just a few days ago a tragedy was caused near Sudbury because of a vehicle that did not carry lights. A motorist who did not see the waggon until his car was almost on top of it, could not swerve quickly enough to avert a collision, and as a resulyt onelife was lost and several men were badly hurt. Unfortunately there is no guarantee that this will be the last accident of this kind that will occur on Ontario's roads until a change is made in the regulations. When the people of the largest city in Ontario, a city with brightly lighted streets, vote in favour of compelling all vehicles to carry lights, it should be fairly evident that the vehicle without lights is a menace to safety.

Healthy Thinkin.

London Daily Chronicle: There is little that is new in M. Coue's system. It is familiar enough to those who have examined the teachings of many professors of mind-cure who have set up little schools in England and America during the last quarter of a century. It is remarkable chiefly in the degree of attention that it has attracted, uniting in itself an appeal to the health interest—to the universality of which the success of patent medicine and advertisements testifies—and to that human craving which finds temporary satisfaction in revivalist meetings or manifestations of the occult. Over both of these attractions its influence has this great advantage—that there is nothing in it, so far as we can see which is not healthy and sane. Think yourself well. Think yourself cheerful. Away with this morbid illusion! What could be a better frame of mind for the everyday purposes of life?

SPRING AND SUMMER FORE ST FIRES.

"There are usually two periods of fire-hazard in the Canadian forests, in early spring just after the snow disappears, and in late summer, when the vegetation has begun to get dry says a bulletin in the Canadian Forester's Association. Exceptional seasons vary these periods but the two classes of 'spring fires' and 'summer fires' remain. Many people understand why the dry, hot period of late summer is likely to be favorable to the starting of forest fires, but they think that, after the heavy snowfall of winter, the woods ought to be safe till early summer at least. A little reflection, however, will show why the early spring is particularly dangerous. In early spring there is often a short period of hot, bright days. The leaves have not yet come out and the sun shines down through the leafless branches directly on the forest floor. The snow disappears as if by magic and the dead twigs of last year's leaves become dry as tinder. If a glowing match or cigarette stub is dropped among this material the forest floor is ablaze over a space of many yards in a moment. A few days at this period are always most critical. After the first spring rain the ground vegetation becomes green and damp, and the leaves come out and shade the forest floor. The worst danger is then over, until the hot days of late summer cause the vegetation to dry out, when a danger period ensues which lasts till the first autumn rains. The moral of it all is that Canadians ought always to be careful with fire in the forest and doub'y careful during these danger periods."

PROHIBITION BY TAXATION.

There was forty per cent. less drinking in Great Britain last year than there was in 1914. Not more than 32,000,000 barrels of beer were emptied, as against 36,000,000 in the first year of the war.

High taxation is destroying the drink trade, as it destroyed the cigar trade for a time. For every seven glasses of liquor drunk in 1920, only six were drunk in 1921.

The tota consumption of alcohol last year fell to 61,000,000 gallons—8,000,000 gallons less than in the previous year. Of this amount 79 per cent. was bought as beer; 17 per cent. as whiskey and 4 per cent. as wine and cider.

To put the situation in a sentence, the total revenue of the drink trade last year was $2,000,000,000, and the greater part of it was taken in taxation.

Never before, since the habit of drinking alcoholic liquors began, has the British public drunk so little. It would seem, at the moment, as though a sort of near-prohibition would be brought about in England, because of the high price of drink.

There were only half as many arrests for drunkenness last year, as there were in 1920. In Greater London, there were only 27,410

It is greatly amusing Britishers to notice that there wers nearly twice as many arrests for drunkenness in Chicago ae in London. The ratio of drunkenness appears to be 18 per 1000 in Chicago and only 4 per 1000 in London.

In fact, there has been a remarkable falling off in crime of all sorts in England recently. Eight prisons were closed last week. In the whole of England and Wales, there are at present only 30 prisons, with 11,800 prisoners. One jail in Cambridge, has been made into a library for the Public Records Office.

The whole drink trade has been "savagely over-taxed"—to use one of its own phrases. Drink-sellers are primarily tax-collectors.

The beer tax is $24 a barrel. It is 13 times what it was in 1914.

The total amount paid in rates and taxes last year by the drink trade, was fully $1,300,000,000. This is more than one-fifth of the total revenue of the British government.

About 20 per cent. of the drink revenue is shared, half and half, by labor and capital. About 15 per cent. goes for materials and expenses; and 65 per cent. goes to the government.

One London brewer—Mr. William Harris, said recently that his brewery last year had paid $350,000 in dividends and $2,900,000 in taxes. The government had beaten the shareholders—eight to one.

The liquor control board still exists. It is continued for a year at a time, and there is no sign, at present, that it will be abolished.

It is a most unique body—this liquor board. It is composed of twelve men, appointed by the prime minister.

These twelve men meet in secret. There is no appeal from their rulings. They are dictators. They decide how, when and what, the British people shall drink.

In general, the policy of the government has been to gradually relax the restrictions of the war period. But there are still specified hours and there is very little breaking of the rules.

There is a strong demand for cheaper beer. The present price of 10 to 14 cents a pint is much more than the average worker can afford.

The lowest price for bottled beer in London is 12 cents a half-pint. A glass of beer still is costing as much as six daily papers or an eight-mile ride on a 'bus.

There seems to be no hope that the present taxes will be reduced. The government needs the money, and nothing will induce it to lower the rate of taxation except a falling off in the returns.

So, here is a vast trade with a capital of more than $2,000,000,000, entirely overwhelmed with taxes. It no longer belongs to itself. It is issued as a tax-collecting device with amazing success.

Very likely, the total net profits of the whole drink trade, last year, were less than $200,000,000.

As a result, the securities of breweries and distilleries are not very popular. You can now buy Allsopps preferred to yield nearly 12 per cent: or Watney's deferred to yield 16 per cent: or Plymouth preferred to yield 20 per cent.

—Herbert Casson in Qarron's.

EDITORIAL NOTES AND COMMENT

Clean-Up Week.

Fortunately the hold-up men did not accept the invitation to clean-up as applying to them.

The people of Peterborough should not forget the lectures to be given here, under Rotary Club auspices, by Dr. Barker.

And they are asked to note that the famous lecturer will be here on 3rd May, instead of 5th May as originally announced.

Hands off the Militia should be the warning from every loyal Canadian.

Some of the members of Parliament, who are sneering at Canada's Volunteers, either have a very bad memory or a poor sense of gratitude.

Their Only Use

New York Tribune: Trials of women for killing male acquaintances entertain courtroom crowds for three or four weeks, even if they seldom accomplish other results.

Freed from Politics

Providence Journal: If the Reparations Commission could be free to act without its political hobbles it would undoubtedly arrange a settlement on a sound economic basis. For it knows as much about German finances as the Germans do. It knows the facts of production in Germany and the profits that are resulting from oth foreign and domestic sales. It knows that German taxes are not as heavy as they are in France, and that the Germans are talking rot when they say that added taxation, as demanded by the Allies, would be unbearable.

High Taxation and Discontent

Times of India: High taxes mean increased cost of living and discontent, amid which the disturber of the peace flourishes. A recurring deficit means financial disturbances which react to the detriment of the whole commercial and industrial community, and the immense classes dependent on their welfare. A recurring deficit involves tGovernment in the vicious circle of higher and higher taxes which produce no more revenue, and a heavy price for their borrowings which adds to the annual charges and reduces the development of the productive forces in the community.

The Ethics of Murder

Cleveland Plain Dealer: If a male citizen of the United States wearies of his wife and proceeds to murder her he is forthwith tried, condemned and usually hanged or electrocuted. If a female citizen wearies of her husband and removes him by murder method she is almost always "triumphantly acquitted." Rarely, very rarely, she is sent to prison. She is never hanged. This is only one of the peculiar quirks of the ethics of murder in the United States. The general hanging of husbands and the general acquittal of wives is a specific detail from which a safe generalization may be deduced. It is reasonably safe for any woman to murder any man in the United States.

Wise and Otherwise

There are fifty-two weeks in a year — but lornoze how many "Weeks."

How would it be, we wonder if things were back to a pre-Congress basis

If a man wants to borrow trouble the world stands ready to give him credit.

With Russian rubles down to about ten cents a ton—why worry about coal?

A man's bankroll quite often is washed away in a flood of his wife's tears.

Some men claim they sleep well in Pullmans. And some men are fairly truthful.

Hang it; the next time we have a war, let's work it on the pay-as-you-enter plan.

Whatsoever a man soweth probably won't come up. But gardening is good exercise, anyhow.

In buying liquor, it's wise to believe everything the bootlegger doesn't say about it.

A muskrat makes the same set of furs last a whole year. But who wants to marry a muskrat

Every little bit added to the places you've already been bit takes life just a little bitter.

Some writers gain reputations simply by writing so obscurely that their lack of thought is completely concealed.

We wonder if Connie Mack, this year, will continue his custom of running into New York every month to see a ball game.

Old lady to street car conductor: "What did you start this car with?" Conductor: "With a jerk, ma'am."

An ex-toper chirps that "Bartholdi's liberty statue is not accented on the first syllable, so will be left standing."

Hating the ape-descent theory as he does, perhaps Mr. Byran will start a movement to abolish the name of the present month.

Desire for re-election is quite commendable considering it's one thing under the sun upon which the Senate can unanimously agree.

The college graduate usually imagines he had the world "put away on ice", but the June commencement is followed by a hot summer.

The average bachelor acts as if he's eternally afraid some woman will slip up behind him and marry him when he's not looking.

One way of looking at it: "Why should the government take my money by taxation? The government already has more money than I have."

ROAD SIGNS ON THE DASH NOW

A Possible Adaptation of Wireless For Guidance of Motorists.

The countless women who to-day drive their own cars might be tempted to take touring trips of no mean distance were it not for the fact that there is always one bogie that looms up, when such a project is contemplated—and that bogie is the same that often worries men drivers, too—the fear of making a false turn, or running past a sign post, so that nightfall will find the traveler lost on a strange road in an unknown region, says Harold Turnbull, in "Motor"

Of course, road markings, sign posts, road maps, and guide books have been, and are still, like charts and lighthouses are to the sea-faring mariner, but eternal vigilance is necessary if one is to make certain of reaching the chosen destination. Then there is the human equation, and, take it all in all, even the experienced automobile tourist sometimes goes astray. Once off the beaten course, any combination of misadventures is possible, with scarcely a chance of timely assistance. Punctures and blow-outs, the exhaustion of the gasoline supply, ignition and engine troubles—these are misfortunes not to be lightly borne on a lonely road and with night coming on.

However, we may soon expect all this to be a thing of the past, for Invention, fertile-minded and never-resting, has found a way, like a chivalrous knight of old, to save all fair ladies in distress. Indeed, Invention is playing the role of a veritable St. George—for he is going to slay the dragon, once and for all, the terrible dragon, Going Astray that lurks along every motor route.

You know what a wonderful fellow Invention is, with his self-starters, miraculously operating jacks, wire wheels, and detachable rims. You know that he has given woman her full liberty, her rights, even more than has the ballot, for he has enabled her to move freely where she will, because of that perfected wonderful mechanism—the modern motor car, which, if intelligently treated, requires very little attention. Well, Invention has allied himself with the good-roads movement in this continent, and he has thought out a method of guiding you automatically over every improved highway in the length and breadth of our broad land. Invention proposes to place another little instrument alongside the speedometer. It is called the electric directometer, and it will do just what its name indicates—direct you on your course.

What is the mystery, what the magic behind this more than-human little instrument? The answer is, there is neither mystery nor magic; electricity, the ever-ready, is simply being called upon to play a new part.

An iron wire is strung along the telephone or telegraph poles that line many highways, or is sunk beneath the roadbed itself. This last would best be done at the time of the construction of the highway. At intervals, there is placed an electric generator, of small size, which sets up an electric current of a kind known to engineers as of "high frequency." Now, just as a telegraph instrument sends out dots and dashes by means of electrical impulses, so will such dots and dashes be emitted by the iron wire. These dots and dashes—based on the Morse telegraphic code—have a special significence in the system we are describing. The Dixie Highway, for example, may be represented by five dots one dash; the Lincoln Highway by three dots seven dashes, and so on. If anywhere along the Dixie or the Lincoln Highway there was placed an instrument, as in an automobile, sensitive to the emissions from the wire, these emissions would be registered, in short and long clicks, that is, in dots and dashes.

In order to pick up these electrical" " emissions, a mechanism, known in electrical parlance as a "coil," is placed on the hood of the motor car. Then in order to increase the strength of the current so picked up, there is also an amplifier. This connects with a relay, and lastly with a little box-like instrument on the dash of the car, and this last is the directometer itself.

On the face of this directometer—which is covered with glass—there are a series of perforations—on one side there are dots, on the other dashes.

Suppose our car is on the Lincoln Highway, which we have chosen to represent with three dots seven dashes. So long as we are on this route, this combination of dots and dashes will show in brilliant red on the instrument. But if we by chance take a wrong turn, thus coming to another road, an alarm is at once sounded. A bell rings and does not cease until we have corrected our error.

In the event that a detour is to be made, a warning is also given by two of one arrows that point to the right and left. The course of the detour is indicated by the proper arrow lighting up. This is brought about by placing a detour that points a special transmitter, which acts upon a mechanism behind the arrow. Nothing is left to chance, and therefore nothing can go wrong.

The regular guide book is not abandoned, but it is supplemented with a list of all the motor highways in the country; each highway being indicated by a certain number of dots and dashes.

Be Sure About Your Battery

No matter what kind of a car you drive or what kind of a battery there is on it you should keep informed about certain battery facts.

You should know whether your battery is charged to the proper point—whether it has enough water in it—whether each of the cells works properly.

Our most important duty as a Battery Station is to tell you these things. It doesn't make a bit of difference what make your battery is. Here at Battery Headquarters we give every make exactly the same attention.

DID EDWARDS BOY AND ABE FILION, ETC.

(Continued from Page 3.)

and two younger children at home. Subsequently Jennie stayed at Mrs. Wigmore's, a near neighbor, leaving the two litle children with her grandfather.

Mrs. Edwards was also at Hill's on the preceding Sunday and returned home in company with Filion at about 10.30. Filion, she said, who is single, stayed at her house Saturday and Sunday nights, sleeping on a couch downstairs in the kitchen. He left for his work on Monday morning at 8 o'clock and she at 4 o'clock. Filion and her dead son never had a word, she swore.

Continuing, after describing deceased's action on Sunday and Monday morning she deposed that he took dinner with the family on the latter day, April 10, after which he sat on the verandah. She emphasized his sulky spells when things did not suit him, and said he was in one on Saturday, Sunday and Monday, because she had refused him $2 on Saturday, when, however, she gave him money for tobacco. She thought that on her return from Russell Hill's on Wednesday she would find Ernest in better humor.

Mrs. Edwards here denied keeping company with Filion who, she said, had visited her home on invitation from her boys Ernie and Jack. The latter had worked for Filion's father on the 8th line, and the three of them were at the time in question seeking employment on the railway at Norwood. Ernie had been at home two weeks, while Jack and Filion were cutting wood for Russell Hill. Witness was positive that her son had never complained of Filion coming to her house.

How She Left Him.

Referring to the last time she saw Ernest, Mrs. Edwards alleged that she saw him twice on Monday afternoon, April 10—at 2 o'clock on the verandah at 4 o'clock in the barn yard, lying on his back, with hands over the head and right knee drawn up. "I thought he was sleeping," she said; "his cap was over his eyes, and I went away to Russell Hill's and left him there." As to telling Constable Puffer of Norwood that she saw the dead boy last on the verandah, witness claimed that she was excited and forgot about seeing him lying on the grass later, as described.

Under cross-examination Mrs. Edwards indignantly denied improper relations with Filion, with whom she had never occupied the same bed in her house.

That Bottle of Strychnine.

Questioned as to that bottle of strychnine in the house, bought ten years ago by her late husband in Lakefield, witness declared it was kept in Ernest's unlocked trunk, everybody in the house knew it was there. But they have searched for it everywhere but in the barn, to no purpose. She denied telling an Examiner reporter that there were a few "drops" of poison left in the bottle; in fact, while she remembered the appearance of the strychnine, she could not recall the shape of the bottle or whether it was labelled or not.

In final cross examination, Mrs. Edwards did not know what could have happened deceased, who had never threatened suicide; and she remembered telling her other son Rollie that she had seen Ernest lying in the barn yard after four o'clock, and noticed that he had moved his foot.

Filion's Evidence.

Abraham Filion told of his relations with the Edwards family, which were friendly all round. He had lived there for two weeks, and since January or February he had visited there twice a week, on invitation from the boys, with whom he was chummy. Ernie and Jack worked for his father. When at the Edwards' he slept on a couch in the kitchen, the boys in the next room, and the mother upstairs, reached through the dining room. He saw Ernest last on Friday, April 7; on the Saturday, Sunday and Monday Ernest was not to be seen—he was sleeping, his sister asserted. He was the best of friends with deceased, and had never exchanged words with him regarding his mother, with whom and himself all relations were perfectly proper.

Witness described Ernest's disposition since January as sulky and morose; he would sit with his head down, seemingly planning and did not wish to be bothered.

He knew nothing of strychnine in the Edwards' home and he denied having threatened Ernest at any time. Recalling his movements on Wednesday, April 12, when Jennie notified her mother of Ernest's death, Filion said he had driven Mrs. Edwards and Jack from Hill's as far as Brown's, where he stayed over night, while the others went on home, a mile away. But he attended both wake and funeral.

A Discrepancy.

Roland Edwards, another brother of deceased, living at Norwood, deposed that on last seeing Ernest a week before his death he was in normal health and not depressed in mind. Regarding a conversation with his mother as to her movements, he testified to her telling him that on the Monday in question she had seen Ernest lying on the ground in the barn yard at noon and also at 5 o'clock, when she returned home. She did not say that she had gone to deceased to see were he all right or not. His mother had never discussed with him Ernest's moroseness nor had the latter complained to him of Filion and his mother.

Position of Body.

John Williamson, who has lived in Norwood since a year ago last October, testified to renting the house on his farm to Mrs. Erwards, and to finding the body of Ernest between one or two o'clock Wednesday, April 12, lying face down, limbs perfectly straight, arms across the breast, and the head a least bit to one side, all in quite a natural position. Deceased's cap, he said, was about a foot away from his head inside up, and a handkerchief close by. He did not touch the body only to ascertain were life extinct. He had heard it stated that Ernest had taken a mad fit because his mother refused him $2, and he was impressed by the fact that Mrs. Edwards exhibited no sign of emotion.

The Same Story.

John Edwards, 18-year-old brother of deceased, gave evidence which closely coincided with that of others of the family as to his mother's movements on the days in question, and Filion's relations with the family, and he could not be shaken in his denial that he had talked over with his mother and other members of the family what evidence to give in favour of Filion. He did not know why Filion stayed at Geo. Brown's Wednesday night of the day of his brother's body was found, instead of driving his mother the rest of the way home.

Little Jennie.

Jennie Edwards, a 14-year-old school girl, testified that she looked after the house in her mother's absence. She last saw Ernest Monday noon, April 10, when they all dined together. That morning her mother and deceased did "chew a little over everything. Ernest said his mother should not be keeping Filion there and he was mad because he couldn't get a horse. Ernest never spoke to her (witness) that morning, and she went to school as usual. On returning she found her mother away at Brown's, and she (witness) stayed at Wigmore's Monday, Tuesday and Wednesday nights. She heard of her brother's death a little before 3 on the Wednesday afternoon; the body was lying face down, the arms under him and his feet straight.

Witness described the mid-day meal on the Monday, and swore that on her return after four o'clock in the afternoon she found the things on the table as she left them and Ernest nowhere in sight. So she left on the table a note for him that he would find her at Brown's. She has not seen that note since nor heard of any one finding it.

To Mr. Hatton, witness denied that she had discussed with her brother Rollie the nature of the evidence they would all give to-night. No one had threatened her in that regard.

Finding the Body.

Constable Isaac Puffer, in his evidence, declared when he saw the body it was lying face down, hands across breast, toes stiff and limbs straight on the ground. The hat was 18 inches from deceased's head, right side up. (Williamson testified that the hat was innerside up.) A khaki handkerchief was near the hat. There were no marks of a struggle; in fact it looked just as though some one had lain deceased there. If taken suddenly ill, Ernest could not have fallen in that position he contended.

Recounting his conversation with Mrs. Edwards on her return home that Wednesday evening about 7 o'clock, and their subsequent movements, Constable Puffer said:

"To my question, what's wrong with your boy, Mrs. Edwards repeated the story about her refusing him $2 and his getting angry. She then told me she went away Sunday morning and on commencing to recount what happened Monday morning I asked her how she could know about Monday's happenings if she were not at home, when Mrs. Edwards replied that she returned Sunday night with Filion, who went away Monday morning, she herself leaving after dinner with Ernest. 'And I've never seen him since,' she said. Describing their entrance to the house, Mrs. Edwards first, Puffer following closely, the latter stated that he lit the lamp in the living room and had there been a note on the table which Jennie says she left, he must have seen it. He thoroughly searched the place for evidence, but found none, neither were there any signs of a struggle. Mrs. Edwards, he declared, showed no signs of emotion or motherly concern in the matter.

The inquest was held in the police court, Coroner T. H. Greer presiding and County Crown Attorney Geo. W. Hatton acting for the Crown.

R.A.F. FLYER TO START FLIGHT AROUND WORLD

Major W. T. Blake Will Take the Place of Sir Ross Smith Who Was Recently Killed.

START SOON.

LONDON, April 28.—(Canadian Press.)—Major W. T. Blake, of the Royal Air Force, has been invited to take the place of Sir Ross Smith in the proposed round-the-world flight the Evening Star announced yesterday. Sir Ross, who, with his brother, Sir Keith Smith, had planned to attempt to fly around the world, was killed recently in an accident.

Major Blake told the Star he was taking Captain Norman MacMillan, but he had not decided on the type of flying machine to be used. The route will be through France, Italy Greece, Egypt, Mesopotamia, India, Eastern China, Japan, thence via the Aleutian Islands, across to Alaska, through the United States to New York, thence to Newfoundland, and then across the Atlantic, via Greenland and Iceland to Scotland.

Major Blake expected to start about the end of May and plans to complete the trip in two months.

CHILDREN'S COUGHS QUICKLY RELIEVED

It is hard for to keep the children from taking cold, they will run out of doors not properly wrapped, or have too much clothing on and get overheated and cool off too suddenly, they get their feet wet kick off the clothes at night; the mother cannot watch them all the time so what is she going to do

Mothers should never neglect the children's coughs or colds, but on the first sign should procure a bottle of

DR. WOOD'S
NORWAY PINE SYRUP

It is pleasant and nice to take, and relieves the cough or cold in a very short time, and thus prevents bronchitis, pneumonia, or perhaps consumption getting a foothold on their system.

Mrs. E. Smith, 288 Victoria Ave., North, Hamilton, Ont., writes: "I have three children who have had very bad colds, due to change of climate. I have tried different remedies, but I seem to get the best results from Dr. Wood's Norway Pine Syrup. I have no difficulty in giving it to them as they like it. I always have at least one bottle in the house."

RUSSIANS SAY THEY ARE NOT BEING HEEDED

(Continued from page 3.)

to the sub-commission on Russian affairs to-day.

Immense interest is concentrated in the probable text of Mr. Lloyd-George's non-aggression pact, several drafts of which have been drawn. It is learned that one of the drafts contains the proposition that the members of the Little Entente shall mutually agree to organise a kind of flying army corps, which act as international policemen to protect the frontiers and punish violations of the non-aggression agreement. It is understood that idea emanated from Roumania, but several delegates gave it as their opinion that there seemed little chance of its being incorporated.

As the Conference assumes broader aspects, certain indications come to the surface that two distinct political waves, which, being contradictory, are difficult to reconcile, are surely spreading throughout Europe. One is internationalism, which thinkers of almost all countries are preaching; the other is nationalism. The latter has flourished particularly since the Great War, and the birth of new states through the Treaty of Versailles has only served to multiply nationalistic sentiments.

While few statesmen dare to speak openly of the possibility of attaining some form of federation of the European States, it is learned that many of them secretly possess ambitions to bring about harmony between nationalism and internationalism and the basis of this new European construction will be the principles of equity, justice, and the fellowship of man.

Many Conference circles remarked yesterday on the coincidence that two leaders so widely apart as Lloyd-George and the Rev. Don Luigi Sturzo, leader of the Italian Catholic Party, should be exhorting Europe that it must move along the lines of internationalism, based on equity and self-restraint, as well as justice and charity. It is understood that Mr. Lloyd-George has a profound ambition to make his non-aggression pact the precursor of a broad movement to bring all the peoples of Eurone, including Russia and Germany, closer together, perhaps as the first step towards some form of European Federation.

Liver Trouble
Is Usually Due to Constipation

When you are constipated, there is not enough lubricant produced by your system to keep the food waste soft. Doctors prescribe Nujol because its action is so close to this natural lubricant.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol
For Constipation

THE secret of getting well is finding the right medicine. The fact that Dr. Caldwell's Laxative Syrup Pepsin has the largest sale in the world would seem to prove that several million people find it THEIR right medicine. Miss Evelyn A. Craig of Sherbrooke, Que., once a semi-invalid, says Dr. Caldwell's Laxative Syrup turned her sickness into health.

DR. CALDWELL'S
LAXATIVE SYRUP PEPSIN
FOR CONSTIPATION

Use Dr. Caldwell's Laxative Syrup Pepsin for constipation, biliousness, headaches, feverishness, and to head off a cold. Unlike physics and cathartics, it acts gently and does not gripe. The formula is on the package, and a dose costs less than a cent.

TEN DEAD AND 32 MISSING IN TEXAS FLOOD

FORT WORTH, Tex. April 28.—(Canadian Press). — With the list of missing reduced to 32, relief workers last night expressed the belief that the death toll from the flood which swept this city early on Tuesday probably would be less than ten.

No additional bodies were found yesterday.

The latest estimate on the property damage put the figure at $2,000,000. Refugees are being cared for at relief stations last night. They number 2500.

BRANTFORD INQUEST.

BRANTFORD, April 28. Canadian Press. — The inquest which opened here last night on the body of Peter Egopian, the Armenian, whose body was found cut to pieces on Monday night, and in which connection Harry Dent, another Armenian, is held as a murder suspect, was adjourned without any evidence having been taken.

The police now believe that the murder took place in the kitchen of the Egopian home and the body cut up in the cellar.

RUSSIA MAKS CONCESSIONS TO GERMAN FIRMS

An Unnamed Organization Will Be Given Privileges in Lumber and Lime Trades.

CREDIT GRANTED.

MOSCOW, April 28. Canadian Press. — The first concessions to Germany since the sign of the Russo-German Treaty are announced by the newspapers.

At Petrograd an unnamed German firm has undertaken to complete unfinish l buildings, improve the tramways and repair the sewer and water supp l systems, in return for lumber concessions and building lines.

The Council of Labor and Defence has ratified plans for the organization of a Russo-German export company, capitalized at 1,000,000 gold rubles, with a equ l number of shareholders from the Hirsch group and the Russian State Bank, for operations in the metal industry and the i port and export of ore and chemicals.

The Foreign Office announces that the Norwegian Government has agreed to guarantee a credit for fish purchases in Norway by which the Soviet Government will pay one third in cash and the remainder in two years. The amount will be 20 million kromer.

An English firm it is also announced, has agreed to deliver to Russia annually ten thousand tons of meat and conserves from Argentina on credit.

ETERNAL TRIANGLE ENDS IN MURDER

The Jury Find Verdict of Murder Against Benjamin Swim at Woodstock, N.B.

THE CASE.

WOODSTOCK, N. B., April 28.—Canadian Press. — Benjamin Swim, at his trial, was convicted by a jury in the Supreme Court late yesterday of the murder of Harvey Trenholm and his wife, at Benton Ridge on March 27. The jury was out one hour. Sentence was deferred until to-day.

Olive Swim, the 18 year old daughter of a Houlton, Maine, nurse and a cousin of Swim, was married to Trenholm tw weeks before the murder. Swim is a son of William Swim, of Monticello, Maine. He confessed that he shot the two at their home because of jealousy, the girl having refused to marry him.

Swim shot himself in the head but the wound was not serious. He was arrested after being tracked for eight miles by means of blood spots in the snow.

GRAIN STEAMER RUNS AGROUND.

KINGSTON, April 28.—(Canadian Press).—The steamer Joyland on her way east to Montreal with corn from Western points went ashore Wednesday night below Clayton. No de information could be learned erday about the mishap though it is not expected that she is very hard ashore. The Donnelly Salvage and Wrecking Company was notified and the steamer Cornwall and two lighters were sent down too to release the steamer.

Save the brakes by coasting to a stop as much as possible.

H. A. CONROY DIES.

OTTAWA, April 28.—(Canadian Press).— Henry A. Conroy, Inspector of the Department of Indian Affairs died yesterday at his residence here in his 72nd year. He was born in Toronto in 1850 and had been a resident of Ottawa for nearly 20 years. Surviving are two sons: W. B. Conroy of Atlin, B.C., and S. H. Conroy of Edmonton, and five daughters, Mrs. B. E. McCutcheon, Regina; Mrs. H. R. Bridgeman, Welland, Ont., Mrs. Eugene Russell, Terrytown, N. Y. and Mrs. Norman D. McKenzie of Indian Head Sask.

Not a Bite of Breakfast Until You Drink Water

Says a glass of hot water and phosphate prevents illness and keeps us fit.

Just as coal, when it burns, leaves behind incombustible ashes, so the food and drink taken day after day leaves in the alimentary canal indigestible material, which if not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste, toxins and ptomainelike poisons are formed and sucked into the blood.

Men and women who can't get feeling right must begin to take inside baths. Before breakfast each morning drink a glass of hot water with a teaspoonful of limestone phosphate in it to wash out of the bowels the previous day's poisons and toxins, and to keep the entire alimentary canal clean, pure and fresh.

Those who are subject to sick headache, colds, biliousness, constipation, others who wake up with bad taste, foul breath, backache, rheumatic stiffness, or have a sour, gassy stomach after meals, are urged to get a quarter pound of limestone phosphate from the drug store, and begin practicing internal sanitation. This will cost very little, but is sufficient to make anyone an enthusiast on the subject.

TRAGEDY IN UNVELING

There is an element of tragedy in the belated completion and unveiling of the huge Grant memorial at Washington on April 27.

The man who designed the striking statuary groups—Henry Mervin Shrady—died in New York, two weeks before his great work was to be dedicated. His physical breakdown was attributed largely to his work on the memorial, which he considered his great life work.

One Version of Outbreak, India

LUCKNOW, INDIA, April 28.—(Associated Press).—One of the British officials stationed here gives the following version of the sanguinary outbreak at Chauri Chaura, which has been briefly mentioned by cable.

"Chauri Chaura is a police station in the district of Gorakhpur, United Provinces. In pursuance of the Ghandi non-co-operation policy of boycott, bands of volunteers had been going round the village markets, intimidating and forcing people to avoid foreign cloth and liquor shops. The police officer of Chauri Chaura, whose duty it was to keep the peace in his circle, warned these volunteers on a market day against the consequences of intimidating people, but the pickets paid no heed to this warning and threatened to punish the police officer.

"On the date of the tragedy, Feb. 4, a large number of volunteers, followed by thousands of ignorant and credulous villagers, came in a procession and made a demonstration before the police station. A howling mob of nearly 4,000 people, whose feelings had been worked up by the oratory of the volunteers, surrounded the building. The staff, which consisted of two Indian officers and 18 men, tried their best to reason with the rioters, but were pelted with brickbats picked up from the railway line.

"Nine of the policemen who were armed with muskets fired cartridges in the air to scare away the mob. When the fire ceased the volunteers shouted:

"Thanks to Ghandi, the bullets won't hurt you, and are all changing into water.'

"The howling band immediately advanced in a body and attacked the police building. The policemen, seeing no loop-hole of escape, bolted the doors from inside. The mob then set fire to the building. Some of the policemen perished in the flames and those who were driven out by the heat and smoke were assaulted with clubs and spears, besmeared with kerosene oil and thrown back into the fire, there to suffer further agony until life was extinct. Some of the armed policemen had obviously been battered to death by their own muskets.

"This ghastly affair proves what non-cooperation means to the masses of India. Indeed the tragedy had alarmed the non-cooperators themselves.

"Pandit Hirday Nath Kunzru, one of the leading publicists of the United Provinces, after making independent inquiries on the spot came to the conclusion that Congress Volunteers organized and led the unprovoked attack on the police station and were responsible for the murder of the policemen.

"Photographs of the police buildings and of the bodies of the victims portray the horrors that are likely to follow in many parts of India, if the revolutionary doctrines of the non-cooperators are allowed to run their course unchecked."

THE UNSPOILED WILDERNESS

Lovers of Nature have to search farther and farther for the unspoiled wilderness as the years go by. Every year miles and miles of the 'forest primeval' are being sacrificed to the onward march of civilization. Soon the majority of the great Northland forest playgrounds will be things of the past, and the sportsman and the wilderness lover will have to go farther afield to find unbroken haunts of their finned, eathered, and furred friends. Resting in the midst of the green wilderness of the Timagami Forest Reserve (300 miles north of Toronto) like some gigantic octopus with its innumerable legs and arms and feelers, lies Lake Timagami.

Ther you must go, if you really wish to enjoy Nature. Imagine this lake with its 1,600 islands. The fishing is excellent. Lake trout tipping the scale up to 35 pounds, small mouthed black bass, speckled trout and wall-eyed pike abound. Altitude of the district 1,000 feet above the sea level. Illustrated publication with good map, list of hotels and camps and all particulars has been issued by the Grand Trunk Railway and can be had free on applicaton to any Grand Trunk Ticket Agent, or C. ON MISSING LIST.

ACTON, Ont., April 28.—(Canadian Press.) — Daniel McKinnon, who came here from Cochrane about six weeks ago and purchased a farm, has been missing since April fifth.

ALL HOPE ABANDONED.

SAULT STE. MARIE, Ont., April 28.— (Canadian Press.)—All hope for the safety of the Lambton, the light tender, has been abandoned. The tug Gray wirelessed to Sault Ste. Marie last night that there was no sign of the vessel around Caribou and that temporary arrangements had been made to keep a light burning there.

CONSTIPATION BAD HEADACHES FAINT, DIZZY SPELLS

Constipation is one of the commonest ills of mankind and one too often allowed to go unlocked after until some serious complication sets in.

A free motion of the bowels daily should be the rule of everyone, then there will be no constipation, sick or bilious, spells, dizziness, heartburn, coated tongue, foul breath, sour stomach, floating specks before the eyes, jaundice, water brash, etc.

Keep the bowels properly regulated by the use of

MILBURN'S LAXA-LIVER PILLS

and you will enjoy the best of health.

Mrs. Frank Wilsey, R. R. 2, Belmont, Ont., writes: "I have been troubled with constipation for nearly two years. I had bad headaches, faint and dizzy spells, and would bloat terribly. I was nearly discouraged for I had tried so many things that gave me no relief. My mother got me a vial of Milburn's Laxa-Liver Pills and told me to give them a fair trial. After I had taken one vial I felt much better and continued their use. Now I have no faint and dizzy spells and am gaining nicely. I would not be without Milburn's Laxa-Liver Pills for the world."

Price 25c a vial at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

PERUVIAN GOLD NOW LYING IDLE.

Will Be Placed at Interest in London.

LIMA, PERU, April 28.—Millions of dollars in Peruvian gold, lying idle in government depositories here as a currency reserve, will be placed at interdet in New York and London under legislation adopted by the Peruvian Congress to establish a federal reserve abnk and revise the country's financial system.

The reserve bank act, patterned after similar legislation in the United States, provides for an elastic currency which can not be tampered with. Notes of the bank will be apyable in gold in Peru, and in gold drafts in New York and London. The institution 'sreservoir of credit will be available to any Peruvian bank in an emergency, thus permitting private financial institutions to extend greater commercial accommodations from their gold resources.

Dr. W. W. Cumberland, American financial representative of the Peruvian government, will be a permanent member of the new bank's board of directors.

Chapter XXIII.
I NEED MORE MONEY

Filled with a fine resolve never to let it happen, I went at my belated housework, Jack helping.

First we made the bed, then arranged the furniture and dusted the living room which is also the dining room.

And Jack, coming upon my new salad bowl, whistled and said it was fine, and I explained that it had cost $8 an he said he guessed that wouldn't break us, and he was glad I had it, and we admired it together and I explained that it would serve also for fruit, that it was really a compote.

And perhaps I chatte.. 1 with the hope that if he became greatly interested in the beauties of the salad bowl, things would be less embarrassing for me when we came to the new cups in the kitchen.

At last we reach. I them, the cups he had asked me not to buy that month on account f their high price, and the unpaid bill for furniture.

As Jack picked up the first cup from the draining basket I exclaimed:

"Now Jack Madison, be careful! Don't break that cup! It cost three dollars—with its saucer!" Thus indirectly, I broke the dreadful news!

"Gee what a price! Are there any more?"

"Only six, dearest." I chattered excitedly. "We had only odd ones, you know. And this Wedgwood is fine enough for an heirloom—I mean to hand down—to our daughters-"

It pleases Jack immensely to have me suggest our possible family.

He stopped and kissed the back of my neck as I bent over the sink. I blushed, as if I had cheapened something holy. I had spoken of our possible children—for the sake of getting his mind of from my silly extravagance! I hated myself-

And then Jack discovered the dessert plates

"Plate to match?' he asked and this time he did not smile.

"Aren't they perfecly, glorious?" I cried out. "See! now wouldn't you think them all alike But they are not! They're different! No two alike! That's why they're so expensive! Mary Smith has a dozen of them. I knew you'd want me to have things as nice as Mary's. But I bought only six!"

By getting Jack to admire the many designs. I expected to keep him from asking the price of the plates. He did not inquire, but he must have done some figuring, for he exclaimed:

"Gosh! I oght to be earning more money!"

"Wouldn't that be grand!" I agreed.

"I ought to. At my age!" Jac:. isnt often dismal. I comforted him.

"You musn't blame yourself, dear! Not even if some of the boys are earning $10,000 a year and more. Of course it would be awfully nice if we could have a car this summer.

"But some of the boys didn't go to the war. And th.t set you back awfully. Just as you had started, too. And now this business depression. But the slump won't last forever. And we'll manage to get along, until times improve!"

My comfort didn't seem to do my husband much good.

"Of course, some day," I added, "you're going to be a rich man!"

Jack gave me the queerest look. I didn't understand it. But it made me feel chilly all over. He seemed to say that he didn't care whether or not, he was ever a rich man.

And I positively shiver to think we may be poor all our days!

When in Need of a Tonic Should Start on the Road to Wellville by Following This Advice

Peterboro, Ont.—"I can speak in the highest praise of Dr. Pierce's medicines. I suffered for a long time with feminine weakness, through which I became all rundown, weak and nervous. I also had severe backaches, pains in my side and bearing pains. I learned of Dr. Pierce's medicines and began at once to take them. I took two bottles each of the 'Favorite Prescription' and the 'Golden Medical Discovery' and they completely cured me of all my weakness and restored me to good health.

"At one time my husband became afflicted with a chronic cough which caused him to become all rundown. He got so thin he was almost a skeleton. He tried many medicines but did not get any better until he took Dr. Pierce's Golden Medical Discovery. By taking this medicine he was completely restored to good health. I shall always speak a good word for Dr. Pierce's medicines."—Mrs. Martha Sholer, 373 Bethune St.

If you need a building-up tonic for stomach and blood obtain Dr. Pierce's Golden Medical Discovery from your nearest druggist or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. tablets and write for free confidential medical advice.

BOARD WILL HAVE BIG CELEBRATION.

MONTREAL, April 28. — (Canadian Press)..— This evening the Montreal Board of Trade will celebrate the centenary of its organization with a banquet at the Windsor Hotel here at which speeches will be delivered by His Excellency the Governor General, the Prime Minister, Hon. W. L. McKenzie King; E. W. Beatty, President of the Canadian Pacific Railway, and other prominent Canadians.

PAINS IN BACK AND SIDES

Relieved by Lydia E. Pinkham's Vegetable Compound

Lindsay, Ontario.—"I used to have very bad pains in my back and sides and often was not fit to do my work. I tried many medicines before I began to take yours. I saw Lydia E. Pinkham's Vegetable Compound advertised in the 'Toronto Globe' and now that it has helped me I recommend it to all of my neighbors. I keep it in the house all the time and take it once in a while no matter how well I feel, for one ounce of prevention is worth a pound of cure."—ELIZABETH CAMPBELL, 13 St. Paul St., Lindsay, Ont.

To do any kind of work—and you know there is much to be done—is next to impossible if you are suffering from some form of female trouble. It may cause your back to ache or a pain in your side; it may make you nervous and irritable. You may be able to keep up and around, but you do not feel good.

Lydia E. Pinkham's Vegetable Compound is a medicine for women. It is especially adapted to relieve the cause of these troubles, and restore them to normal health.

TORONTO BOY LOST SUIT FOR $100,000

NEW YORK, April 28.—(Special to Examiner)—Alexander P. McCauley of Toronto, has lost four years fight for $100,000 in his suit against Theodore B. Starr & Co., New York jewellers, for false arrest.

McCauley, who was suspected of being "Christmas" Keough, the famous confidence man now serving a long sentence for passing worthless postal money order during the holiday season, was arrested five years ago in St. Louis. Later he was released and brought suit for false arrest but it was dismissed.

A year later McCauley was arrested in New York and mistakenly identified by employees of five New York stores as a man who had tendered wortl less money orders in payment for "Christmas presents". He was indicted as "Christmas" Keough, but later the indictment was quashed.

McCauley brough suit against Theodore B. Starr & Co. for $100,000. He won judgment. The case went to the Appellate division, which reversed the decision. McCauley took it to the Court of Appeals, which yesterday confirmed the decision of the Appellate division, four years after the first suit was entered.

WOOL MARKETING CO-OPERATIVE PLAN IN DURHAM COUNTY

Co-operative marketing of their products seems to be the one big factor in solving today the marketing problem of the Ontario farmer, and there is perhaps no other line in which more advancement is to be noted than in the handling of wool. Last year 3,600 Ontario sheepmen consigned over 700,000 pounds under the co-operative plan, the collection work being carried out under the direction of the Ontario Sheep Breeders' Association, and the sale of the graded wool being effected through the agency of the Canadian Co-operative Wool Growers, Limited, a co-operative organization belonging distinctively to the wool growers of Canada.

In order to reduce costs, render settlement more promptly and give better general satisfaction, it has been decided this year to amalgamate all the details under one head, namely, the Canadian Co-operative Wool Growers, and with the idea of estimating possibilities for the season, W. H. J. Tisdale, assistant manager of the organization, was in Durham last week consulting and planning with F. C. Paterson, the Agricultural Representative. The Department of Agriculture, through its county office, is lending very valuable assistance in this work; first of all, in the matter of supplying wool sacks and paper fleece twine to all farmers. These, together with shipping tags, are now available at the Port Hope office. Mr. Paterson, in order to reduce transportation costs, is also arranging for carload shipments at county points as follows: Port Hope, May 29; Bowmanville, May 30; Cavan, May 31; Pontypool, June 1; Burketon Junction, June 2.

Farmers are well advised to keep these dates in mind as the freight is just about half where the wool is shipped in carloads.

As to the wool market, it has shown more strength since January 1, prices being up 15 to 20 per cent., as compared with the general average of 1921. Co-operatively graded, wools are at present selling to the mills at from 12 to 25 cents per lb., dependent upon grade, and although it is impossible for any co-operative concern to guarantee any set prices, owing to changing markets, the fact remains that a product sold in this manner realizes for the shipper full market value less actual costs of operation. For 1922 such costs will be materially reduced, as compared with 1921, it being estimated by the Canadian Co-operative that 2 1-2 to 3 cents per lb. will cover all details such as grading, repacking, storage, insurance, selling, settlement, use of sacks and twin and freight. Hence, it can be easily seen that on a slightly stronger market farmers are well advised this year to very seriously consider the co-operative means of disposal.

RICE LAKE LEADERSHIP TUXIS TRAINING CAMP

An event of considerable interest to older boys and leaders of boys' activities, is planned for the coming summer when a Tuxis training camp will be held on the shores of Rice Lake from July 10 to 17. The Rotary Club of Cobourg has chosen a fine site and is offering the camp for the above purpose, as well as for the use of similar organizations throughout the summer. The camp will provide a great opportunity for the men and boys of a considerable district to get together for a week of camp life, sport and work-outs on the Tuxis program; the underlying idea being, of course, to prepare those attending for live and successful leadership among boys in their respective communities. C. E. Plewman, the well-known boys' leader, is to be camp director.

The district covers the territory from Belleville and Picton on the east, to Whitby and Oshawa on the west, and extends north to Campbellford and Peterborough—Rice Lake being quite easy of access and very central for the whole area. Very successful and enthusiastic camps have been held in other districts in recent years, and great satisfaction is being expressed on the formation of the Rice Lake camp. A committee, representative of the district, is in charge of details, and expects to have some interesting announcement to make in the near future.

The jewel vault in Buckingham palace contains more than 6,000 gold ornaments, weighing considerably more than a ton in all.

THE JUDGMENT IN ACTION OVER PETERBORO SCHOOL

TORONTO, April 28.—(Canadian Press)—Leagl warfare followed the erection of $167,000 Peace Memorial School for the Peterborough Board of Education. Henry Hope and Sons of Canada, Limited, Toronto were engaged as sub-contractors for the steed sash and ornamental iron work and sued the general contractors, Richard Sheehy & Sons, Peterborough, for the balance of $3,0004.13, alleged due on the 10.549 sub-contract. Sheehy & Sons retorted with a $5.000 claim for damages for delay. Justice Orde has given judgment declaring that Hope action was premature but he allows their claim of $3,004.13 to be credited against defendants judgment for $3,100 damages and costs. As a result the Toronto firm pays defendants $95.87 plus costs of action and counter claim.

STEWART STREET BOY BITTEN BY VICIOUS DOG

James Gates Unearths His Third Case of Dog Bite.

James Gates, who will likely be installed as official dog catcher in the near future, had reported to him yesterday afternoon an attack by a vicious dog upon Vicor Raper, a young boy living at 575 Stewart street. The dog, which Mr. Jas. Gates said he had information was owned by M. Wainwright, 268 London street, is alleged to have attacked the boy on his own property. He was bitten upon the hand and medical treatment was necessary. Mr. Gates said he understood the matter, which is the third case of dog biting that has come to his attention this year, is being reported to the police.

SPRING FARM WORK IN NORTH MONAGHAN

Farmers Got Away to a Good Start This Week.

Farmers in North Monaghan have got away to a good start with their spring work, a resident of that township said yesterday. Ploughing is general and considerable spring wheat seeding has been continuing since Monday. The work is being carried on under the handicap of heavy ground, but the farmers hope for dry weather to relieve the water-soaked land to some extent.

A large number of farmers are optimistic over the way the season has started out but none seem to be able to define exactly what disaster the rain has caused beyond holding up the spring work two weeks. Another group look upon the rain as the best thing in the world, pointing out that the ground must be well stored with water to carry the crop through the dry weather that is sure to prevail later on. The fall wheat is passing thro gh the critical period, but so far throughout the district it is above the average, and the clover is looking remarkably well, farmers report.

The largest freight engine weighs 450 tons and has actually drawn a load of 17,000 tons in a slight upgrade.

BETTER GARDEN TIPS

BY LUTHER BURBANK

THE BACK YARD AT LU THER BURBANK'S HOME.

FLOWER GARDEN.

Sweet peas and zinnias are likely to give the best results to the beginner in his flower garden.

BURBANK.

Zinnias blossom all summer long and the newer varieties offer a wide range of beautiful colors, as well as contrasting beauty of form. For 15 cents invested in seeds can be obtained as generous floral results as would come from $25 spent on dahlia roots.

Zinnias form a very inexpensive and almost certain garden product. A giant variety can now be raised, measuring from 4 to 6 inches across each blossom and insuring a gorgeous, long lasting flower bed.

Sweet peas will grow almost anywhere. They thrive even in the shade. But they should be planted early, although frequently they thrive even after late planting. Also they grow rapidly and blossom over a long period, especially if the flowers are quickly gathered and the plants not allowed to go to seed.

Marigolds and poppies can next be placed upon the beginners list.

Marigolds are a hardy annual and can be depended upon almost anywhere.

Poppy seeds should be sown early and have an early yield. One cannot be too careful in thinly distributing the seed. Most everyone sprinkles popy seed ten times too liberally, and congestion generally results.

Poppies should be grown a foot apart to get the best color and quantity. Any number of fine poppy varieties can now be secured and a mosth interesting flower bed group arranged if care is given to selection.

But MOST IMPORTANT is the early sowing, for poppies thrive even when the seed is sown on the snow or in frozen ground.

SOVIET GOVERNMENT IN A DANGEROUS MOOD.

MOSCOW, April 28.—(Canadian Press)—The Soviet Government has sent a wireless message to foreign minister Tchicterin in Geona embodying a resolution of approval of the Russian delegates' policy at the Economic Conference and giving instructions that no concessions be granted the Allies which would interfere with the rights or of political freedom of Russia workers.

MR. AND MRS. FROST MARRIED 50 YEARS.

Celebrate Their Golden Wedding At Coldsprings.

On the evening of Tuesday, April 18th, the teachers and members of the Adult Bible Class of Coldsprings Sunday School gathered at the home of Mr. and Mrs. George Frost, who are members of the class, to celebrate their golden wedding. The evening was spent in music and short addresses. A very pleasant feature of the occasion was the wearing by Mr. Frost of the coat he was married in. A dainty lunch was served.

Mrs. Spiers presented Mr. Frost with gold cuff-links and Mr. Kitney presented Mrs. Frost with a very beautiful plant and jardinier, while Mrs. J. Bennett read the following address:

An Eulogistic Address.

"Mr. and Mrs. Frost,—

"The members of the Adult Bible Class and teachers of Coldsprings Sunday School have gathered here tonight to offer our congratulations and best wishes on this, your golden wedding anniversary.

"You have lived the entire fifty years in our neighborhood, and have proved yourselves worthy of our esteem and respect. You have been members of our Sunday School ever since its organization, thirty-four years ago, and your never failing interest has been a source of inspiration and help in our work.

"We ask you to accept this gift as a souvenir of the day, and pray that God may abundantly bless and help you.

"Signed—Teachers and Adult Bible Class."

Mr. Frost made a suitable reply.

Mr. and Mrs. Frost were also the recipients of a beautiful Brunswick grafonola from their family.

After the singing of "Blest Be the Tie That Binds," a very enjoyable time was brought to a close by all joining hands and singing "Auld Lang Syne" and "God Save the King."

Family All Living.

The following are the children of Mr. and Mrs. Frost, all of whom are living: Mrs. E. MacGregor, Battleford, Sask.; Mrs. J. Dixon, Morse, Sask.; Mrs. A. Holden, Peterborough; Charles, Peterborough; George, Toronto; Albert, Seattle, U.S.A.; Ralph, Cumberland, B. C.; Elmer, Young's Point. There are also fourteen grandchildren.

The photo of this happy couple appeared in Thursday's paper.

Wild Things Are Healthy

Dr. McCarrison, Oxford University, who lived for 9 years among wild tribes in India, says he never saw a case of stomach or bowel illness amongst these people, because they live upon natural foods, whole grains, milk, green vegetables and fruits.

Refinement takes from flour and most modern cereals, the vitamines and alkaline salts, nature's protectors against disease. Roman Meal, on the contrary, made of three whole grains, is rich in alkalis and vitamines.

Being 25 per cent. flaxose, which is three times more alkaline than any other grain, it corrects deficiencies in modern diet. It also improves the blood, being several times richer in protein and minerals than beef, while the branny roughage keeps the bowels swept clean, preventing blood contamination.

Roman Meal is delicious for porridge, muffins, pancakes, etc. 28

You Can Save on Food

without starving the body or lowering the vitality. The most expensive foods are generally the least nutritious— most of them have no real food value and they tax the digestive organs.

Shredded Wheat

is all food, the most real food for the least money. It is 100 per cent. whole wheat and is prepared in a digestible form. Contains more real nutriment than eggs or potatoes and costs much less. Contains all the lime salts for making sound teeth and all the elements for making rich blood and healthy tissue.

Shredded Wheat Biscuit is delicious with hot or cold milk, sliced bananas, prunes or canned fruits. Triscuit is the Shredded Wheat wafer and is eaten with butter, cheese or marmalade.

The Light of Other Days

BY F. H. DOBBIN

When we speak of other days we generally refer to some time back, depending on the years of the speaker. Other days, to the young man or young woman, just matriculated, of the habit had been framed of going to school, will antedate the conversation by about ten years. To the real old stager, the son or daughter of the pioneer, other days refer to the days of dad and mother. To the years of privation and intense physical effort, blended in with the love and fellowship that bound the pair together, when hope was a beacon of the future and cheered the trials of the struggle, season after season. Cherished in all rural households are the stories of experiences as father and mother found them. And a very real thing was the providing of light for the household.

The Pine Knot

The primitive light-giving material was the bank of burning logs heaved on the burning coals in the old open fireplace. Then the ever-present pine knot. Full of resin and inflammable substance but smoky to extreme. The light, par excellence, of the by-night fisherman. Next the tallow candle, then whale oil, afterwards kerosene, or by other name, coal oil. Now to the bright, clean and not costly electric light. In the neighbourhood in which these lines are written the period of years from the pine knot to the electric light covered about seventy-five.

To those of somewhat advanced years the light of their childhood was the tallow candle. That is said to be tallow. It is one of the mysteries of animal composition that it can afford both tallow and suet at the same time. For tallow is essntially a beef product, a sort of side line to the edible parts of the animal. Tallow will give a candle that is firm and hard, burning with a bright light, and not exactly smoky. But its practical value as a means of illumination is seen when sixteen of the candles are taken as the basis of value and equivalent to one electric bulb.

Candle Making

Candle making in the olden days was more than a chore, a sort of rite. It could be done in a somewhat neat way or be a source of intense discomfort and a real mess maker. Depends on how it was gone about. Often it was a case of let George do it. The women of the family put the chore off as long as possible, descrying the smell, a messed-up stove and disorder generally. Except in winter weather, the manufacture was consigned to some convenient spot in the yard, with the ourside cook-shed as an accessory befor the fact. Often as not the cook house held the materials, collected at divers times and from devious sources.

Let us see how one boy describes his share in the making of candles and his conviction that the whole process was an imposition on any boy who distinctly wanted to go and play and join in the boyish sports with his fellows.

The first intimation that candle-making was impending was an order to go out and collect a lot of candle moulds. No one family owned and enjoyed moulds enough to make at one sitting, or rather melting, a batch of candles. So it was a phase of community welfare that candle moulds were interchangable, to be borrowed and returned. This candle mould was an efficient contrivance and met the need nicely.

Tubes made of tin and set in a sort of frame, in groups of four, six and up to even twelve, arranged in pairs. The lower end was a sort of cone, pointed and a hole in the point. The upper ends of the tubes, when stood upright, were surrounded by a sort of shallow dish to catch any overflow from the melted tallow or if carelessly poured. The pointed ends firmly soldered into a shallow stand, perhaps an inch or so deep, the pointed cones projecting.

The Boy Diplomat

The boy was both a messenger and a diplomat. He was instructed to get results, that is moulds. To be extremely affable and respectful, for tribal jealousies often prevailed. Kept home from school—and that fact was the only thing that reconciled the boy to active participation in the enetrprise—he got his small cart or waggon, and made the rounds to families known to possess moulds of approved efficiency and capacity. Moulds that had been tried and which would "draw" properly. And his instructions were to say that Mrs. Andycart sent her compliments and would Mrs. Gimmewise lend her the loan of her candle mould. Seldom was the appeal in vain. For housewives who declined to lend might find themselves in extremity on some future emergency. Bringing in the sheaves—no moulds—took one whole, solid afternoon.

Out in the yard was a large cast-iron pot, about two feet in diameter. This pot was set up on three stones, never more than three. Raised from the ground so that wood could be poked in much profusion under the pot to keep the fire going. The firing up the boy enjoyed, for there was a sort of Robinson Crusoe flavor to the duty that was shared in by other boys who came to look over the fence and to stay and hinder. Into the pot was dumped all sorts of fats. The tallow candle was largely a misnomer, except in the case of a special brand kept for use when company was in the house. Some tallow, all kinds of fats, skimmings from pots, pieces of meats, bones with shreds attached, anything that would burn and stand alone. Once a good breezy fire had been started and gotten in its work the contents of the pot looked like Hades, and smelled like perdition. As the concotion bubbled and boiled all sorts of things rose to the surface. The boy set to work on an active skimming of the seething mass, snaking out bones, pieces of paper, skewers and all sorts of debris. Certain families held the patent rights—so to speak—on certain decoctions, that added to the liquid fat would clarify it and make the candles hard. Such information was carefully guarded, and whatever the potion was, it was stirred in with much confident ceremony.

In the meantime the moulds were threaded with the ever needful cotton candle-wick. This came in balls and formed the other essential of the candle. Lengths of the wick were cut off, doubled, twisted and poked down the tubes of the mould, to protrude at the pointed end. When all wicks were so placed a stick was run through the loops and the wicks drawn up and knotted over another rod or stick on top of the edge of the mould, the wicks being carefully centered. Then the contents of the pot, having been skimmed under professional supervision, was poured down the moulds filling the tubes to overflowing. The moulds were then set aside to cool.

A Horrid Interval

To the boy, this cooling time was a horrid interval. If the day was one in late November, the chilling process went on apace. But if on a warm day in August, there was intense gloom. But we must not suppose that all the inventive genius in the country is exclusively the property of men, only. Boys are ingenious. At any rate, this was one. So in defiance of maternal caution he would furtively douse the moulds with cold water from the well. This refrigeration, if at times effective, was bad for the candles, making them "short," and liable to break down at inconvenient times. Often the scrap fats were too watery, particularly if skimmed from soup pots. And the candle developed a constitutional weakness.

The approved length was about ten inches. Dickens tells of a festive occasion at which there was a general illumination of "short sixes." But making short candles took just as much attention as the longer candles, but burned only half the time. Besides a long candle cut could be into shorts, and so in use give double the light for half the period of burning.

And the Snuffers

An indespensable adjunct of the candle was the snuffers. Hardened sinners—those with finger and thumb calloused—just pinched off the burned wick and wiped off the debris on the leg of the trousers. But such attention, while needed, was less than polite. So the snuffers were ever in use. Possibly examples of the snuffer will survive preserved as curiosities. A sort of scissors, with a small metal box on one limb and a flat piece of metal on the other, that when the contrivance was brought together by pressure of the fingers, chipped off the top of the wick and thrust the buried part into the box.

For this always intervened. The cotton wick, if not removed, turned over on the candle and melted the side, and if not entirely extinguished, kicked up an awful smell. It could be heard all over the house. Wrath and objurgation followed. Children were not allowed to snuff. They were too inexperienced and irresolute. It required a dexterous and experienced hand, otherwise, as often came about, the cutting was done too low on the burning wick and darkness ensued. And immediately everybody would enquire, with large solicitude, "Where was Moses when the candle went out?" A sort of dish surrounded the base of the candlestick and in this dish the snuffers reposed. The whole apparatus had to be cleaned daily, a disagreeable duty. The parafine candle, of which some examples were on the market, were not in general use, only on state occasions.

Whale Oil

Along about the 'forties, whale oil came into use. Seeking and immolating whales, frying out and bringing in the oil from whales was a tremendous industry. Thousands of shops and crews, sent out by companies were engaged in the chase and capture. The resultant oil seemed to be the greasiest thing on earth. Foul smelling, and inexpressibly dirt making. The convenient glass lamp had not been invented. Metal-made lamps leaked. The wicks were circular in form, much as now used in the convenient coal-oil heaters, but were moved up and down with a sort of rotary movement, the whole body of the lamp turning. Too much wick made a smoky flame. Lamp glasses were exceedingly dear. To break one was to endanger the peace of the family. To smash a couple meant insolvency. Much of the oil was burned, in the very back settlements, by pouring some into a dish, inserting a piece of cotton rag and allowing the end of the rag to hang over the dish, drawing up the oil by capillary attraction. The smoke went where it listed. An old man, who had been caretaker of the local church in the early days told that the care of twenty whale oil lamps and keeping them burning was what tried his Christian principles to the breaking point. And he once admitted, in a burst of confidence, that if he had been privileged to swear it might have often relieved the situation.

Advent of Coal Oil

Coal-oil came along in the later 'fifties. It was received with much distrust and suspicion, for many accidents and burnings, and explosions resulted. The oil as first presented lacked the niceties of refining as we now have it. All the elements of benzine, gasoline, naphtha and the explosive vapors were left in the oil. All that the refining did, was to eliminate the earthly particles and get rid of the coloring matter. But once established it soon found public favor. With it came the glass lamp, the flint glass chimney and the simple movement for lowering or raising the flat wick. But for years the coal oil can was never allowed within the house. Not even in the shed. It was ensconsed out in a corner of the yard, covered with a board, and lamps filled in daylight, almost be stealth. Then the coal-oil lamp began to be glorified. To be offered in all fantastic and elaborate forms and to be a conspicuous feature of parlor decoration, strung around with pendants of cut glass, draperies, shades and other fixings. A very elaborate lamp was taken as evidence of opulence, and the tax assessor at once raised the assessment on the ground of evidences of apparent wealth.

In the meantime, and before, gas was in use in such places as had municipal pretensions and could support the works and distributing systems. And in the early 'eighties the first of the now blessed electric light made its appearance First, as a public service and afterward introduced into stores, churches and places of amusement. The cleanest, safest, most convenient and serviceable illuminant that man has as yet devised.

DON'T DRIVE OVER FIRE-HOSE

The Chief of the Toronto Fire Department has written Mr. W. G. Robertson, secretary-treasurer of the Ontario Motor League requesting him to use his good offices to bring to the attention of motorists, the fact that running cars over fire hose very soon destroys them and at times has resulted in severing hoses, thus occasioning very costly delays in fire fighting. Recently four motorists paid fines in London, Ontario, for running over fire hose. It is unthinkable that any but the driver of the road hog genus would deliberately jeopardize the life and property by driving a car or truck over fire hose.

Divorce is increasing rapidly in England, especially among the poor.

MOTORING CLUBS GAIN IN POPULARITY IN ENGLAND

Country clubs for motorists are being organized in England. The first one was recently opened, being the Old Ham Manor House, on the Bath road at Newbury, 55 miles from London. An old Tudor house near Tewkesbury, with five acres of gardens and tennis courts, is being prepared for the second club house.

The plan is to have at intervals of about 50 miles on the principal highways club houses for motorists which will give a superior kind of hotel accommodation, together with everything the motorists needs in the way of garaging.

The length of the ordinary paper making machine is 200 feet.

FAMED EASTERN CITY IS INVADED BY MOTOR TRUCKS

Bagdad, famed city of Arabian Nights and terminus of the ex-Kaiser's dreamed Berlin-Bagdad railway, to-day finds the motor-car almost as indispensalbe as her desart caravans. Wondrous carpets, rugs, dates and oriental spices, and perfumes, according to Millar, export officials, are now being carried by motor trucks.

Turks and Persians and Arabians give the cars the right-of-way through the narrow streets flanked with gay bazaars In the cool of the evening they speed along the banks of the Tigris and by the great mosques from whose towering minaters the muezzin cries the call to prayer.

MISS LAURA CRAWDERY (UPPER LEFT), MISS GRACE CLEED (UPPER RIGHT), MISS AILENE HOEFER (LOWER LEFT) AND MISS IRIS ARNOLD (LOWER RIGHT) IN GOWNS THAT ARE CONSIDERED OK. THE GIRL IN THE CENTRE, WITH THE HIGH HEELS, POWDER PUFF AND FLIRTY WINK, POSED ON CONDITION HER NAME WOULDN'T BE USED.

LAWRENCE, Kan., April 28.—Winkers and wearers of high heels! The ban has been put on them for all time, as far as the Women's Student Government Association of Kansas University is concerned.

A fashion show was held recently and live models posed in all sorts of gowns. Then the girls passed on them.

And now—
Can a co-ed wear high heels?
No, siree!
Can she wink?
Not a chance!
Can she wear an evening gown without a back?
Mercy, no!
Can she powder her nose in public?
Very poor taste!

The girls voted strongly in favor of knickers in place of flashy evening gowns. And they approved skirts that came to about the centre of the calf.

As to the fit of garments—they must be loose. Skin-tight effects are absolutely taboo.

MADE IN CANADA from BRITISH and CANADIAN WOOLENS

in 1920, against $386 for ten months in 1919.

Since I have destroyed my itemized account for 1919, I am unable to tell exactly wherein the difference lies between $14.50 per month for last year, and $38.60 for 1919. For one thing we travelled a good deal more with Bird o' Freedom than we did with Galloping Dick, and travelling always mounts up in garage bills and incidentals. Bird o' Freedom also spent $35 steamer fare from St. Johns, N.B., to Digby, N.S., and from Yarmouth to Boston. Then Bird o' Freedom was in its fourth year, and needed tires and paint and repairs, which brand-new Galloping Dick did not require, and more was spent on my old vice of "extra equipment." And finally I have become one year wiser in the ways of humoring a motor car.

What It Should Cost For Up-keep of An Automobile

Prospective Purchasers Deterred by Unwarranted Fear of Maintenance Expense.

ONE EXPERIENCE.

To many who can really afford to buy a motor car, fear of subsequent upkeep running into a figure beyond their means is a deterence. The truth of the matter is that this expense is too often inflated away beyond normalcy, for want of ordinary care and the exercise of common "horse" sense. The cost of running a car depends more in the man than on the car itself, and while some careless extravagant owners entail a yearly upkeep expenditure of in the neighborhood of a $1000, others again manage to more than cut that figure in two; providing, of course, they care for the car themselves and keep it in their own barn.

But the foregoing figures are merely snap consumers to the insistent question: "What does it cost to keep a car," and for the benefit of prospective purchaser's attention is here drawn to the experience of Kenneth Brown, who in April's number of "Motor" details how he kept his cost upkeep down to $386. He writes in part:

For the last two years I have kept a careful account of every penny spent by an average man, without mechanical experience or talent, upon two different makes of cheap cars. With us, the car takes the place both of horse-and-buggy and of railroad trains. Any men or woman can duplicate my figures; and any person with a permanent home can considerably improve on them, although it is likely that a person totally inexperienced with cars, for the first year or two, would make some mistakes that I have learned to avoid.

In 1919 the entire running expense of our car, from January 1st to November was $386. This did not include insurance, licence, or depreciation; but it did include six new tires, (due to my own foolishness), and it did include all repairs and extras—and I was then a demon for "extra equipment." When I gave the insurance agent the amount of "extra equipment" I wished to include in my policy, he regarded me much as the man did when he said: "Keep the plug, and give me back the chew."

This $386 also included all charges for garages, tolls and ferries from Virginia to Bar Harbor, back to Bethlehem, N.H., thence to Boston, to St. John, New Brunswick, by boat to Digby, Nova Scotia, and in the fall back from Yarmouth to Boston. And my speedometer registered over six thousand miles. Unfortunately I destroyed the itemized account for 1919, so I am unable to tell how this $386 was divided between gasoline, tires, repairs and so forth.

But for this $386 what did we not receive? We owned a magic Carpet that transported us whithersoever we wished to go. My finger moved a twig, and the Magic Carpet sped forward like the wind, or drifted slowly as a zephyr. Being an improved Magic Carpet, it had comfortable seats. Sitting cross-legged on an old-style Magic Carpet would be awkward for ladies, with the modern style of dress. It had a top to protect us from sun and rain, unlike the old-fashioned Magic Carpets which must have been most uncomfortable during a drenching rain.

This last year we drove much over roads, the excellence of which was in inverse ratio to the beauty of the scenery; and in Maine and New Hampshire our new young car christened itself "Galloping Dick," and no one was disputed the suitability of the name.

With the first cars we owned, I was chiefly interested in seeing how many miles to the gallon I could get out of the motor. For this purpose no device appealed to me in vain, and though I say it as shouldn't, I think an average of 23 miles, for a full season's motoring not bad. Finally, however, it dawned upon me that what I might save at the spiggot of gasoline consumption could easily be wasted at the bung-hole of extra equipment; and this last year I have been less interested in how-many-miles-a-gallon than in how-many-dollars-a-month. Also I turned a deaf ear to "extra equipment."

We drove from May 1st to December 31st, a trifle over 4,000 miles, and the account stands thus:

TOTAL RUNNING EXPENSES OF "GALLOPING DICK"	
Gasoline, oil and grease	$93.68
Garages, tolls, ferries, tips, distilled water, washing cleaningcarbon	36.57
Repairs	13.13
Tools, extra equipment	13.23
Punctures, 1 blow-out, 1 inner tube	9.40
Insurance, and telegram to insurance agent	48.57
Licenses in Massachusetts and Maine, and postage on plates	40.08
	$232.66

Omiting the licenses and insurance (which were not included in the 1919 account) leaves $164.01 for eight months

Static, Bugaboo of Radio— Duncan Tells What It Is

(By R. L. DUNCAN, Director, Radio Institute of America.)

What is this "static," bugaboo of all radio enthusiasts, about which we hear so much grumbling?

After a respite during the winter, it is again beginning to break in and interfere with wireless transmission and reception. Despite the efforts of all experts, nothing much has been done to curb this interference.

It is hard to buck Nature, and statics, or atmospherics, is the name given to electric waves sent out by Nature.

Water in Air.

During the warm spring and summer months, water evaporates very quickly. The warm air covering the earth's surface becomes laden with water vapor.

Because this warm air is light, it rises to the cooler regions above. There, owing to the change in temperature, it is condensed and formed into small particles of water.

Since there is always some electrification of the air, these small drops of water are charged with electricity. Drawn together by the billions, they form into clouds. When these become heavier than air, they burst and descend upon the earth as rain.

Lightning.

Each of these particles constituting the cloud retains its electrical charge. There may be several combinations of these in the air. When their electrical pressure becomes too great, current jumps from one cloud to another in the form of lightning.

This lightning flashes back and forth until it dissipates itself.

As these flashes from cloud to cloud, or from cloud to earth, take place, they radiate an electrical wave quite similar to that radiated by a wireless transmitting set. They are not particular about the wave length they use. It is therefore almost impossible to tune them out.

MOTOR AND FUEL.

Importance of keeping the engine in good shape to get the most out of it is evidenced by a diagram of power losses in the average car.

The diagram, prepared by automotive engineers, shows the dispersion of energy from fuel as it passes through the engine of the average touring car travelling at speed of 40 miles an hour on direct drive.

Through radiation, friction, and various forms of resistance, the power dwindles down to a little above 5 per cent for the actual movement of the car.

Radiation

With a perfect motor, engineers have found that more than 35 per cent. of the fuel's heat energy is lost at the start by water cooling. Direct radiation by exhaust gas takes another 35 per cent.

Resistance through exhaust pipes, muffler and by engine friction bring the remaining power to about 20.8 per cent. of the original thermal capacity of the fuel.

That is all the power the engine transmits to the rest of the car. It represents the amount of energy remaining for useful work.

Of this 20.8 per cent, however, more than 8 per cent. is lost in friction from transmission and through the tires. Air resistance takes another 7 per cent., which leaves only 5.4 per cent. as all the excess power that can be obtained.

Dependent on Cat

Each design of engine and car has a different energy diagram, but there is not much difference in the percentages of power losses.

The highest efficiency obtained in the best types of stationary internal combustion engines is about 35 per cent. That is the Diesel type. Modern high speed automobile racing and airplane engines approach within a few points of this value.

SHE COULD SING FOR JOY STATES QUEBEC WOMAN

Troubles of Six Years' Standing Overcome, Mrs. Jos. Berube Pours Out Her Gratitude to Tanlac. Health Now Perfect.

"I could just sing for joy for what Tanlac has done for me, for I feel stronger, healthier, happier, and younger now," said Mrs. Joseph Berube 57 'Montcalm street., Quebec, Que..

"Gastritis had pulled me down until I was hardly more than a shadow of my former self and I just can't describe the distress I used to feel at times after eating. Nobody knows what I suffered during the past six years and I just can't describe what a blessing Tanlac has been to me.

"I am like a different person in every way, I have a splendid appetite now and never have a trace of indigestion. I sleep all night long without waking once and get up in the morning feeling refreshed and happy. Tanlac certainly is a grand medicine."

Tanlac is sold in Peterboro by the Warne Drug Co., Ltd and by leading druggists everywhere.

THE MARKETS

NEW YORK, April 28.—(Canadian Press.)—Covering contributed to the many substantial gains made at the opening of to-day's stock market. The rally extended to almost every group, including Investment Rails, high class Equipments, Motors and the Independent Steels. Union Pacific, General Electric, Studebaker, Midvale, Alcohol, Associated Dry Goods and May Dept. Stores gained one to two points. Secondary Rails were irregular, a one point advance in New Orleans and Mexico being offset by selling of Rock Island and some of the other secondary western issues. Bethlehem Steel hardened on maintenance of the regular common dividend, and U. S. Steel threw off some of yesterday's heaviness.

Dealings in first hour barely aggregated 300,000 shares and trading in bonds was correspondingly moderate. Oils assumed a commanding position during the morning. Most of the domestic issues as well as Mexican Petroleum, Pan-American Petroleum and General Asphalt gaining one to three points. Independent Steels scored further advances and Motors and related subsidiaries rose one to three points. New York, Chicago and St. Louis rose 2 1-2 points and moderate strength was shown by St. Paul Pfd., Missouri, Kansas and Texas Common and Pfd. Call money opened and renewed into next week at 3 1-2 p.c.

Absorption of low priced railroads and renewed buying of popular industrials caused another sharp upturn in afternoon despite firmer money tendencies. New Haven, Pere Marquette Iowa Central, St. Louis and San Francisco, Chicago and Eastern Illinois preferred, New York Central, Norfolk and Western, Mexican Petroleum and U. S. Steel registered gains of on to two points.

STERLING EXCHANGE.

NEW YORK, April 28.— (Canadian Press.) — Sterling Exchange easy, Demand rates Great Britain 4.42 1-8. Canadian Dollar 1 9/16 p.c. discount.

CHICAGO GRAIN.

CHICAGO, April 28.—(Canadian Press.—Initial wheat prices which varied from 1-8 to 1c. lower, with May 1.40 1-2 to 1.40 3-4 and July 1.25 1-2 to 1.25 7-8, was followed by something of a rally, but then by fresh declines. Corn and Oats at first sagged with Wheat, but later rallied. After opening 1-8 to 3-8 lower, July 63 3-8 to 64 1-2, the Corn ramekt scored slight general gains. Oats started unchanged to 1-4 off, July 40 1-8 to 40 1-4 and then steadied at about the same as yesterday's finish.

MONTREAL STOCK MARKET.

MONTREAL, April 28.—(Canadian Press.)—A much more optimistic tone prevailed on the local stock exchange during the first half hour this morning, and many substantial advances were recorded. The paper issues, particularly, were strong, the largest advances being made by Price Bros., which sold at 44 1-4 after closing at 41 and Spanish River which also sold 2 1-2 points up at 80. Abitibi was up a point at 52 and Laurentide three-quarters at 84 3-4. Atlantic Sugar, in spite of its depressing annual statement, sold steadily at 19 after closing at 18 1-4. Brazilian was stronger by a quarter at 43 1-2.

TORONTO STOCK MARKET.

TORONTO, April 28.—(Canadian Press.)— Fresh demand for stocks put in an appearance on local stock market this morning. Brazilian sold up to 44 1-8, a gain of 5-8. Abitibi advanced to 52, a gain of 1 1-2 points. Canada Bread advanced a point to 31 1-2. Steamships Pfd. was one higher at 50. Mackay gained 1-4 at 93 1-4 and Toronto Rails 1 point at 64 1-4. C.P.R. was weak with sales at 141 as compared with 142 yesterday. Royal Bank sold off a point at 197 1-2. Government Bonds quiet. In unlisteds, Brompton, at 28 1-8 showed a net gain of 1 3-8, and Imperial Oil a two point advance to 110.

THE HOME CIRCLE

TWILIGHT

SARA TEASDALE

Aloof as aged kings,
Wearing like them the purple,
The mountains ring the mesa
Crowned with a dusky light;
Many a time I watched
That coming on of darkness
Till stars burned throught the her
Intolerably bright.

It was not long I lived there,
But I became a woman
Under those vehement stars,
For it was there I heard
For the first time my spirit
Forging an iron rule for me,
As though with slow cold hammers
Beating out word for word.

"Take love when love is given,
But never think to find it
A sure escape from sorrow
Or a complete repose:
Only yourself can lead you
Up the hard road to heaven
That ends where no one knows."

Most of the older citizens are pretty well acquainted with the boy who made such a wonderful start in life and by the time he was eighteen everyone was predicting a wonderful things for him. But something seemed to happen, or rather nothing happened. He slowed down considerably. He tried for one or two worth while things and failed. Everyone said, "Oh, well, that's just a bit of hard luck, he'll get there the next time." But he didn't and finally he stopped trying and settled down to some more or less mediocre position.

Then there was the silent young man who had so little to say, whom everyone considered quite dull and about whom they used to say, "Poor John! He's so stupid. His mother will have him on her hands as long as she lives." But for some unknown reason he seemed to get a good position, and, much to every one's surprise, he kept it. He kept climbing until he had acquired the presidency of the X.Y.Z., on the A.B.C.R.R. or something else, commanding a salary of about seventy-five thousand a year.

Now just exactly what happened in the case of these two boys to make their careers terminate so differently and so far from the way people expected. Probably the older people living in the town had more to do with it than they suspected. In the case of the first boy, they did not allow him time to test his own powers but made him believe he was made for great things. He soon had so much confidence in himself that he decided he could live on his reputation and he quit trying. Some people can and do that but not until their reputation is fairly well established.

In the case of the second boy he was either conscious of his own powers and determined to show the world that he had them to in his careful plodding way he stumbled on his ability and began steadily climbing.

It is a pretty good idea when youngsters start out, not to predict their future, for they are always more or less certain to be influenced by your predictions, and you may be doing a lot of harm.

The International Exploits Of Christopher Poe.

A SERIES OF 10 THRILLING DETECTIVE STORIES By ROBERT CARLTON BROWN.

A Baffling Blow.

THE 12:32 train drew in at the little village of Oregon not over half an hour late.

"Pretty near on time," remarked the little station agent, surveying the long dusty platform, and holding his mouth open in surprise as he saw a short, fashionably dressed gentleman alight from the parlor car followed by a porter with two grips.

The train moved on and the stranger stood looking about him with quizzical violet eyes; suddenly he picked up his grips and started toward the station agent, who still stood in wonder before his small office.

"I wonder if you could tell me where I could find a good, comfortable place to spend a couple of weeks? asked the well-dressed newcomer, dropping his grips and looking up at the station agent. "I don't want a regular boarding house. I don't want a place where I can go fishing, I don't want to do any hunting. I just want to rest."

"I guess Oregon is the place for you. That is all there is to do here," remarked the agent. "There is lots of people in town who would like to make a little extra money and I guess you can get pretty good feed most anywhere."

"It's been my experience," said the stranger with a soft eastern intonation, "that farmers sell their good butter and their cream and their best eggs in the city and live off what's left. But I don't care much for the food as I do for an absolute change. I don't want any place near the village. I had rather go out three or four miles, on a little road where there aren't any automobiles passing all day.

"I guess the Shepard's would be about the right place for you," offered the genial agent. "Just wait a minute and I will call 'em up and see if they will take you in."

"That would be very good of you; my name is Poe, Christopher Poe," the easterner held out his hand and the agent clasped it, giving his name as Henry Stone.

"Much obliged to meet you," continued the agent with a conscious grin turning into the office door to cover his evident embarrassment. "Wait just a minute."

With a series of energetic turns at a bell handle he primed the party 'phone and after a few minutes conversation hung up the receiver and called out to Mr. Poe "yes, the Shepards say that they will take you, if six dollars ain't too much."

"No, that will be all right. I guess I can stand it. How can I get out to this house?"

"Tom Hedges over at the livery stable will take you out for a dollar," answered the agent practically.

Christopher Poe picked up his grips, thanked his informant and stepped across the road to a ramshackle building sheltering a hay and feed store and livery stable. In ten minutes' time he was being driven through a picturesque road out into the open country.

"There's lots of funny people lives around here," remarked old Tom Hedges, squinting off toward the horizon and stroking his tobacco stained beard with his free hand. "You'll find the Barrys a funny lot, they live on the farm next to Sheparda. Old man Barry, he's pretty sick, an' he's got two sons that wish he'd die.

"Well, that's rather unnatural," smiled Poe, thinking that old Tom Hedges himself was quite as queer as any of the characters he mentioned.

"Well, you wouldn't think so if you knew old Bill Barry. He's as tight as a drum. Never been known to spend a cent. He ain't got no more morals nor conscience than a rabbit. He's kept them two boys out of school an' working on his farm all their lives and they are pretty near sick of it. Younger one, Jack, he wants to get married."

Old Tom Hedges drawled along during the entire ride, relating uninteresting anecdotes about his queer friends and neighbors. Christopher Poe was but little interested and his thoughts were busy with the beautiful prosperous farms through which they drove.

He found the Shepards a family quite to his liking and was given a room which over-looked a rolling fruitful valley. The remainder of the day he spent strolling about aimlessly, idly through the fields and woods. On his return home he was suddenly reminded of Hedges' description of the curious Barry family by coming upon a strange girl, who looked half wild, a wood sprite, a wild flower. She was trudging along with two milk pails, when suddenly a young fellow who answered Hedges description of Jack Barry came running up, snatched one of the pails from her hand and scolded her for struggling with such a burden.

Christopher Poe walked slowly behind the pair and watched them with idle interest, until a big, brawny fellow came running out of the little hill-side house toward which they were headed.

"Bell's worse. Better send for the doctor," he cried.

A hollowing voice came from a room above." I don't want no doctor. You send for one and I'll lambaste your hide. That's all."

At that moment the Sheparda' supper bell rang and Christopher Poe dropped his interest in the Barry family and hurried home with the anticipation of dinner.

After a thoroughly satisfying meal consisting of greasy potatoes and smoky thin beefsteak, Poe lighted a cigar and sat upon the veranda enjoying the cool evening and thoroughly at rest. At nine o'clock he went to bed in the hope of sleeping until eight, but before it was light a rush of feet awakened him. He sat up in bed and looked out of the window to find an excited group on the porch below talking in loud, hysterical tones. In the dim light he made out the forms of Jack Barry and the girl he had seen with the milk pails.

"He couldn't have killed himself," Jack Barry cried. "The sheep shears was lying on a chair clean out of his reach. George and me was listening. It was just as the clock struck four. We heard him give a kind of gruntin' groan, an' it was half an hour later before I got up nerve enough to go into his room an' George he was just comin' through the other door at the same time."

George took up the story at that point. "We seen him lying there in his old undershirt, with the sheep medal lying acrost his heart. There was blood flowing down all around it, and when we moved that there prize he won with them Shropshires there was a great big hole and when we pulled back his shirt there was the sheep shears all bloody at the end."

Christopher Poe bounded from bed. He had hoped for a peaceful two weeks in the village that had attracted him as he rode through on the train. But here was an evident mystery which fascinated him. His duties as a New York banker had forced him into the study of criminology, and it had been his pleasure for many years to work as an amateur detective and solve whatever mysteries were forced upon his attention. In two minutes' time he was dressed and a minute later had joined the porch group which had already started toward the Barry's. His presence went unnoticed in the excited little crowd.

On approaching the Barry's house, built into the shelter of a hillside, Poe was brushed aside by the half-wild girl who had remained silent during the walk. She rushed on alone into the house and Poe followed quickly, going directly up a rickety pair of stairs and coming out into a room lighted by a smoky lamp. On the bed lay the ghastly, gaunt form of Bill Barry, the sheep breeder.

The girl had already reached the room and was holding in her hand the blood-stained sheep shears. There was an insane gleam in her eyes and the banker detective had a moment in which to study her before she became aware of his presence. Then the whole Shepard family, consisting of man and wife and three grown children and the two Barry boys came trooping into the room. They stood aghast at the spectacle on the bed. Poe noted that both of the Barry boys seemed grimly contented with the sight of their father lying dead before them.

The girl abruptly dropped the shears and they fell with a clatter, breaking the ominous silence of the room. George Barry shouldered his way through the awed spectators and pulled back the red shirt from his father's chest, he held up the glittering sheep medal, a round silver trophy as big as a saucer, on which was engraved the name of Bill Barry and the sheep which had won the prize for him at an international live stock show.

"Bill, he always wore that round his neck, just as you see it here," remarked George Barry without emotion. "He was more fond of that than either of us boys or Jenny. I guess it's been like a wife to him since mother died. When he first took sick we tried to get him to let us take it off, but he wouldn't hear to it."

"Yes," put in Shepard, as though adding something weighty, "I guess Bill was more fond of that there sheep medal than he was of his soul or his good name." He glanced at the unsightly sheep shears and asked, "Is them the shears that did it?"

"Yes, we found 'em sticking into him," remarked the younger Barry unemotionally. "He couldn't have done it himself for they was on the chair at the other side of the room and if anybody had sneaked in they could have found 'em."

"What puzzles me" put in George Barry, "Is that I didn't hear a sound except that little grunt he gave just after the clock had struck four."

Christopher Poe glanced up to the old marble mantle-piece at the foot of the death bed and considered it thoughtfully for a full minute, during which every one remained silent with his eyes fixed the ancient Swiss timepiece.

"I was awake all night, too," admitted Jack Barry hesitatingly. "I heard that there clock strike one, and two, and three, and when it struck four the last stroke sounded a little bit off, I didn't know just what it was, but George he noticed it, too."

"Yes, and just that minute—I heard the old man groan, just kind of a groan, not very loud, but it scared me and it made me sweat" put in George.

"Can you describe what was strange about that fourth stroke? asked Christopher Poe with interest, glancing around as he saw the young girl, Jenny, turn away and start stealthily down the stairs.

George stepped over to the clock and turned the hands ahead, pausing to the hou[illegible] everyone in the room listened intently as the clock clanged once in a high, silvery, metallic tone. It struck again, a third time, a fourth, a fifth, and then as all stood expectantly awaiting the sixth stroke, the clock remained silent.

"Must be something the matter with that! " remarked George dubiously," she's always kept good time and struck regular when she was kept wound." He jarred the clock back and forth on its antique legs and listened attentively for that last stroke.

"Must be out of gear," said George practically, trying his hand.

Christopher Poe's interest was divided between the disappearance of the girl and the failure of the clock to strike the full number of times. When the interest in the clock had waned and the little group having slightly overcome their fear of the ghastly spectacle had moved nearer to the bed. Poe stepped forward and remarked. "It certainly looks as though Mr. Barry had been murdered. I would advise that his body be covered with a sheet and this room locked so that nothing will be disturbed before the police arrive. Have you telephoned to them?"

"There ain't nobody to telephone to but the undertaker," said George Barry with finality.

"But there must be an investigation. Crimes like this should be examined into by public officials," said Poe.

The Shepards coincided with his opinion and finally the Barrys reluctantly left the room as it was, locked the door, went downstairs and called up the sheriff.

Meantime Poe asked Mr. Shepard for the use of his horse and buggy and slipped away to town. He picked up old Tom Hedges at the livery stable and took him for a drive. During the ride he briefly sketched the tragedy to the garrulous old man and asked for further information concerning the Barry family. Tom Hedges was not at all reluctant in giving him minute details concerning the three Barrys and the girl, who was a ward of old Bill Barry, and worked like a slave on the place.

From the mass of information Poe received he picked the following details as most interesting to him. Jack Barry, the younger son, was in love with Jenny, the ward. All three of the younger people were ruled by Bill Barry with a firm hand. They feared him and in Tom Hedges estimation none of them had the courage to admit such a crime. He explained the fact that both boys were awake and heard the clock strike during the night before by saying that each of them was afraid that the other would have some secret conversation with their father. They lay awake to keep watch on each other, in fear that the old man in his diseased state of mind might be influenced to make a will in favor of one of his children, leaving out the other.

Tom Hedges repeated a scandal concerning Jenny; she was generally supposed to be the daughter of Bill Barry's brother who had ran away with an adventuress who afterwards went insane.

"I wonder?" asked Christopher Poe at the end of his conversation with Hedges, "if I could get a chance to board at the Barrys' after the funeral is over?"

"I guess you could, the boys are just as tight as their father was and as long as Jenny would do the work they'd like to get the extra money. But what do you want to go and get into such a sad house for now?"

"Oh, I am interested in this thing and I'd like to find out more about the Barry family" answered Poe.

"Well, all you got to do is to ask 'em."

"I'll do that."

The next day Christopher Poe attended the funeral of old Billy Barry. Because of the tragic way he had met his death many people turned out from curiosity to follow the body to the little Oregon cemetery.

Christopher Poe learned nothing of interest and early that afternoon explained to the Shepards that he would gladly pay them two weeks' board in full if they could arrange for him to get a room at the Barrys. Mr. Shapard diplomatically made the arrangement with George Barry and that afternoon Chritopher Poe quietly moved into the little hill-side house and was established in the very room in which Bill Barry had died; the room having been made clean and tidy by Jenny.

The gruesomeness of his situation did not occur to the financier because of his great interest in the crime. He lay for hours in the bed and re-established in his mind the room as it had been on the night of the murder. During the first night he rose several times to rearrange chairs in an effort to figure out some plausible theory. He also carefully examined the Swiss clock and made a mental note of the fact that he could plainly hear the breathing of the two brothers who occupied separate rooms, both opening onto the middle chamber in which Poe lay.

Jenny had a small room below, just beneath the old staircase, and though he felt that someone was moving about below stairs several times during the night he could hear no sound.

Next day at breakfast Jack announced in a business-like tone that he and Jenny were to be married that night. Christopher Poe immediately became anxious. A vague theory had been forming in his mind and he felt that he must act at once.

So immediately after breakfast he asked the two Barrys and Jenny upstairs to his room. The old sheep medal with its blood stains upon it lay on the dresser, the sheep shears beside it. Christopher Poe had found no difficulty in seeing that these two articles were not disposed of. The gruesome relics seemed to hold a morbid interest for all the Barry household.

When they were all gathered in the room Christopher Poe stepped softly to the door and locked it, then he went over to the clock on the mantle piece and turned the hands until they were pointing to half-past two.

"Now," he said, taking up the sheep shears and placing them on the chair near the stairway where they had been the night of the tragedy, and putting the silver sheep medal on the bed. "I want you all to imagine that this is the night that Mr. Barry was killed. The shears lay where they did that night the sheep medal will represent the place your father occupied, and the clock is set at half past two. I have found in examining this clock that it is of very excellent Swiss workmanship. The bell sounds the hours in regular rotation. I have tampered with it now so that it will strike three o'clock when these hands are turned to three.

"Now you two boys are supposed to be lying awake in these two outer rooms and Jenny is either awake or asleep downstairs in her room." Christopher Poe slowly and deliberately moved the hands of the clock until they reached the hour of three. The silver tinkle sounded clearly and distinctly three times.

"Now," continued the banker-detective, "you heard it strike three and if I left the clock alone it would strike four after an hour is passed, but instead of that I turn the hands around the entire face of the clock back to about half past two so that the next time the clock strikes, while it would be really four o'clock, the bell would only sound three times."

He turned and looked at Jenny, who was trying to hide her flushed face behind Jack.

"We'll suppose that some person has slipped silently up the stairs after the clock had struck three and has turned the hands in just the manner I did, so instead of the bell sounding four times at four o'clock there will be but three strikes."

Jenny was edging toward the door and Christopher Poe cleverly cut off her retreat by stepping to the chair and picking up the sheep shears. The boys stood fascinated watching his every movement.

Jenny, her hands trembling, finding the door locked, returned and stood behind Jack as though seeking protection.

Christopher Poe again deliberately turned the hands of the clock until they reached the hour of four. Then as the time-piece began striking clearly he rushed toward the bed with the sheep shears tightly clutched in his hand and stood in a dramatic pose waiting as the clock struck once, twice, three times. Then his hand descended swiftly and the sheep shears clanged on the rim of the thin silver medal, making a note similar to the fourth stroke of the clock.

"You see," he cried, looking up with his face eagerly flushed "the clock did not strike four times. I made the fourth stroke by hitting the sheep shears against the medal. You spoke of a strange feeling that you had on the night of the murder when you heard the fourth stroke of the clock. Did you recognize the sound when I struck the medal just now?"

"Yes!" cried both brothers together. And Jenny made a bolt for the door, tugging frantically at the knob.

"You recognize it, too," Poe said, catching the girl firmly by her arms. "You recognized it because it was you who first figured out how to set the clock back and how to imitate the fourth stroke at four o'clock in such a manner that these two boys, whom you knew were listening intently in their rooms, would hear and suspect nothing."

Still holding the girl, whose guilt was written in her wildly defiant eyes, Christopher Poe turned to the Barrys and said softly, "this girl is not a murderer. It was quite natural living the life of a slave that she has for so many years, and loving Jack as much as she hated his father, that she should wish to kill the tyrant. I say it is quite natural that this girl should, because, as you might have seen if you had not been so intimately connected with her, she is insane."

The boys stood dumbly looking at the girl who had been their companion for years and in whose diseased mind this weird tragedy had taken growth and matured as a noxious weed.

To prevent a scene Christopher Poe had already requested the sheriff to be in waiting near the house that morning. He gave a shrill whistle out the window to summon him and Jenny taking advantage of his move, jerked away from him and tried to grasp the sheep shears from George's hand but together they overpowered her and in half an hour the unfortunate girl was on her way to the Insane Asylum.

Christopher Poe packed up without loss of time and returned to the city, firmly convinced that more peace and rest could be found in the turmoil of the metropolis than in a supposedly quiet, rural retreat.

BELLEVILLE HAS MANY OLD TIMERS

Williams Will Be New Man on the Mound — Some Other New-Comers.

PRACTICE STARTS.

This is how the Daily Ontario, of Belleville, views the opening baseball season:

The initial practice of the Grand Trunk C.O.B. league team Tuesday night has left the railbirds well pleased with life in general and their chances of some fast ball here this summer in particular. There is a distinct feeling that with the majority of the old players again wearing the gray and crimson uniforms and with an even break there will be nothing to worry about.

Williams, the new pitcher, was on hand and served them up in a style that warmed the hearts of the management. How he will be in a stiff game is another matter entirely, but he has speed and several kinds of slants; and Peeny Mills and he will likely get along together. If he only puts them where Mills asks for them he can call it a day well spent.

Others out were: Meagher Cap. Smith, Weir, Ross, Casey, Symons, while a newcomer was Crook, the hockey-baseball player from Toronto now in a bank here, who was tried out on second; one or two others were there also, as well as a whole flock of just plain 'fans".

The next work-out will be Thursday night again at Pine street grounds.

The news around the circuit is that other teams are starting the same way. Oshawa with all its imports from the Kingston Ponies and from the dickens knows where else and Port Hope and Lindsay are talking big; Peterboro is in trouble again as Riverside Park is still flooded.

Cobourg is supposed to be "very" strong this year and Bowmanville is trying to figure out where they are at. Leaside is busy building a millionaire team.

It's going to be a long grind. Twenty-eight games anyway and there will be two and sometimes three games a week. The lads will have a busy summer.

CANADIAN LEADS IN GOLF TOURNEY

Marcus Greer, of Quebec, Has Card of 76 at Trenton Country Club. Remarkable Playing.

TRENTON, N.J., April 28.—(Canadian Press.)— Marcus Greer, of Quebec, Canada, with a card of 76 yesterday afternoon led a field of 160 players in the qualifying rounds of the second annual tournament of the Trenton Country Club. Play began yesterday morning and will continue throughout Saturday. The best running card was handed in by Norman Maxwell, of Whitemarch Club, Philadelphia, who covered the 18 holes in 84 strokes.

Despite a high wind, Greer's playing was remarkable. Paired with Woody Platt, of Philadelphia, he went out in 37 and came back in 39. Platt netted an 81 to complete the round. Greer's card follows:

Comedian Altrock Outdoes William Tell

NICK ALTROCK ON THE GROUND OFFERING HIS NOSE AS A TEE FOR THE GOLF BALL. WALTER JOHNSTON AND STANLEY HARRIS LOOKING ON WITH JIM THOMPSON, SOUTHERN PROFESSIONAL, DOING THE DRIVING.

Nick Altrock, famous comedian of the Washington baseball club, is nothing if not original.

Someone told Nick the story about William Tell shooting the apple off his son's head with his trusty bow and arrow.

That sounded interesting to Nick, so he decided to go William Tell one better.

Nick conceived the idea of placing a golf ball on his nose, as a substitute for a tee, and having said ball driven off his nose.

"Anyone who has ever seen me and therefore is familiar with the size of m nose will appreciate the great danger entailed in pulling this stunt" is the way Nick explains it.

Nick insists there are a ny number of golfers he would allow to drive the ball, among them being Babe Ruth.

"You know Babe often swings where the ball ain't, and this is no trick when the golfer doesn's hit the ball. It immediately becomes a serious accident."

Millbrook, Omemee, Mount Pleasant and Bethany Constitute New Group Known as the Cavan-Manvers-Emily League.

P. Stinson, President.

Under promising auspices of enthusiasm, good-will and a large attendance the Cavan-Manvers-Emily Baseball League, which has been promoted by Jake Solomon of Peterborough, was organized at Bethany last night. Four clubs were represented, from Millbrook, Bethany, Mount Pleasant and Omemee. It was expected that Janetville and Cavan would also be able to enter teams in this group, and although one or both of them may still come through the door that was left wide open for them, they were regarded as doubtful, for this season at least.

The delegates from the four clubs were as follows:

Omemee—E. H. Mitchell, M. M. Weir and E. Pogue.

Millbrook—Percy Stinson, L. Russell, Clifford Nattress and R. H. Edmunds.

Mount Pleasant—Garnet Shields, Robert Bryan and Hubert Lowes.

Bethany—Carl Sisson, W. L. Hannah and Charles Staples.

The Charter Officers.

The officers elected to establish the C.M.E. League were:

Honorary Presidents — S. S. Staples, M.L.A. for Durham, and F. G. Sandy, M.L.A. for Victoria.

Honorary Vice-Presidents — R. Crerar, Bethany; Harry Bland, Mount Pleasant; E. H. Mitchell, Omemee; R. H. Edmunds, Millbrook.

President—Percy Stinson, Millbrook.

1st Vice-President—H. H. Ryley, Bethany.

2nd Vice-President — Garnet Shields, Mount Pleasant.

Secretary-Treasurer—M. M. Weir, Omemee.

Executive—Dr. Hamilton, Bethany; E. H. Mitchell, Omemee; Hubert Lowes, Mount Pleasant; R. H. Edmunds, Millbrook.

Will Join O.A.B.A.

It was virtually decided to affiliate with the Ontario Amateur Baseball Association in the intermediate series, but the actual resolution to that effect was deferred until the next meeting. The delegates declared themselves unanimously in favour of identifying their league with the Provincial association, but they were content to postpone the formality for the present, in the feeling of satisfaction with the success of their first get-together meeting.

Must Be Amateur.

One feature of the new league, which was particularly emphasized, was the intent and determination to maintain the C.M.E. on a strictly amateur basis. This was the keynote struck by the President, Mr. Stinson, and reiterated by the other delegates.

Mr. Solomon took charge of the opening proceedings, and to feel out the opinion of the visitors, most of whom he had previously known only through correspondence, he called for an expression of opinion toward the project of a new league between the Durham and Victoria Townships.

Encourage Sports.

Mr. Stinson, speaking for Millbrook, heartily approved the proposed league. "It will give us regular games and will encourage amateur sport," said Mr. Stinson, "but it must be confined strictly to amateurs and local men. We must look to the boys and try to develop them, to have them coming along and filling up the teams. While it will be a purely amateur league and consequently not as high-class ball, still it will serve the purpose intended in this league."

Mr. Solomon explained that, according to the O.B.A.A. rules, teachers were permitted to play in the towns in which they are engaged, and local boys attending college were excepted by the residence rules and could play with their home teams.

"This league will get the boys of the different towns better acquainted," Mr. Solomon said. "They will enjoy themselves and the towns will develop a deep interest and healthy rivalry."

Mr. Mitchell of Omemee endorsed Mr. Stinson's introduction and said Omemee wished to extend their territory into the country in order that some of the eboys living on farms could be signed up. "We don't want to confine our team to the village," said Mr. Mitchell.

Mr. Solomon informed the gathering that a player could turn out with the team in the town to which he lived the closest.

Mr. Shields spoke for Mount Pleasant and Mr. Hannah for Bethany in full harmony with the preceding speakers, and to get down to real business Mr. Stinson moved, seconded by Mr. Mitchell, that a baseball league be formed.

Mr. Stinson was chosen President without opposition on Mr. Weir's motion, seconded by Mr. Mitchell, and Mr. Solomon retired in favour of the President-elect.

Honoured By Election.

In his brief address of acceptance, Mr. Stinson said that as a Manvers boy he felt proud to be the first President of the league composed of teams from Cavan, Manvers and Emily Townships. "I shall do all that is right and fair to the best of my ability, and it shall be my aim to promote the best interests of baseball in this league."

Before the meeting adjourned Mr. Stinson appealed to the officers and the four clubs for their cordial and faithful assistance, and promised them that as President he would be unbiased and thoughtful only of the welfare of the C.M.E. League and the proper development of baseball in that district.

Mr. Stinson made a splendid impression, and both Mr. Solomon and Mr. Patterson afterwards remarked that this league starts out under very favourable auspices, both in the compactness of the group, the fine spirit of sportsmanship manifested, and also in the personality of the officers.

It was stated that Mr. S. S. Staples, M.L.A., had offered to donate a silver trophy for the new league.

Of the wise counsel of Mr. Solomon and Mr. Patterson, it needs only to be pointed out that their effort has all the promises of becoming a flourishing league that will engender keen rivalry along the Durham-Victoria boundary townships. They were given a hearty vote of thanks for their assistance.

Mr. Stinson is the G.T.R. agent in Millbrook, who is otherwise prominent in the affairs of the village. In "Dick" Edmunds he has an energetic mate, an old ball player, and incidentally a fine curler, whose heart is in clean sports.

Harry Ryley of Bethany, another of the promoters of the league, declared that he would co-operate to the fullest extent in helping make it a success. Shields and the other Mount Pleasant men and Mitchell and Weir of Omemee, who were prominent in the organization procedure, are all for the league, which brings into a regular schedule, under O.A.B.A. supervision, the scratch games that have been played in former years.

The club membership fee was fixed at $5 in a motion by Mr. Edmunds, seconded by Mr. Ryley.

ENGLISH TEAM DEFEATED.

PRINCETON, N. J., April 28.—(Canadian Press.)—Princeton's lacrosse team yesterday defeated the Oxford-Cambridge players, 6 to 4. Held to a 3-3 tie in the first half, the Tigers, by superb offensive work in the early part of the final period, scored their three additional goals. The English team rallied later but was checked after socring once.

COBB PROTESTS AGAINST WORK OF DANFORTH

The Detroit Manager Says That St. Louis Pitcher Used Illegal Delivery in Tuesday's Game.

TO INVESTIGATE.

ST. LOUIS, Mo., April 27.—(Canadian Press)—The pitching delivery of Dave Danforth, whom the local American league club obtained from the Columbus American association team last winter, was made the subject of continual protests by Ty Cobb, manager of Detroit Americans, and his players in Tuesday's game here, which the visitors lost 5 to 3.

After the game Cobb assert I that, in his opinion, Danforth's deliveries were illegal. Several balls were retained by the umpires and will be sent to Ban Johnston, president of the league, for inspection.

When Danforth came to the American league on a previous occasion, after having made a remarkable strike out record with Louisville in the American association, his pitching efforts were attacked repeatedly as unfair. Some critics alleged that he used a sharp strong thumb nail to cut the surface of the of the ball and make it cure more readily.

DICK HUGHES SENT TO HAMILTON CLUB.

READING, April 28.—(Canadian Press.)—Chief Bender of the Reading Internationals, yesterday announced the release of Infielder John J Cavanaugh, an option, to the Richmond Club, of the Virginia league. Lefthand Pitcher Ray Fedder was unconditionally released and Dick Hughes, pitcher, was released on option to the Hamilton Club of the Michigan-Ontario League.

BUNT EXPECTED TO COME BACK

Better Pitching and Less Lively Ball Expected to Bring the Bunt Back Into Prominence.

DANGEROUS PLAY.

The bunt in baseball is due to come back.

The season of 1922 is certain to see a revival of the bunt as an offensive weapon.

The lively ball and a desire to emulate the deeds of Babe Ruth has crowded the bunt off the baseball map for several years.

The bunt is a one-run play. It means much to get a one-run advantage under the ordinary conditions. For several years, however, one run has meant nothing in the life of a ball team.

The lively ball always opened up possibilities for getting runs in clusters. For that reason most teams kissed the bunt goodby, placed it securely away with the moth balls.

With a less lively ball and better pitching the bunt is sure to return to poplar favor during the 1922 season.

It's a great method to put the opposition in the air, throw a pitcher off his stride, one of baseball's most dangerous weapons on offense.

Keep tires mended to ge best results.

NEWTON-COYNE GO THE FEATURE

But There Are Plenty of Other Bouts on Wm. Hamilton A. C. Card.

The Newton-Coyne bout on Monday night promises to be the feature event of the William Hamilton Athletic Club's big card, but there will be plenty of other bouts on the programme that promise to supply some excitement. Both Newton and Coyne are in great shape and their three round bout should go through at top speed. They are very evenly matched indeed these boys, and they will will give an exhibition of scientific boxing that will make the crowd sit up and take notice.

The full programme will be announced to-morrow.

In addition to the Newton-Coyne mill there will be a clash between Trickey of Toronto and Irish Jordan at 125 lbs., and between Maddeaux, of the Classics, Toronto, ond Ted Williams of Peterboro at 139 pounds. With five or six local bouts as well it will be a great evening's sport.

Brock street rink should make an ideal place for the bouts. A ring will be erected in the centre of the rink and there will be 350 ring-side seats at 50c. The rush seats, it should be noted will be 35c each. Sid Simons will referee the bouts, and there will be three judges.

BOWLING

MERCANTILE FIVE-PIN LEAGUE.

Telephone Office Take 3 Straights From Raybestos.

Thef Telephone Boys gave their usual performance last night when they took 3 straights from the Raybestos gang. The bowling was rather slow druing games as per usual. It was the weather which got the blame. Elliott of the Bell was the only one who did not like using three balls a frame all the time, taking pity on the pin boys by making over 600 mark. Morrow came next with 470. Van Peer was high for Raybestos with 473.

Following are the scores:

Telephone Office—				
Elliott	208	228	168	604
Morrow	188	123	159	470
Gray	96	168	154	418
Bartley	129	146	130	405
Long	129	119	163	411

SPORT GOSSIP

Raybestos Practice.

The Raybestos ball team will practice on the grounds of the Sacred Heart church on Saturday afternoon.

Lacrosse Turn Out.

Candidates for the Junior O.A.L.A. team are requested to report for practice at Central Park Saturday afternoon. Bet Todd will start them off and all the juniors are expected to be on hand. The juveniles are also invited to be present.

FOOTBALL NOTES.

TWO LEAGUE GAMES FOR SATURDAY.

Owls play Quaker Oats at the Oval. Kick-off at 3 p.m. Referee, F. McKinley.

This is the first game to be played at the Ovan this season, and it should be a good opener for the best playing pitch in the city.

The other game is Canadian Woollens vs. Canadian Packing Co. Kick-off at 3 p.m. Referee, H. Andrews.

This will be a rather interesting game, as both teams have gained the same number of points, and have both played two games. So the winner to-morrow will take a jump up the League table.

Owing to the Canadian Woollens' grounds not being ready, their game will be played at King Edward Park. On this ground last week, there were no corner flags. Home team please note.

Woollens Vs. C.P.R.

Kick-off at 3 p.m. on King Edward Park. The line-up of the Woollens has been re-arranged slightly, owing to Jack Cridland, right back, still being on the sick list with the injury he received to his foot in Owls vs. Woollens game on Good Friday. W. Lomax will again be missed from the forward line, he having been called to Hamilton owing to the sudden death of his mother.

Lomax turns in a clean game, and many of his football associates will be sorry to learn of his bereavement.

Saturday's line-up will be: Goal, Hillman; right back, Chambers; left back, C. L. Monkman; half-backs, (r) Read, (c) Roberts, (l) Buchan; forwards, (o.r.) Hotson; (i.r.) Shuttle, (c.f.) Gaskell, (i.l.) Downes, (o.l.) Jones.

The Woollens', executive are busy with their grounds and feel certain that next week will find it ready for anything but there were times when they though it would never dry out, in fact, as suggested by a local wit, to many of them it was reminiscent of Flanders fields.

The stone pickers are still calling for volunteers to assist in removing the 'Irish confetti' on this ground hard by the towusbip of Monaghan.

SATURDAY FOOTBALL.

The Canadian Packing eleven who will meet the Canadian Woolens tomorrow afternoon will be composed of the following players: Lasenby, goal; W. Downer, right back; W. Oxley, right back; Brabbury, right half back; Batley, left half back; Mann, center half; J. Shaw, outside right; Folles, inside right; M. Shaw, center; J. Clark, inside left; Strickland, outside left; J. Downer and J. Edwards, reserves.

REGENT—Herbert Rawlinson in "The Scrapper," Olive Tell in "Love Without Question." Also Christie comedy, "Back From the Front."

Capitol Entertainment

House Peters has a striking role in "The Man From Lost River" at the Capitol Theate for this week end. This is a thrilling picture of life in the lumber camps, with the mighty giants of the forest succumbing to the tools of men and the husky lumberjacks' rough life depicted in scenes where they eat at pine tables and dance to the music of the mouth organ. Peters is the foreman, Jim Barnes, a vital and compelling character,who loves the shrinking Marcia. Her marriage to Fosdick, the tenderfoot Easterner, is followed by desertion, when Barnes befriends her.. The discovery of oil on his property brings the recreant husband back, only to be stricken by the pestilence which attacks the camp.

There is a thrilling "Nick Carter episode, several loudly-encored songs from the bass singer, Cameron Geddes, including "The Armourer's Song from Robin Hood, and "Annie Laurie", and a very funny comedy in which a luckless swain endeavors to capture a bride by way of rescuing her from approaching automobiles and causing her to slip on hard pavements on slippery banana peels. His efforts land him in jail on four successive occasions, but he finally succeeds in capturing a willing maiden.

AT THE GRAND.

WES BARRY IN NEW SCREEN PRODUCTION

Freckled Movie Celebrity Will Grace Silver Sheet in "School Days."

Freckle-faced Wesley Barry, the inimitable movie celebrity, will grace the screen of the GRAND Theatre, next week in his latest starring vehicle, "School Days", made from the Gus Edwards classic of the same name starting Thursday, May 4, for three days.

The very mention of the words "School Days" holds an appeal for young and old, and it is said that every mother who has boys, every man who remembers his boyhood every human being who can thrill to the joys, the disappointments, the pranks and the glory of boyhood will gloat over the trials and tribulations of Speck Brown, better known to the screen world as Wes' Barry.

Briefly, the story centers around a small town boy who loves the old swimmin' hole and his dog, Hippy, better than anything else in the world. He meets a wealthy uncle who sends him East to get an education. Here he meets many youngsters of wealthy parents, and he finds himself out of the social swim He is beset by many trials and tribulations, and finally he goes back home to his faithful dog and his little country sweetheart via the freight train route.

There are said to be many other interesting high-lights in the picture in addition to a cast composed of a number of players who have graced the screen in scores of productions. The cast includes, in support of Wes' Barry, Nellie P. Spaulding, Margaret Seddon, Jerome Patrick, George Lessey, Arline Blackburn, J. H. Gilmore, John Galsworthy, Eveline Sherman, Francis X. Conlan and Arnold Lucy. The production was made by Harry Rapf, and directed by William Nigh.

AT THE ROYAL.

Edna Murphy and Johnnie Walker are presented to-night in the William Fox feature called, "The Jolt". This is the story of a returned soldier, who after fighting for his country in France found hard luck and lack of employment when he got home. The first few scenes of this powerful and exciting play are laid in France when Johnnie Stanton (Johnnie Walker), is given a farewell banquet as he is about to leave for America with his French bride, Georgette, (Edna Murphy. Some months after arriving home Johnnie fails to get work. He was previous to the war a crook, but had determined to go staight. When his ill luck is at its worst and his wife finds it imperative to have more money with his furniture seized and his grocer adamant to appeals for credit he meets his old time leader of the gangsters. Johnnie is driven by desperation for his wife's sake to commit a burglary. At the house he is robbing he finds as a guest, his fomer "buddy" of the trenches, Johnnie's pal in the burglary, sees the two meet and shake hands.. Thinking Johnnie has double-crossed the gang, the pal shoots at him but hits Johnnie's "buddy" Johnnie recognizes the mistake he has made in returning to crime. The gang of crooks is rounded up in a spectacular manner by the police. Johnnie gets a good job, his first boy is named after the old "buddy" of the trenches and everything ends as merry as a wedding bell. William Farnum in the "Rain bow Trail" is seen at his best. This play is really a sequel to "Riders of the Purple Sage" that was so much enjoyed at this theatre about a month ago. The plot deals with attempts made by the Mormons to destroy a family who dared to oppose them and their custom of polygamy.. The scenes are beautiful being laid in Utah and the Grand Canyon of the Colorado. A thrilling story that fairly sizzles with excitement and holds attention from start to finish. The Sunshine Comedy "Business is Business" is a scream! It is based on the experiences of a real estate dealer who sells his houses even if he has to "stock" the cellar to make a sale.

AT THE REGENT.

"Pack up your troubles in your old kit bag and smile, smile, smile!"

That might have been the motto of the hero in "The Scrapper," but there isn't any record of the fact. "The Scrapper" is the Universal special attraction starring Herbert Rawlinson which comes to the Regent Theatre to-day.

It's the story of a dashing young Irishman right out of college and endowed with a hankering for two things—work and romance. And he has the sunniest sort of a nature. If he's winning, his only boast is, "I had ye there—yes I did!"

When he is being beaten, he doesn't pull along face and set his chin like that of a bull dog trying to surround the neck of a collie with a two-inch jaw. He grins and waits till the clouds roll by with philosophical good nature.

But he isn't slow. Oh boy, no! He tries to kiss a girl the first time he meets here, and because she won't do it he retaliates by marrying her before the finish.

Gertrude Olmstead, the prize winning beauty of pictures, is the leading woman oposite Rawlinson. Edward Jobson, William Welsh and Walter Perry are the chief character actors and Fred Kohler and George McDaniels, the heavies. Al McQuarrie, Frankie Lee and Hal Craig complete the cast.

Hoabrt Henley was the director in charge of the filming of R. G. Kirk's Saturday Evening Post story, published as "Malloy Campeador."

GALLAGHER'S RECORD AN ENVIABLE ONE.

The pitching of Teddy Gallagher who was sought after by Toronto Leafs, and who consented to try out with them but never reported, was the sensation of Eastern Ontario, as it was in 1920. In 1920 Gallagher shook the amateur baseball world, when in his first game of the season he struck out 22 men in nine innings. Last year he was as g- as ever, winning 13 games and losing six, and striking out 213 men. In each of two games he struck out 18 men, and he crowned his work on July 7th by shutting out the Adams, N.Y., team with no runs and no hits, striking out sixteen men and allowing only two to reach first base. His work also included a one-hit game in which he fanned 16 men. On top of his pitching, he led the team in batting an average of 4.25. Gallagher is taking Dainty's place for Osh-wa, as the former Oshawa twirler is now trying out in the Mint League. The former Kingston twirler is a bear for work and a natural hitter.

OPEN MEETING OF THE SCHOOL TSSOCIATION

An open meeting of the Home and School Association of the Prince of Wales school was held last evening, when a report was received from Mrs. F. Miller, representative of the association at the conference of Home and School societies held in Toronto last week. Mrs. Miller's report was most interesting to the ladies active in Home and School work. A letter from Mrs. A. Mowat, president of the Local Council of Women, was read, asking the co-operation and support of the society in attendance at the free lecture to be given by Dr. Barker at the Grand Opera House next Wednesday afternoon, under the auspices of the Rotary Club. A short musical programme was rendered, with vocal solo by Miss B. Neville and instrumental selection by Miss Lily Kay.

TRINITY CHOIR CONCERT.

At the Trinity Choir Concert being held in the Church on Friday, May 5th, Miss Jessie Tuite, who is assisting, is a very able and talented elocutionist, and comes from Belleville, where she holds the position of Professor of Elocution at Albert College, and whose attainments well merit all the honors conferred on her.

Mr. Bert Ure-Cutt, the noted tenor, who is also assisting, is organist and choir leader at St. Andrew's Church, Galt, Ont. His vocal powers are all that could be desired, and as a singer he ranks amongst the foremost in the Dominion of Canada.

Don't miss this opportunity of hearing these two gifted artists, whose renderings will be amongst the outstanding features of what will be a concert of a very high order. Please note the place and date.

MUTUAL CONFIDENCE AND GOOD WILL IN EMPIRE.

TORONTO, April 28.—(Canadian Press).—Addressing the Canadian Club to-day, Sir George Perley declared that while the policy of continuing the British Empire on a basis of out-and-out equal partnership between Britain and her Dominions was complicated, it was quite possible to work it out by mutual confidence and good will. To strengthen the Empire they must develop unity of thought and action among component parts.

A well-attended reception under the auspices of the Ladies' Aid Society of St. Andrew's church was held yesterday afternoon and evening at the Manse, which was thrown open for inspection of the decorating and renovating which has been going on since the recent fire. Much of the new work, including the hardwood flooring and beautiful arch in the second floor, has been donated by the Ladies' Aid Society, and fnuds derived from their entertainment yesterday will be used to defray the cost of this work.

Mrs. Jas. Rollins, Mrs. F. L. Robinson and Mrs. R. M. Waddell received the guests, with Mrs. R. Waram and Mrs. C. Banks in charge of the refreshment committee. The rooms were garnished with carnations and the tea-table was prettily arranged with large silver bowl of sweet peas and silver candelabra. Mrs. A. J. Eaton and Mrs. C. McFarlane poured tea in the afternoon, Mrs. Jno. Jamieson and Mrs. Wm. Stevens officiating in the evening, assisted by different members of the society.

A pleasant musical programme, arranged by Miss Hazel Davidson, was rendered during afternoon and evening, with vocal solos by Mrs. M. H. Park and Miss Ina Allen, instrumental selections by Miss C. Layton and Mr. Leslie Unitt, and several numbers by the Imperial Male Quartette, composed of Messrs. M. H. Park, D. D. Brown, E. Humpage and J. Smith.

WEDDING BELLS

CONDON—MARCHAND.

A very quiet but pretty wedding was solemnized by Rev. Father Costello at St. Peter's Cathedral, on Tuesday morning at eight o'clock, when Miss Anna Edwidge Marchand, daughter of the late A. Marchand of Hastings was married to James John Conden, son of John Condon, 273 William street. The bride was attended by Miss Gertrude Condon, sister of the groom and the groom was supported by William Ahern. The happy couple left on the G.T.R. noon train for St. Catharines, and Niagara Falls. On their return they will reside in the city.

OBITUARY

MRS. WILLIAM WILLS.

Mrs. Wm. B. Wills, the oldest resident of Mitchell Ontario, and one of the town's most highly respected citizens, passed to her reward on Sunday in the ninety-first year of her age. She was born in the Isle of Wight, has been a resident of Mitchell about sixty years. She was a member of the Methodist Church, a class leader for many years, and took an active part in all kinds of church work. She was noted for doing good in the community in which she lived in times of sickness, and filled the position of a nurse for forty years or more. She was known by men and women all over Dominion who were born in Mitchell, as she was present when they were born, and kept in touch with them till they grew up and left town. Her husband died several years ago.

There are surviving two sons and six daughters; James, in Windsor; John, Mrs. Francis and Mrs. Davidson, in the West; Mrs. Butcher, Peterboro; Mrs. Taylor, Buffalo; Mrs. Blowes, Mitchell, and Miss Emma at home.

A. H. MOYES.

"The Advocate" of Red Deer, Alberta, in its edition for April 21st, devotes a column and a half to the obituary notice of A. H. Moyes, whose father, John Moyes, and three sisters, Mrs. Wm. Herd, the Misses Elizabeth and Janie, are residents of Peterborough.

Mr. Moyes, who was in his 38th year, had been for seventeen years in the employ of Campbell, Wilson & Horne, wholesale grocers of Calgary, as travelling salesman and manager of their Red Deer branch for several years past. He was described as an enthusiastic member of musical and sporting circles, a loyal member of the Presbyterian Church, a member of the City Council and the Board of Trade on different occasions. Enthusiastic eulogies of his character and ability from business associates and friends generally accompany the obituary.

WHAT PROPOSALS ARE.

GENOA, April 28 (Canadian Press). — The Italian press to-day gives indications of what the Allied proposals to Russia are, as follows:

First, it is asserted, no loan will be offered, but the suggestion is made of an international consortium to finance trade through combinations of firms and individuals of the countries represented. Germany will be included and provision made for the United States to enter.

The plan contemplates economic colonisation of Russia, with guarantees that the sovereignty of the Soviet Government will not be infringed upon.

FRENCH CABINET DISCUSS SUNDAY POLICY AT GENOA

Will Hear M. Barthou Outline Conference Situation, Especially Regarding Reparations.

RUSSIAN QUESTION

PARIS, April 29. Canadian Press. —A meeting of the entire French Cabinet has been called for Sunday night when M. Barthou will outline the conference situation at Genoa.

Although Barthou was a member of the Briand cabinet, he was considered unquestionably in full accord with M. Poincare on the general lines of France's policy at Genoa. He was even accused in some quarters of being the prime mover in Briand's downfall because he thought then the Premier was conceding too much to Lloyd George on the reparations question and in dealing with Soviet Russia. Hence the diversion with the premier now on the Russian question would come as a surprise in political quarters. It is pointed out in well informed circles, however, that Barthou as negotiator is unable to take the same uncompromising stand as the Premier, who lays down general principles. Therefore, it is believed by intimate friends of Barthou that he found his instructions from Paris irksome in the presence of a skilful negotiator like Mr. Lloyd George, and he probably is coming home to ask for a little elasticity in directions from the Cabinet.

HARMONIZE DIFFERENCES.

GENOA April 29. Canadian Press. —In line with Lloyd George's declaration that the new allied proposals to the Russians must be considered as a whole, a special drafting committee was endeavoring to-day to frame a document which would harmonize differences in the demands submitted by the British and the French delegations.

A Central News correspondent says he learned that the British draft proposals to Russia set forth eight points ,the principal of which is that Russia shall recognize all her debts, and after moratorium of five years pay 2 per cent. interest for five years and then 4 per cent. for another five years. The document does not specify that Russia must accept the principle of private ownership.

NOTHING INCONSISTENT.

LONDON, Aril 29. Canadian Press. — A despatch to the Times from Genoa says that the legal advisers of the Reparations Commission will report that they find nothin in the Russo-German pact inconsistent with the Versailles treaty, subjec to satisfactory replies being received from the Germans on certain points.

MUST HAVE CREDITS.

GEOA April 29. Canadian Press. —Foreign Minister Tchitcherin, of Russia to-day sent Premier Facta of Italy a note expressing dissatisfaction with the delay in replying to its note of April 20, and saying that the note would be withdrawn and the Russians would resume their initial position unless they were assured that the credits necessary to restore Russia would be granted.

DRAFTS HARMONIZED.

GENOA, April 29. Canadian Press. —The sub-commission on Russian affairs this morning agreed on the preamble to the Russian proposals. The sub-commission announced that the French and British drafts of the preamble had been harmonized.

Local Member Opens Up the "Back Stage"

A recent news despatch records the experience of Pearl White, the prominent movie star, so popular with "serial" fans, who was appearing in person at a certain theatre. At the moment of making her bow to the audience, a fifty-pound weight from the flys above fell beside her, missing her by a few inches.

In this connection, it is interesting to note that Mr. T. Tooms, local members for the Legislative Assembly, has had theatres and all stage appliances brought under the supervision of Government inspectors, who previously had no authority to go behind the scenes and inspect ropes, weights and other stage paraphernalia. The new regulations come into force immediately.

LITTLE CALL FOR UNSKILLED LABOR

Building on Extensive Scale is Badly Needed.

Slight industrial gains during the week are recorded by Hugh Robertson, in charge of the Ontario Employment Bureau, but the situation with regard to unskilled labor, machinists and iron workers has shown very little improvement, he said. Until building begins on a more extensive scale throughout the country and industry shows greater gains, Mr. Robertson sees very little hope for finding work for the unskilled workers, who form the big majority of the unemployed. The demand during the week has been for specialty trades.

Mr. Robertson still reports more work on farms than applicants. Prevailing low wages make it impossible, however, for married men, in which class most of the experienced farm workers are found, to go on the land unless a cottage is provided. Under present strenuous conditions, it is necessary to have the problem of existence mastered very nicely to work in the country and keep a family in the city on $35 and $40 a month, and yet the farmers claim, and back it up with convincing figures on farm prices, that these wages are all they can afford to pay.

SUICIDES RESULT OF SPIRITUALISM.

NEW YORK, April 29 (Canadian Press). — Suicides in New York, Newark, and Toronto by persons who had been reading accounts of Spiritualist theories, yesterday were followed by Court action in Brooklyn to commit Porter, who was alleged to have become mentally deranged and stabbed his wife in mistake for a ghost.

RIVAL LEADERS IN CHINA WAGE WAR FOR PEKIN

Foreigners Hear Rumble of Artillery as Armies of War Lords Clash in Battle.

AIRPLANES ATTACK

PEKING, April 29. — (United Press.)—Foreigners in Peking to-day heard the rumble of artillery as the armies of Chang Tso Li, the war lord of Manchuria, battled with the forces of General Wu Pei Fu, Viceroy of Honon. Legation guards are ready for action.

The rival Chinese leaders are fighting for control of the Peging government. President Hsu Shih Chang is here with a small garrison, too weak to resist either armies which are hammering each other at the city gates. The victor in the battle now raging is expected to advance upon Peking.

Marched on Peking.

General Wu Pei Fu marched upon Peking with the intention of outsing President Hsu Shih Chang on the ground that he was too free in handing concessions to foreigners. He was intercepted by the forces of the Manchurian war lord, who has the backing of Sun at Sen, President of the Chinese government, with headquarters at Canton.

Foreigners Protected.

The foreign legations here are protected by troops of each nation represented, and in event of invasion of the city by either rebel army, these guards will defend the legations just as they did in the Boxer uprising. Foreigners in Peking would go behind the legation walls for protection. It is not thought likely, however, that either of the rebel chiefs will antagonize the powers by menacing their legations.

AIRPLANES VS. WARSHIPS.

SHANGHAI, April 29. — Three airplanes yesterday attacked nine warships in the Pearl river when the crews were suspected of being sympathetic with the Peking govenment.

A direct hit was scored on the river cruiser Haichi. The bomb killed 20 sailors and wounded 30, and put the vessel out of action. The others surrendered.

First in History.

This was the first battle in history between air and water fleets. According to the despatches the nine warships were lying in the river when the agents of President Sun Yat Sen were sent to ask the commanders to pledge neutrality during Sun Yat Sen's expedition against Peking.

(This refers to the expedition against the Peking government by General Chang Tso Li, who has the backing of the Cantonese and who is now fighting outside Peking.)

The fleet commanders refused to

RADICAL LABOR MEN TO HOLD PARADE ON MAY DAY

Monster Demonstration in Winnipeg to Include O.B.U. and Workers' Party Members — "Communism Only Cure For Capitalism" Will Be Chief Banner Carried.

WINNIPEG, Man., April 29 (Special to The Examiner). — At a meeting of Radical Labor men last night, it was decided to hold a monster parade on May Day.

The majority of the Labour men in Winnipeg belong to the Radical element, as they did in the days of the big strike.

These include all Street Railway employees, all workers in the vast railway shops located here, outside of international organisations, garment workers, who are very strong in membership here, cigarmakers and many of the building trades' and the teamsters' associations.

The O. B. U. and Workers' Party of Canada will finance the demonstration.

The chief banner carried will be "Communism Only Cure for Capitalism."

All Labour men who served terms in the Penitentiary and jail following the last strike, will be the principal speakers at the close of the parade.

Another banner will be labelled "Greetings to Soviet Republic."

Red flags will be prominent throughout the parade, but in accordance with the by-laws of the city Union Jacks of large design must head the parade.

FAIR BOARD FAVORS JUDGE'S EXAMINATION

Endorse the Proposal of J. Lockie Wilson — New Amateur Class in Garden Vegetables Open to the General Public.

Horsemen's Practice Fee.

An amateur section in the garden vegetable class of the Peterborough Exhibition was added to the prize list by the Fair Board last night upon the recommendation of the committee of which Mr. Frank Kitney is chairman. It calls for an expenditure of $30 which will be distributed over the twenty-four vegetables which the committee selected for competition. The main business of the meeting over which Mr. H. G. Webber presided in the absence of Mr. R. Denne was the revision of the prize list preparatory to printing it for this year's exhibition. Some of the sections were turned in promptly and with some emendations, and the others were promised for early delivery to the secretary.

The garden section for amateurs was opened as follows, Mr. Kitney remarking that the professionals felt that the amateur growers should be discouraged:

Amateur List.

6 qt. basket potatoes, 6 red carrots, 5 yellow onions, 5 red onions, 2 qts. butter beans, 1 qt. dry white beans, 5 beets, 5 parsnips, 5 ears table corn, 5 red tomatoes, 5 pink tomatoes, collection of peppers, 2 green cucumbers, 2 ripe cucumbers, 1 water melon, 1 musk melon, 1 citron, 1 squash, 1 vegetable marrow, 2 roots celery, 2 heads cabbage, 2 heads red cababge, 2 heads savory cabbage, 1 head cauliflower.

The members present last night were: W. S. Merrell, J. Gillespie, R. B. Rogers, Harold Baptie, Smith Milburn, C. S. Cummer, Frank Kitney, H. Lush, J. T. O'Connell, Tom Brown, George Paxman, Jos. Kelly, W. H. Young, Dave Jordan, T. N. D. Kelly, W. R. Breyfogle, W. A. Roseborough, F. A. Hodgson, J. O. Ball and T. McIndoo.

Mr. Roseborough reported that in the grade dairy cattle class it was proposed to increase the prizes for grade bulls from $12, $8 and $4 to $15, 12 and $9 to encourage and compensate those who won the second and third prizes.

May Move Trees.

Mr. S. Whatley's request in behalf of the football league that teams be permitted to play on Exhibition Park was referred to the Ground committee.

Mr. Brown reported that some of the trees planted last year had been placed under electric light wires, others would interfere with carnival shows, and some of them would have to be removed. Mc and W. R. Breyfogle were requested to look over the arrangment of the trees this afternoon.

Report of Association.

T. N. D. Kelly who, with Smith Milburn attended the annual meeting of the Fairs Association, gave a brief interesting summary of the principal business of local interest that had been discussed and transacted. Most of the advice at the convention was for the special benefit of the smaller fairs. One subject that had appealed to the Peterborough delegates was J. Lockie Wilson's proposal requiring judges for the Ontario agricultural exhibitions to pass a qualifying examination that would demonstrate their fitness for the work. Mr. Wilson contended that in judging of cattle, for example, the arbiters should be able to explain the reasons for their decisions and awards.

Some of the farmers argued that

Grading Underway on Hunter Street

The grading of Hunter street east of Armour Hill is proceeding at a rapid pace, Ald. Walter Stocker, chairman of the Board of Works said to-day. Sixteen men are on the job and seven teams. Six of the teams are drawing and one ploughing and each team is accounting for two loads an hour. The cut has considerably altered the aspect of the hilltop during the week. The earth being taken out is dumped in the crater at the east end of the Hunter street bridge. The men on the job are receiving 40 cents an hour and it is estimated that the work is costing $110 a day.

BUILDING PERMITS NEAR HIGH LEVEL

Figure Up to $100,000 During This Month.

Building permits at city hall during the month up to last night totalled in value over $100,000. This figure represents a new high level and indicates a return to what has been called normalcy in building. April, 1910, a big year, saw building worth $120,000 started. In April 1911, the figures were only $82,000 so this month's record shows up in a satisfactory light in comparison with these other highs. Sixty six permts were issued up to last night as against 44 a year ago. Sixteen houses have been started. One would have to go a long way back in the files to find as good a five days as from Monday to Friday. The total went to $47,170. Permits were issued for five houses.

The largest permit for the month was taken out by the Roman Catholic Episcopal Corporation, for a rectory on Romaine street. This building will be an imposing one, over fifty feet long and nearly 40 feet wide. It will contain 15 rooms and is estimated to cost $22,000. R Sheehy & Sons have the contract, while Arthur W. Holmes of Toronto is the architect. The contractors look for the completion by November 1st. D. Belleghem & Sons took out the second largest permit for alterations to their premises on Hunter street, estimated to cost $12,000.

H. J. McCannon, real estate dealer, is building an 8-roomed house at the corner of Monaghan road and Weller street estimated to cost $4,200. F. Rowan has been given the contract. Two-six-roomed dwellings are being put up by L. D. Lettellier at the corner of George and Prince streets. The houses are to cost $1800 each. T. McMurray has been awarded contract for a seven-roomed house .H. V. O'Dette is building on Sophia street at an estimated cost of $2,700.

Permits issued for the last few days are

Herbert Allen, 113 Gladstone avenue, ice cream parlor, $100.

Martin Hickey, verandah, 477 Rubidge street, $20.

Ed. Wright, verandah, 532 Charlotte street $50.

J. McCann ver dah, 109 Romaine street $125.

R. G. Allan, garage, 540 Stewart street, $25.

E. Swisternikoff garage, 157 Rubidge street, $30.

D. R. Fleming garage, 307 Boswell avenue, $75.

H. F. Foote garage, 809 George street $90.

NO ONE OPPOSED LEASE RIVERSIDE PARK P.A.A.A.

The Ontario Railway and Municipal Board Issues Order Ratifying Transaction By City Council.

THE AUSTIN CLAIM.

Yesterday C. R. Widdified, city solicitor, attended before the Ontario Railway and Municipal Board at Toronto in support of the application of the city to lease Riverside Park to the P. A. A. A. As there was no one present to oppose the application, the Board made an order allowing the city to enter into the lease asked for.

The position the city has maintained in regard to the claim for $2,000 damages made by the estate of Walter Clarke Austin, owners of the property immediately to the north-west of the Quaker Oats plant, as a result of the bridge construction, has been upheld on a motion in Whitby on Thursday, and the claim will now be settled by arbitration.

Some time ago the estate issued a writ against the city for over $2,000 damages. The city maintained the claim should be settled by arbitration, but the plaintiff proceeded in the case and served notice of trial for Monday, May 1st. The matter came up in Whitby on Thursday, and was disposed of on a motion in favor of the city.

Arbitration proceedings on the claim will now follow. Joseph P. Magnon, Oshawa barrister, is representing the plaintiff, while C. R. Widdifield, city solicitor, is watching the city's interests.

MILITIA OFFICERS WATCHING OTTAWA.

No Summer Camp Unless Estimates Go Through.

Officers in local militia units are watching the proceedings at Ottawa pretty closely these days to see when the militia estimates are going through. Although recommencement of drill was hoped for by April 15th the allowances have not gone through the House and the prospect of their not going through at all is not beyond the realm of possibility. In any event unless the government is less parsimonious than last year officers like Lt. Col. T. J. Johnston of the 3rd Prince of Wales Dragoons feels like dropping out of active praticipation in military affairs altogether.

If the estimates are to go through intact valuable weeks spring training have already been lost and the officers locally are anxious that the uncertainty of the situation may be cleared up without delay. Col. T. J. Johnston who commanded the camp held here last June stated that he did not know what would be done with regard to camps this year. He favored the old Pettawawa system of giving more opportunities for drills and manoevres. It is not likely allowance will be made for more than a nine day camp he felt.

ST. ANDREW'S SUNDAY SERVICES

An Interesting Address for To-morrow Night — Excellent Music.

Much of the comfort of travelling depends on the wisdom with which we select our baggage. Experienced travellers never overload the transport waggon. Life is a journey and the Minister of St. Andrews' has prepared a sermon on this question of baggage which you will find practical and interesting at to-morrow night's service.

The Music

Anthem—Awake thou that sleepest. Allen—Miss Ina Allen and Choir.
Solo—Come unto Him (Messiah)—Handel—Mrs. Park.
Anthem—Unaccompanied—Rock of Ages—Bowles.

APPEAL MADE FOR TWO LITTLE BOYS

Appeal made edB fffff ffffff ff.

An appeal is herewith made for two little boys, aged 7 and 10 years respectively, who have been unable to attend school for some months past on account of lack of clothing. They are in need of complete outfits and anyone having clothing of any sort suitable to their needs, would be doing a good turn by sending it on to Mr. Powell, at 588 George Street.

At Manhatan, Mont. are some of the largest barley farms in the world.

NO SALARY INCREASE FOR RELIEF OFFICER

Finance Committee Turn Down F. W. Miller's Request — Ald. Crowe Suggests Combination Combining Two Offices.

ALD. CROWE SAYS HE'LL STAY WITH IT.

The Finance Committee last night prepared its recommendations for the Council on Monday night, and featured the meeting with a general tug at the purse strings all around, relaxing to the exteat, however, of voting the Trent Waterway Development Association $300.00 to help to defray the expenses of advertising the city.

Ald. N. E. Phalen presided, with Mayor W .H. Taylor, Ald. Malcolm McIntyre, Ald. Walter Stocker, and Ald. Joseph Crowe in attendance.

Early in the evening the committee ran into a letter from the Board of Ontario License Commissioners, asking if the Council would favour exempting standard hotels from business assessments and giving them an exemption from municipal taxes not exceeding 33 1-3 per cent. The letter declared that if Canada was to get the American tourist business good hotel accommodation was necessary, and their improvement and enlargement should be fostered by municipalities.

Taxed to Death.

Several of the aldermen were heard to remark that the hotel rates were surely high enough to give the proprietors a profit.

The chairman said he understood that the Board was feeling out the opinion of municipalities with the object of introducing legislation later on.

Ald. Stocker said he had heard that the licenses of standard hotels were only being renewed for six months, and he felt this was an indication that some move was under way.

Mayor Taylor was not in favour of any concessions. "The people are being taxed to death," he said.

Ald. Stocker and Ald. Crowe moved and seconded that the communication be received. This action was taken.

Ald. Crowe asked if the Council had thought about arranging a camp site for motorists as is done in the West.

"That wouldn't help the hotels any," remarked Ald. McIntyre.

"No, but I see they're doing it up at Kitchener."

"Let them come here. We'll use them right," said Mayor Taylor.

Band Turned Down.

The Melodie Concert Band reminded the committee that they are still in the field for a grant.

"We didn't ask them to form a band. So far as I'm concerned, I'm only going to support one band," declared Ald. Crowe.

"One band's all we can support," said the Mayor.

A SMALL FIRE AT THE C.G.E.

Fire Originated in an Oil Circuit Breaker in the Test Department.

A fire which at one time threatened to assume dangerous proportions broke out in the testing department of the C. G. E. about 4.15 o'clock yesterday afternoon. The fire originated in an oil circuit breaker and the flames and smoke which resulted made the confligration look much greater than was actually the case. The circuit was situated under the floor and was being used in conjunction with a large 45,000 K.V.A. generator which is being tested out before shipping it to Winnipeg.

The number of high tension wires in the immediate vicinity of the flames prevented the use of water and it was necessary to use only chemicals. This however proved effective. The local fire department responded and rendered aid to the fire fighting forces of the company.

A number of offices situated in the vicinity of the fire were filled with smoke which caused some consternation among the young ladies employed there.

SAY CATHOLICS ARE PERSECUTED

But Primate Darcy of Ireland Denies Charge

BELFAST, April 29.—(Canadian Press). — Primate Darcy, of the Anglican Church in Ireland, Bishop Brierson, Moderator Lowe and President Smyth, of the Methodist Church, have replied to a statement issued at Maynooth College which, in referring to conditions in Belfast, said Catholics were subjected to "savage persecution hardly paralleled by the bitterest sufferings of the Armenians." The reply say the assertions are a complete misrepresentation of facts, and that the trouble in Belfast is political, not religious, an effort to paralyze the Northern Government.

REACH NO AGREEMENT.

DUBLIN, April 29. — (Canadian Press).—The peace conference called by Lord Mayor O'Neill held another meeting to-day, but after three hours' discussion it dissolved without any agreement being reached.

THE SENSATION IN DUBLIN.

DUBLIN, April 29. — (Canadian Press).—The slaying of several prominent Protestant citizens of Cork yesterday has aroused a sensation here equal to that caused by the slaughter of the MacMahon family in Belfast, and the Provisional Government has announced that those guilty of outrages will be brought to justice, regardless of the time and effort this may take. It is believed that the murders were intended as reprisals for the killing of the MacMahons.

COURT MARTIAL HELD.

DUBLIN, April 29. — (Canadian Press).—At a court martial in the Irish Republican Army Headquarters here to-day, Desmond Lawlor was honorably acquitted of the charge of murdering Captain Meade, of the British Army, in an ambush near Dublin in February. The principal witness, a soldier, admitted he had made a mistake in identifying Lawlor.

ELITE OF MOTOR WORLD LEARN OF TRENT WATERS

Big Influx of Yacht and Auto Visitors to Peterboro and District Expected This Year — But All Are Not Simply Pleasure Seekers.

The Secretary of the Trent Waterway Development Association has been notified by the Department of Railways and Canals that the request of G. N. Gordon, K.C., M.P., for a further allotment of maps of the route has been complied with, and fifty will be forwarded. By this prompt action the publicity work of the association will not be held up. As soon as the illustrations are added they will be put in the mails for points in Canada and United States, where they are destined to grace the walls of yacht clubs and kindred organizations, whose members are interested in pleasure cruises.

Illustrated folders are being sent in generous numbers with the maps, and the policy of the association is not to be at all skimpy with whatever literature they have. Unfortunately at this early stage of the publicity game it is not as varied as the officers would like, but as time goes on the display will thrive and develop.

Enquiries are coming in to the headquarters that seem to make safe the assumption that there will be a large number of tourists in the Trent waterway district this summer. It is understood that Col. W. M. Buck, well-known Montreal sportsman, is bringing a party through, and literature is now on its way to him. G. W. Carter, of Geneva, Ohio, has written to tell how he is interested in a trip, and asked that literature be sent to three people in Cleveland and four in Geneva. Other enquiries, all brimming over with optimism for the possibilities of the Trent route, have come from the following: Rev. John Morrison, D.D., Sarnia; D. Henderson, of Henderson and McGuire, barristers, solicitors, Toronto; M. G. Chantler, secretary Brampton and Peel Motor Club, and from H. E. Waterman, secretary of the Hamilton Harbor Commissioners.

All the letters are not seeking information about pleasure cruises. W. S. St. George, of Bobcaygeon, is interested in negotiations to extend a barge and steamer line now running between American points and the Great Lakes into Trent waterway points, and desires to discuss the feasibility with the association at its annual meeting.

The large illustrated maps in the hands of the Secretary are being rapidly disposed of. Some of the clubs to which these have been mailed, or will be mailed, and it will be noted that most of these are the elite of the yachting and motor-boat world, are: Queen City, Royal Canadian, Rochester, Buffalo, Buffalo Launch Club, Detroit, Chicago, Saginaw Harbor, Royal Hamilton, Tamagua, Toronto Motor Boat, National, Royal St. Lawrence, Miami Beach, South Shore, Power Boat Club, Chicago, American Power Boat Association, Yachtmen's Club, Philadelphia, New York Motor Boat, Bridgeburg, Columbia, Colonial, New Rochelle, Orienta, Harlem, Wilmington Motor Boat, Hudson Rover, Philadelphia, Lulu Temple, Newburgh, Delaware River, Mississippi Valley Power Boat Association, Illinois Valley, Yacht and Canoe, Seattle, Cleveland, Milwaukee, Steel Mills, Royal Bermuda, Kingston and Oswegatchie.

Head Stuffed By Catarrh or Cold? Use Healing Cream

If your nostrils are clogged, your throat distressed, or your head is stuffed by nasty catarrh or a cold, apply a little pure antiseptic germ destroying cream into your nostrils. It penetrates through every air passage, soothing inflamed, swollen membranes and you get instant relief.

How good it feels. Your nostrils are open. Your head is clear. No more hawking, snuffling, dryness or struggling for breath. Get a small bottle of Ely's Cream Balm from any druggist. Colds and catarrh yield like magic. Don't stay stuffed up. Relief is sure.

TRADE REPORTS SHOW BUSINESS IS MUCH BETTER

Business Conditions Improving Slowly Throughout Entire Dominion.

THE REPORTS.

WINNIPEG, April 29.— (Canadian Press.)— That business conditions throughout Canada are slowly but surely growing better is indicated by the weekly trade report of the Canadian Creditmen's Trust Association issued from its head office here yesterday.

Montreal, Ontario and other eastern reports are all in line. Reports from wholesalers, including drygoods, hardware, ladies' and men's wear, millinery, etc., are encouraging, trade conditions being found to be better than during the past two weeks, the improvement noticed early in March being held in almost all lines. Boot and shoe circles still looking for improvement, retail merchants report better business with improved weather conditions.

Winnipeg and the west now basking in the sunshine is looking ahead for a better summer and fall, the spring improvement having been too slow to please many. Seeding is under way through Manitoba and with ideal soil and climatic conditions the crop outlook, so far as it is safe to predict at this period looks exceedingly favorable. Wholesalers, therefore building their hopes on the crop situation are optimistic as to summer and fall business. Retail merchants report improvement in business especially in larger cities, smaller country towns being generally affected by farmers being busy on the land.

Saskatchewan reports from Regina, Saskatoon and other parts show little change in business conditions since last reports, "fair," "moderately good," and "slight improvement" figuring in advices from wholesalers. With farmers busy retail trade is slow. An improvement in collections has been noticeable of late.

British Columbia wholesalers find indications of a good summer business. Hardware trade reports slow improvement maintained; and most other lines, excepting boots and shoes, likewise.

102-YEAR-OLD MAN DIES AT KINGSTON

KINGSTON, April 29 (Canadian Press). — William Thompson, an inmate of the Home for the Aged, passed away yesterday morning in his 102nd year. He would have been one hundred and two years on 17th June next.

He had been ill but two days. He was born in Fredericksburg, and went to the Township of Sherfield when he was very young.

He lived there until four years ago when he came to the city. He was a lumberman by trade, and many times "drove the river," he being an expert at this kind of work.

FARMERS' CASE FOR WHEAT BD. IS PRESENTED

C. Rice-Jones Tells of Advantages to Western Farmer Before Agriculture Committee.

FORMER RESULTS.

OTTAW', April 29. — The western farmers are asking for the re-establishment of the Canada Wheat Board (a) to prevent the dumping of large volumes of wheat on the market in the fall because of circumstances over which the farmer has no control and thus secure better prices; (b) because it would be of benefit not only to the farmers but also to all of Canada and particulary to the creditors of the farers who would be assured that every farmer woud eceive the average price for his grain; (c) because it would reduce the spreads between the different grades of grain; (d) because it would be possible for the farmer to get more fall work done if he knew that by hauling his wheat "on the snow" he could still secure a good price.

C. Rice-Jones, General manager of the United Grain Growers' Company, gave the above summary of the farmers' case to the House Agriculture Committee yesterday afternoon and urged the committee also to give every consideration to the status of the Canada Grain Act. One section of that act, providing for the licensing and bonding of grain dealers, had been declared ultra vires, and there was danger of others suffering the same fate.

There was a danger of the farmers being left at the mercy of the mushroom grain companies and the individual dealers.

The farmers, said Mr. Rice-Jones were only asking for the Wheat Board as a temporary measure. They had wished to start a voluntary pool but conditions were against them. Now they asked legislative assistance for a year or two to tide them over present conditions until they could organize their own pool. Mr. Rice-Jones complained that the present system of marketing was "not intelligent." Canadian wheat was dumped on the market for the buyers to take it away. Under the Wheat Board his company had been able to make a reasonable profit.

James Stewart, who was chairman of the Canada Wheat Board, was on the stand for a time yesterday afternoon as well as during the whole morning session. Mr. Stewart, who said that he was "not here to present a case either for or against a wheat board," believed that in the last two crop seasons the Canadian farmer would have received "many millions of dollars" more for his crop under controlled selling. There could not be successful control without control of flour prices, he said, and flour price control would hardly be feasible under a voluntary pool. The voluntary pool would have to compete with regular buyers, but its formation would have a psychological effect on conditions since it would be an important competitor of the private buyer.

The committee adjourned until Monday when it will hear Sanford Evans, and on Thursday next it is expected that the report of the sub-committee named to confer with the law officers and others will be available for discussion.

PRESIDENT LEWIS REACHES NEW YORK.

NEW YORK, April 29.—(Canadian Press.)— President Lewis, of the United Mine Workers, arriving here yesterday, said he had returned to break the deadlock in negotiations toward settlment of the anthracite coal strike.

Bank Manager Did Not Know Facts of Returns

D. C. Macarow, General Manager of Merchants Bank, Not Personally Familiar With the Contents of Signed Monthly Statement.

MONTREAL, April 29—(Canadian Press).—The outstanding feature in the evidence submitted to Judge Cusson, siting in the Enquete Court here yesterday, in the charges against Sir Montagu Allan, and D. C. Macarow, President and General Manager respectively of the Merchants Bank of Canada, was the fact that the witnesses examined namely J. M. Kilbourne, Secretary of the Bank since 1906; J. Gillespie Muir, Chief Accountant for the past 35 years; and Henry B. Luscks, of of the Chief Accountant's staff. All explained that when the President and the General Manager of the bank signed the monthly statements to the Government, they had no personal knowledge of the information to which they had testified.

Further, evidence was to the effect that under the provisions of the Bank Act which require a monthly return to be sent to Ottawa, not later than the 20th., of the following month, there was no way by which the General Manager could obtain such personal verification of the statements he signed.

Evidence further showed that the bank returns sent to the Government are made up much in the greater part by merely consolidating the reports of all the branch bank managers by the office of the Chief Accountant, and adding to this a statement of purely head office figures, such as value of bank premises, rest, and other items belonging to headquarters. It was admitted on cross-examination that what the branch bank managers sent in each month to become a part of the general monthly statement sent to the Government, is merely an inventory; that it is only once a year that there is a re-valuation of the assets held based upon inspectors' reports.

The case heard yesterday was against D. C. Macarow, former General Manager who was charged with having "wilfully made false and deceptive statements" in the monthly statement for October, 1921. The charge against Sir Montagu Allan of having "negligently" done so, was not taken up. The case was put over until Monday next and promises to take several more days' sittings.

BOAT HOUSES AND WHARVES ON STONEY LAKE DAMAGED.

Cause Attributed to Ice Jams and High Winds—Wharf at Mount Julian Suffers.

Lakefield News.

LAKEFIELD, April 29.—Mr. eGorge Hill has returned from a trip to Stoney Lake and reports very high water this season. He saw evidences of damage from the ice. Many boat houses and wharves are in a bad state from the ice jam of this year. The breaking up of ice was accompanied by extremely high winds, which accounts for a great deal of it. The government wharf at Mount Julian has been damaged to a considerable extent.

Dangerous Sidewalk

The side walk on Colborne street between Concession street and Chippewa avenue is in a very bad state of repair this spring. The frost has played several merry tricks with it which have caused holes quite dangerous, especially at night. The section which is in poor shape is the strip between Mrs. Isaac Watson's property and Mr. Burrow's house a load of finely crushed stone would do a great deal of good.

POLICE FORCE IS FIRED ENTIRELY.

NEW WESTMINSTER, B. C., April 29.—The entire police force of New Westminster has been dismissed by the Board of Police Commissioners, effective May 31, in order to secure complete re-organization from top to bottom. A lack of co-operation in the force which seriously interfered with its efficiency was the reason given. It was decided to invite applications for nine police constables and the dismissed men are at liberty to apply for the jobs.

QUIET DAY SPENT BY OTTAWA HOUSE ON MINOR MATTERS

Brief Exchange Between Meighen and William Duff Enlightens An Uneventful Day.

FLYING OF FLAGS.

OTTAWA, April 29 (Canadian Press). — Estimates of the Department Public Works and Department of Justice before the Commons yesterday combined to make a quiet afternoon devoted to steady passing of item after item, although a short exchange between the Right Hon. Arthur Meighen and William Duff, Liberal member for Lunenburg, lightened the proceedings for a few minutes.

The exchange had its foundation in Mr. Duff's objection, on the ground of economy, to the flying of flags over public buildings. Later when Mr. Meighen was urging for details of the expenditure in the Public Works Department, Mr. Duff interjected "Hear, hear."

"And the objector to flags agrees with me," Mr. Meighen remarked.

"I wish to object. I think it was a contemptible remark to make, and could only come from a contemptible gentleman, Meighen by name and mean by nature," shot back Mr. Duff.

Mr. Meighen observed that he did not intend to "disturb the level of the debate" by discussing the matter, and the contentious items were stood over.

Peace returned with the introduction of the estimates of the Department of Justice, which were approved in rapid succession. But little criticism was made although T. L. Church, Conservative, North Toronto, ventured the opinion that Canada was away behind the times in prison reform.

Sir Lomer Gouin, Minister of Justice, intimated that the number of prisoners was increasing.

BD. OF INQUIRY IS ADJOURNED

Coal Strike Conciliation Board Will Reconvene On Thursday Morning.

CALGARY, April 29.—(Canadian Press.) — The conciliation Board of inquiry into the dispute between the miners and operators concerning a reduction of wages by fifty per cent was adjourned yesterday afternoon until next Thursday morning, when the Board will again sit in Calgary. The operators had announced they were not prepared to go on. The miners' representatives objected to the recess, dclaring it was the policy of the operators to starve out the miners. The operators replied saying the strike was costing them thousands of dollars daily and that they were not attempting to cause delay.

"This adjournment means the decision of the Board will be delayed another month," said Robert Livett, representing the miners. "Our financial position is such we cannot withstand this for long."

FAMOUS INDIAN PASSES AWAY.

PORT ARTHUR, April 29. — (Canadian Press.)—Antoine Moses member of a famous Indian family who terrorized Indians and whites in the Huron Bay district 30 years ago is dead.. After several murders flights and unsuccessful attempts of their arrest in the days of their activity, four brothers were finally captured and brought to Port Arthur. Two were convicted of manslaughter and sentenced to ten years in the penitentiary. They served their time and the family has given no trouble to the authorities since.

PRIVATE BILLS CONSIDERED BY ONTARIO HOUSE

Commission to Investigate Death of Capt. Huston. Lloyd Harris Under Fire

HYDRO QUESTION.

TORONTO, April 29. — The announcement that the government had named John A. MacIntosh, K.C., as commissioner to conduct an inquiry into the death of Capt. Orville Huston, and a debate on the qualifications of Lloyd Harris of Brantford to serve on the Royal Commission probing the Chippawa project, enlivened an otherwise slow and uninteresting day in the Ontario legislature. It was private members day and a number of minor bills were passed.

The appointment of Mr. MacIntosh followed the speech Thursday of A.. C. Lewis (Toronto N.E.,) and Attorney-General Raney explained it was due to "the charges preferred, or I might say the insinuations made by the honorable member from northeast Toronto". The attorney-general said the government would pay for counsel to act on behalf of Mr. Lewis in the investigation and that the hearing would open in Toronto the evidence available here being exhausted before going to Fort Frances. Mr. MacIntosh is a Toronto lawyer. The body of Capt. Orville Huston was found in Fort Frances on December 16 last with a bullet through his heart.

APPOINTMENT QUESTIONED

M. M. MacBride sometime ago submitted questions to the government concerning Lloyd Harris of Brantford who has been appointed as one of the commissioners to investigate the Chippawa project. They asked if Mr. Harris is a director of the Dominion Power and Transmission Company and whether this company is a competitor of the hydro. They asked if he has any connection with the Montreal Light, Heat and Power Company, and whether he opposed the hydro bylaw when it was submitted to the people of Brantford in 1909. It was asked if Mr. Harris proposed that Brantford should acquire the Western Counties Electrical Company and if he still is financially interested in this company. It was also asked on whose recommendation Mr. Harris was appointed to the commission.

DRURY REPLIES

Premier Drury said he did not think there was anyone but would admit the integrity, ability and fair-mindedness of Mr. Harris. The question had been raised that Mr. Harris sitting on this case was similar to Hon. Frank Carvell sitting in the railway commission on the Bell Telephone Company when he was interested in a telephone company himself. The premier did not think it was a parallel case, because the company Mr. Carvell was interested in was directly affected in the finding in that case. While he doubted the regularity of the question he agreed to ask Mr. Harris to answer them and would lay these replies before the house.

CONFERENCE AGAIN TRIES TO SOLVE PROBLEMS OF THE RUSSIAN SITUATION

SEAMEN'S UNION AND GOVERNM'T SETTLE DISPUTE

Friction Between Australian Government and Sailors Has Been Removed.

TEST CASE.

LONDON, April 29 (Canadian Press). — After very protracted proceedings, the selection of a crew by the officers of the Commonwealth liner Hobson's Bay is now practically completed, says a Reuter cable from Sydney, Australia..

All the men chosen are members of the Seamen's Union.

It is officially announced that the Hobson's Bay will sail on her scheduled time, 29th April (to-day).

There has been friction between the Seamen's Union and the Federal Government of Australia in regard to the engagement of crews for the Commonwealth steamships, the Government objecting to the "interference" of the Union in the Government's management of the steamship lines by insisting on choosing the crews for the Commonwealth ships. This difficulty has been cleared up. The chief officer or chief engineer of a liner now engages the crew, but gives preference to union men.

JOFFRE TO SAIL.

NEW YORK, April 29. Canadian Press. — Marshal Joffre will sail for home to-day on the White Star Liner Celtic. He will stop at Liverpool a few days, spend one day in London, then cross the Channel to France.

Attempt Being Made to Harmonize the Demands of France and Plans of British Delegates.

MATTER OF CREDITS.

GENOA, April 29 (Canadian Press). — Two historic documents dealing with the reconstruction of Russia have been submitted by France and Great Britain to the Economic Conference, and last night were in the hands of a special drafting committee, appointed by the Sub-Committee on Russian Affairs, which will endeavour to harmonise the differences in them.

The special drafting committee will report to the full sub-committee this morning, and the sub-committee, after approval is given the report, will submit it to the Soviet delegation.

The French document sketches at length means for restoring Russia's agricultural and industrial activities, while that of Great Britain devotes more attention to credit for Russia.

France insists on the full payment of Russia's war debts and the restoration of private property to foreigners; Great Britain favors a reduction in Russia's far debt, and is willing to be satisfied if Russia grants former foreign owners the use of their property, instead of a return of actual ownership.

France's Demands.

The adoption of the twelve articles in the agreement with Russia which regulate the disposal of the Russian debt is favoured by France. She demands that the Soviet conclude before 31st December, an agreement with representatives of owners of Russian state bonds in order to provide for the payment of interest.

If an agreement is impossible, according to the French contention, the Soviet must promise to accept the decision of a mixed arbitration commission, the president of which will be appointed by the Chief Justice of the Supreme Court of the United States, or by the League of Nations, or by the President of the Court of International Justice.

The French draft demands, in case private property cannot be restored, that Russia shall pay indemnities. These indemnities would be provided for by an issue of new Russian five per cent. bonds. The mixed arbitration tribunal of three members—one member for Russia, one for an interested Government, and the third, who would be president, to be designated by the Chief Justice of the Supreme Court of the United States—would decide disputed points.

DR. BARKER'S VISIT.

The visit of Dr. Barker to Peterborough on Wednesday is an event in which the public should be greatly interested, and the interest should be reflected by large audiences at each of the lectures. Dr. Barker comes under the auspices of the Peterborough Rotary Club, who are so confident that his addresses will be of value and benefit to the people of Peterborough that they are paying all the costs in connection with the visit of the famous lecturer. The lectures will, of course, be entirely free to the public, and there will be no collection taken. The expense is being met by the Rotary Club, who ask no other reward than the realization of the fact that they are making a contribution towards community welfare by making it possible for Dr. Barker to be heard here. The citizens of Peterborough can do their part by providing the speaker with capacity audiences. The full effect of his visit would be lost if he were not brought into contact with as many Peterborough people as possible. Dr. Barker, who for years was on the Chautauqua circuit and has lectured to millions of people, has a direct message for this city, and the Rotary Club hope that he will be given an opportunity to deliver it under the most favourable auspices.

RELIGION IN THE HOME.

One thing which in our loyalty to the church we often forget is the fact that the most important factor in the moral and religious life of a nation or community is not the church, but the home. Here are given the first and deepest impressions life knows. Here ideals are formed and standards moulded. Here the strongest and tenderest affections are born. Here is determined whether self or God is to be the centre about which life will revolve. No task is more far-reaching in its results both for the individual and for the nation than the task of making the atmosphere of the home wholesome, true and reverent.

One outstanding responsibility of parents is to give their children a right example, particularly in things religious. It is easy to forget that every act, word and attitude is being noted and copied by the forming lives about us, and that no influence compares with that of parents. The precepts of a dozen preachers may be obliterated from a child's mind by one act of a parent, and the moral earnestness of a whole staff of Sunday School teachers lost because of a single careless or flippant word spoken by a father or mother at home. Many a child is stunted in its religious growth by the home atmosphere in which it has to live, and no one on earth is responsible but the parents.

Another responsibility of parents is to have some sort of family religious life. The ideal would be to have each day a time of "family worship," as our fathers did, and every home would be richer for this. But even where this is not possible, the reading and study of the Bible can be encouraged, and some way found to daily recognize God as the giver of all good. What a reproach for a parent if in some time of need in later years a child will say, "Neither father or mother ever prayed or taught me to pray." If there is such a being in the universe as we believe God to be, there is nothing we can give our children that is so important as a knowledge of Him.

SCIENTIFIC RESEARCH.

The Dominion Government is in a position to inaugurate a policy that will be of inestimable value to Canada, and it is to be hoped that the suggestions of the Honorary Advisory Council for Scientific and Industrial Research will not fall upon deaf ears. The reference is to the proposal that the Government of Canada should set aside half a million dollars to erect and equip a building at Ottawa, to be known as "The National Research Institute," and that in addition an annual grant should be made for the carrying on of research work in the public interests. Instead of having to rely on the scattered efforts of gallant, public-spirited investigators, Canada would have her own bureau. It would be a common working place and a common repository of such new scientific knowledge as had been acquired at public expense. That there is need of such an institution in Canada seems to be a self-evident fact—without intelligent research work, Canada cannot hope to develop her resources any more than a private concern could expect to succeed against competitors who had research departments of their own. The nation that can finish its raw materials trebles and quadruples its rewards, and if the weapon of technical knowledge is not utilised by Canada to the fullest extent, the burdens of taxation and the evils of unemployment cannot be offset. Unless we can master all that is to be known regarding the nature and possibilities of our vast supplies of varied raw materials, Canadians must ultimately find themselves at the mercy of foreigners who know how to prepare our riches for purposes of commerce.

Here are a few questions that the Advisory Committee asks, and the answer to which might possibly be found by a Research Bureau:

Who knows the secret of exterminating wheat rust?

What should a black fox eat?

What use can we make of our tremendous supply of helium?

How can Canada be put into a position to meet its own heavy and increasing demands for fuel?

How can the enormous quantities of low grade iron ore in Canada be utilised?

What can be done with our straw, our sawmill waste, our liquor from sulphate mills?

The soiving of any one of these problems would mean millions of dollars to Canada. A half-million-dollar grant for scientific research, therefore, looks like a profitable investment that would be certain to pay rich dividends.

The visit to Peterborough, under the auspices of the Engineering Institute, of Col. Gaudet, representing the Research Council, has given local people an insight into what has been done along this line and of what can be accomplished.

TAKING DOYLE TOO LITERALLY

In Toronto this week, a poor old man was found dead in his bed. He had ended his life by blowing out the gas. On a chair, near his bed, was found a newspaper cutting with Conan Doyle's description of death as "beautiful and without any sense of pain," says the Ottawa Journa .

This incident has its lesson. And the lesson is the danger of even honest fanatics in a world all too thickly populated with people eager to embrace any new fad or theory, no matter how ridiculous or how divorced from demonstrated fact. It is quite probable that Doyle is an honest man, that he believes what he says. The trouble is that he offers not a particle of sensib e evidence to support what he claims, and that the credulous eagerness with which suffering humanity embraces every new remedy is calculated to invite the attention of quacks and charlatans, thus working infinite harm.

If Doyle's were a scientific brain, working cautiously and presenting visible evidence in support of his beliefs, objection could not be taken. But Doyle, far from being a scientist, is not even a highly educated man. As a writer of detective stories, as the creator of Sherlock Holmes, he was pleasing, to say the least, but the gift which enables one to spin a good detective story hardly constitutes capacity for the exploration of mysteries which have baffled the most profound philosophers and scientists of all the centuries.

Just as psycho-analysis has passed under a cloud, it would not be surprising if the new brand of spiritualism, and auto-suggestion, and all such other dabblings into the mysteries of being, soon found themselves in eclipse. And the reason is that all such theiries, unobjectionable when confined to the attention of minds capable of dealing with them in a sensible way, suffer from too much enthusiasm and too little of scrupulousness, on the part of hosts of disciples. Ignorant people, people without capacity to weigh evidence, people lacking in even the rudiments of philosophic thought, and people who merely wish to prev upon the uninstructed and the hysterical, take up such movements; there is trickery, dishonesty, doubt, a weakening of faith; and in the end nothing but harm.

Have we Forgotten our Dead

Less than five years from Conscription to contemptuous criticism of the militia.

It would be incredible if it were not true. As our Parliamentary correspondent points out in such vivid fashion, four years ago now the existence of civilization hung in the balance. The Hun was no longer at the gate—he was breaking in the door. The Allied armies were reeling back—the German blows had wrung from the stolid Haig the most poignantly pathetic and soul-shaking cry of the war. "Our backs are to the wall"—Canada's best and bravest were on the ground, or under it, and yet it did not seem enough.

No one was criticizing the militia then.

The voice of Assiniboia was not heard in vacuous mouthings over a "belted aristocracy going around feeding on the fat of the land." The real sons of Assiniboia were then tightening their "belts" when German shell-fire cut off the supplies, were "feeding" precariously on such standardized rations as got through, and were fee'ing as little like an "aristocracy" of any sort as is humanly possible.

"Gold, lace, fuss and feathers" are now the epithets flung at the men who are preparing—for what? Not to sit comfortably and securely in Parliament and draw four thousand a session for talking poisonously unpatriotic fub-dub; but to live in a squalid, hungry, death-haunted Hell in order that these complacent Parliamentarians may enjoy that freedom of speech they so flagrantly abuse.

"Feeding on the fat of the land." We would have thought that this was the last accusation which a full-fed politician, standing in a well-heated and scientifically aired Commons Chamber, would hurl at the heads of his fellow citizens who are nominating themselves for public service—not in any such luxurious and physically safe surroundings—but in filthy trenches, in death-cold billets ventilated by the shells of the enemy, anid conditions where a decent meal is an experience and the white napery and courteous service of a Parliamentary restaurant an unreal dream of a far-off land

* * * *

It is a thousand pities that the militiamen could not meet in a super-Parliament and send their political critics to the next war.

There could be nothing more wholesome or poetically just than to give these talkers, who are so daring with their tongues, an opportunity to prove their courage where barrages fall and machine-guns speak.

The practiced spell-binder always has the blunt soldier at a great disadvantage—until real danger to the nation looks over the edge of the world. Then "it's special train for Atkins when the guns begin to shoot." The idealism which thinks that war is a hideous nightmare from which we can easily free ourselves if we will only wake up—whose theory is, as the sapient Woodsworth put it, that "the way to arrive at international disarmament is by national disarmament" (that is, disarm the police and the thugs will gather weeping to turn in their guns)—which did so nearly succeed in disarming the defenders of liberty prior to 1914 that only a miracle prevented that first fierce rush of barbarism from succeeding—this visionary, suicidal and, one had hoped, discredited idealism can always carry with it shallow minds and short memories in the piping days of peace.

But wait till the war clouds hang on the horizon. Then these drivelling idealists run around frantically like ants frightened from a broken nest, looking for the rude fellows who have learned how to fight—for the "belted aristocracy" which can live on army rations and sleep in miry trenches and not be invalided home the first day—for the "gold braid, fuss and feathers" brigade which can stop a German raid and possibly save the skins of the unterrified talkers who to-day would have no free Parliament to vapor in if tens o thousands of these despised militiamen did not lie mouldering in France and Flanders.—Montreal Star.

LITERARY GEMS

MAKING HONESTY WORTH WHILE.

Confucius, philosopher of "action and reaction," made the Chinese honest by his advice, "do not do unto others that which you would not have them do unto you." The white man, in his transactions, is constantly looking for dishonesty, to punish it. The Chinese constantly watch for honesty, to reward it. One reason we have so much trickery and thieving in white civilisation is that we do not reward honesty with the same enthusiasm we inflict punishment for stealing. The white race will grow wiser as it matures mentally.—Minneapolis News.

WHY AN INVESTIGATION?

(London Free Press.)

Although U.F.O. orators used to denounce continually the Borden Government for appointing commissions and declared they wanted a return to government by people's elected representatives, yet there has not been a day since the Drury administration came into office that a commission has not been at work and usually a half dozen. The commissions of the Drury Government have cost hundreds of thousands of dollars and have been one of the chief causes of the growing provincial expenditures.

Now a fresh boar has been named to investigate the expenditures and administration of the Hydro Commission. As experts galore will be summoned, it means thousands of dollars more before it is finished.

BUSINESS MEETING OF SUNDAY SCHOOL.

Officers and Committees Elected at St. James' Church.

The members of the King's Own Class, St. James' Sunday School, held their annual business meeting and election of officers at the home of their teacher, Mrs. J. F. Chapman.

After the conclusion of business a pleasant social hour was enjoyed in music, games and contests.

A very dainty lunch was served by the hostess, and the twenty-four members of her class present were unanimous in their choice of a teacher for the coming year.

The officers and committes elected are as follows:

Teacher—Mrs. (Rev.) J. F. Chapman.

Assistant Teacher—Mrs. Walter Wright.

President—Miss Margaret Wright.

Vice-President—Miss Clara Robinson.

Secretary—Miss May Ritchie.

Treasurer—Miss Mina Andrus.

Committees — Devotional, Mrs. Foster (Convenor); Social, Mrs. Verna Fell (Convenor); Membership, Miss Constance Wagar (Convenor).

By a Bride.

Perfect contentment may be found in individual independence. this bride and groom think. But their financial affairs are interfering with their "perfect freedom."

Of course I expect my husband will some day be a rich man. I've been poor all my life. I'm tired of it.

We girls used to talk this over at college. And I know that lots of girls feel the same as I do. They agree that a girl after she's married mustn't be too easy in her demands on a husband. Not if she wants to make anything of him.

Jeanne Alson used to get perfectly furious when we talked so.

"You silly flappers!" she used to scold. "You marry to spend and spend! And demand and demand! You want things and things! Plan to drive your husbands!. Then what? You'll lose them! And you deserve to!"

"But they say that if a wife is too contented a husband will slump! Make a man too happy, and he'll slump." So Mary Smith, at college had said. "I think a wife can help her husband make a fortune by keeping him on his toes!"

Jeanne asekd:

"You girls al. remember Molly Gaines?"

We did. Molly is the shining millionairess among out alumnae.

"Well, Molly married her chemistry professor, you know. And she prides herself on having made her husband. He was content to fool around with science, just as science, you know. Molly decided he might as well make a fortune out of his knowledge, and not teach in a minor university all his life. So she kept at him until he went into commercial life. Color was his specialty. He was aways measuring color waves. Now he makes dyes.

"And a million a year!"

"Yes! And he used to be the dearest sweetest man in the university. And now he's an old grouch.!"

Only a few of us shared Jeanne's opinion. Most of us believed that making money is a duty a man owes his wife. For doesn't a girl, when she marries, surrender her own chance to acquire a fortune? Does'nt a man, then assume a double responsibilitly his own and hers

So we girls argued in school. And I never have forgotten the theory. And long ago I decided not to let my husband get into a financial rut.

Naturally, Jack felt from the first his wife ought to have the best of everything. Just as a matter of personal pride. For example, whenever I mentioned a car, Jack agrees that I ought to have one.

I must admit that he never brings up the question of a car, but he is attentive when I tell him about the new models some of the other girls have. Jessie Langdon has a new sedan. And her husband is in the office with Jack. I suppose things will come our way some time.

But I have a harder problem than most of the girls.

For if Jack had o.e single tiny fault in his character, it is this: he may be a wee bit to much of a reader and a dreamer and a chess player.

He much prefers sitting over a chess board at some kind of chess board at some kind of chess solitaire to going to the most brilliant society event of the season. And that attitude toward society and people with money will not do—if Jack is to make a quick success.

SENTINELS OF PROTECTION

Canadian car owners who equip with Firestone Tires expect mileage, comfort, smooth, steady driving, safety and freedom from tire trouble. Such faith in Firestone performance extends to millions of users. The reason is found in Firestone quality, the record of which goes back twenty years to the original determination of the maker—whose name is on the tire—to give "Most Miles per Dollar".

New proof of Firestone protection is found in the greater mileage this year of Firestone Tires. Their high quality is delivering the miles to a degree that makes them the most economical tire you can buy.

EGG MARKETS.

OTTAWA, April 29.—(Canadian Press.) — (Dominion Live stock branch.)—There appears to be greater activity in the car lot movement of eggs this week than has been apparent at any time during this season. This would indicate greater production and a much larger movement into the coolers. Consumption is about normal. Prices in the principal markets are showing no indication of easing off.

Toronto firm with practically no change in price. Specials jobbing 35, extras 34, firsts 30 to 31, seconds 25.

Montreal firm. Competition between buyers is keen for western Ontario offerings. Jobbing prices unchanged.

Manitoba and Saskatchewan markets unchanged.

CHICAGO WHEAT.

CHICAGO, April 29.—(Canadian Press.)— Big buying of wheat for Europe estimated at as much as 3,000,000 bushels led to a new upturn yesterday in wheat prices here. The market closed unsettled at the same as Thursday's finish, to 1 1-8c. higher, with May $1.42 1-8 to $1.42 1-4, and July $1.42 1-4 and July oats were unchanged to 1-4c. up, and provisions unchanged to 5c, lower.

Duel of Words.

Yesterday's discussion of the two drafts brought forth a duel of words between Premier Lloyd-George of Great Britain and Louis Barthou, chief of the French delegation, which the auditors described as both witty and satirical.

Signor Schanzer, Italy, as usual, took a leading role in the discussion, urging conciliation between the French and British delegates. In this stand he was supported by Dr. Motts, Switzerland, and M. Skirmunt, Poland.

BEST COUGH MIXTURE IS HOME MADE

Acts With Speed—Loosens the Phelgm—Stops Irritation and Coughing Ceases

Fine for Chest Too and Is Cheaply Made at Home

When you make, in two minutes, a world beating remedy that acts directly on the membrane and often overnight causes stubborn coughs and even hard chest colds to disappear, why trifle with things that will probably disappoint.

Hawking and snuffling and also soreness of the mucous membrane go and you will feel fine in almost no time.

Just get one ounce of Parmint (double strength) add to it a little sugar and enough hot water to make a half a pint and you've got an inexpensive remedy better than you can buy ready mixed.

Its soothing, healing action on the membrane is the reason so many people use it for Catarrh and acute nasal colds.

RADIO REVIVES NEED ESPERANTO.

One of the Subjects Taken Up By Wireless Experts—Rapid Progress.

LONDON, April 29.—Radio is reviving the movement for an international language.

Out of the international radio conference held here comes the suggestion of adopting some language, like Esperanto, so that radio fans the world over may understand one another.

This is one of the subjects taken up by the wireless experts of America, England, France and Germany at this conference. It was suggested by Edward J. Nally, President of an American radio distributing firm.

Need of Esperanto.

"One of our greatest hopes," said Nally, "is the establishment of an international radio language or code, like Esperanto, which could be understood by all. This would place the activities of the whole world at everybody's ears.

"There is no reason why every American school house should not have a simple wireless apparatus to enable teacher and pupils to listen to what the rest of the world is doing."

Esperanto, the proposed language by which this world-wide communication may be made possible, has already been accepted by many countries as the language of the world. It was composed by Dr. L. I. Zamenhof, the Russian linguist, in 1887.

Since then Esperanto has spread in popularity until now Brazil, Czechoslovakia, Russia, Finland and important parts of other countries have introduced the language in their schools. The Paris Chamber of Commerce is carrying on a campaign for the adoption of Esperanto by all the world's commercial bodies as the official commercial language of the world.

Argument Strengthened.

The chief argument for Esperanto as the international language is being strengthened through the popularity of radio the world over. It is thought that this will draw humanity closer together by a single medium of intercommunication.

With the rapid progress made in the development of radio as a worldwide means of communication, the need of such language as Esperanto becomes more apparent. ....

"DUTCH MARKET" CAMPBELLFORD A HUGE SUCCESS.

A Perfectly Delightful Social Event Thronged By Crowds of Enthusiastic Visitors.

CAMPBELLFORD, April 28.. — "The Dutch Market" held in Parish Hall on Thursday afternoon, under the auspices of the Willing Workers of Christ Church, was, as anticipated, a huge success from every stand point. All afternoon, throngs wended their way into the hall which once inside the guests found to be a veritable Holland, with its tulips— tulips everywhere— and— great flapping windmills over each booth containing its inviting wares. Here smiling ladies—catered to the wants of all. One could not help but linger over the Fancy Work and Sewing Booth, with all its dainty articles for young and old. Those in charge were Mesdames E. J. Burling, Fred Linton., Robt. Patrick and Miss Annie Martin. The Home Cooking table, with its load of toothsome viands was in charge of Mesdames Charles Benor, Fred Lang and Miss Mae Moffat.

The Candy Table with its load of sweets was presided over by Mesdames A. J. Jenkins, I. A. Humphries and Miss Jennie Martin The Ice Cream booth did a flourishing business under the charge of Mesdames Edwin Henson and A. Maun. Busy anglers frequented the fish pond which was in charge of Mrs. Matt. Sergeant and her class and seemed to have the best of luck. The pretty little tea tables which looked most charming and inviting were in charge of Mesdames Harris, Archer, and Misses Bedford and Maynard, who were as busy as Dutch housewives invariably are as six o'clock drew near, the guests were invited to visit the dining room where supper was daintily served in country fashion, the tables fairly groaning under the loads of good things, served by youthful maids, with white caps decorated in dutch style. Here too the decorations were tulips and little Dutch wives. The waitresses Misses Isabel Cleugh, Reta Baker, Helen Bygott, Kathleen Bygott, Doris Bonnycastle, Frances Bonnycastle, Evelyn Bonnycastle and Alice Reid. Mesdames Ernest Cassan and Charles Bonnycastle were in charge of the supper and to their efforts is largely due its great success. Supper over the Clemen's four piece orchestra Messrs E. Clemens, Clarence McKeel, Leslie Clegg and Everett Thomas, furnished several selections which were heartily appreciated. Rev. C. E. Clark occupied the chair in his usual efficient manner and the following pleasing Dutch programme was rendered "Tulip Time in Holland" was sweetly sung by Miss Bygott in which a group of six girls joined in the chorus. Mr. Gledhill's humorous reading "Imitation" called forth much applause. Miss Doris Sutton sang in sweet voice "By the side of the Zyder Zee" Mr. F. C. Bonnycastle in his usual genial manner acted as auctioneer and found ready buyers for his appetizing cakes, pies, bread, and useful articles of apparel. A duet "Little Dutch Colleen" by Master George Runions and Isabel Bygott, with chorus of girls was heartily encored, to which they responded. A solo "Poor John" by Miss Maggie Kitchen, was also heartily encored. Miss Colville, President of the Willing Workers, in a brief speech, expressed her thanks to the willing workers and all who assisted in any way toward making the bazaar such an unqualified success. The meeting then closed with the National Anthem.

Personal News

Mr.. Jack McCallum of the McCallum Marble Works, Kingston, formerly of town was in town a couple of days this week.

A BIT OF LOCAL HISTORY FROM 90 YEARS BACK.

How Three Peterboro Churches Acquired Their Sites.

In the brief review of the history of Methodism in Peterboro given at the annual meeting of the Methdist Social Union on Wednesday evening, mention was made of the rather curious circumstances surrounding the land on which Trinity church is built. Ninety years previous to the erection of Trinity, land was set apart on Rubidge street by the Legislative Council, for the erection of three churches; St. John's Anglican Church, St. Peter's Roman Catholic Cathderal, St. Andrew's Presbyterian church. However, the trustees of St. John's church preferred the site where their present building is erected, and the change was made according to their wishes. The property on Rubidge street passed into private hands, and was eventually owned by the late Hon. George A. Cox, whose estate made a gift of the land to the Trinity church authorities. After nearly a century of time, therefore, the will of the original body of men who planned for the erection of three churches on Rubidge street was carried out.

STRIKE AVERTED.

NEW YORK, April 29. Canadian Press. — A possible strike of union paper mill workers next Monday was averted, at least temporarily, late yesterday afternoon, when union leaders and the representatives of the manufacturers agreed to a two weeks truce. The present wage agreement, which would have expired on Monday, will be continued during the armistice.

SEEDING HELD UP.

LETHBRIDGE, Alta., April 20. —Canadian Press. — Seeding is again held up in the Lethbridge district by a heavy rain early yesterday morning. One-third of an inch of rain was recorded.

"Oh! My Back"

HOUSE cleaning is bad enough at any time. There is so much dust and dirt and turmoil.

But it is usually the exposure to cold drafts and the stretching and straining that bring calamitous results.

The kidneys are extremely sensitive to currents of cold air, and you are very likely to find this out suddenly when stretching or straining the muscles of the back.

Suddenly the pain seizes you, and there is of necessity a lull in the house-cleaning activities for a time.

There is nothing like Dr. Chase's Kidney-Liver Pills for kidney troubles of any kind.

Not only on account of their direct action on the kidneys, but also because they arouse the activity of the liver and bowels as well, and thereby relieve the kidneys of much of their work.

Another thing about Dr. Chase's Kidney-Liver Pills, you do not have to wait long for results. In a day or two you will obtain great relief, and a few weeks' treatment will usually overcome complicated derangements of the kidneys which have defied ordinary kidney medicines.

Mrs. Wm. H. Comeau, Plympton, N.S., writes: "I had been suffering from lame back, and had taken medicine for some time, but nothing helped me until I started to use Dr. Chase's Kidney-Liver Pills. These pills completely relieved me in a few weeks, and I have never been bothered with lame back since."

Dr. Chase's Kidney - Liver Pills, one pill a dose, 25c a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

SAYS CANADA HAS SAVED COMPETITION

NEURALGIA AND SCIATICA

Caused by Starved Nerves Due to Weak, Watery Blood.

People think of neuralgia as a pain in the head or face, but neuralgia may affect any nerve of the body. Different names are given to it when it affects certain nerves. Thus neuralgia of the sciatic nerve is called sciatica, but the character of the pain and the nature of the disease is the same. The cause is the same, and the remedy to be effective, must be the same. The pain of neuralgia, whether it takes the form of sciatica, or whether it affects the face and head, is caused by starved nerves. The blood, which normally carries nourishment to the nerves, for some reason no longer does so and the excruciating pain you feel is the cry of the nerves for food. The reason why the blood fails to properly nourish the nerves is usually because the blood itself is weak and thin.
When you build up the thin blood with Dr. Williams' Pink Pills, you are attacking neuralgia, sciatica and kindred diseases at the root. The value of these pills in cases of this kind is shown by the experience of Miss Beulah M. Fairweather, Cumberland Bay, N.S., who says: "A few years ago, following an attack of measles, I was left in a badly run-down condition. I was weak and very nervous, and had no appetite. A doctor was called in and gave me medicine, but it did not help me. My blood was thin and my hands and my feet were always cold. Then to add to my misery I was attacked with neuralgia, from which I suffered greatly. I was reduced to a mere skeleton, and did not care whether I lived or not. I was in this deplorable condition when I began taking Dr. Williams' Pink Pills. It was some time before I could notice any benefit from the pills, but before a half a dozen boxes were used there was no doubt that they were helping me. Then I got six more boxes, and before they were done, I was once more enjoying good health and am now strong and healthy. I shall always feel grateful for what the pills have done for me, and urge all weak people to give them a trial."
You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

CALOMEL IS GREATEST MEDICINE IN WORLD FOR PEOPLE WHO ARE NOT WELL

The Only Medicine That Acts Upon the Liver

People who suffer from Indigestion, Rheumatism, Headaches, Biliousness, Constipation and Kidney Pains will find almost instant relief by taking one Tanated Calomel Tablet before meals or two at bedtime. The secret of the success of this medicine is due to the fact that it is the only medicine that acts upon the liver. No salts, seidlitz or castor oil are necessary after taking Tanated Calomel, for it is self-eliminating. When the liver fails to excrete bile into the intestines they become filled with waste and the whole system becomes poisoned, causes all kinds of sickness. If you do not feel well get a small box of Tanated Calomel from the druggist and you will feel fine in a day or so. It is sold by F. C. Webber, Charlotte street.

PETERBOROUGH IS VERY FORTUNATE

Appearance Here of His Majesty's Famous Scots Guards Band Saturday, May 6th.

The arrival at the end of the present month of the band of His Majesty's Scot Guards on the Empress of Scotland to give a series of miiltary concerts on behalf of the Great War Veterans Association is being loked forward to by all lovers of music, for there is no military band in Great Britain which has a higher reputation than that conducted by Lieut. F. W. Wood, who has a wonderful ability in interpreting the compositions of the world's most famous composers. The tour, which will last throughout the month of May, is under the direction of Dr. Charles Harriss, of Ottawa, himself famous as the director of the Imperial Choir of ten tousand voices and the massed bands of the Brigade of Guards which gave a Thanksgiving perforance in Hyde Park before the King and Queen and nearly a million of his subjects. The famous band is coming to Canada at the direct official request of the Canadian Government, and with the support of the British Government, His Majesty the King having given it special permission to make the tour sa as to help on the work being done by the Great War Veterans Association. Everyone of th: musicians who comprise the bands are experts, there being more soloists in the organization than in any other similiar body. The first four concerts will take place in Montreal on May 2 and 3, and the band will visit Peterborough on May 6th, for an evening performance. Their programme includes the works of Elgar ,Wagner, Sullivan, Tschaikowsky, Berlioz Puccini Saint-Saens, and a host of other composers whose classical works are a delight at all times but interpreted by the Scots Guards Band will be a musical treat that will draw music lovers from far and near to hear.

MENNONITES ARE MET BY MEXICANS WITH OPEN ARMS

Bishop J. P. Wall Denies Report That They Were Not Satisfied With New Land.

MORE TO GO.

MINNEAPOLIS, Minn., April 29—(Canadian Press).—Bishop J. P. Wall, head of the Old Colony Mennonite Church at Hague, Sask., denied yesterday the truth of reports in Canadian papers that the first Mennonite settlers in Mexico had found the country and people inhospitable and were eager to return. He said there is nothing but gratitude expressed by the Mennonites who have gone to Mexico for the reception by the Mexican people and intimated that propaganda motives were behind the reports.

THE KAWARTHA LAKES

The Kawartha Lakes are among the most popular of Ontario's summer playgrounds. The region was long a favored one with the Indians who gave it its musical name, signifying "Bright Waters and Happy Lands." The Kawartha chain comprises Lakes Katchewanooka, Clear, Stoney, Buckhorn, Chemong, Pigeon, Bald, Sturgeon, Cameron and Balsam, and they are six hundred feet above the level of Lake Ontario. Every form of outdoor recreation may be indulged in, there being unlimited opportunities for sailing, canoeing and motor-boating, for bathing and for fishing. Bass, maskimonge and salmon trout are caught in the large lakes, while there is good fishing for speckled trout in the smaller lakes in the district. The region is easy of access, has good hotel accommodation and is within 125 miles of Toronto on the Grand Trunk Railway System. Free illustrated booklet with map and list of hotels sent on request. APPLY SULPHUR TO HEAL UP YOUR SKIN

Broken out Skin and Itching Eczema Helped over Night.

For unsightly skin eruptions, rash or blotches on the face, neck, arms or body you do not have to wait for relief from torture or embarrassment—declares a noted skin specialist. Apply a little Mentho-Sulphur and improvement shows the next day.

Because of its germ destroying properties nothing has ever been found to take the place of this sulphur preparation. The moment you apply it healing begins. Only those who have had unsightly skin troubles can know the delight this Mentho-Sulphur brings. Even fiery itching eczema is dried up.

Get a small jar from any good druggist and use it like cold cream.

SAGE AND SULPHER DARKENS GRAY HAIR

It's Grandmother's Recipe to Restore Colour, Gloss and Attractiveness.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural colour and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is mussy and troublesome. Nowadays by asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recipe, improved by the addition of other ingredients at a small cost.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, glossy, and attractive.

OTONABEE HAS FALLEN 19 INS.

River Receded Rapidly Recently and Little Lake Is Almost at Summer Level — Stoney Lake Is Down Nine Inches.

The water level below the Peterboro lock has dropped to 15 feet 1 inch from its high mark of 16 feet 8 inches, and from all sections of the canal similar recessions are reported. The fall here was nineteen inches in a few days, and in Stoney Lake it has moved from 11 feet 5 inches to 10 feet 6 inches, a difference of nine inches. The Stony Lake peak on the water guage was only two inches less than the record made in 1913, but at Peterborough this Spring's freshet was five inches beneath the 17 feet 1 inch record which was also made in 1913.

The head of water at the Peterboro Lock might have reached the 17 inch mark this season were it not for the effect of the dredging in the river below the city in recent years. Obstructing bars and shoals have been channelled offering a deeper and straighter course for the water. The Yankee Bonnett ridge or rocks that was strung across the river with only a straight for the steamboats was practically turned parallel to the stream. Bars at Howden's, Robinson's Island, Danger field, and T.A.S. Park were also extensively dredged, and the result of all this work has been experienced this Spring in the freer and faster flowing of the river south west of the city. Another outlet is the third opening that has been dredged into Rice Lake at the mouth of the river. The level at the George street wharf is almost at summer height.

pledge neutrality and the Canton government thereupon demanded that the squadron be surrendered.

This was refused, and the gunboats cleared for action, evidently preparing to bombard Canton.

Suddenly three bombing planes loomed into view over the river and commenced dropping explosives. All of the bombs landed in the river except the one which hit the Haichi.

War Vessels Helpless.

This burst with a terrific explosion, the despatches said, partially wrecking the boat, dismounting its guns and strewing its deck with dead and maimed. Bits of debris showered over the other eight gunboats.

The war vessels were helpless agains the aircraft, their guns being useless for high angle fire. As the air fleet pivoted and returned to the attack, surrender signals were hoisted by the whole fleet.

These gunboats were the last of the Peking Government's navy.

HALIAFX EXPLOSION WRECKED HER NERVES

The reader will, no doubt, remember when a few years ago there was a collision in the Halifax, N.S., Harbor and one of the munition ships was blown up, causing great loss of life and laying a large portion of the city in ruins, and causing a great deal of suffering and distress among the inhabitants.

Mrs. Winfield Dill, now of Windsor, N.S., was living in Halifax at that time and went through this trying experience and the shock wrecked her nerves. She writes as follows: "I was living in Halifax at the time of the explosion, and it wrecked my nerves so that I could not do my housework. I would take such nervous spells I would be under the doctor's care.

I saw Milburn's Heart and Nerve Pills advertised, so I took two boxes and they helped me so much I took six more, and now I am completely relieved. I can recommend them to anyone suffering from heart and nerve trouble."

To all those who suffer from nervous shock we would recommend our

NO SALARY INCREASE

(Continued from Page 1.)

"There's no appropriation for it," the chairman put in.

"I'd rather see them go in and join the other band and be more sociable," was Ald. Crowe's suggestion for clearing the situation.

"I move the letter be received."

"And I second it," said Ald. Stocker.

The motion carried.

Asked Increase.

The request for an increase in salary from F. W. Miller, city relief officer, sent to the committee from the Council, was considered, and after a sympathetic review of the situation by Ald. Crowe, coincided in by the other members, was refused on the ground that there was no allowance made in the appropriations. Mr. Miller in his letter stated that he had given up the position of truant officer in the schools at a loss of $500.00 yearly.

Mr. Miller, it was stated, receives $1,000, and is the lowest paid city official. The committee recognised that the salary was not a large one, but Ald. Crowe pointed out it was as much and more than most working men hoped to earn.

Has Not Imposed on City.

Ald. Stocker remarked that a good man was necessary, as it afforded opportunities to impose on the city.

Ald. Crowe produced an imposing array of figures to show what is paid in other cities. In Brantford last year one man filled the positions of sanitary inspector and relief officer for $1,800 a year; in Kitchener, a regular "pooh bah," sanitary and plumbing inspector and relief officer got $1,500; in St. Catharines, the two positions of sanitary inspector and relief officer were filled for $1,500; and in St. Thomas the three for the same sum; while in Kingston the two jobs cost $900.00. Peterborough's total for the three was $4,000 last year.

The Request Refused.

Ald. Crowe's figures seemed to leave the other members with little to say.

The chairman wanted to know whether they would grant an increase or not.

Ald. Crowe said no. He suggested that if any increases were going the female help at the City Hall should receive first consideration.

Ald. McIntyre and Ald. Phelan fell in with this line of thought and the request on motion of Ald. Crowe and McIntyre, was not granted.

"Now stay with it," said the seconder to the mover as a last word.

"Oh, I'll stay. I either sink or swim," assured Ald. Crowe. "I soon won't have a neighbour speak to me if I stay in this Council much longer," drily added the Brock Street member in retrospect.

Nothing for Playgrounds.

No action was taken in regard to a grant to the Playgrounds Association, which had not been definitely settled. The committee stood firm on a policy of retrenchment on grants.

"I can't see where we can get the money," said the chairman, and Ald. Stocker went on to remind him that the grading on Hunter Street was eating a big hole in the Board of Works appropriation. The work was costing $110.00 a day, he said.

A Grant Allowed.

The Trent Waterway Development Association fared better than any other cause last night, but it was only because allowance had been made in the appropriations. A grant of $300.00 was recommended towards the expense of advertising Peterborough in the recent booklets issued by the association, of which upwards of 50,000 have been printed. It was felt that Peterborough could afford to do as well by the association as Orillia and other places.

The recommendation went through on the motion of Ald. Crowe and Ald. Stocker.

Bulky Audit This Year.

City Auditor Fred Hall completed the audit yesterday, the chairman remarked, and the committee had to make arrangements for the printing, which is a big job this year, the City Clerk said, on acocunt of the Utilities Commission accounts being embodied in detail.

Tenders will be called for, and the chairman was authorised to let the contract for 100 copies.

Appeal Assessment.

Notice was received from the township of North Monaghan that the city is being assessed $2,000 on the property owned in that township on which a sewage disposal plant is proposed to be erected. As none of this land will be rented to campers this year and the city is not liable to assessment, the city solicitor was instructed to enter an appeal.

Sell Debentures Locally.

The city treasurer was authorised to sell the accumulated local improvement debentures, totalling over $20,000, locally at a rate to yield the investors 5.60 per cent. A ready market is looked for. It is estimated that the city will require about $250,000 from the Bank of Montreal in connection with capital expenditure this year, and the bank will be notified to make such provision, the committee decided.

How I Earn $15 to $25 a week at home in my SPARE TIME

By Wm. S. Coulthard

I needed more money.

I had a lot of time on my hands in the evenings, Saturday afternoon, etc.—for I had no hobby—and besides my expenses had been mounting fast—so you will see the receptive mood I was in when I saw your little ad, "MAKE MONEY AT HOME."

I sent for your free booklet.

I read it.

Your plan looked good to me—your guarantee so liberal—and on investigation I found you were reliable, so I accepted your offer. If others could make money by your plan, I could.

That was less than a year ago.

Now I am earning $15.00 to $25.00 a week, each week, writing show cards in my spare time. In addition to this, I still hold my regular job, and my salary has been increased there, too. I believe my spar time work has made me better satisfied with life, and so I'm doing my regular work better.

I have been offered positions writing show cards, but I am not interested, as my present position is perfectly satisfactory, but I certainly am glad I enrolled in your school—my spare time money is exceedingly attractive. Besides, I find show card writing an interesting occupation that fills in those evening hours that used to drag so. In fact, it is really a hobby now with me—and a profitable one, as you can well imagine. Only last week I received a check from your school for $70.00 for work done over the last three weeks. Of course, you'd have paid me regularly each week if I'd bothered about it, but I was too busy to tell you the amount of work I'd finished.

There are times, however, that I feel show card writing by your simple method is almost too good a thing—that's when I have so many orders ahead that I cannot see my way clear to finish them—and have to turn down work.

Your system of supplying work to your students has certainly helped me, but sometimes you send too much—I'm only working at it in my spare time, you know. Please note this, and don't try to overload me too much.

By the way, I think you'll be interested to know that previous to enrolling in your school I had never tried my hand at any work of this nature.

I'm glad to thank you for what you've done for me—and you can certainly use my name and tell prospective students, for I'll be doing anyone a real good turn if I can help them get started in this profitable work.

Yours sincerely,
WM. S. COULTHARD.

NOTE:—The above is the story of Mr. Coulthard. It tells of facts, for Show Card Writing offers a marvellous opportunity to both men and women, either for spare time or full time work. What Mr. Coulthard has done and is doing, you can do. Colbran, Dusenberry, Wendt, Blade, Poulson, Charles, Wright, Babieau and many other men have proved it. Mrs. Litherdale, Mrs. Lush, Mrs. Le Moine and dozens of housewives have added to the family income in this way. Girls like Misses MacDonald, Clegg, Bordreau and Hoyle are but a few of those who have bettered their positions in this pleasant way. All these owe their success to the American Show Card School method of training—the old established school which has trained hundreds to make money in SHOW CARDS. The American Show Card School will gladly send you full particulars if you but send your name and address to them. Use this Coupon.

PRODUCE SCARCE ON LOCAL MARKET

Butter Firm at Forty cents --Plenty of Potatoes

Although the day was bright and sunny, there was not a very large market this morning, and carts along the curb held small variety. Plenty of potatoes were in evidence, at a price of $1.50 per bag, a higher sum than that demanded in the store, but vegetable produce was scarce. Onions, carrots, at 30 and 45 cents per peck, cabbages in small quantities, comprised the contents of a couple of waggons. Little, pink squealing porkers were visible on all sides, huddled together in crates, at $14 per pair, and one lady had a quantity of maple syrup, "first run," at 65 cents per quart.

The flower-man had a pile of young tree saplings, at varying prices; purple-blossomed pansies, three roots for a quarter, roots of marguerite daisies and Canterbury bells, and a velvety-petalled brown and cream English primrose in a small pot. The fish dealer had a rival this morning, a gentleman, whose sole stock-in-trade consisted of large flat suckers, at ten cents apiece, with plenty of purchasers.

Over in the corner, two little boys harbored a couple of small grey, long-eared bunnies, a dollar a pair.

Last week's exuberant supply of butter and eggs was entirely absent in the basket market. The supply and the vendors were limited this morning. Butter was firm at forty cents a pound, and eggs at twenty-seven cents per dozen, with one lady compromising at twenty-six and a half. Cream was plentiful, selling for fifty cents a quart sealer; there was a small quantity of black butter beans at ten cents a measure, and fresh-looking horseradish at twenty-five cents a half pint.

THE MARKETS

NEW YORK, April 29.—(Canadian Press).—Opening prices in to-day's Stock Market indicated a further retirement of short interest and an extension of yesterday's general rally. Oils, Rails, Steels and Coppers were the strongest features. Standard Oils of New Jersey and California, Mexican Petroleum and Texas Company rose one to two points. Wheeling and Lake Erie Common and Preferred gained 1 and 1¼ points respectively. Bethlehem Steel and American Smelting averaged one point gain. National Biscuit was the strongest of the specialties, adding three points to yesterday's brisk rise. American Sugar Corn Products and Industrial Alcohol responded moderately to further buying.

MONTREAL MARKET.

MONTREAL, April 29.—(Canadian Press).— The upward trend of prices was continued conspicuously this morning on the local Stock Exchange, Papers, as was the case yesterday, leading the market in strength and activity. Abitibi was up another point to 53, the high touched a few days ago. Price Bros. sold a quarter higher at 44¼, while Spanish River advanced three-quarters to 83½; the Preferred was up 1 1-8 at 94. Brazilian was another strong feature this morning, and sold three-quarters higher at 45. Consolidated Smelters was unchanged at 23.

IT'S CHEAPER TO BUY ICE THAN IT IS TO SPOIL FOOD!

A few cents a day will buy enough ice for the average family's use. Food of course costs many times as much, and you cannot afford to waste it by allowing it to spoil during the warm weather. THE COMFORT OF HAVING ICE cannot be measured in money, for it means your food supplies will be kept fresh and appetizing. Where there are children ice is essential: the milk they must have cannot be kept sweet and fresh without it.

BUT BUY PURE ICE

Ice that is absolutely free from bacteria, that can be used safely in drinking water, that can be placed in contact with food without contaminating the latter. In Peterborough that means

Safe, Dependable SANITARY ICE *Pure, Economical*

Made from pure spring water, pumped from deep artesian wells, and filtered before it is frozen. Marble Ice, made without air, so that it cannot honeycomb and therefore lasts longer than other ice.

REPORT.— No. 48733 - SAMPLE OF ICE.

Sanitary Ice Supply,
Peterborough, Ont.,

Gentlemen:-

We have made a bacteriological examination of the 25 lb. sample of Ice which you sent to us for test.

The results of the tests indicate the Ice to be free from harmful bacteria and in good condition for domestic consumption.

Yours very truly,
MILTON HERSEY COMPANY, LIMITED.
VICE-PRESIDENT.

SANITARY ICE FACTS

Made from pure water.
Lasts longer than natural ice.
Safe, sure and economical.
You buy it by ticket, only paying for what you use.
When you don't need ice you don't have to pay for it.
Sanitary Ice Service is always at your service.

BE ON THE SAFE SIDE

Ice is not free from Germs, one freezing does not destroy Bacteria: repeated freezings may do so, but Spores resist all freezings, only lying dormant until the Ice has been subjected to heat when they again become active. Ice obtained from rivers and lakes cannot be pure, especially of late years, on account of waste matter emptied into the streams by the constantly increasing numbers of summer resorts, farm barn-yards and camps which have no other sewerage than the lakes and streams.

Ice thus obtained ought not to be used for consumption, nor allowed to come in direct contact in any way with food.

USE SANITARY ICE - IT'S PURE

JUST A WORD ABOUT REFRIGERATORS

We appreciate the fact that many families who want to take Ice have been unable to buy a Refrigerator. We have therefore evolved a plan by which Refrigerators can be secured on easy monthly payments, with a Free Supply of Sanitary Ice for this season. We start delivering Ice under this arrangement on Monday, so that in order to get the full benefit of this plan you should place your order at once. We would be glad to tell you all about this arrangement.

FAIR BOARD FAVORS JUDGES' EXAMINATION

(Continued from page 1.)

this would prevent farmers' sons from securing positions as judges, but Mr. Kelly said he was deeply impressed by Mr. Wilson's idea.

Mr. R. B. Rogers said he thought the suggestion was a splendid one and urged that the Board support Mr. Wilson's scheme. He seconded Mr. Kelly's motion expressing the Board's approval of the proposal of J. Lockie Wilson, who is superintendent of fairs in Ontario, that judges be examined as to their qualifications.

Another recommended change reported by Mr. Kelly provided that in the ladies' and gentlemen's driving outfits 60 p.c. be allowed for horses, 10 p.c. for harness, whip and lap rugs, and 30 p.c. for the carriages. This would clearly define the outfits and exclude what Mr. Kelly referred to as knick-knacks.

Fee For the Track.

The Board unearthed an old resolution fixing a fee for the use of the race track during the summer for working out trotting horses. Mr. Brown said that the owners of the horses held they should be allowed to use the track without any charge, but the directors unanimously agreed that this was asking too great a privilege.

On Mr. Balls motion, seconded by Mr. Baptie, they will be called upon to pay a fine of $10 and also to keep the course in good condition, but will be given full use of the stables.

Are Your Valuable Papers Safe?

Very often people who would not take the chance of keeping large sums of money in their homes will think little of leaving valuable bonds or other documents practically unprotected.

A fire or burglary in such cases may easily cause a heavy loss.

Protection for such valuables is obtained at little expense by renting a safety deposit box in The Bank of Nova Scotia.

"PRINCESS ZARA" AT THE GRAND

(By Jeannette)

A packed house greeted the first performance at the Grand Opera House last evening of "Princess Zara", the operetta produced under the auspices of the Literary Society of the Peterborough Collegiate Institute.

The production of the English fairy tale was beautiful done, under the capable direction of Mr. Martin Chenhall, A.R.C.O.. From the first pretty dance to the ensemble chorus which precedes the final fall of the curtain, the interest of the onlookers is held by the effective unfolding of the whimsical, humorous story, and the skill of the actors, whose performance, considering their youth and unfamiliarity with stage-craft, is surprisingly good.

The plot of the piece centers around the temperamental whimsies of the aged King Buonocor, a confirmed repeater of ancient "chestnuts" and an anti-superstitionist who trolls forth in song his defiance of signs and omens, and orders a dinner where cracked mirrors, cross eyed waiters and spilled salt shall be in evidence. The King, a pompous figure in velvet suit, with red plush, gold-banded crown and quivering Vandyke beard, is enacted by Martin Chenhall, Jr., and brings down upon himself by his folly the curse of the witches, an eerie band of black-gowned hags, with brooms, elf-locks, and pointed black hats adorned with spitting silver cats. The leader, Grewsom, (Mildred Bailey) is particularly good in her presentation of cracked voice beldame.

Miss Debra Armstrong, as Princess Zara, is a lovely young figure in gowns of blue and white, and her performance is the outstanding note of the production. With a lack of self-consciousness which gives an almost professional air to her part, a histrionic power surprising in one so young, and a sweet voice, Miss Armstrong received renewed applause in her portrayal of the wilful princess who is made queen by her father, comes under the spell of the witches, and proceeds to make life miserable for her unhappy attendants. Her father and lover aire banished to the kitchen and, because of the toughness of their cookery, finally condemned to death. There is a whimsical scene between the lady and Prince Florizel (Ernest Legon) when the latter, garbed in his cook's outfit, makes love to the queen, who returns his devotion, only to spring up a minute later and demand that his head come off, something in the manner of the cruel queen in "Alice in Wonderland".

Baron Locomo, the Kings' minister, (Eric Finlay) has a most unhappy time. Having unwittingly incurred the displeasure of the little queen, he is ordered to be boiled alive, but escapes in the middle of the event by reason of his 'stoker' being called away to form the principal actor in his own execution. The Baron, in a lobster-like condition, gives a recital of his woes which is shrinkingly effective, and does a splendid bit of acting during the narrative.

Throughout the whole of the play the faries battle with the wicked witches to break the spell under which the unhappy Princess labors. Helen Lamb is their queen, "Butter fly", and her good offices finally triumph, and the dark crew retires in dismay. The band of fairies form a lovely guard for their little queen a group of airy, fairly, light-footed damsels in rainbow-hued gossamer draperies, with extended butterfly wings.. Audrey Lacheur is Violetta, chief maid of honour, Tortoiseshell a fairy, is enacted by Margaret Denne; Doris Clegg and Helena Curtis are pretty maids of honour. Firenze and Carina, and Ian Munro is Camillo, the Prince's friend, in satin suit with cerise breeches. Pages in red and green (Lionel Chapman and Walter Sutton) and guards in red (Arthur Jackson and Bert Lindley) added colorful touches.

The costumes are exceptionally pretty. The Maids of Honour, dainty maidens in pointed-waisted gowns with panniers and fichus, and pink roses in powdered hair, have lovely soft-hued dresses, and the nobles are dignified gentlemen in knee breeches, suits of satin and velvet, and stiffly-tied perukes. A gavotte by the maids of honour and nobles was a soft-moving maze of many-hued quaint figures.

"Who'll Buy?" was a dainty song and dance number by the Flower Girls fetching damsels in short red skirts, black-jacketed blouses, orange sashes and caps, and the fairies have several light and airy choral selections, the shimmering creatures under the coloured spot giving an effect of dancing flowers.

The witches have several well-executed weird choruse, and form a grewsome background with hissing refrain for the fantastic duet between the two transplanted cooks brandishing shining frying-pans.

The princess has several tuneful songs, excellently rendered in Miss Armstrong's clear melodious soprano, a particularly fine effect being achieved in the final solo, "O Father Dear", where the wilful princess craves her father's pardon, and the musical number include several very pretty choruses. In these, as in the dainty dances, exceptional training is manifested, making a splendid exhibition of the skill of the director, Mr. Martin Chenhall. The committee in charge is to be congratulated on the success of their exquisite production. V. R. Henry, M.A. acts as chairman of this committee; M. Chenhall, A.R.C.O. looks after the choruses; Miss Josephine Redmond B. A., of the dances; Miss Pearl Faint, M.A., of the elocution; Miss Hazel Moffat, B.A., the costumes and C. S. Browne M. A. is business manager.

The orchestra of the Collegiate Institute, an aggregation of fifteen members, rendered excellent service last evening in their accompaniments of the many solo and choral numbers. Just before the fall of the curtain, the "leading lady", the win some Princess Zara, was presented with a large bouquet of roses, the gift of her assembled Courtiers.

The operetta will be repeated this evening, and is well worth a return visit or of the patronage of any who were not present last evening.

Now She Doesn't Need The Doctor

WHY JOHN HAMILL PRAISES DODD'S KIDNEY PILLS.

When He Found Them His Wife Found Relief. That's Why He Tells Sufferers to Use Dodd's Kidney Pills.

Marietown, Sask., April 28.—(Special.)—Mr. John Hamill, a well known and highly respected resident here, is a firm believer in Dodd's Kidney Pills.

'I speak on behalf of my wife," Mr. Hamill says, when asked the reason why. 'She has been ailing for years. I had doctors attending her but she didn't seem to get any better.

"At last I found Dodd's Kidney Pills and my wife found relief. She kept taking them from time to time. Now she doesn't need the doctor.

"Also since childhood Mrs. Hamill has been a sufferer from constipation. She found relief from that in Diamond Dinner Pills."

Nine-tenths of the ills that dog the pathway of suffering women come from diseased kidneys. Ask your neighbors if Dodd's Kidney Pills do not make strong, healthy kidneys.

MASQUERADE EVENING AT ALL SAINTS HALL

A.Y.P.A. Held Successful Affair—Largely Attended

The A.Y.P.A. masquerade party, held in the Parish Hall of All Saints' church on Wednesday evening, April 24th, was a huge success. Commencing at 8 o'clock, strangely garbed figures began to assemble in the hall. By about 9 o'clock nearly all the A.Y.P.A. members and several friends had arrived. There were over 60 present.

The costumes showed great originality and the judges had no easy task deciding on the prize winners. It was only after much discussion that they reached their conclusion. The ladies' first prize was won by Mrs. Bennewith as an Indian Squaw and the second by Mrs. Fuller as the most comic lady. The first men's prize was won by Mr. Morden as an Indian chief, the second by Mr. W. Brockwell as the most comic gentleman.

Among some of the splendid costumes were: Irene Maconomy as a girl of 5 years ago, in crinnolin and hoop skirt and Charlotte Gulliver in a quaint old-fashioned costume; Miss O. Johnston as a Spanish dancer; Mrs. Fitzgerald as Night; Margaret McCarron as an Irish girl; Miss Twigg as a Spanish lady, not forgetting Mr. and Mrs. Sisson as Farmer Jack and his wife, who were the life of the party.

A splendid programme was arranged by the programe and entertaining committees. Several contests were played during the evening and the prize for these was won by Miss Gregson. Vocal solos were rendered by Miss Bates, Miss Gatfield and Mr. Willis. The pianist for the evening was Mrs. Hanna.

At 10.30 supper was served, after which a sing-song with most of the lights out, brought this most enjoyable evening to a close.

HOW YOU CAN BAR THE STATIC.

New Appliance Helps to Protect the House. Radio News.

By R. L. DUNCAN,
Director, Radio Institute of America.

All devices so far put forth to eliminate static interference also cut down the signal strength of the radio station.

But a balanced crystal set constructed by the English Marconi Company operates with fair success.

It consists of two carborundum detectors energized by a local battery current. One detector is adjusted to a high degree of sensitiveness and the other to a lesser degree.

When a heavy charge of static enters the aerial, the crashing sounds are somewhat eliminated by the reaction process of the crystal rectifiers. But the incoming signals are likewise weakened.

In tropical countries, where one ordinarily can receive transmission from a station 500 miles away, it is at times impossible to receive even 10 miles on account of static interference.

To reduce static interference to a minimum, most transmitting apparatus today employ a 500 or 600-cycle note—one having a high-pitched musical sound. Static comes in on a very low pitch.

A good way to cut down on static interference is to employ the least possible degree of coupling between the primary and secondary windings of the receiving tuner to the lowest point where the signals you wish to copy are still audible.

Don't forget to see that there is a good lightning switch on the aerial connection leading into the house. Not only is this necessary to comply with the rules of the fire underwriters, but it is a great protection for the house, making the aerial ground act as a lightning rod.

Watchman, What of the Corset?

It the corset going?

* * *

Is this to be a Figureless Year in Peterborough?

* * *

Will it soon be Good Form to be in Bad Form in this city?

* * *

Are Shapeless Weeks in the offing? We ask for to know.

* * *

These are serious questions. Serious questions are always popping up to complicate conditions. No sooner do we apparently solve all the major problems having to do with business and the home, and appear to be headed straight for peace and prosperity, than up bobs some new serious question.

* * *

Now it's the corset. The old-fashioned rubber-band garter is beginning to come back, according to the stylists. Everywhere the tendency among the fair sex seems to be to throw away something and put on something less.

* * *

Just what a garter has to do with a corset is a matter for no mere man to fathom, but 'tis reliably reported that general adoption of the old-fashioned "wristlet" garter means the discarding of the corset. All of which is taken as meaning a great menace to two great industries—the corset and bedroom furniture trades.

* * *

If the Peterborough woman stops wearing corsets, the corset shops will obviously have to suspend business, and, of course, there will be no further use for bedroom chairs, since there will be no corsets to throw over the back of 'em.

* * *

The corset manufacturers over the boundary are visibly alarmed. There are between 40,000,000 and 45,000,000 women in the United States. Over 66 per cent. of them are "consistent corset wearers," according to a prominent corset magnate. The other 34 per cent. are accounted for as follows:

* * *

Twenty per cent. live in places like Canarsie, Oil City, Wappinger's Falls, and Dodge City. (They don't get out much, either.)

Ten per cent. think their husbands are blind.

Two per cent. work in Al Woods shows or dress as if they ought to.

The other two have figures no corset can aid.

* * *

A "consistent corset wearer" is a woman who wears corsets because she has contracted the habit and who has passed the point where she can wear 'em or leave 'em alone.

* * *

Over 30,000,000 women in that country wear corsets every day. These are plain figures—or would be if they went around without corsets.

* * *

Now every woman has at least two pairs of corsets. That makes 60,000,000 corsets in that country. And, as Ignatius Innbadd would say, "that's a lot of corset."

* * *

If all these corsets could be placed end to end, they would—well, frankly, they would look like the very devil.

* * *

That isn't the way to place corsets. Nor would they show that way to the best effect. And after you placed them that way, think of the job lacing them! 'Sridiculous!

* * *

Thirty-five per cent. of the corset wearers are stout, near-stouts, or stylish stouts, according to estimates. The corset makers feel that this quota will never forsake them. Stout woman's place, they know, is in the corset.

* * *

All things considered, the corset makers incline to be optimistic. The garter craze, they hold, is a mere fad and will pass out after the husbands have gazed at their wives a few times and remarked, "Whatza-mattah, Ella? You're all out of alignment."

* * *

A rubber-band garter may hold up a stocking, but it takes a corset to hold up a form.

* * *

The head of one of the five largest corset companies in the country announced the other day that exhaustive tests had been made with stenographers which proved that a girl in a well-designed, well-fitted corset was in infinitely better shape at the end of a day than an ungirdled sister. "Better shape" is good.

REGAINS HER HEALTH BY INTERNAL BATHS

Mrs. Robert Gordon, 422 Cadillac Street, Montreal, Que., writes:

"I cannot speak too highly of the J. B.L. Cascade. It has saved my life. I have been troubled with constipation, piles and ulceration of the bowels for years, have only been using the Cascade for three months, and am happy to be doing my own work aagin after having been laid up for many months. I would not take one hundared dollars for my Cascade if I could not procure another."

Auto-intoxication (or self-poisoning) results from the accumulation of waste matter in the lower inestine. Its ill-effects may be manifested in many ways: commonly in headaches, indigestion, piles, impure blood or sleeplessness, and particularly in those dreaded diseases, hardening of the arteries and heart trouble,

Internal bathing is the one sure means of cleansing the intestinal tract, and keeping the system in the stae which perfect health demands. Medicines only force nature, while internal bathing gently assists her.

The J.B.L. Cascade is the only perfect appliance for Internal Bathing. It is shown and explained at the Warne Drug Company, Peterborough.

COMPLETELY FREE OF CONSTIPATION

Tried for Years to Find Relief

"FRUIT-A-TIVES" GAVE IT

Chronic Constipation or insufficient action of the bowels, is one of the great causes of disease. Some authorities even claim that Constipation cannot be permanently corrected. This is a great mistake, because here is the proof that constipation can be cured and the bowels made to act regularly and naturally.

YARMOUTH, N.S.

"For years, I was troubled with Constipation, and had to take laxatives and purgatives all the time. If I neglected to take these, the bowels would refuse to do their work.

About two years ago, *a friend advised me to try "Fruit-a-tives"*, which I did. The first box helped me so much that I obtained further supplies of the remedy and continued the treatment. After using about eight boxes, my bowels were able to perform their particular function without aid.

The relief in my case has been lasting, as up to date, I have never had any further trouble. I can recommend "Fruit-a-tives" to all suffering as I did and I am sure they will derive equal benefit".

"Fruit-a-tives" are sold by all dealers at 50c a box, 6 for $2.50, trial size 25c., or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Horticulturists to Hold Drive Here

Flowers Are Not Very Plentiful in Peterboro —The Objects

The week of May 1st to 6th has been set aside as horticultural week for Peterborough, during which time the Peterborough Horticultural Society will make a drive for membership. Doubtless there are as many women as men in the city who are interested in the work of the society, which has for its main object the beautifying of Peterborough. Women are members of the Executive Board of the association, and prizes have been offered by one lady for the most attractive window boxes maintained throughout the season.

One thing about Peterborough that is particularly noticeable in the summer season is its lack of color. Of course, there is plenty of green visible. With its long stretches of tree-shaded streets and well-kept lawns, the green note is bound to be emphasized, but, outside of the green and brown and grey of the grass and tree-trunks and pavements, colors are lacking. This is mainly due to the practise of growing flowers, if they are grown at all, in back yards or in shaded side-plots. There are few glowing flower-beds on front lawns or high spots of color anywhere visible in the near foreground of large, lawn-surrounded houses.

In Toronto, one sees flowers. Even on the smallest of back streets, the popular oleanders, with their profusely-flowering bright pink blooms, are in evidence in green tubs, and geraniums are in most of the windows, even if they shelter in tin cans. In Montreal, one goes in from the suburbs through a mile or two of dirty slums, where grey, twisted washing slants out from tenement windows and the loveliest of high-colored flowers and long, luxurious creeping vines cover ramshackle balconies. The French have an eye for color, and run to gorgeous reds and yellows when they pick their flower seeds. In St. Catharines and the Niagara district, there are wonderful gardens, filled with amazing reds, and purples and whites, in flowers that range from staely rose-bushes to the low-placed, vivid hues of the shy forget-me-not in dainty borders. But in Peterborough, we have few flaring gardens. Prim little spaces filled with dull-colored blossoms dot a few foregrounds, it is true, but most householders seem to be content with well-kept lawns and perhaps a stiff creeper over a verandah corner.

"SPRING."

Last night I wrote a sonnet
All redolent of Spring,
Of rippling rills and daffodils,
And birds that gaily sing.
It breathed of fragrant blossom,
The grace of clinging vine,
And O, my muse just revell'd in
The joys of sweet Springtime.

Last night I penn'd my poem,
When prospects promised fair,
When leafing trees, and B.V.D.'s
Seemed soon to be our share.
Alas, when I awakened,
The morn was cold and grey—
So I started up the furnace, and
I hid my song away.

Annual Exhibition of Gymnasium Work

The annual exhibition of gymnasium work of the Young Women's Christian Association will be held in the gymnasium at the Young Men's Association rooms on Thursday and Friday nights next, May 4th and 5th, when an exposition will be given of the work undertaken in the various gym. classes of the Y.W.C.A. during the season.

The grand march which preludes the performance has a total of over 80 people in it, from the tiny tots to the senior class members. Massed classes follow, with dumbell exercises by the Saturday juniors, nursery rhymes by the tiny tots, intervals of Swedish exercises, Indian club work, wans, single stick and apparatus work. There will be English folk dancing, an Indian dance and minuet in costume, an interpretative dance entitled "My Lady Goes a-Walking," by three little girls, and special numbers by the aesthetic dancing class, which include a poppy number, the Valse Brillante, Rustic Courtship and the Dresden China Gavotte.

PIMPLES ON FACE

DIDN'T LIKE TO GO OUT

Those nasty little pimples that break out on the face and other parts of the body are simply indications that the blood is out of order and requires purifying.

There is only one way to get rid of this obnoxious skin trouble, and that is by giving the blood a thorough cleansing which can best be done by that old reliable blood medicine,

BURDOCK BLOOD BITTERS

and when the blood is purified the pimples will vanish and you will have a clear, healthy complexion.

Miss Mary E. Flangan, R. R. No. 3, Stella, Ont., writes: "I have suffered for about two years with pimples and blotches breaking out on my face. The doctor said it was caused by bad blood. My face was so bad I didn't like to go out among a crowd of people. One day I was talking to a friend, and she advised me to get a bottle of Burdock Blood Bitters and try it. I took three bottles, and there was not a blotch or pimple of any kind left. Some of my friends asked me what I had used and I said, "Burdock Blood Bitters chased them."

Christian Mothers May Day "At Home"

A May Day "at home," under the auspices of the Christian Mothers' Society of St. Peter's Church will be held in St. Alphonsus' Lyceum on next Monday evening, May 1st. Decorations in keeping with the opening of the "merry month of May" have been planned, and the ladies in charge are arranging for a pleasant social event. The reconstructed concert hall at the lyceum, which affords such an excellent opportunity for dancing in new and attractive surroundings, will be used.

The Christian Mothers is a society of ladies whose good work is done in a quiet, unassuming way, and whose activities cover a large, unobtrusive area. They are occupied especially in visiting the sick who need their attention, and have at different times made arrangements for the care of tubercular patients and their removal to better surroundings. The extent of their charitable work during the past very hard winter was greater than usual, and many homes were visited by the faithful members, to contribute a little of help and attention where it was most needed. Church societies that number many of the Christian Mothers on their rolls also, are the Ladies' Sewing Society of St. Peter's and the West-End Knitting Club, both of these organizations doing most of the sewing, mending and knitting for the forty or more little boys and girls at St. Vincent's Orphanage.

To Speak Here for Local Rotary Club

An event which will probably prove of interest to most of the thinking women of the city is the address to be given here on Wednesday next, May 3rd, by Dr. Charles E. Barker, of Grand Rapids, Michigan. Dr. Barker, who will speak in the Grand Opera House under the auspices of the Rotary Club twice on Wednesday, addresses the men of the city in the evening on the subject of "A Father's Relationship and Responsibility To His Son." In the morning, he will speak to the boys and girls of the Collegiate Institute, and in the afternoon at the Opera House, he talks to the women of the city on "A Mother's Relationship and Responsibility To Her Daughter."

The lectures are absolutely free, all expenses being borne by the Rotary Club. Dr. Barker is not a medical practitioner, but has obtained University degrees as a doctor of hygiene and physical culture. Before deciding to work under the auspices of Rotary, he devoted his winters to lecturing to the general public on health matters for the International Committee of the Y.M.C.A., and in the summer months was on the Redpath Chautauqua platform as their leading health lecturer. During these years, he addressed over 1,500,000 people. He is described as a speaker of outstanding ability.

DANDRUFF.

Clean combs and brushes, scalp massages and occasional shampoos are enemies of dandruff. Dandruff is a main cause of baldness.

Housekeepers Are Familiar Enough with Clean-up-Week

Although the men folks who have introduced the idea of clean-up week to the community seem to think that they are the discoverers of a bright innovation, clean-up week—or weeks, rather—has been one of the yearly tasks of the lady of the house ever since the days when Mother Eve kept house in the first garden.

The lady on the can of Old Dutch cleanser is a good prototype of the woman of the home in the spring of the year. A young man's fancy may lightly turn to thoughts of love, as the poet declares, but a housewife's fancy has no such sickly hue. Her mind is concerned at this time, when the birds are building nests and the trees are budding, with questions of dark corners and box-encumbered attics. The odor of good yellow soap and the whirr of the vacuum cleaner form the background for her washing and cleaning activities.

A man's place in the home during house-cleaning time is negligible. His desire for comfort has no realization at all just now. He is supposed to be content with sketchy meals on table-corners, and to read his paper in rooms bereft of curtains and floor-coverings. If he is willing to lend a hand, there are all sorts of things that he can do; take up carpets, put up curtains, move heavy furniture and re-hang the pictures which he saw so earthly reason for removing in the first place.

In connection with spring cleaning, a Brantford paper reprints an article by Arthur Gibson, Dominion Entomologist, in The Canadian Veterinary Record, which gives some timely information on clothes moths. He says:

"These insects, like the carpet beetles and some other household pests, thrive best in situations where there is relatively little disturbance. Woollens, furs, etc., hung up in cupboards, or left in bureaus, are damaged to such an extent that their use is no longer possible. It is therefore important that such articles should be aired and carefully brushed before they are packed away in the spring. The method of protection which I personally follow is to place winter clothing, etc., after brushing, in a tight trunk and fumigate the same with bisulphide of carbon. The clothing is simply placed in the trunk and on the top of the same a saucer is placed, into which is poured about three ounces of bisulphide of carbon. The lid of the trunk should then be closed tightly and the fumigation allowed to continue for at least forty-eight hours. As the bisulphide of carbon is highly inflammable, no light, of course, of any kind, should be brought near the trunk while the fumigation is in progress. Afterwards, when the clothing, furs, etc., are removed from the trunk, they should be wrapped twice with strong wrapping paper, care being taken to see that the edges are turned so that no moths may enter."

Snowy white without boiling

THAT dull, grey, streaky look that you always had to boil out of your clothes is never there when you use Rinso. It soaks the dirt, softens it, loosens it so thoroughly that it all runs away in the rinsing, leaving the clothes sweet, snowy-white and fresh as new.

It's because Rinso is the new, modern scientific washing preparation that works in an entirely new way. It washes by soaking. It is altogether different from ordinary soaps and washing powders. So, it should be used differently. *Do not pour Rinso itself into the tub.* Make your Rinso liquid first, as per directions.

IF YOU USE A WASHING MACHINE

Soak your clothes in the Rinso suds as usual—for one hour, two hours, overnight, or whatever time is convenient. Then add more Rinso solution and work the machine. Rinse and dry—you'll have a clean, sweet, snow-white wash.

East or West—Eddy's Best—*since 1851!*

"Here's an Eddy — 40 years old!"

EDDY-TORIAL

The great industries and public utilities of to-day are the servants employed by modern society to serve itself.

Eddy's is an all-Canadian institution.

It is owned by Canadians. operated by Canadians, employs only Canadian capital, and its profits are kept in Canada for the development of other Canadian industries.

That it has attained national importance is proof that it has performed a service in an acceptable manner.

Always, everywhere in Canada ask for Eddy's Matches.

In an old shack near the Mattawa River, these matches—a relic of the old match-making days, a box of Eddy's matches made over forty years ago at Hull—were found last Autumn!

They had weathered the extremes of our Canadian climate, the heat and cold, the sleet, snow and rain for forty years.

It was an old sulphur match—the "Telegraph" Brand—the last word in matches at that time—a great match in its day.

Longer than Eddy's make to-day, it was wasteful. Still, it was a light, and a good one.

The most incredible thing of all was that after 40 years the matches were just as good as the day they were made, and the man who found them lit his pipe with one of these old timers!

Every Eddy will serve you as faithfully.

Williams Gets Seventh Homer -- Local and Other Sports

WILLIAMS, OF BROWNS, PROMISES TO SUPPLANT RUTH AS HOME-RUN KING

(By Henry L. Farrell, United Press Staff Correspondent)

NEW YORK, To be a king, if only for a day, "Ken" Williams is doing all the swat king's stuff.

In the last four days, the long Brown outfielder has hit six home runs. By hitting five in three days he equaled records made in 1884 by Kelly, of Chicago; by Muldoon, of Cleveland in 1822, and by Babe Ruth in 1921.

In hitting six in four days he equaled the record made last year by Ruth.

Wlliams is the home run king right now and it is not sure that his reign will last only until the old king, the bambino, returns.

This time last year George Kelly, the towering first baseman of the Giants, had four homers and he was pretending to the throne of Ruth, who was leading him by only one clout.

Kelly was looked upon as a big surprise, but Williams is doing none of the unexpected.

With twenty-four homers last season, Wlliams was tied with Bob Meusel for the runner-up position to Ruth, and when the hard-hitting Brown slipped it to his friends down south this spring that he was going after Babe, this season, no one thought that the hot sun was affecting him.

The way Williams is acting just now, Ruth will have the unusual duty of tagging along behind for a while. He started out with a bang last season and up to this time he had only five to his credit.

He hit from then on at a pace he can hardly hope to better this year.

Ruth never questions his ability and few weeks ago he sad that he would make a new record this year in spite of the five-week handicap imposed on him by Commissioner Landis.

Kelly, who furnished all the excitement last year for 3 weeks and wanted to see a champon whipped, has fallen down this spring. He had one homer yesterday, but it was only his second of the season. The National League pitchers apparently have found what he can't do, and they are making him do it.

Major league sluggers are managing to keep right around the clout record established last season, making it appear that the slower ball has not been put back in play.

CHURCH LEAGUE.

George Street won 3 straight from St. Andrew's on Thursday night at the Y.M.C.A. Alleys. In the last game Vern Miller won the game for his team by making four strikes in the last two frames, providing a sensational finish. Scores:

The draw for the second round of the Singles Tournament is as follows:

Touchburn—Outram.
Cuffe—Vance.
Monkman—G. Weatherstone.
Graham—Nelson Routley.
Miller—Norman Routley.
Walton—Piercy.

Games may be rolled to-night, or must be finished Monday night.

Third round will be played next Thursday night.

SCHOOL LACROSSE.

Walter Smaill gave an interesting talk to the boys of the Model school yesterday afternoon and later to the boys of King Edward School, in the interests of the school lacrosse team. It is expected to have the league under way by Saturday next, though some of the boys are talking of getting in some practice earlier. Mr. Smaill pointed out to the boys that this game is the most essentially Canadian of any of the popular athletic contests and deserves the hearty support of every Canadian.

ALL READY FOR BIG CUP FINAL

King George Will Not Be Able to Attend — Can Accommodate 150,000 Persons.

LONDON, April 29. Canadian Press Cable. — While the eve of the English cup soccer final between Huddersfield town and Preston Northend finds London and the South of England contemplating the blue ribbon football event with almost sublime indifference, the Northerners are suffering from a severe attack of cup final mania. Huddersfields chief constable complains that the town is football mad. Preston is reported to be more peaceful.

The progress of the game to-day will be signalled over Yorkshire and Lancashire by flying pennants firing star shells and sending up color balloons. The railway excursion facilities provide for carrying 150,000 people but they will not all go to Chelsea where the match will be played. Stamford Bridge arena terracing has been extended and improved and elaborate arrangements made for the accommodating of a huge crowd. Army megaphone men will direct the packing of the arena but the crowd is not expected to exceed 50,000.

Disappointment is expressed over the fact that the King will not be able to attend owing to the death of Lord Mountbatten. His Majesty will be represented at the game by the Duke of York who will present the cup.

The weather forecast is rather discouraging promising misty cold temperature with local showers such as prevailed during the week. The turf however is in splendid condition but the going will probably be heavy.

A New Pitcher

According to the Bowmanville Statesman, "Ralph Blaber, who pitched for last year's Goodyear team, winners of the Central Industrial League, is now working at the local rubber plant.

TALES OF A WAYSIDE TEE

By GRANTLAND RICE

(Copyright, 1922, New York Tribune Inc.)

As the season of competitive golf moves on into May, the main opening month all along the line, one of the big questions which confront the authorities and interest all is the selection of the American team for the British invasion.

Naming the first four or five men is simple enough. No long debate is needed to suggest that Evans, Ouimet, Guilford Jones and Gardner should be the first five choices.

But if eight men are to be picked, naming the other three is an entirely different matter.

Among those to be considered are: Fownes, Knepper, Sweetser, Marston, Johnston, Hunter and four or five more who have shown their ability in recent years to play fine competitive golf.

There are five or six of these who are so evenly balanced that it is almost a toss-up as to which shall be picked and which left out.

Team a Strong One.

Any golf combination headed by Chick Evans, Francis Ouimet, Bobby Jones, Jesse Guilford and Bob Gardner is sure to be exceptionally strong.

And when the committee has such stars as Fownes, Johnston, Knepper, Marston, Hunter, Sweetser, etc., to select the other three men from, if the program is an eight-man test, there will be no big drop near the finish.

It is the stoutest combination which the United States has been able to select in a long line. For it has proved experience mixed in with youthful brilliancy and every man mentioned has been thoroughly tested in more than one campaign.

Picking Teams.

Selecting these international teams is no light, easy-going task.

Last spring, at Hoylake, when the British team was announced there were loud murmurs of complaint from numerous quarters.

At that time several of the strong artisan golfers, including Willie Hunter, were left out. As Hunter played the best golf of the championship meeting which followed there were quite naturally additional murmurs later on.

Hunter undoubtedly deserved a place on the British team, and this year there will be no such oversights.

The British problem is even more complicated than the American case, for outside of Hunter and Tolley they have a long string that is well matched, with no great choice. One might mention Wethered, Jenkins, Harry Braid, Holderness, Aylmer, Sandy, Armour, Carter and a few more who are on a par and then hardly hit a man who survived the last eight in the Hoylake championship.

From this list the British committee can collect a strong, experienced set of campaigners who may not win, but who should put up formidable resistance.

The Walker Cup Team.

The International team match is to be played at Brookline just before the amateur championship starts.

Play for the Walker Trophy, modeled something after the manner of the Davis Cup for tennis, will be different.

This contest is scheduled for the National Links and there will be only four men to a side.

Here the complications pile up. From Evans, Ouimet, Jones, Guilford and Gardner, who is to be dropped?

And suppose at Brookline still another wins the championship? If the teams have to be named by a certain advance date, it is easily possible that the new champion will not be in the line-up.

Evans and Jones will be certainties, unless there is some new development beyond one's present limited vision.

Ouimet will be better for a short team-play dash than he will be for the long stretch of the championship grind. Bob Gardner, a fine golfer and a hard fighter, can hardly be left off and the same can be said of Guilford, the present champion.

We hardly envy any committee the job of picking four men from this group. Guilford is the more recent of the lot to reach fame, but he did it in no half-way manner by crushing Evans and Gardner on successive days.

It is for complications such as these that the coming campaign will be more than ordinarily interesting, for the main climax of the season offers greater drama than the game has yet known on this side of the Atlantic. So the statement that golf is facing its greatest program in the United States is not a mere collection of words.

BOXERS MADE A POOR SHOWING IN TORONTO

Frank Barrieau Was Given the Decision at End of a Ten-Round Bout.

TORONTO, April 29.—(Canadian Press.)— Frank Barrieau, Canadian welterweight champion, earned the decision at the end of a very disappointing ten round bout at Civic Arena here last night. The bout was marred by continual clinching and the big crowd of about eight thousand fans showed their disapproval by hissing the boxers. For the first five rounds neither one showed much desire to make it a fight, but Barrieau scored points with his left leads. After receiving a warning from Referee Honey Walker, both men improved from the fifth round and Barrieau showed his superiority with a staight left that jabbed Klesch's mouth repeatedly and which the Cleveland boxer was unable to evade. Klesch's fighting was very disapointing.

LAKEFIELD LADIES TO FORM BRANCH.

A meeting will be held in the Council Chamber at Lakefield on Monday evening, at 7.30, to form a ladies' branch of the L.A.A.A. This will be a very popular move, as many of the girls and young women of the village would like to have an organisation for sports in the village. A good atendance will do a great deal towards helping on this movement.

BASEBALL MEETING.

A large and enthusiastic abseball meeting was held in the Hess Garage on Tuesday evening last when the prospects for the coming season were discussed and the needs of the team talked over in a general way.

The first practice game of the season ahs eben arranged for Monday evening, May 1st between the old rivals, the Tannery and Merchants Everybody come out and see the boys in their first work-out.

The game will be called at 6.15 sharp so be on hand early.

Former Stars

Since actively retiring from baseball, Hans Wagner, has dabbled in several business ventures. He resides in Pittsburg. For several years he has coached the Carnegie baseball team. It is understood that he is at present promoting a sporting goods store that will be under his direction.

Jimmy McAleer is a retired capitalist. He is living a life of ease at Youngstown, Ohio. He takes a prominent part in civic affairs.

Cy Young is still the farmer. He lives at Paoli, Ohio, and has a well-stocked farm.

Diamond Dust

The local Central League team are arranging for the use of the Exhibition grounds to practice on till Riverside Park gets in shape.

The Adanacs junior team had a good workout Tuesday evening last. There was a large crowd out, and they should have no trouble in selecting a fast aggregation.

Percy Ecobichon, the local left-hander, who last year was with Cobourg, in the Central League has signed with the Petes for the coming season.

The Classics team in the City League will practically use the same infield as was with Cressman's last year.

Percy Armstrong will again take a hand in baseball. Armstrong will be heaving for the Classics team, in the City League.

The local Central League should soon be practicing, as most of the other teams in the circuit are already hard at it.

The Y.M.C.A. City League team has signed Allan Doughty, last season with the Westclox, to duty on the mound.

Fred Rutherford, who played short last year wth the C.G.E. will be found in the garden the coming season with the Classics.

WHERE THEY ARE.

From last year's roster, Teddy Gallagher, star southpaw and Art Twigg third baseman are in Oshawa and will play in the Central League. Punch Derry, right hand twirler, will pitch for Cobourg, and Bruce Thompson right fielder, will also be a member of that team. Saunders captain and second baseman, will be in Oshawa, Jimmy Stewart, of Toronto Dental's fame, in Hamilton, and Hornbeck untility player is out of the city, as is also Jack Evans, first string catcher. Added to this list is De. Cherry, slugging outfielder and pitcher, who has just recovered from an operation, but who cannot play this year.

Frank Williams, a southpaw from Verona, is going to work in Belleville and will try out with the team. They also announce that all the talk about Tommy Wilson of Perth was wrong. Wilson should have liked to have gone to Belleville, they say, but for family reasons decided not to move.

TEN BOUTS ON CARD INDICATE A LIVELY NIGHT

Newton-Coyne Bout Will Be Feature But Other Events Promise Lots of Action.

MONDAY'S MILLS.

Everything is set for the Wm. Hamilton Athletic Club's big programme of boxing bouts on Monday night. Jerry Coughlin who is managing affair for the W.H.A.C. guarantees that the events carded will take place and assures the boxing fans of at least ten bouts including the three feature mills in which well known Toronto mitt artists will perform. Brock St. Rink should be an ideal place for the ring battles for the r'.g will be erected in the centre where every move can be closely followed.

The greatest interest of course centres in the main bo.t which brings together those old rival champions, Walter Newton of St. Helen's Toronto, the Ontario 135 pound title holder and Tommy Coyne of the Classics, Toronto, the Toronto champion in the same class These two fast hard hitting experienced boys will show the fans what championship boxing means and their three round go should be cramful of action.

Irish Jordon is stacked up against Trickey of Toronto, and is counting upon his K.O. wallop to win for him. It may if he lands it.. Those who know Trickey say Jordon will be lucky to lay a glove on the Toronto boy. However, Monday night will tell the tale.

Against Ted Williams of Peterboro will be Rube Maddeaux the Classics' good middle weight. He is a hard hitting boy with a lot of science and Williams will have to be at his best to hold his own. There will be eleven preliminary bouts of three rounds each, and ten bouts going to a decision.

Here is the complete card.

100 pound class—Joe Jordon vs Tony Prett.

105 pound class—Millar vs McGill.

108 pound class—Rex vs Lavery.

118 pound class—Pethick vs Smith.

Special 125 pound bout—Trickey, Toronto vs Irish Jordon, Peterboro.

120 pound class—Brooks vs Johns.

125 pound class—McAuliffe vs Minnecola.

125 pound class—McMahon vs Veeman.

Special 158 pound bout—Rube Maddeaux, Toronto vs Ted Williams, Peterboro.

Main bout—Walter Newton, St. Helen's, Toronto vs Tommy Coyne, Classics, Toronto.

Sid Simmons of Toronto will be the third man in the ring.

HAMILTON BOYS SHOW UP WELL IN ANNUAL RACE

Take Second Place in U. of P. Relay Carnival After Grilling Contest. Runner Collapsed.

EXETER WINS.

PHILADELPHIA, April 29. — (Canadian Press)—The Interscholastic Medley Relay Championship Race held yesterday at the opening session of the 28th. annual relay carnival of the University of Pennsylvania, was marked by a dramatic finish after a thrilling contest between Exeter Academy and Hamilton Collegiate Institute of Canada The Canadian school boys set the pace for the first three quarters of a mile and appeared to be sure winners on the last lap.

O'Neil who ran the last relay for Exeter staged a great sprint for the full 440 yards, and overtaking the Hamilton runner, 40 yards from home ,won handily. Ten yards from the finish the Canadian finalist collapsed and fell on his hands and knees with second place just a few feet away, while the third place runner came pounding up a few yards in the rear. Unthinking officials ran to the fallen runner's aid with the intention of helping him across the line, but were waived away by the judges, who recalled what the safe tactics lost Dorando at the Olympic marathon in London in 1908.

Unaided, therefore, the Hamilton Institute relayist crawled and rolled the remaining distance and won second place by inches, falling over the line as the third team runner strode across..

WEISMULLER HAS GREAT AMBITIONS

Chicago Youth Is Out to Capture Every World's Record in Aquatic Events. Present Record.

It is the ambition of Johnny Weismuller to lower the world's record for every event on the swimming card.

The 17-year-old phenom of the Illinois Athletic Club of Chicago has already created new records for at least a score of events in the last six months of national competition.

Weismuller weighs 168 pounds, and stands six feet one inch. Here is the way he explains his great speed in the water.

"Perfect synchronization of arm and leg movement is necessary to get up great speed in the water. I breathe with every stroke.

"The legs and the arms play only a minor part in swimming. It is all in the stroke and the timing of the hands with the feet—six beats to a stroke."

There you have it, try it out.

Lacrosse

Dr. Sutton has arranged for next week's meeting of the lacrosse club in the Chamber of Commerce on Thursday night at 8 o'clock.

A new shipment of lacrosse sticks, making a total of twelve dozen and a third since the season opened has reached Peterborough. Three dozen were youths' sticks and two dozen of the latest bundle was the boy's size. Some of them have already been delivered and it is expected that all the larger sizes will be quickly taken.

The sale of boys' sticks is steady, and their use should be more in evidence from now on.

Athletics are practicing at the Exhibition Park these evenings and are more enthusiastic than ever. Their attendance has been increasing, and this club should round up a lot of new material before the city league games open.

And juniors who may have come to Peterborough since last season and have not yet made themselves known to the local team are invited to attend the practices and make themselves at home.

"PERJURY" ~ WILLIAM FOX PRODUCTION

At the CAPITOL—Monday, Tuesday, and Wednesday.

AT THE THEATRES

CAPITOL—Feature picture presentation, "The Man From Lost River," with House Peters. The latest Christie comedy, "Falling For Fanny," with Eddie Barry.

ROYAL—Edna Murphy and Johnnie Walker in "The Jolt." Also Sunshine comedy, "Business is Business."

REGENT—Herbert Rawlinson in "The Scrapper," Olive Tell in "Love Without Question." Also Christie comedy, "Back From the Front."

Capitol Entertainment

Starting with Monday's matinee, a William Fox super-special production, William Farnum in "Perjury," will be the feature picture. Cameron Geddes, basso par excellence, held over for another week by public demand. No advance in prices. The house of comfort, class and quality; the home of all super-special productions.

"Perjury," the William Fox special with William Farnum, which enjoyed a sensational run in a Broadway, New York, theatre, will begin a 3-day engagement next Monday at the Capitol Theatre. During its run on the most famous entertainment thoroughfare in the world, New York reviewers declared that no more gripping photodrama had been shown since the presentation of William Farnum in the screen version of Victor Hugo's "Les Miserables."

Robert Moore, the hero of "Perjury," like Jean Valjean of "Les Miserables," is a kindly and lovable man who, through a shocking combination of circumstances, is compelled to serve a long term in prison. It provides the famous Fox star with wonderful opportunities to display his well-known power of expressing human emotion and pathos. Those who have seen the photodrama declare it to be unsurpassed in intense human interest.

The production is elaborate—twenty-four separate interior sets, including one huge set for the court-room scene showing the trial of Robert on a murder charge, having been built in the Fox studios for the Farnum company in the picturizing of "Perjury." Some of these show scenes of twenty years ago, while others are modern.

The acting of Farnum as an active, ambitious man of forty-five, happily married and the father of two lovely children, and as a pathetic, sweet-souled old man, dazed by long imprisonment, is declared to be the most impressive and appealing of his remarkable career.

Harry Millarde directed the production. The cast includes Sally Crute as Martha Moore, Wallace Erskine, John Webb Dillion, Frank Shannon, Frank Joyner, Grace La Vell, Gilbert Rooney and Alice Mann.

AT THE REGENT.

STORY IS DRAMATIC.

There Are Thrills Aplenty in the Theme of "Behind aMsks."

Jeanne Mesurier, an orphaned heiress, is the ward of Mme. Ena Delore, who plans to marry her to Maurice Brensault, a faded and almost impoverished beau, for a consideration. Mme. Delore, with Major Nigel Forrest, and gambling confederates who, by means of signals, manage to fleece unwary players at bridge.

Jeanne overhears a discussion of her proposed marriage and declines to consider Brensault. Tabooed in his club, Major Forrest arranges with Mme. Delore to fleece Ronald Engleton, a man of wealth, at bridge. Cecil Bourne, who is at loggerheads with his brother, Andrew Bourne, master of the manor at Westhaven, because of the former's faithlessness to Kate Cansard, to whom he is betrothed, is infatuated with Mme. Delore and invites Major Forrest and herself to visit him at the manor.

Mme. Delore accepts and patches up a truce with Jeanne who agrees to accompany her to Westhaven. At the manor, the gamblers resume their fleecing of Engleton. Jeanne meets Andrew Bourne, who represents himself to be the overseer of the estate and they fall in love with each other. Andrew proposes marriage, but Jeanne postpones her reply. Andrew lives at a fisherman's cottage on an island while Cecil entertains his guests.

Brensault insists that Mme Delore arrange for his marriage with Jeanne, or repay the debts she and Forrest owe him. That night, while playing at bridge, a quarrel ensues, in the course of which Engleton is knocked unconscious. Jeanne is attracted by the noise and follows Mme. Delore and Forrest to a smugglers' cave, where they hide Engleton's body. Jeanne is locked up in the cave with the unconscious man, but makes her escape and dives into the sea as Andrew approaches in a launch. Andrew drives the conspirators from the manor and takes Jeanne to his arms.

AT THE ROYAL.

MONDAY'S BIG DOUBLE BILL.

For Monday the Royal has a splendid double bill of personally-selected features and comedy. The Vitagraph special, called "No Defence," features William Duncan and Edith Johnston, supported by an all-star cast. This wonderful picture is a combination of adventure, mining interest, mountain police, society and political intrigue. It is a film replete with thrills and spectacular situations. It is the story of a society matron's daughter, whose mother is rich in ancestry but short in ready money. The mother tries to marry the girl to a rich man, who is long in cash but short in morals. The daughter loves a young mining engineer of good ancestry, but without much of a bank account. Then there is the First National society photoplay, with Pauline Starke and Percy Marmont in the leading roles, called "Wife Against Wife." This is a battle of wife against wife . . . . to the final heart break. It sweeps from the studios of Paris, where is borne the love of a famous artist to the whirl of New York, where wives and wives and oversea love must be forgotten. There is infinite pathos, infinite appeal in Pauline Starke's portrayal of a little girl seeking a heart and finding a heart break. She will come closer to you, gentle reader, than any character you have seen on the screen for months. The two-reel comedy, a Mack Sennett special, is called "Love and Doughnuts," with Ben Turpin as leading fun-maker. To-night is your last chance to see William Farnum in "The Rainbow Trail," a sequel to "The Riders of the Purple Sage."

AT THE GRAND.

HAVE YOU EVER PLAYED HOOKEY?

Did you ever play hookey from school?

Wesley Barry, the freckle-faced movie star, plays hookey more and once in the Gus Edwards' screen play, "School Days", which comes to the Grand Theatre next Thursday. And in '-ying hookey, Wes' to lay the foundation for a story that will appeal to every human being who has experienced the thrills, the pranks and them many disappointments of boyhood.

For little Wesley, as the untamable and irresponsibel Speck Brown, loves the old swimmin' hole and his dog "Hippy" more than all the wealth and educat' in the world. But he chances to meet a wealthy uncle who induces him to pursue an education among the juvenile highbrows in the East. In his new surroundings he tries to be chummy. He also tries to put over an invention perfected by his old friend, Leff called, "You can't Lose-It-Clothes-Pin." He finds himself duped by a pair of clever swindlers.

Digusted with the artificial existence of his wealthy schoolmates, keenly disappointed by his failur. to put over the invention. Wes' longs for the old swimmin' hole and his dog. In the wee small hours of the morning he runs away from his palatial residence, boards a freight train and finally arrives safely back in his old haunts. Once more he is happy, for he not only has his dog, but also his litte sweetheart, and he can roam at will through nature's playground.

Prominent members of the cast supporting Wes' include Francis X. Conlan, as old Leff, Arline Blackburn, as Wes' sweetheart, Margaret Seddon as the teacher, George s-sey, as the stern guardian and J. H. Gilmore as the wealthy stranger. The picture was produced by Harry Ralf, and directed by William Nigh.

The senior lady of the English queen's household, the mistress of the robes, is invariably a duchess.

Everyday Health and How To Know It

Weekly Health Talk No. 17
By A. P. Rogers, D.C.

UncleBenSays:

The Chap who takes care of his health along the lines of least resistance doesn't live the longest.

Everyday health depends on temperate habits but most of all upon an active liver. A multitude of troubles camp on the trail of the man who suffers from an inactive liver. Bowel wastes are poisonous and will quickly break down the health if not completed eliminated daily.

HEALTH FOLLOWS

CHIROPRACTIC CORRECTS PRESSURE ON SPINAL NERVES IN DISEASES OF THE FOLLOWING ORGANS:

THE LOWER NERVE UNDER THE MAGNIFYING GLASS IS PINCHED BY A MISALIGNED JOINT. PINCHED NERVES CANNOT TRANSMIT HEALTHFUL IMPULSES. CHIROPRACTIC ADJUSTING REMOVES THE PRESSURE. THE UPPER NERVE IS FREE AS NATURE INTENDS.

Where the sluggish liver is due to interference with the proper transmission of nerve impulses, there is no relief to be obtained except through skillfully administered chiropractic spinal adjustments. It is sometimes the case where the condition is one of long standing that the adjustments will be slow in bringing results but in most cases results are quickly obtained.

GENERAL HEALTH MUCH IMPROVED.

"For a number of years I suffered from from sluggish liver and indigestion. I tried many things with no appreciable results before I was advised to try chiropractic. I can now say that my general health from day to day is excellent and my physical condition much improved."—Rev. J. H. Barnes, Chiropractic Research Bureau Statement No. 1314H.

TRINITY SERVICES.

The services in Trinity Church on Sunday will be of unusual interest. It is the closing Sunday of the church year. The pastor, Rev. F. E. Malott, will preach in the morning on "The Call of An Optimist," and in the evening on "The Great Debate." The music at the evening service will be of a very high order:
Anthem—"Lift Up Your Heads, O Ye Gates" (Cowan).
Soprano solo—"Hear My Cry, O Lord" (Rogers), Mrs. King.
Violin solo — Audantino-Martini (Kreisler), Miss Palmer.
Male chorus—"Now the Day Is Over" (Parks).
Visitors and strangers will be welcome at all the services of Trinity Church.

"CLEAN-UP WEEK."

This was "Clean-Up Week" in Peterborough, and considerable progress was made in removing the winter accumulations round the lawns and yards of private houses. A number of the streets have also been cleaned up and repaired. The local gardeners are getting busy, and residents are co-operating with the "Clean-Up" campaign. Mr. James O'Keefe, the well-known gardener of Lansdowne Street, has been on the job all week sprucing up lawns, preparing gardens, and laying out improvements in various parts of the city. Mr. O'Keefe says that home-owners have begun earlier this year to improve their premises, and thinks the "Clean-Up" Week was a good idea. Let the good work go on!

A STREET CAR STRUCK A BUGGY

At 9 a.m. to-day street car No. 12 on the George street line struck a buggy driven by Robert King, New Chamberlain street, at the corner of Perry and George. King was thrown out and the horse turned a complete somersault. The driver was not injured beyond a few bruises and the horse was able to stand on its feet again. The buggy will not be able to do service, however, until it has been in a repair shop. The street railway were not to blame, it is said.

THE APPROPRIATION HAS BEEN EXHAUSTED

Government May Decide to Continue the Civil Service Bonus.

Mr. G. N. Gordon M.P., returned this morning from Ottawa, and said that the Civil Service bonus had not been paid for the month of April because the appropriation was exhausted on the 31st of March 1922, the end of the fiscal year, and that before any payments could be voted towards a bonus it would require to be voted on again in the House.

The Prime Minister announced yesterday that the Government had not reached a conclusion as to the bonus situation, but Mr. Gordon said he was hopeful that all those receiving under $2000 would continue to receive the same bonus as last year while all those above that will probably be cut off. The member said that while this had not been announced as the Government view of the matter yet this seemed to be the prevalent opinion among the Members in the lobby.

THE RELIGIOUS COUNCIL MEETING

Interesting Program Provided—Ladies Provided Supper.

The Religious Education Council, composed of Sunday school workers from the different Protestant churches (Anglicans excepted) of the city, met at Reid street hall last night, with a total attendance of about 180 members.

A supper, provided by ladies from the different churches, was followed by a hymn and prayer by Rev. F. E. Malott. Addresses on "Preparation Necessary to Make a Successful Sunday School Teacher," and "How the Organized Adult Bible Class Can Help the Sunday School," were given by Messrs. Malcolm Clark and H. B. Cowan, and a demonstration of the C.G.I.T. programme by the Girls' Work Board was given by Miss Leta Brownscombe. Mr. John Edgar, president of the Council, outlined the plans of the organization. T. H. Blanchard, superintendent of Trinity Sunday school, presided at the meeting, and R. F. Downey had charge of the singing. The Trinity orchestra provided several excellent musical numbers, and Mrs. H. Doig gave a well-received vocal solo, "The Ninety and Nine."

STRAIGHT TO THE CAUSE

Of your bodily ailment, CHIROPRACTIC goes, like an arrow to the bull's-eye of a target. It has been demonstrated that the cause of most disease is found in nerve pressure at the spine. The progress of disease is oftentimes insidious, increasing gradually and steadily until it has a firm and merciless hold upon you.

Time Flies

Think! Since you have read these words, a few more seconds have been consumed from your allotment of time in this world. Your existence here will depend to a great extent upon the care and attention you give your body. Will you drift and let come what may, or will you make an effort to prevent disease?

IT IS EASY

To be healthy if you start right, and the best way to start is to make sure that your spine is normal. A spine in normal alignment means that the spinal nerves are free of pressure, and that all the tissues of your body are receiving a proper supply of nerve energy. If 100% of nerve force reaches all parts of your body you will be healthy. If you do not have good health you can be sure that your nerves are not doing their work properly, and you should determine to find out the condition of your spine.

HAVE A SPINAL ANALYSIS AND LET US TELL YOU WHAT CHIROPRACTIC VERTEBRAL ADJUSTMENTS CAN DO FOR YOU.

MAY PRESENT A SOLID FRONT TO RUSSIANS NOW

Confidence Expressed British And French Divergent Views Can Be Adjusted at Conference.

MORE HARMONY

GENOA, May 1. — (Canadian Press.)—Work of completing Allied proposals to Russia was resumed to-day. The last two days have brought into evidence a more harmonious spirit between British and French delegation, despite continuing clashes between Lloyd George and M. Barthou at sessions of conference committee, and better progress is now looked for. Confidence is expressed that divergency in the British and French views can be adjusted so as to present a solid front to the Soviet delegation.

Pope is Optimistic.

Hope for a successful outcome of the conference as a notable aid in achieving the establishment of peace on a secure basis, aws expressed by Pope Pius in his notable letter to Cardinal Gasparri, which has created deep interest in conference circles. After stating that he had followed the work of the Genoa conference with "anxious trepidation," the Pope expresses the earnest hope that the results will prepare a basis for a new era of peace. "Such a return to a normal state of human relations in its essential elements," says the letter in part, "in conformity with the dictates of reason, which is also a divine command, will work greatly to the advantage of both conquerors and conquered; but especially to the advantage of those unhappy populations of eastern Europe which, already laid waste by war by internicine struggle and by religious persecutions, are now in addition decimated by famine and epidemics, while they embrace in their territory so many sources of wealth that they might be strong elements in social restoration."

Russia Not Hostile.

Foreign Minister Tchitcherin has written M. Barthou of the French delegation, assuring him there were no secret military or political clauses in the Russo-German pact, and that Russia is not hostile to France depite France's unfriendly attitude to Russia.

PRINCESS ZARA AGAIN SCORED BIG TRIUMPH

Repeat Performance Was Greeted By Near-Capacity Audience.

The dainty operetta, "Princess Zara," was repeated on Saturday evening at the Grand Opera House by Collegiate Institute pupils, to a house that nearly reached capacity, and with a success that surpassed the triumph of their first evening's performance. Everything went off in the smoothest possible manner, and the committee in charge is congratulating itself on the results achieved during the two nights.

The manner in which every detail was foreseen and worked out in the production of this charming musical offering by young performers is a distinct credit to their school, their directors, and their own ability.

Miss Helen Lamb, Queen of the Fairies, was the pleased recipient on Saturday evening of a beautiful floral tribute.

Death Rate Much Higher This Year

Compared with April last year, the mortality rate in this city was high, amounting to exactly double. March showed a similar increase, although not as marked. In April there was one more death than in March. Marriages fell off from a year ago, but were greater in number than last month. The comparative figures are:

	April, 1922	March, 1922	April, 1921
Births	47	39	46
Marriages	18	13	24
Deaths	36	35	18

Customs Returns.

The steady way in which business has been improving since the first of the year is shown by the Customs receipts for the first four months. April receipts were $7,000 above March. The figures for the four months are: January, $43,330.43; February, $41,737.43; March, $51,852.03; April, $58,116.42.

HARRY REW IS BADLY INJURED

Thrown From a Bicycle While Out For a Spin on Saturday Afternoon.

Thrown from his bicycle while coasting down the hill on the Gravel Road below the watering trough, about three miles from the city at 3.50 on Saturday afternoon, Harry Rew, 22 years of age, 65 Crescent Street, suffered a fracture of the skull, and this afternoon was reported to be in a dangerous condition at Nicholls Hospital.

The Examiner was informed at the hospital that he had never regained consciousness, and his condition was unchanged from the time he was admitted.

The accident was observed by J. A. LeBlanc, one of the three companions of Rew, but he was unable to describe what happened. The boys were speeding along, Harold Throop and Lorne Cunningham ahead, Mr. Rew next, and Mr. LeBlanc behind. Whether his wheel struck a stone or some part of the machine broke, Mr. LeBlanc was unable to say. The front wheel, at any rate, flew to pieces, and Mr. Rew was pitchforked over the handlebars on to the road. He fell heavily.

The boys rushed to his help, but he was unconscious. An automobile that was approaching from town stopped, and the driver turned his machine around and drove the injured man into the city. He was given attention by Dr. G. S. Cameron, and removed almost immediately to Nicholls Hospital.

When the accident happened the boys had been bicycling about an hour and a half, and had just gone as far as the watering trough, and were nicely started home again.

Mr. LeBlanc had just been introduced to Mr. Rew that afternoon, but the others were close friends.

The injured man is well known in the city, and popular in a wide circle of friends. He was born in England, but had lived here for many years. He was married a short time ago, and lived with his parents, Mr. and Mrs. Harry Rew, Sr., 65 Crescent Street.

Mr. Rew was an active member of St. George's Church and sang in the choir. He was employed in the toolroom at the C. G. E.

SUCCEEDS JUDGE METCALFE.

OTTAWA, May 1. — (Canadian Press.)—Judge J. E. P. Prendergast, of Manitoba's Court of King's Bench, has been appointed to the vacancy in the Manitoba Court of Appeal caused by the death of Justice Metcalfe.

A Message to Peterborough from a Famous Lecturer

The ROTARY CLUB is bringing DR. BARKER, Celebrated Health Lecturer, to Peterborough on WEDNESDAY, because it is confident that what he has to say will be of benefit to the whole Community. The Rotarians are paying all the expenses of the occasion in order that Dr. Barker's message may reach the greatest number. The opportunity should not be missed.

He will give Three Addresses as follows:

To the Collegiate Institute Pupils in the Morning.

To Women, and Girls over 15, at the GRAND OPERA HOUSE at 3.30 p.m., with the Local Council of Women in charge, on the subject—"The Modern Mother and Her Daughter."

To Men, and Boys over 15, at the GRAND OPERA HOUSE at 8 p.m., on the subject—"A Father's Responsibility to His Son."

Dr. Barker needs little introduction. For years he was a Lecturer on the Chautauqua Circuit, and for the past eighteen months he has been delivering his famous Addresses under Rotary auspices. He is a Magnetic Speaker, with a vital subject that is most effectively handled.

The GRAND OPERA HOUSE should be crowded on WEDNESDAY AFTERNOON and EVENING.

A New Malady Has Broken Out In The Western Section Of The City

Jonathan Smithers Who Lives On Hunter St. West, Was Among The First Victims—Board of Health Powerless To Act.

A new malady has broken out in the west end of the city and is raging in many of the homes in that section. It seems to be an ailment that even the Board of Health, the Sanitary Inspector or the Medical Health Officer himself is powerless to help. It is even possible that the Chairman of the Board of Health may be afflicted with the disease, as he lives in that end of the city.

The first manifestation of the new illness was noticed last week in the home of Mr. Jonathan Smithers, who lives on Hunter street west. This gentleman came home at noon and complained of having a very stiff neck. In the evening the symptoms were aggravated, and Mrs. Smithers, who is a very careful wife and mother, recommended hearty applications of liniment. The medicine chest was resorted to, and no further mention was made of the malady until Mr. Smithers returned home the next evening, when he again complained of the plain in his neck. Mrs. Smithers made very careful provision that night against drafts from windows, thinking that probably Jonathan had acquired the pain from sleeping in a draft. However, the affliction persisted, enquiries as to whether Mr. Smithers had turned his head suddenly by chance eliciting a firm negative.

Then Jonathan, Jr., and Mabel, who attend the Collegiate Institute and come home every day via Hunter street, developed the disease, and complained bitterly of having sore necks. Mrs. Jones-Browne ran in next morning and informed Mrs. Smithers that her husband had a very stiff neck, and that several of the children of the neighborhood, who attend St. Mary's Convent, had very stiff necks. As they described it, "There was a crick in them."

The origin of the strange epidemic, which was complicated in most instances by a dizzy head, might have remained a mystery for some time, and been the cause of much wasted anxiety, had it not been for the discovery made by Mrs. Smithers when she went down town on Saturday afternoon last. Passing by the front entrance to St. Peter's Cathedral, she noticed that a number of men were employed with ropes and pails, and, elevating her eyes, found that the steeple was being repaired by several workmen. After remaining in contemplation of their activities for some time, Mrs. Smithers proceeded on her way down town. On her way home she paused once more. There was another stiff neck and dizzy head in the Smithers' home that evening.

BUSY SESSION POLICE COURT

Two Drunks Made Small Contribution — Youths Visit Peterborough

Magistrate O. A. Langley had quite a busy session this morning. Police court started off with a motorist having to cough up $2 for not turning his automobile at street intersections which according to the Motor Vehicle Act is the logical and proper place to perform such evolutions. Two gentlemen who were intoxicated in a public place were assessed $20 to $10 plus costs which amounted to $11.50. The difference in the fines was because it was one man's first introduction to the court. The other prisoner who blamed beef, iron and wine for his thick speech and "taking up the whole sidewalk" as P. C. Bromley said declared the "police were all agin him". "If I thought you meant that the evidence of the police counted for more in my court than anybody else's I'd demand a public apology right here or send you down for contempt of court", His Worship said.

"Oh I didn't mean that your Honour. I just meant they were agin me", accused hastened to explain.

Four youths travelling from Toronto to Montreal as blind baggage found the morning air too chill and got off here this morning. They eventually landed in Police Court charged with stealing a ride. After Magistrate Langley looked them over and noted their semblance of respectability he dismissed the charge and gave them a day to get out of town. One of the youths declared they would be away again in half-an-hour. Whether they would travel by rail again he did not say. The money on the four would not pay the fare of one.

HUSTON FAMILY TO GET COUNSEL FOR INQUIRY

Gordon Waldron, K. C., Will Represent Government.

TORONTO, May 1 (Canadian Press), — Gordon Waldron, K.C., will be Government's counsel in the investigation into the death of Captain Orville Huston, which is to be conducted by John A. MacIntosh, K.C.

This was announced by Attorney-General Raney this morning.

He explained that the Huston family would be entitled to have counsel represent them, at least in regard to the second part of the proceedings—that which will investigate the inquest held immediately after Huston's body was found at Fort Francis.

Mr. Raney, however, said he was not yet prepared to announce whether the Government would pay for this counsel or not.

Local Carters are Having a Busy Run

Local carters are experiencing the busiest time of their lives, according to one of the leading men in this line of business, and there have been more movings up to date than in many years, he said. The unpleasant aspect of the moving is that the trend is away from Peterborough rather than in to Peterborough. "We are moving three out of town for one into town," he said. "Things are certainly busy. So far we have moved about 15 people and have as many more waiting. Most of the people seem to be going to Toronto, St. Catharines, and up that way, and the majority are mechanics who expect to do better," he said.

May Day now isn't what it used to be. Long distance carting is all by motor truck, and the day of the freight car as a conveyance of household goods is past. Local cartage firms are prepared to move you from here to Toronto in the morning and have everything set up in your new house in time for supper.

GREAT PROFIT IN A FORDSON TRACTOR

Its Utility and Usefulness Proven By Many Practical Demonstrations.

Dufius Motor Sales Sell Five Tractors In Five Days.

Farmers are admitting the many advantages of a Fordson Tractor, when it can be purchased for $470.

On Saturday a recent purchaser stated that cultivating with a Fordson is fully three times as good as that done by horses, and, in addition, the Fordson will do more than twice as much work as three horses.

Another farmer stated that he went over a field twice with a cultivator and a light harrow attached behind, and entirely eradicated the twitch grass which was extremely prevalent.

Another purchaser in the Township of Cavan, who has two large farms, started a Fordson Tractor on Tuesday of last week, and by Saturday night one farm was entirely sowed.

It is quite evident that Tractor farming at $470 for a 23-horse power Tractor, is the solution for the shortage of farm help and the possibility of getting the farms cleared once more—to say nothing of greater acreage, greater production, and, more important than all, greater profits.

ST. PAUL'S NOTICES.

The regular monthly meeting of the Session will be held Tuesday evening at eight o'clock.

The Ladies' Aid Society will held its regular monthly meeting Friday afternoon at 3.30.

St. Paul's anniversary services will be held on May 14th. The Rev. Geo. Pidgeon, D.D., of Bloor Street Presbyterian Church, Toronto, will preach on that occasion. The choir will give their annual concert on the Monday following, and will present the cantata, "The Rose Maiden." They will be assisted by the following artists from Toronto: Edna Read (soprano), Vera McLean (contralto), Sidney Walsh (tenor), Frank Oldfield (baritone) and Joseph Quintile (harpist).

The teachers are arranging to observe children's week, which will be held in most of the churches of the country from May 14th to May 20th.

TIDE OF BATTLE IS FLOWING EAST TOWARDS PEKIN

Advantage In Battle Raging Apparently On Side Of Forces Fighting South Of City.

LATE DESPATCHES

PEKING, China, May 1. — Canadian Press. — Artillery firing in the sector south of Peking became more intense toward midnight and a small part of Chang Tso-Lin's army retreated toward the southwest walls of Peking. Wu Pei-Fu's forces appeared to be developing their flanking movement on Chang's right wing, while the latter's troops were defending the Marco Polo bridge across the Hun river, commanding the approach to Peking.

The advantage in battle for the possession of Peking was apparently going to the forces fighting 12 miles south of the city where Leh Wu was forcing the troops of Chang from Changsintien, and the tide of battle rolling eastward toward the southern walls of Peking.

PROTECT LEGISLATION.

LONDON, May 1. — Canadian Press. Great Britain, France and Holland are expected to follow the example of the United States in sending marines to reinforce its legation guard in Peking, says a despatch to the Daily Telegraph.

ATTEMPTS WU'S LIFE.

LONDON, May 1. Canadian Press —An attempt to assassinate General Wu Pei Fu, the leader of the Central Chinese forces, was made last Saturday, says a Peking despatch to the Evening News. The despatch added that he was slightly wounded and his assailant was executed.

NO KIDNAPPING PLANS.

ATLANTA, Ga., May 1. Canadian Press. — Officials at the headquarters of the Ku Klux Klan here today, declared that they had no knowledge of any plans formulated by members of that organization to kidnap Matthew Bullock, the negro wanted at Norlina, N. C., on a murder charge.

MERCHANTS' BANK INQUIRY.

MONTREAL, May 1. Canadian Press. — The question of whether reports on bad debts received at the head office of the Merchants Bank from the local managers could have been indicated in returns made, in conformity with the law to the Finance Department, formed the subject upon which H. B. Loucks, an accountant, was examined at this morning's session of the police court enquiry into charges that D. C. Macarrow, the general manager of the bank, was guilty of signing an incorrect return for October, 1921.

For the Crown C. W. Wilson secured statements from Mr. Loucks, that the half-yearly return secured in September was not included in the government return though statistics on bad debts compiled for the annual report in April were.

A YEAR OF TRIAL.

LONDON, May 1. — (Canadian Press.)— The past year, says Britain's Chancellor of the Exchequer, was one of unexemplified trial, with a slum in the trade boom which followed the war. Manufacturers could not dispose of their stocks on account of the exhausted purchasing power of customers. The revenue for the last fiscal year was one billion, one hundred and twenty-four million pounds, which is ninety-one million pounds less than estimated. The expenditure was one billion and seventy-nine million pounds. The income tax collected was three hundred and ninety-eight million pounds.

APPEAL OF LIQUOR CASE.

HAMILTON, May 1.—(Canadian Press.)— The appeal of Herbert T. Guest, a truckman, against conviction and a fine of $500 and costs by Magistrate Jelfson in April, on the charge of unlawfully transporting liquor through the Province of Ontario, was allowed to-day by Judge Gaul, who held that there was no violation of International law.

MEETING OF INTEREST BY BROTHERHOOD OF ST. JAMES'

A meeting of more than usual interest was held by the Brotherhood of St. James' Church yesterday afternoon. Mr. Moss presided, and introduced the speaker, Mr. Leon Frazer, of the Chamber of Commerce. Mr. Frazer discussed brotherhood matters, expressly dealing with the subject in connection with the Genoa Conference, emphasising the fact that the motives of this great society have become of great interest to man. The musical programme was of a high order. Albert Barton sang in excellent voice, 'Jesus, Lover of My Soul,' and two numbers by the Salvation Army Saxophone Quartette were much enjoyed. Mrs. E. J. Hotston ably presided at the piano. The brotherhood wishes to express its appreciation and thanks to all who assisted in the program.ie.

Permits Issued For Two More Dwellings

April saw a turn in the tide in the building industry, and not since before the war were so many building permits issued at City Hall. Peterborough is well up with other cities in the building boom that has commenced. The total value of buildings started during the month was $101,980. So far this year buildings worth $123,797 have been started, as compared to $89,602 in 1921. In April last year the total was $69,045; of which the large permit issued the Bank of Toronto for $37,000 represented the largest portion. Work was started on 18 residences during April. Permits issued in the dying hours of the month were:

James Long, shed, 561 Reid Street, $50.

E. B. Edey, addition to woodshed, 85 Aylmer Street, $35.

John Birdgenaw, frame cottage, Prince Street, $1,400.

A. F. Boomer, six-roomed dwelling, Conger Street, $2,800.

NEW ROOF FOR CARPET PLANT

Mr. James Finnie Obtains Contract For Brinton Carpet Factory. Job to Start Immediately.

Mr. James Finnie has been awarded the contract for the re-roofing of the Brinton Carpet Company's factory on Lock street, and will begin work as soon as possible. The new roof will be of "saw-tooth" style to provide the plant with the fullest amount of light and will cover an area of approximately 34,200 square feet. This is said to be the beginning of rather extensive alterations and improvements to the factory, for which certain extensions are understood to have been planned and may be undertaken this year. Mr. W. H. Barry is the architect of the work Mr. Finnie is undertaking.

5TH ANNIVERSARY ST. JAMES CHURCH

Excellent Sermon By Rev. S. W. Fallis And Good Music Were Features.

With impressive services morning and evening, St. James' Methodist Church yesterday celebrated the fifth anniversary of its dedication. Rev. S. W. Fallis, B.D., of Toronto, book steward of the Methodist Book Rooms, reached eloquent sermons that were greeted with large congregations, and the musical programme arranged by Mr. A. Nicholls, organist and choirmaster, was of a high order.

It was the first occasion on which Rev. Mr. Fallis has appeared in St. James' Church, and he congratuated the congregation on the splendid building, completed five years ago, that serves as a monument to their industry and faith. In the morning he took his text from Isaiah 40, 9, "Behold your God."

"I think the outstanding need of the age in which we live is just to be able to visualise God—to get Him out of the clouds—to come to realise Him just as you realise the person sitting next to you in the pew this morning," said Rev. Fallis in opening his appeal for a clearer conception of the Almighty. The man who can visualise God is the greatest benefactor of mankind, the minister declared. The popular idea that a commercial benefactor of mankind may not be at the same time a spiritual benefactor was a fallacy, he said. The Bible, as understood by him, was a continued effort by God to make possible his visualisation by man. One of the bitterest moments in the life of Christ was when his disciples failed to grasp the fundamental reason He came among men, in order to be the supreme revelation of God.

While he fully believed in the mystical, many people were inclined to the practical, and it was for these persons that God sent Jesus into the world, that through Him the vision might be complete. Outstanding in the world's poetry inspiring a beautiful vision of the Almighty were, he thought, the words of Isaiah, "He shall feed his flock like a shepherd; he shall gather the lambs with his arm, and carry them in his bosom, and shall gently lead those that are with young."

"The moral tone of the nation, the confidence and the endurance of the people in their God-given tasks depends on their conception of God," said Rev. Fallis. "The proper study of mankind is God." First study the history at the heart of Christ, secondly the nature of God and at the heart of our experience let us place of the armies, the patriotism of the God. While recognising the valiance statesmen, the self-sacrifice of those at home, Marshal Foch touched the true chord in his immortal message after the Armistice, "Under the blessing of God the victory was won."

ROTARIANS ARE URGED TO WORK FOR BOYS' CAMP

Claude Rogers Tells Them What Is Being Done And What Is Expected Of Them.

CHAIRMAN SELECTED

A challenge to Peterborough Rotarians to support and work for the boys' camp was given by Rotarian Claude H. Rogers, chairman of the camp committee in the course of an impressive address on boys' work which featured to-day's luncheon at the Empress. Rotarian Rogers outlined the programme for the camp, told of the materials needed to ensure the success of the event and put the issue squarely up to his fellow Rotarians.

President John Crane presided and among the guests to-day were Rev. Father Costello and Mr. Gordon Frazer, President of the Trent Waterway Development Association.

Rev. Harold Young, chairman of the Entertainment committee, presented an interesting report as to what had been accomplished by that committee.

Rotarian McElderry gave the following list of committee chairmen for the ensuing year:

Entertainment—Rev. W. H. Young.
Fellowship—Jas. Hamilton.
Public Affairs—Thos. Barrie.
Educational—H. R. H. Kenner.
Boys' Work—C. E. Smith.
Relationships with International Headquarters—Leon Frazer.
Publicity—D. Reid Wrenn.
Inter-City Relationships—R. Dobie.
Boys Work Committee — C. H. Rogers.
On-to-Los Angeles — Dr. M. A. Morrison.
Get-the-Boys—Geo. A. MacDonald.
Get-the-Goods—Jack McHardy.
Business Methods — Andrew Brown.
Attendance—W. R. Widdess.
Classification—J. H. Seels.
Birthday Fund—J. M. Greene.
Crippled Children—W. R. Breyfogle.
Music—Jack McHardy.

Rotarian S. R. Armstrong gave the members some information about the visit of the Scots Guards band. The famous organization will arrive in Peterborough on the 6.15 C.P.R. train on Saturday evening and will be met by the Reception committee, headed by Fred Roy. After spending a half hour in their car the band will be escorted to the armouries by the 57th Regiment and Salvation Army Band.

An invitation was received from Rotarian Geo. A. Gillespie to visit the Peterobrough Creamery, and it was decided the club should accept the invitation for Monday next.

Rotarian Claude Rogers was the speaker of the day and his reference to the Boys' work feature of Rotary's activities in general and to the coming Peterborough boys' camp in particular were very much appreciated by the members.

The speaker declared that the boys' camp would be the connecting link between the Rotary Club and the boys whom they hoped to benefit. The members of the Rotary Club would be expected to interest themselves in the camp and to take some of the work off the shoulders of the committee. Boys would have to do a certain amount of work around the camp so that they would learn the lesson that in order to play it was necessary first too work. Rotarians would be callled upon to visit the boys and address them around the camp fire and to assist in various other ways. For the present however, every member of the Club was urged to do his part in securing the material that was needed to construct the camp.

This is a notable week for Rotary, inasmuch as the local Club is not only bringing Dr. Barker here on Wednesday, but is also sponsoring the visit of the famous Scots Guards Band on Saturday.

Rotarian E. Gus Porter, M.P., of Belleville, dropped in to to-day's luncheon long enough to congratulate the Peterborough Club on its fine turnout.

Overland

BANKS'

Overland Country Club, a Bargain

NOT A FAULT TO FIND

Mr. Struan G. Robertson, of Seabank, Pictou, N. S., writing in April as to his Overland purchased in the previous May, says: "I have pleasure in stating that I have not a fault to find with it. I did 3,560 miles with the car during the summer and fall without trouble of any kind except the breaking of an ignition wire. I did not have a puncture.

"Today the car seems as good as when I got her.

"On a 210 mile run round Cape George, Antigonish, Guysboro, Melrose, Glenelg and home by East River St. Mary's with four passengers, I used but ten gallons of gas, being an average of 22 miles to the gallon.

"I am thoroughly well satisfied with it and have not seen anything in its class that I would exchange it for."

Household Suggestions

GARBAGE

Now is the time to begin putting chloride of lime into the garbage can to prevent flies and other insects from forming. The can should be kept covered and in the shade, at all times.

HAIR

To prevent the water drain of the wash basin from clogging up, loose hair should never be allowed to drain through. If the water is let off slowly the hair remaining could be cleaned out and thrown into the refuse pail.

MUD

Spring mud brought in by sonny can best be cleaned off by allowing it to dry over night and brushing it off at cleaning time in the morning. The electric suction sweeper would be even better than brushing.

LINOLEUM

Linoleum covering the kitchen floor can be made to last twice as long if it is covered with varnish. If painted early some evening, it will be found dry by morning.

FLOWERS

To keep cut flowers fresh, clip their stems. By doing this, it will be found flowers will remain alive several days longer than usual.

DUST

When sweeping a room it is best to lift up the edges of the rug. Dust gathers there and blows out into the room proper.

GROUNDS

Don't throw coffee grounds into the refuse can, if you have a garden. Use a fertilizer instead.

CLOTHING

That rent at the back of the neck in your coat is hanging it up on a hook. The use of coat hangers will prevent this.

GREASE

When you save grease from bacon or other meat, it is best to strain it first. This leaves the savings clear and good for other frying use.

ICE BOX

The refrigerator should be cleaned out and given an airing once a week. For effective airing, the ice box could be allowed to stand open and empty over night, with the kitchen windows open.

LITTLE WANT ADS.

At this time of the year, there are any number of things that are badly needed, either by the man or woman.

These things can be done without, but the Summer is going to be not quite s happy without them, and they need not cost you nearly as much as you think, if you only use the Want Ads. to get them.

So many people lose a vast amount of pleasure simply because they have never learned the value of a simple little appeal to the Examiner Want Ad. Column. Don't let this bright month of June go by without satisfying little extra Summer wants through the Want Ads.

TENDER FOR PAVEMENT

WESTERN MEN SEE THE SIGHTS OF OLD QUEBEC

Delegation From House of Commons Spent the Week-End in Old French City.

THE TRIP.

QUEBEC, May 1. — (Canadian Press.) — New scenes, new conditions and new people were presented to the delegation of western members of the House of Commons who visited Quebec over the week end as the guests of Quebec City. The visitors were shown Quebec and its business activities and introduced to the leading citizens and enjoyed a hospitality for which the ancient capital is noted. With the deputation were Hon. Ernest LaPointe, Minister of Marine, Hon. W. R. Motherwell, Minister of Agriculture; Hon. Charles Stewart, Minister of the Interior; Hon. J. H. King, Minister of Public Works; Hon. Dr. Beland, Minister of Soldiers' Civil Re-establishment and Dr. Tolmie, ex-Minister of Agriculture.

EXECUTIVE COUNCIL LEAGUE OF NATIONS TO MEET AT GENOA.

GENEVA, May 1.—The executive council of the League of Nations will meet here on May 11, regardless of whether the Genoa conference has ended or not. It is proposed to take over such matters as the Genoa gathering may refer to it.

It is thought here that the work at Genoa may be finished before the date of the council meeting and that the League may be asked to continue certain work already begun by the Economic Conference.

The Council will be presided over by Count Quinones De Leon. The sessions will probably last a week.

CANADA SECOND TO U.S. IN MILK TRADE

Report Shows That United States Leads in British Market. Has Ousted the Swiss.

LONDON, May 1. — (Canadian Press.)—Discussing the importation of condensed milk into Great Britain, "The Agricultural Market Report" issued by the ministry of agriculture refers to the great modification in trade conditions in recent years, the change being mainly one of direction.

The publication shows that North America has now almost completely ousted Switzerland from the position it held ten years ago when that country practically supplied the whole English trade. Canada now takes second place only to the United States in the sweetened whole condensed milk trade. Canada's maximum exportation to Great Britain occurred in 1920. Australia and New Zealand, says the report, are now entering the market as shippers.

CANADIAN AUTHORS ELECT OFFICERS.

OTTAWA, May 1. — (Canadian Press). — The Canadian Authors' Association, at its annual convention here on Saturday, elected the following executive for the coming year: Honorary President, Lady Byng, Ottawa; President, John Murray Gibbon, Montreal; Secretary, Bernard K. Two Million Collected in Last Two Days. Bushel Basket Full of Checks.

GREAT RUSH.

MONTREAL, May 1 (Canadian Press.—Over five million dollars are the total for income tax registered at the Montreal tax office by six o'clock Saturday evening, it was stated by the Inspector of Taxation yesterday.. The total is about equal to that received last year.

There was tremendous rush on Saturday and it is estimated that $2,000,000 were paid in on that day, and Friday. Many checks came in to the last minute asking how returns should be made out and these people included even judges of the Superior Court.

OBITUARY

THOMAS SOMERVILLE.

After an illness extending over some eight weeks Mr. T. A. Somerville passed peacefully away at his farm home, "Prairie View," on the morning of Thursday, April 6. Some years ago, Mr. Somerville had been very ill with heart failure, but in recent years he seems to have regained his old time vigor. Taken away now in the prime of life (46 years) and in the midst of large business interests and family responsibilities, his death is particularly regrettable.

Mr. Somerville was born near Enniskillen, County of Fermanagh, Ireland. In 1879, with his parents, he came to Canada, settling near London, Ont. Ten years later the family came to Manitoba, taking up their home on the farm now occupied by Edward, some seven miles east of Hartney. In 1897 he married Miss Sophia Goodfellow, of Peterborough, Ont. During their 15 years of happy wedded life three children were born to them Orville, Annie and Joe. These with their mother are left to mourn their great loss. The deceased is also survived by his aged parents and by his two brothers Chris and Edward.

The funeral service held on Saturday was attended by a large number of sympatheitic friends and neighbors. Rev. Mr. Lane, the minister in charge, spoke of some of the excellent qualities of Mr.Somerville's life and character. He was an exemplary farmer and stock man, a good neighbor and a faithful friend. He was a man of quiet disposition, happy in his home relationships. Recognition of God and a desire that His will be done, marked the passing of his soul into eternity.

LAKE STEAMER BELIEVED LOST WITH ALL ON BOARD

PARRY SOUND, May 1 (Canadian Press). — M. Brais, marine agent here for the Department of Marine and Fisheries, who has been posting bulletins regarding the missing steamer Lambton, on Saturday posted a final bulletin which removes the last basis of hope entertained by the relatives that the crew and passengers on the Lambton might yet be found. The bulletin announces that the search for survivors has been exhaustive but fruitless.

The Lambton, a small steamer bought by the late Government during the war with a somewhat larger boat, the Grenville, nave been used by the Department here for lighthouse and buoy service.

Parry Sound loses six of her citizens, Andrew Valyear, the steward and cook, being the only married one of the six, and he leaves a widow and eight children.

TAX WANTED ON ADVERTISING IN FOREIGN PAPERS.

OTTAWA, May 1. — (Canadian Press.)—At the meeting of the Canadian Authors' Association held here Friday and Saturday J. Vernon MacKenzie, editor of MacLean's Magazine and B. K. Sandwell sponsored a resolution asking the Government to consider placing a tariff on advertising carried in foreign magazines imported into the Dominion. Secretary Sandwell stated that protection was urgently needed in this direction, as much as in manufacturing industries.

CAMPBELLFORD AND DISTRICT

Officers Elected for Ladies Aid of MethodistChurch —"Oak Farm" Comedy Enthusiastically Received.

PERSONAL NEWS

CAMPBELLFORD, May 1.—The regular meeting of the Ladies' Aid of the Methodist Church was held in the church parlours on Thursday afternoon with a good attendance—the president, Mrs. J. A. Irwin, presiding. The treasurer's report for the year just ending was highly satisfactory. The president then vacated the chair, and it was filled by the pastor, Rev. H. B. Kenny, who commended the president and members for the successful year. The election of officers then took place as follows:

President—Mrs. J. N. Stone.
1st vice-president—Mrs. F. W. Wood.
2nd vice-president—Mrs. F. J. Smith.
Treasurer—Mrs. Charles Davidson.
Secretary—Mrs. Clarence Williams.
Pianist—Mrs. I. T. Frederick.

A hearty vote of thanks was tendered the retiring president and the other officers for their untiring efforts during the year.

"Oak Farm" Comedy Repeated.

The comedy "Oak Farm," presented in the Opera House here on 16th March by the young people of St. Mary's Church, and which was such a success, was repeated by request) on Thursday night, under the auspices of the Lacrosse Club, and again drew a full house. The cast, which is a strong one, consists of the following: Mrs. Matt. Mulhearn, Miss Marion Smith, B.A., Miss Murray, and Messrs. Thomas Callery, B. Kerr, J. Anderson, E. O'Connor, and Mr. Woods, and all acquitted themselves equally as well as on former presentation, at which they proved themselves no amateurs. Musical selections were also rendered by Miss M. Burleigh and Mr. Mitchell.

Passed Away.

There passed away at her home in Gravenhurst, Mary Ann Connolly, wife of the late Patrick Gallagher. The deceased, who was born in Seymour West, on the old Connolly homestead, was well known and highly respected here. Mrs. C. H. Coveney, who passed away here but a few weeks ago, was a sister of deceased; another sister, Mrs. Dennis McGuire, resides in Toronto, and a brother Daniel, at Edmonton, Alta. The funeral was held on Saturday upon the arrival of the 1.40 train from the G.T.R. Station to St. Mary's Church for interment in St. Mary's Cemetery.

Personals.

Messrs. Lewis Hay and Earl Stephens, of Queen's University, Kingston, having completed their year's work, are at their respective homes here.

Mr. Edmund Carnahan, of the School of Practical Science, Toronto, is with his parents, Mr. and Mrs. W. E. Carnahan.

Rev. M. L. Hinton, of Hastings, spent Thursday in town.

Miss Bertha Clark left on Saturday to resume her duties as teacher at Humberstone.

Mr. Ray Merrills returned to Toronto on Friday by motor, and was accompanied by Mr. James Irwin.

BD. APPOINTED TO HEAR COMPLAINT OF U.S. MINERS

D'Arcy Scott of Ottawa Will Be Chairman of Board Called Under the Lemieux Act.

OTHER MEMBERS.

OTTAWA, May 1 (Canadian Press). — The full board has now been appointed under the Lemieux Act to conduct the investigation into the dispute between the coal companies included in the British Empire Steel Corporation and their employees, and it is expected that a meeting of the Board will be held some time during the present week.

The appointment of the chairman, D'Arcy Scott, of this city, was announced last evening by the Department of Labour. Mr. Scott was formerly Deputy Chief Commissioner of the Board of Railway Commissioners for Canada. The other members of the Board are: John E. Moore, lumberman of St. John, N.B., representing the companies, and Isaac E. MacDougall, of Inverness, N.S., representing the employees.

Mr. Scott was appointed chairman by the Minister of Labour, owing to the inability of the representatives of the companies and the employees to agree upon a nomination.

RICHARD CROKER DIES IN IRELAND

Famous Tammany Politician Passed Away at Glencairn Castle After Lingering Illness.

DUBLIN, May 1. Canadian Press —Richard Croker, formerly leader of Tammay Hall, New York, died at 330 on Saturday afternoon at Glencairn Castle, Sandyford, a few miles from Dubin. His wife was at his bedside.

The former political leader spent the better part of the last ten or twelve years in Ireland, where he owned extensive estates, making occasional visits to the United States. The last of these visits was in the Spring of 1921 when he went to New York in connection with the legal proceedings instigated by his sons to prove him incapable of managing his own affairs.

Shortly after he returned to his home at Glencairn Castle he became seriously ill and his condition was described as so bad that it would be impossible for him ever to leave his bed. But he soon showed signs of improvement and early this year he was reported to have regained his health and spirits.

Croker took a keen interest in the negotiations between Ireland and Britain looking to a settlement of the age long controversy.

When the treaty providing for the free state was signed he gave it as his opinion that by the pact Ireland had gained practically every thing fought for in the last 700 years. He believed that 70 per cent. of the Irish in the United States were for the treaty.

CORNWALL CHEESE BOARD HAS MEETING.

CORNWALL, May 1.— (Canadian Press.)—The annual meeting of the Cornwall cheese board was held in the Board room of the Town Hall Saturday afternoon. The secretary, J. W. McLeod, presented his report covering the operations last season, showing that the Board opened on April 23rd, 1921, and closed on November 12th, 1921. During that period there were boarded and sold by the 36 factories which comprised the board, 53,978 boxes of cheese, which were sold at an average price for the season of 18 1-2c. per pound.

WOMAN KILLED BY FALL FROM 18-STOREY BLDG.

Mother of Well-Known Composer and Pianist is Killed in New York. Ill Since February.

Nervous Breakdown.

NEW YORK, May 1 (Canadian Press). — Mrs. Rose Grainger, of White Plains, N.Y., mother of Percy A. Grainger, the Australian composer and pianist, was killed yesterday by a fall from an eighteenth-storey window in the Aeolian Hall Building.

Word was immediately sent to the son, who is said to be in Los Angeles on a concert tour.

After first reporting the case a suicide, the police recorded that Mrs. Grainger "either fell or jumped."

Henry T. Fink, musical critic for the New York Evening Post, later issued a statement, explaining that Mrs. Grainger had gone to a window for fresh air, was overcome with dizziness, and had fallen. He said she had been so ill since February that she could not see her son before his departure for the Pacific Coast.

"It was a complete nervous breakdown, and her heart was in very bad condition," he said. "After arriving at Mrs. Sawyer's office," he added, "she suddenly felt faint, and asked Mrs. Sawyer to get her some warm milk and to raise the windows, as she was suffocated. Mrs. Sawyer went out and returned in about ten minutes. She could not see Mrs. Grainger. She called loudly, but there was no answer.

Mr. Fink said that Mrs. Grainger gave her son his first musical education, and had been his constant companion until her recent breakdown.

"Whe Percy was 11 years old," he added, "his mother had a frightful injury to her spine, and had to lie strapped to a board for nine months. Her recent breakdown was a continuation of that illness."

Her son, he said, was hurrying to New York, and the funeral services would not be held until he arrived.

GRAIN AT TRENT RIVER AFFECTED BY COLD WEATHER

Clover Also Damaged — Will Appoint a New Trustee School Section No. 10—News Briefs.

TRENT RIVER, May 1.— The river is lowering a little to-day and we hope soon to see it normal.

A special meeting of the electors of School Section No. 10, Seymour, will be held in the school house on Wednesday, May 3rd, at 2 p.m., for the purpose of electing a trustee to fill the vacancy caused by resignation of George Chiles. Dr. E. J. Free, M.O.H. from Campbellford, will be present to give a talk on "Health."

Messrs. R. J. Allan and James Irwin of Campbellford, were visitors here last Thursday.

The postponed meeting of Seymour West Women's Institute, will be held at the home of Mrs. Charles Macoun, to make arrangements for the county meeting and for an exchange of roots and seeds.

Mrs. Chas. Macoun was in Toronto recently attending the trustees section of the Ontario Educational Association. She also attended the Provincial convention of the Federated Women's Institutes, held at the Parliament Buildings.

Clover and fall grain stood the winter well, and until last week conditions were very favorable. The cold weather of the past week has delayed the earlyy growth and may adversely anect the fruit.

Mr. E. H. Fairbrother came down from Toronto Thursday to spend a few days at his cottage.

INSTANTLY KILLED.

The King will also visit certain French and Belgian cemeteries and deposit wreaths as a tribute to Great Britain's allies. His Majesty will also review British ex-service men now employed in the devastated areas.

QUEEN OF SPAIN IN ENGLAND FOR ROYAL FUNERAL

Funeral Service For Lord Leopold of Mountbatten Will Be Held in St. George's Chapel To-Day.

AT WINDSOR.

LONDON, May 1. — (Canadian Press.) —Queen Victoria, of Spain, and her two daughters arrived in London last night to attend the funeral of Lord Leopold of Moutbatte, her brother. She was met at the station in behalf of the King and Queen by the Duke of York and also by Princess Mary and other members of the Royal family, the Spanish Ambassador and the Embassy staff. The party drove immediately to Marlborough House chapel, where the body of Mounbatten is resting, pending removal to Windsor for the funeral service in St. George's chapel to-day.

Princess Beatrice and others met the party at the chapel.

BORDEN TELLS OF PRINCIPLES OF THIS NATION

Replies to Toast of "Our Dominions" at Royal Academy Banquet in London.

THE WAR.

LONDON, May 1 (Canadian Press). — A new toast, "Our Dominions," was proposed at the Royal Academy banquet at Burlington House last night by President Sir Aston Webb, who declared that Great Britain never forgot the heroism of the Dominions in the war.

Sir Robert Borden, former Premier of Canada, responding, said the Dominions came into the war because they were free nations of a great Commonwealth of nations called, for want of a better term, an Empire, and because they believed not only that the great ideals of justice and liberty were being threatened, but the integrity, perhaps the existence, of the Empire were at stake.

FIVE YEARS FOR THEFT.

WINDSOR, May 1.— (Canadian Press.)—Kenneth McIntee, 27 years old, taxi driver, was sentenced to five years in Kingston Penitentiary when he was found guilty Saturday on a charge of stealing $2,500 worth of narcotic drugs from Ralph Berlin. The theft occurred on March 24.

THE FATE OF THE SENATE.

The announcement that one of the Progressive members of the Federal House proposed to precipitate a debate in the Commons on the question of the Senate, aroused much amusement among those who remember the vigorous manner in which the Red Chamber has been denounced so often in the past. Fancy a debate on the subject—"Resolved, that the Senate is not of the greatest advantage to Canada." How tame that indictment is alongsnde some of the tirades that have been launched against the Upper House in the days gone by. And when the Senate survived the fiery assaults of crusader after crusader, who poured torrents of abuse upon it, there is little likelihood that an attack by a commoner, who can think of nothing worse than that the "Senate is not of the greatest advantage to Canada," will make much of an impression. As a matter of fact there is always at the back of the mind of the average member of Parliament the thought that some day the fates may be kind to him, and send him to that much abused but peaceful haven, where the tired politician, the fear of elections removed, and undisturbed by ministerial crises or unruly constituents, can find rest and consolation. It is to be hoped, however, that Parliament will not waste much time upon the fruitless debate. There are many more important problems to be discussed than the fate of the Senate.

MUNICIPAL ELECTION DAY.

Municipalities have been given power by means of a bill recently passed by the Ontario Legislature, to adopt the first day of December as municipal election day, if they see fit to change from the present date. The local council, the Examiner believes, would do well to consider this matter and to discuss the advisability of having Peterborough take advantage of the legislation which is designed, of course, in the hope that a much larger percentage of the electorate could be induced to exercise the franchise if the elections were held earlier. It must be admitted that New Year's Day has not proved a success as an election day. It was originally selected because it was felt that on a holiday there would be no troublbe in securing a representative vote, that practically everybody on the list would have ample time to visit the polls during the day. That was all right in theory, but the system has failed to work out in that way. It has been found that many people participating in family gaterings, have refused to leave the festivities long enough to register a vote, and more often than not, fewer than half the total votes on the list have been polled. Obviously then New Year's Day is a failure. It is doubtful whether any better showing would be made in the week between Christmas and New Year's, and for several weeks before Christmas an election would be regarded by the merchants as an unwarranted interference with business. Hence December 1st has been adopted as a suitable date. It is not close enough to Christmas to cut in upon business and the legislators undoubtedly believed that a better vote could be secured then than at the end of the year. The municipalities have, therefore, been empowered to make the change, and the matter should engage the attention of the city council. Any change could hardly help but show an improvement.

WAVING THE FLAG.

There is food for thought in the little flag incident that took place in the House the other day. One of the members objected to an appropriation in the estimates for flags for public buildings, declaring that he did not believe in that form of showing loyalty which required flags to be flown day in and day out, although he had no objection to them being used on special occasions. Hon. Mr. Fielding, however, warmly advocated the display of flags, and the majority of Canadians will agree with him. We do not see enough of our beautiful flag, the Union Jack, in this country, and in that respect we could well adopt the system of our neighbors to the south. They inculcate a love for the Stars and Stripes among their children in the schools, and the American flag is always displayed on public buildings at all times, and lavishly used on every public occasion. Every parade, no matter under whose auspices, is marked by hundreds of flags, and this constant display of the Stars and Stripes cannot fail to be a stimulus to patriotism and an important factor in the strengthening of a national spirit. In Canada in general—and in Peterborough in particular—we might take a leaf from Uncle Sam's book. We might as well confess it—we in Peterborough are not flag wavers. We let important anniversaries pass by with only a flag here and there to do tribute to the significance; famous men come to Peterborough, and instead of flag draped buildings, they find only a dozen business places with a flag displayed. And when it comes to parades, the National Ensign is very rarely in evidence. It is not that Peterborough is not loyal—the recruiting record of the city during the war gives the lie to that charge—but somehow we are not given to outward display of our loyalty. It would perhaps be better if we were.

THE CASE OF THE MILITIA.

The opposition to the Militia estimates as brought down by Hon. Geo. P. Graham is not only a source of embarrassment to the Government, but it is a matter that has aroused the resentment of many Canadians of all shades of politics. Nt one desires that at this time, when talk of national disarmament is in the air, and the nations have already taken some steps in that direction, that Canada should make lavish expenditures upon her defence forces, but the proposals of the Government in regard to the Militia can, by no stretching of the imagination, be brought within the scope of that description. In fact the Dominion is probably spending less to-day on her army, navy and aerial forces than any other country in the world. Our common-sense and our national pride alike should convince all thinking Canadians that we cannot scrap all our Militia organizations, that we must have some measure of protection, some defence of law and order other than is furnished by our police. Back of them there must be the support of the citizen regiments of the Militia, who can be called upon in time of need. No one claims that our Militia system is perfect, but it is at least the basis for the defence of Canada against foes, either with or without, and it is folly to think that we should voluntarily leave ourselves without that measure of protection. With the experience gained through Canada's war effort and from the lessons of that conflict, it should be possible to materially increase the efficiency of the Militia system without adding to its cost. It is along that line that the Dominion should be moving at the present time. But much of the discussion in the House the other day was ridiculous. The service rendered during the war by members of the active Militia of Canada might have been counted upon to protect the Militia from sneers and belittlement. But evidently the House of Commons has its share of men whose memory is not of the best; the story of Ypres and Vimy and Passchendaele and the Hindenburg line has already been forgotten—at least so far as those little Canadians are concerned.

BEAUTIFYING CANADA.

The Galt Reporter is out for a more beautiful Galt and a more beautiful countryside. It says that Canadians who have visited England praise the beauty of its rural parts and lament the neglect to beautify our own country.

In natural beauty Ontario is not deficient. The charm of English and European scenery is due largely to human effort in preserving the natural advantages of the landscape, planting and building in harmony with the natural environment. People travel thousands of miles to view such scenes without reflecting that they might be reproduced here with such modifications as taste and common sense would suggest. There is, for illustration, a point only a few miles from Toronto from which a wide expanse of country can be seen, and any building erected upon which would be a conspicuous landmark for many miles. In an older country such a height might be crowned with a castle or a temple which would be a lasting source of pleasure.

A field covered with rotting stumps is an ugly and dreary spectacle often seen from the window of a train. What a change would be effected by taking out the stumps, which must have a commercial value in these days of scarcity of fuel, and replanting with trees, shrubs, or flowers. A united effort of this kind would do much to beautify the country, and would pay. Many of our towns and villages are charmingly situated, but defaced by architectural monstrosities. It is not much more expensive to build well; it is not necessary to spend money on ornament, but simply to pay attention to fitness and beauty of form.

More encouragement should be given to our town-planners. They should not be regarded as mere faddists. Their advice should be sought and followed, especially where the suggestions are simple and involve no great expense. The one thing that almost anyone can do is to preserve trees and plant them. United effort of this kind would be profitable commercially as well as from the point of view of art. There is no necessary conflict between use and beauty A bridge, for instance, is almost always a pleasing object; it is difficult to build one so badly as to make an eyesore, and most of the recently erected cement structures are good for the eyes. Even the coat of paint on house or fence is a contribution to the national heritage of beauty. And all such effort "blesseth him that gives and him that takes."—Toronto Globe.

EDITORIAL NOTES AND COMMENT

Horticultural Week.

If you love the "city beautiful" you should be a member of the Horticultural Society.

At least there are no May Day troubles in Peterborough.

It does not seem to have occurred to the aldermen that the relief officer by his careful methods undoubtedly saved the city enough money during the unemployment relief period to provide for an increase for himself for half a dozen years.

The new building by-law should be passed—and then enforced. There should be no relaxation of the regulations, no matter who applies for special privileges.

Again the attention of the Board of Health is called to the fact that many houses in the centre of the city are without sanitary conveniences.

The Melodie Concert Band should be able to play "All We Got Was Sympathy" with a good deal of feeling.

The Ladies' Home Journal, with a circulation of approximately two million, uses practically all its editorial page this month advising motorists to observe "Safety First" principles. Its space could not have been better employed—but the trouble is the average motorist will never think of applying the advice to himself.

LITERARY GEMS

ORIGIN OF CANADA.

"Canada" is probably derived from the Huron word "Kanada," which means "a village or settlement." The early French writers used the term "Canadien" to designate the Algonquin tribes on or near the St. Lawrence as distinguished from the Algonkin and Micmac. Jacques Cartier applied the name "Canada" to the country adjacent to Stadacona (Quebec), the chief of which he designated as "the King of Canada."—From "5,000 Facts About Canada."

Voice of the People

WHY A NEW MAN?

Editor, Examiner:

Sir,—As a ratepayer of the city of Peterborough, I wish to make a protest against the action of the City Council with reference to the changing of the Chief of the Fire Department. As we have a Chief who is a city man and is as well able to do the work as any outsider, and at the present time with other taxation going up, the question is, in bringing in a new man what will he do? He may put the city to five or six thousand dollars expense to show that he is doing something.

Now, if our city aldermen want a trip to Toronto or to Montreal, let them make some other excuse such as they had last year for the Union station.

As a large ratepayer, I think it is time to call a halt and get something done that will be a real benefit to the city.

Thanking you for the space, I remain,

Yours truly,
F. MONTGOMERY.

BIRTHDAY GREETINGS

To Georgie Haggis, on her Tenth Birthday, May the 1st.

How fast the years have flown away
Since that bright joyful, glad May day,
When first in all her witching grace,
We saw her smiling baby face.

A little dimpling, daring, she—
Was sweet as ever babe could be,
An infant cherub from the skies,
Sent down to us in human guise.

But Time's swift wheels keep rolling on,
Since then, ten years, have come, and gone,
Now, babyhood is left behind,
And she, with keen, inquiring mind,

Freely imbibes of learning's lore,
Pursuing knowledge more and more:
Daily to school her way she wends,
And pleasure there, with profit bends.

Blessings upon her curly head,
Full many a book the Elf read,
Gymnasium feats she learns to do,
And trip the light fantastic, too.

She's full of life and childish glee,
Affectionate and fond and free,
And may Heaven's smile upon her shine,
Unfading till life's sun decline.

Heaven grant, her path aong life's way,
Be strewn with fairest flowers of May,
Glad natal days, full many send,
And Georgie, from all ill defend.

SWORE HER DEAD SON WAS LIVING.

To Punish Daughter-in-Law For Re-marrying.

PARIS, May 1.— (Associated Press). A woman's attempt to punish her daughter-in-law for marrying again after her husband's death in the war has just been exposed here.

An elderly woman in Touraine informed the Ministry of War that she had recognized her son in one of six photographs published by the newspapers of insane soldiers, former prisoners of war in Germany, returned after the armistice in a complete state of amnesia, unaware of their identity.

The wife of the missing soldier having long ago given up her husband as dead, had just been married a second time and, in the midst of her new honeymoon she was instructed to come to Paris and identify her first husband.

Greatly perturbed, she visited the hospital accompanied by her mother-in-law, who greeted "her son" effusively.

"This is not my husband," shouted the young woman, and acquaintances of the missing soldier also failed to recognize him, some of them saying even that there was not the slightest resemblance.

The older official broke down and told the officials:

"I've known right along he wasn't my son, but I wanted to teach his wife a lesson, she had no business getting married again."

RUSSIAN EXPORTS

MOSCOW, May 1. — (Associated Press.—Russian exports for January this year amounted to $1,250,000, according to recent announcement, the goods being made up chiefly of oil products, flax, hemp and furs. The shipments went mostly to England, Latvia and Esthonia, a small part being sent to America.

The imports of Russia for January amounted to 88,710 tons, valued at $11,400,000, this being exclusive of the food taken into the country by the several relief organizations.

The imports show an increase of nearly six times as compared with January, 1921. The bulk of the imports came from Germany with England next, then Latvia, the United States and Esthonia in the order named.

KEEN RIVALRY FOR DANUBE SHIPPING.

Port Facilities Mean a Traffic and National Income.

PRAGUE, May 1.— (Associated Press.—Keen rivalry for predominance in the Danube shipping is developing among the three land-locked fragments of the dismembered Hapsburg Empire—Austria, Czechoslovakia and Hungary. The Danube River is their sea, and port facilities mean traffic and national income. Hence one form of their competition is to build up their respective ports—Vienna, Pressburg, (now called Bratislava) and Budapest, situated close to each other on a bend of the river.

With the prospect of a connecting canal system between the Danube and the Rhine through Bavarian enterprise, the Danube is coming to be regarded here as the greatest artery of trade in Europe of to-morrow and the British were aware of this when they founded their River Syndicate.

The first struggle between the three ports was to get the Allies' Danub Commission. Bratislava won, but the term was fixed for five years and the Commission will next go where the biggest traffic is. This is spurring the Czechs to increase the traffic capacity of Bratislava to 1,000,000 tons this year and ultimate plans call for a capacity for 3,000,000 tons.

The struggle for trade thus far is mostly between Bratislava and Budapest, with Vienna lagging. Hungary has granted a contract to a French firm to construct a first-class port at Budapest and the Czechs are preparing to ans this by equipping Bratislava at a cost to the government of 228,000,000 Czech crowns. Czechoslovakia also proposes to build a subsidiary port at Komarno. This work is to be completed in three years.

A private company has been organized to take over the shipping under the Czech flag on the Danube and Czechoslovakia means to keep the Danube Commission at Bratislava.

LIFE IN RUSSIA IS VERY COMPLICATED.

Depreciation in Value of Paper Ruble a Handicap.

MOSCOW, May 1 — (Associas... Press.—Many of the millions of persone hitherto fed by the government and who are now being thrown upon their own ourserces are finiding life in Russia, complicated by depreciation in the value of the paper ruble, growing constantly more difficult.

Only 6,000,000 persons including the Red army and navy are now receiving government rations, says the Moscow Pravda. Last September the number was 11,500,000.

Factory workmen, government employes and others cut off the free rations list receive, in theory, pay increases supposed to be adequate to permit them to buy their food on the open markets. The pay fixed to-day, however, may be worth actually, in purchasing power, only half as much next week, or next month.

Prices for food and other articles in Moscow follow almost exactly the depreciating value of the ruble as compared to gold or foreign money. If street brokers pay 250,000 rubles to the dollar to-day and 1,000,000 for the dollar a week or so hence, bread will cost four times as much a weke hence.

A salary of 2,000,000 rubles monthly, fixed a month ago, has little purchasing power to-day with street car fares fixed at 52,000 rubles, newspapers 5,000 rubles each and back bread 50,000 rubles a pound.

Few Russians manage to exist through all these difficulties is a puzzle to the foreigner; yet Moscow's population does not appear to be greatly underfed.

Housewives perhaps tear their hair when they find that varying markets disrupt their household budgets A chicken, say, that was quoted yesterday at 600,00 rubles, amy cost 1,000,000 today but many Muscovites manage to get the additional slips of paper called money and buy the chicken just the same.

The people of the United States spend $49,000,000 a day for food.

The modern silk hat was first worn in England about 1840.

REVOLT BY LAUTIH KHAN SUCCESSFUL.

Shah's Forces Ousted From Capital of Persia.

CONSTANTINOPLE, May 1. — (Associated Press).—A series of battles for the possession of Tabriz, second capital of Persia has been in progress since the British troops were withdrawn last year as a result of which the city has recently been taken by Lautih Khan, according to advices received here from Lautih Khan was commander Persian gendarmerie forces in the of Urmia. He set his troops in ent against the Teheran governm... on the gorund that they had not been paid for five months. His forces su... ded the Persian Cossacks and Arm... an battalion at Sheref hane and disa... d them and some of the prisoners joine... is ranks.

With an army of 10,000 men, Lautik Khan then organized an expedition against Tabriz which was defended by the Shah's loyal Cossacks and Persian gendarmes commanded by Swedish officers.

Overcoming their resistance, he made a triumphal entry in Tambriz, occupied all public buildings and issued a manifesto to the people, proclaiming his intention to work for and assure the prosperity and independence of Persia. The Shah's governor and his assistant in Tabriz have been arrested and tried by Lautih's courtmartial

Lack of money to pay the troops and gendarmes, Bolshevik propaganda and brigandage appear to be the cause of most of the revolutionary movements in Persia, says the Teheran advices.

Classic Centre Shinto Worship

TOKIO, May 1.—(Associated Press) Nara, one of the ancient Japanese cities which the Prince of Wales will visit on his tour of Japan as guest of the government, is a classic center of Shinto worship and was the first capitol of the nation. Much of the building and beautifying begun in A.D. 709, the "Golden Age of Japan," is still intact.

The great Kasuga Park conveys the impression of an English manor with its lordly pines and graceful cryptomerias, interspersed with ancient cherry trees and rows of maples, beneath whose shade hundreds of deer may be seen at all seasons. During the time of the Tokugawa Shogunate the killing of one of these deer was punishable by death and while no such penalty is meted out to-day, any injury to these animals is severely dealt with. The deer seem to know it and make friendly advances to all visitors.

During the early days of Nara prosperity, the Todaiji, one of the seven great temples, was the head of Buddhism in Japan, and the buildings covered some 20 acres. It was richly endowed with a domain of nearly 25,000 acres of rice and grain fields supporting a population of 5,000 persons who labored in its service.

Of all its glories there to-day remain but few, chief among them being the Great South Gate, Nandai Mon; the great Hall of Buddha and the ancient and most interesting old shrine called Kaidan-in.

The Great South Gate was built in 752 A.D. and remodelled in 1199. On either side are two gigantic figures of Nio or the Deva Kings carved by Tankei and his pupil Unkei. With the two stone lions close by, excellent specimens of 12th century Chinese sculpture but grotesque to modern eyes, they are listed and protected as "National Treasures."

The Nara-no-Daibutsu, the vast bronze Buddha cast in 749 A.D. being the largest of the kind in Japan being 53 feet in height.

The Kaidan-in is remarkable for its unusual construction and arrangement inside—a series of platforms rising one above the other to support the images of the Deva Kings. Indra and Brahma, which are said to be among the best examples of the art of Nara era, and also are counted among the "National Treasures."

Public Meeting Arranges For Planting Memorial Trees On Arbor Day—Beautify Village.

THE NEW INDUSTRY

HASTINGS, May 1. — A large and enthusiastic public meeting was held in the council chamber on Friday evening, April 28, when it was decided to celebrate Arbor Day by planting trees on Bridge and Albert streets.

Every person interested in beautifying the village is invited to the town hall at 4 o'clock, when speeches will be delivered by the clergy and the directors of the Society.

The trees to be planted will be known as Memorial trees in honor of the brave boys who made the supreme sacrifice in the Great War.

The local band will be in attendance and a half holiday has been proclaimed.

New Barrel Factory.

The buildings at the National Cooperage plant here are assuming large proportions and everything is being rushed to completion.

Since the beginning of the building operations here 10,000 cement blocks have been made, 111 cubit yards of concrete foundations laid, 5000 bricks laid in piers.

The roofs of the main building and boiler house are now covered in and ready for the roofing material.

The siding will be started this eek.

The following are the dimensions of the new buildings. Main building 318 x 60 ft; 2 dry kilns 114 x 20 ft. each; power house 52 x 42 x 20 x 38 ft., with equipment of a 200 h.p. boiler and a 150 h.p. engine.

When the factory is in operation and indications point to an early start this industry will prove a boon to Hastings.

CASH GRAIN.

MONTREAL, May 1. Canadian Press. — The local cash grain market was quiet Saturday. The flour situation was without feature. There was a fair business in millfeed. The rolled oats market was slow. The trade in eggs is active. Prices were down 1c per lb. in butter and declined 1-2c to 1 3-8c per pound in cheese.

WINNIPEG CATTLE.

WINNIPEG, May 1. Canadian Press. — Receipts on Saturday were 120 cattle and calves and 185 hogs.

Owing to the small volume of offerings trading on the cattle market was extremely quiet. The few sales showed fairly in line with Friday's close.

The hog market maintained a steady tone, selects selling at $1.

There was no trading on the sheep and lamb market due to the lack of receipts.

EGG MARKETS.

OTTAWA, May 1. Canadian Press —The shipments of increasingly large quantities of eggs in car lots, under government inspection, was the most notable feature in the egg market on Saturday. The egg regulations require that only cars moving inter-provincially be inspected, but inspection is being requested on many cars moving locally within a province as well. Up to 33c f.o.b. shipping point is being obtained for government inspected extras by carlot shippers in Ontario. In some instances the cases are free, in other cases returnable at an agreed upon price. Jobbing prices in the principal centres are well maintained, while the prevailing price at Ontario country points ranges from 25c to 27c.

Toronto firm, unchanged. Dealers freely offering 27c f.o.b. country.

Edmonton jobbers quoting country shippers on a graded basis, extras 27c; firsts 22, seconds 18. Jobbing prices unchanged.

CHICAGO WHEAT.

CHICAGO, May 1. Canadian Press. — The shakedown in May wheat looked for Saturday, was delayed until during the last hour of trading when the prices broke nearly 5c when selling orders came into the pit. A tense feeling existed in the pit from the start and everyone was looking for some sort of a break. The market lacked support but a few cash houses bought a little at the bottom and that accounted for a recovery of part of the loss. The finish was unchanged to 2 3-4c lower, with May $1.39 1-2 to $1.39 3-4, and July $1.26 1-8 to to $1.26 1-4.

Corn was 3-8c to 5-8c down and oats were off 1-2 to 1c. Provisions were unchanged to 15c higher.

LOSS OF LAMBTON ADMITTED.

PARRY SOUND, May 1.—(Canadian Press.)— The loss of the steamer Lambton, with at least 22 of the crew and passengers, is now officially admitted.

This loss adds another mystery of the Great Lakes.

Not alone the towns of Georgian Bay, but many other parts of Ontario are mourning the loss of citizens. Parry Sound, the home port of the Lambton, is the hardest hit, six of the seventeen members of the crew having their homes here.

CANADIAN PRESS MEN GATHERING.

Annual General Meeting Will Be Fully Representative.

TORONTO, May 1. — Daily newspaper publishers and editors are gathering here from all over the Dominion for the annual meeting of the Canadian Press, Limited, the co-operative news gathering and distributing association including within its membership practically every daily newspaper in Canada. Indications are that the annual general meeting on Tuesday next will be fully representative members attending from as far east as Cape Breton and as far west as Victoria.

To-morrow is devoted to the final meeting for the year of the retiring Board of Directors, when a number of important matters affecting the welfare of the Association will come up for review.

Founded on its present basis in 1917, largely by the urge of war necessity which rendered it imperative that there be a free flow of news from one end of Canada to the other, the Canadian Press has since then made considerable strides forward, and is now an organisation of which its members are proud. Modelled on lines a good deal similar to that of the Associated Press of America, it depends for its success primarily on the goodwill and hearty co-operation of its members in the prompt production of the news of their district for the benefit of the membership at large. This exchange of news is rendered possible by the leasing of about 12,000 miles of telegraph wires, both day and night, from Coast to Coast, operated by the telegraphers of the Association.

In a news sense, therefore, the whole Dominion is in close and instant contact, and the flash of a news story breaking in Vancouver is simultaneously available in Winnipeg, Toronto, or Halifax. Head office is in Toronto, and editorial bureaux are situated at strategic news centres, such as Halifax, Montreal, Ottawa, Winipeg, and Vancouver.

It is of its very essence that the Canadian Press be strictly impartial and unbiassed in its presentation of the news of the day, for its members include newspapers of every political stripe, and these critics of its news services, numbering over a hundred, are vigilant to see that their Association maintains its reputation for scrupulous fairness. A striking illustration of this was afforded by the recent Dominion Elections Campaign, when staff reporters of the Canadian Press accompanied each of the three leaders, with the result that for perhaps the first time there was presented to the people of Canada, day by day, in just perspective, a full picture of the progress of the campaign.

The Canadian Press also undertook, in collaboration with the telegraph companies, the collection and distribution of the election results, and in this a new record for speed and accuracy was set up. The Association works in close co-operation with the Associated Press, and has access through the editorial staff in New York to the world-wide news reports of that great news agency. At the recent annual meeting of the Associated Press, its general manager, Mr. Roy Martin, congratulated the Canadian Press on its very excellent news service covering Canada, and said that as a result more Canadian news is being printed in the United States than ever before.

A feature of the past year has been the building up in London, by an arrangement with Reuter's, of a Canadian Press cable service, which aims in particular to cover the news of the British Empire in more complete fashion than is done by the Associated Press, whose cable service is, of course, primarily designed for American consumption. While still in its infancy this special cable service has already achieved a considerable success, with the result that more and more news of Great Britain, Australia, New Zealand, India, and the Empire generally is made available to the Canadian public. A valuable feature is that through Reuter's, the Canadian Press has access to the very full reports of the British Press Association, the co-operative organisation of the British daily newspapers, which covers very thoroughly news of the British Isles, including a full report of the proceedings of the Imperial Parliament.

Retiring officers and directors of the Association are as follow: President, E. Norman Smith, Ottawa Journal; first vice-president, E. H. Macklin, Manitoba Free Press; second vice-resident, G. Fred Pearson, Halifax Chronicle; directors, F. B. Ellis, St. John Globe; H. Gagnon, Quebec Soliel; John Scott, Montreal Gazette; E. J. Archibald, Montreal Star; W. J. Wilkinson, Toronto Mail and Empire; W. J. McNair, Hamilton; T. H. Preston, Brantford Expositor; A. R. Ford, London Free Press; Burford Hooke, Regina Leader; J. H. Woods, Calgary Herald; F. J. Burd, Vancouver Province; J. F. B. Livesay, general manager and secretary.

MURDER AT SUTTON.

Farmer Kills Wife and Gravely Injures Daughters.

SUTTON WEST, May 1 (Canadian Press). — Robert Stevenson, a farmer of Ravenshoe, murdered his wife on Saturday evening with an axe and inflicted such frightful injuries on his step-daughters, Vera, 11, and Norah, 13, that the condition of both is grave, and the recovery of one is doubtful.

Both are in the Hospital for Sick Children, Toronto.

He was arrested, after a chase, at Schomberg.

The tragedy came as a climax to a series of domestic troubles.

Stevenson, after killing his wife, who was a cripple and almost helpless, attacked the girls. One of them managed to get away, but he followed and inflicted the contents of a shotgun in her breast.

Let us look to the roads within the "Town Limits"

What impression does the approach to your municipality convey to the visitor?

What a shock to find, immediately on passing a sign denoting the "Town Limit," a sudden change from a smooth Concrete pavement to a rutted road.

Some of the worst paving encountered, is that just within the boundaries of cities and towns.

There are many municipalities which have contributed to the improvement of rural or outside roads, but seem to have overlooked the sections of the main routes which are within the town.

This is a feature of our road building which requires attention. It is a vital feature of a continuous system of

permanent highways of concrete

A vivid impression of the condition that exists in some municipalities is afforded by illustration No. 2—above—a faithful reproduction of a photograph.

The connecting-link—the pavement that joins the main highway with the principal business street—surely is worthy of our best efforts—surely should be of Concrete.

SUCCESSFUL DANCE

One of the most successful dances, ever held in town, was put on Friday night, under the auspices of the Campbellford Lacrosse Club. A very large crowd were present and enjoyed the charming music dispensed by the Leonard's orchestra. A most sumptuous luncheon was prepared and daintily served by Mrs James Kerr. The town of Campbellford and Lacrosse fans, wish to vote a hearty vote of thanks to Mrs. Kerr ,for her very great kindness in catering so ably to the guests and which contributed so largely to making the event such a pleasurable one.

REV. PRINCIPAL GANDIER

A large congregation greeted Rev. Principal Gandier of Knox College, Toronto, when on Sunday morning he occupied the pulpit of St. Andrew's Church. Prin. Gandier is a clear, forciful speaker and presented his stirring message, in a manner which kept his audience in rapt attention, and impressed them with his own earnestness and enthusiasm.. The words upon which the speaker based his remarks which were primarily for the young were found in St. Matthew, Chapter 9: verses, 36, 37 and 38; emphasizing the last two verses. "The harvest truly is plenteous, but the labourers are few; Pray ye therefore the Lord of the harvest that he may send forth labourers into his harvest". The speaker declared that the only solution for the unrest in the world to-day was the Christian religion. The great need of godly men and women especially trained and educated was the great need of the church to-day. For foreign and home fields, there was urgent need of workers, the speaker asserting that in many of the home mission fields, the best that could be done was to send students for about four months in summer. Many recruits from the old land, entered our universities to prepare for the ministry but Canada, must, if she is to continue as she is the best land on the earth, send out her own young men and women. The home is the primary, and the school, the secondary recruiting fields for God's service. The professor urged upon the parents present to see that in the home the ministry was always regarded as the noblest and highest calling, which any young life could enter. He urged his listeners to assist in this great need by their support, sympathy and prayers that the young might be called and respond to God's call. Knox College with its spacious building and Christ-like influences was an ideal college, for any young people to enter, being situated in the centre of the great campus of the educational centre of Toronto.

Principal Gandier very fittingly addressed the Sabbath School in the afternoon, going to Hastings for the evening service.

Foreign Dramatists Storm American Stage And Grab the Lion's Share of the Profits

The conquest of the American stage by foreign plays and— this is what hurts the American dramatist even more—the ability of the foreign-born dramatists to gather in the lion's share of the slim royalties of 1922, are two conditions which apparently will be continued into next season.

Sadly, the American dramatists are admitting that the public have tasted the imported article and now prefer the smack of the exotic to the reliability of the old-fashioned homebrew.

Comedie Francaise Coming

The important news from the Selwyn office, stating that the Comedie Francaise will appear on Broadway in December for a four-week engagment, has shown that the scramble for foreign plays, which began last fall aiter the brilliant success of the Hungarian "Liliom," is only on the first lap.

The achievement of the Selwyns will bring to America not only to most celebrated theartical family in Europe but the entire Comedie Francaise company. The three Guitrys—Lucient, Sacha, his son and Yvonne Printemps, the latter's wife, will appear under financial inducements which exceed any ever made any star, including Sarah Bernhardt.

Sacha Guitry is the author of most of the plays in which the Guitry appear. The elder Guitry is unquestionably the greatest contemporary French actor. The most noted of the Guitry plays are "Deburau," "The Grand Duke", which appeared this season in translation, "Pasteur," "The Illusionist", "Nono' and "La Prise re Bergop-Zoom."

To Be Given in French

As the plays will be given in French, the general popularity of the venture is questionable.

But if plays in French may have a doubtful appeal, there is no doubt about the success of the translations. The French plays which have invaded Broadway and are now holding their ground are "Madame Pierre" and "The Nest", both excellent plays, and the weaker "Kiki' and "The Rubicon".

Hungary's detachment in the invading army is composed of "The Czarina' and "Liliom", the latter maying a return engagement, and Russia's of the Theater Guild's "He Who Gets Slapped", and by the Chauve Souris vodkaville.

But the heavy push which is separating American dramatists from the slim royalties of the season's end, is now coming from the English authors, particularly from Milne..

Shaw with his 'Back to Methuselah", and "Candida", and Galsworthy and his very successul comedy, "The Pigeon", have not equaled the astounding popularity of Milne's "The Dover Road" or of his latest drawing room comedy, "The Truth About Blayds."

CHAPTER XXV.
FLAPPER'S FOLLY

Knowing the right people for the sake of Jack's business isn't going to be at all difficult for me, with Bonny Tearle as my chum for ages, and Bonny's father financing the Little Playhouse crowd.

The Tearles' is a war-made fortune—a huge one from chemicals—the Tearles are nice people—human enough not to drop old friends because they have moved into one of the finest houses in town.

It was really I who got Mr. Tearle to back the Players. He'd never have thought of promoting us, he says, "except for Peg." And he was anxious to promote something in the way of art, he admits.

This enterprise has made him quite distinguished among the city's art patrons. He's in close touch with "the legitimate," and meets all the famous actors at exclusive little dinners given by exclusive society hostesses.

And he is not the man to forget that poor little I first interested him in promoting performances of dramatic novelties.

Naturally, it's my duty to look after Bonny. I'm really afraid that that flapper is going to make a lot of trouble for herself and the rest of us, if I don't look after her.

Of course, she's in and out of the Playhouse a good deal, she likes the crowd, considers it bohemian, which it isn't at all, except when she trails George Bradshaw along.

"He's give a sporty hue to a cemetery," Jack says.

Bonny has nothing to do with our rehearsals but she makes tham an excuse for asking George Bradshaw to come along. He's more than 40. She's 16. He's gray and handsome as ever an old man can be. Jeanne says any woman can flatter him silly, but I've concluded that George can flatter any girl into a perfect foo.

"Fascinating, George is! He says I'm a perfect little puzzle, he can't understand me! I tell him all my little secrets 'n' everything, which I don't expect I should do but I just can't help it, but several things I've told him I wish I hadn't. I surely must bush about some of the boys."

"What boys?"

"Bart Elliott! I've told ol' George that Bart is my ideal man! I ought not to. It made ol' George jealous! Then I told him that Bascom Jones had proposed, and was planning a little house out on a ranch with ponies and Indian servants 'n' everything.

"And ol' Geroge said that Jonesey is only 20 and just at the top of fool love's hill, and he hasn't had any experience in love, so he simply can't be true to a girl. Is that so, Peg?"

"It's bunk!". I replied.

"And ol' George says I like Bart only because he's such a good stepper and keeps up with my nimble toes, which George owns he can't, and that's why we always sit out our dances together."

"Is that the only reason, Bunny?"

The poor child blushed furiously, tried to change the subject, always ended up with Bart or Geo ..

As a result of her insanity, I've had to take Bart into my confidence.

HEARTBURN

A SEVERE CASE

Many people are troubled with heartburn who really do not realize just what it is.

In cases of this trouble there is a gnawing and burning pain in the stomach attended by disturbed appetite. It is generally caused by great acidity of the stomach, and whenever too much food is taken, it is liable to ferment and becomes extremely sour, causing heartburn. In such cases vomiting often occurs, and what is thrown up is sour and sometimes bitter.

The way to get rid of heartburn is to keep your liver active by using

MILBURN'S LAXA-LIVER PILLS

and you will have no heartburn or other liver troubles such as constipation, jaundice, water brash, floating specks before the eyes, coated tongue, foul breath, etc.

Miss Agnes Cutting, Shallow Lake, Ont., writes:—"I have had heartburn for a long time. There were gnawing and burning pains in my stomach, and then when I vomited there was a sour and bitter taste. I used two vials of Milburn's Laxa-Liver Pills, and they have cleared me of my heartburn. I don't think they can be beaten by any other medicine."

Price, 25c. a vial at all dealers, or mailed direct on receipt of price by The T. Milburn., Co., Limited, Toronto, Ont.

Mr. Wm. Westlake was a visitor to Peterboro on Thursday.

Rev. J. E. Beckel and Mr. A. Monk called on several of the Fleetwood people on Thursday, and baptized two babies. Also attended the Annual Sunday School Meeting of the Franklin Methodist Church.

Dr. J. J. Hamilton has purchased a new car.

Mr. and Mrs. Arthur Flack left for Peterboro Thursday evening to visit friends for a few days.

The Fall wheat, rye, and clover are not looking as well in this section as they did a few days ago. The high cold winds and frosty nights have been much against their progress. Even the grass which was so green a week ago has taken on a yellow tinge.

Mr. Harry Johnston has secured a position in Bowmanbille. Our best wishes go with him.

Messrs. Percy Stenson, Ross Edmunds Levi Russell and Clif Natress of Millbrook, motored to the village on Thursday evening to attend the meeting of Organization of the Cavan-Manvers-Emily baseball league.

Mrs. (Rev.) J. F. Beckle and children have again returned to the parsonage after a visit with friends in Oshawa.

Mr. Morris,Bank inspector of Toronto is relieving in Mr. Panton's place until a new manager can be secured for the Bank of Toronto here.

Mr. and Mrs. A. Monk motored to Millbrook on Friday afternoon, and found the roads between this village and Millbrook as good as they were any time during the past summer.

Mr. Wm. Hunter of Fowler's Corners, motored to the village on Saturday.

Mr. Herbert Fallis and family spent Sunday with his brother Mr. Louis Fallis.

Mr. and Mrs. Ira Gardner of Reaboro spent Sunday with Mrs. Gardner's parents, Mr. and Mrs. Thos. O'Brien.

Dr. Fred Preston, wife and family of Peterboro, motored to the village on Sunday, and spent the day with his sister, Mrs. Wm. Sisson.

Mr. Walter Burns, wife and family, motored from Peterboro on Sunday and visited Mr. and Mrs. Wm. Westlake.

Mr. and Mrs. Milton Wright visited friends at Janetville on Sunday.

SWEDEN PROTESTS TO RUSSIAN REDS.

Resents Execution of 87 Social Revolutionaries.

STOCKHOLM, May 1st.—(Associated Press).—Conservative elements here are alarmed over the extensive and well organized propaganda campaign being made on behalf of the new commercial treaty between Sweden and Soviet Russia, which is before the Riksdag with a fair chance of ratification

The treaty provides admittance to Sweden of an official Soviet representative, and the admittance to Russia of a like representative of Sweden. The representatives are to be purely for trade protection and extension. and both will agree to abstain from propaganda.

A particular clause of the treaty which conservatives view with alarm, provides that commercial delegates from Russia also shall be admitted to Sweden as well as nationals of Russia having commercial business in the country. This, the anti-Bolshevik group fear, will permit an uninterrupted flow of Communist propaganda and Bolshevist organizers to sweep through Sweden, which in time, they believe, will undermine the nation's political system.

Minister of Commerce Svensson has told members of the Ridsdag that parliament will either have to accept the treaty as it stands or reject it, as the cabinet has signed the document and cannot accept any amendments.

SECOND CHAMBER IN IRISH PARLIAMENT.

Is a Possibility Now Under Consideration.

DUBLIN, May 1.—(Associated Press).—The promises of protection made to the Southern minority by Arthur Griffith are the subject of considerable speculation here, for it is not definitely known what provisions the new Irish Free State constitution will make for carrying them out. The possibilities of a second chamber in the Irish parliament have been discussed, as well as the powers such a chamber would have, therefore the public is anxiously awaiting some authentic announcement to clear up the hints dropped by political leaders from time to time.

Some importance has been attached to a public utterance by Mr. Darrell Figgis, who was acting chairman of the committee formed to draft the constitution. He stated that the question of a second chamber had been tackled and answered "satisfactorily and strikingly" and in a way never attempted by any country in the world before.

Mr. Figgis siad that there were men in Ireland of eminent worth and service, judgment and wisdom, who because of their qualities would be reluctant to pass through the ordeal, but who ought, nevertheless, to be called into the national service, and would be chosen if the people had an opportunity of choosing them. They would never be chosen by any one of the acknowledged political machines, he declared.

BANQUET TORONTO UNIVERSITY CLUB OF NEW YORK CITY.

Sir Robert A. Falconer, the Guest of Honor, Reviewed Many Changes Since the War.

At annual banquet of the University of Toronto Club of New York, held in the Hotel Belmont, N.Y., Dr. Charles G. Heyd, President of the Club presided, and showed that he was not only a good surgeon, who did his bit in France, but also an accomplished Presiding Officer.

The guest of honor was Sir Robert A. Falconer, whose speech, if that were possible, surpassed the many previous eloquent ones he has made. He pointed out very clearly the essential differences in the courses and even the Professors of the American Universities as contrasted with Canadian.

For instance, American Universities credit the students with certain percentages throughout the term much the same as deposits in a bank, making attendance of lectures more or less compulsory, and not laying so much stress, proportionately, on examinations. Whereas Toronto does not keep a record of attendance, leaving it to the judgment of the students, what lectures they will attend and what they will not, and place a great deal, if not entire reliance, on the annual examinations, knowing that if the student does not attend the course, he or she cannot make a good showing in the examinations. Especially as to pass successfully examinations, the student must use considerable judgment to enable him or her to concentrate on the essential points of the various courses to be reviewed prior to the examinations.

Sir Robert thought that this system is more reliable in training the student's mind for powers of concentration and judgment than the system of "punching the clock," (although Sir Robert did not use that expression).

President Falconer also made a progress report of what had been accomplished during the last year. Having recently spoken before all the undergraduates in Toronto, he told what an inspiration it was to look into the earnest faces of this wholesome and reliable young men and women who are bound to do so much for Canada in the future.

After some excellent music, President Heyd called upon Sir John Willison, President of the Municipal Bankers Corporation Ltd., of Toronto and a Director of the Canadian Bond Corporation of New York, an affiliated financial ortanization.

In reviewing the many changes brought about during and since the war, he believed that he would live to see the last Knight, the last Tory, and the last narrow-minded religionist. You know Canadians have requested the British Government not to confer any titles such as use the prefix "Sir" on Canadians. He stated that the University could not do better work than to encourage its young men who come to this Country and who now reside here, to spread the kindly word of Anglo-Saxon unity and friendship.

He assured those present that even in the trying days before the United States entered the war, while the Canadians could hardly understand the delay in America coming in, they always felt that in her own good time the people of the United States would play their part, and they fully realized that the great Nation adjoining the Canadian Border had problems to consider which they must solve for themselves.

He stated that it was his opinion that while the great United States might at times make mistakes, they could be depended on at all times to put such matters right, before much time would elapse, as the heart of the American people is sound and can be always depended upon to do the right thing.

He assured his hearers that Canada might, for the time being be, and is, a considerable borrower of funds in the United States, but he could assure his hearers that the Canadians are a thrifty, careful and honorable people and no fear need be had but they would meet every obligation at due date.

The resources of Canada are almost unlimited, and we need the friendly cooperation of the United States to extend and build up our splendid heri age.

After some more good music, Dr. Heyd showed a large number of very excellent photographs illustrating his trip, and work on the French front, thereby letting us see one more of his accomplishments, that of a good lecturer.

The hour was then too late to call on any other speaker, in spite of the fact that seated at the guest table were such men as Sir Noel Marshall, who sacrificed everything to run so efficiently the Canadian Red Cross during the war; Mr. Albert Oliver, President of the Canadian Club of New York; Mr. W. Tyrie Stevens, President of Canadian Bond Corporation of New York; Dr. C. Nelson Raymond, President of New York Society of Queens University; and Dr. Gordon Gibson, President of New York Graduate Society of McGill University."

Among those present were:—Thomas H. Alison, L. L. Brown, Dr J. E. Bowman, W. P. Barclay, R. A. Cassidy, C. V. Campbell, J. M. Duncan, A. S. Glasgow, Dr. Fred Grasf, Dr. Chas. G. Heyd, Dr. R. E. Humphries, Dr. F. M Johnson, Dr. W. A. Merkley, Dr R. G. MacRobert, Dr. J. A. McLeay, Hubert W. Lofft, H. F. Laflamme, C. R. Keys, Dr. C. J. Patterson, Dr. D. Quick, Dr. R. C. Snider, E. W. Stern, A. WON PURSE OF 100,000 FRANCS ON FIRST RACE

NICE, FRANCE, May 1,—(Associated Press).—Senorita de Ussia, the 17-year old daughter of the Marquis de Aldama, of Spain, whose horse, Viburnum, won the Grand Prix de Nice, this spring, paid 60,000 francs for the horse last fall. The first time out she brought her a purse of 100,000 francs.

"A Spanish owner, a Belgian trainer, and American Jockey and a French horse, are a hard combination to beat," the Senorita said when her friends congratulated her.

Frank O'Neill of Saint Louis had the leg up on Viburnum.

THE ONTARIO EQUITABLE LIFE & ACCIDENT INSURANCE COMPANY

HEAD OFFICE
WATERLOO, ONTARIO

November 21st, 1921.

The Canadian Daily Newspapers Association,
Excelsior Life Building,
Toronto, Ontario.

Gentlemen:-

The high records and gratifying results obtained by the Ontario Equitable during the past year, have been made possible, in part, through the assistance of Canadian newspaper publicity.

We have found that judicious advertising has had for us a more than general result. In reply to particular advertisements we have had as many as a score of replies in one day, from every Province in the Dominion, resulting in a large proportion of cases in the actual closing of business.

In many instances our Agents have sent us applications for policies received as the direct result of an advertisement run in their district newspaper.

We have placed our advertising under the conviction that the public would recognize the value of nonparticipating insurance offered with attractive accident features. The response has confirmed our judgment, and given us tangible evidence of the value of newspaper publicity, which we shall continue to use as an arm in our business.

Yours very truly,

SCT/BWG

President

This letter is ample evidence of direct results from Daily Newspaper Advertising in a most difficult field. Read again the first paragraph of this letter and reflect upon it when deciding upon the medium to carry your advertising.

A.Y.P.A. Held First Meeting Since Lent —Millbrook News.

MILLBROOK, May 1.—The A.Y.P.A. of St. Thomas' Church, held their first meeting since Lent, on Thursday evening in the Sunday School Hall, with 25 members in attendance. The president, Mr. Robert Stone, occupied the chair, and conducted the usual routine business during which some discussion took place regarding holding an entertainment on Thanksgiving night, the A.P.Y.A.members to furnish the program, for which they should practice through the summer months; nothing definite, however, was decided upon.

A very pleasant social time was enjoyed after the business session, one feature being an old-fashioned spelling-match, the captains for which were, Mr. Earl Doxsee and Mr Allen Pitt, the former's side being the winners. Refreshments were served before the meeting closed.

Died:—In Manvers, on Wednesday, April 26, Mr. Edward Beeman, in his 74th year. The funeral will take place from the family residence, Lot 19, Con. 3, on Friday, April 28th, at 2 p.m. Interment at Fallis' cemetery.

Mrs. Mary Cummings and her little son, Duncan, who were guests of Mrs. C. and the Misses Neeler, during Easter week, returned to their home in Toronto on Tuesday. Mr. Cummings came down for the week-end in order to accompany them back to the city.

The Last Dance

The last Orange dance of the season, under the auspices of L.O.L. No. 79, and R.B.P. No. 945, was held in the Town Hall on Thursday evening, and proved a very successful and enjoyable affair. Excellent music was supplied by Mrs. J. Richardson, and Mr R. Edgerton, of Pontypool, with piano and violin. Mr. L. J. Morton acted as floor-manager, and the committee in charge included Messrs. M. Todd, H. Ryley, and R. Hunter. Dancing (both round and square), began about 9 p.m., supper was served about midnight, after which many remained for an hour or two longer enjoying the good floor and music too much to relinquish the evening's pleasure till the "wee sma' hours." There were about 80 guests in attendance.

The completion of the athletic events left over from "Sports' Day," April 20th, was successfully carried out on Saturday afternoon, Mr. D. Loomis, of Peterboro, again coming out to assist the local committee with their work. The handsome oak shield, suitably engraved, presented by the local Community Club, was won by Ernest L. Burnham, who made 486 points out of a possible 500. Considerable labor is involved in totalling up the averages of the various groups competing, and these will not be available for a day or two.

Mr. and Mrs. D. Loomis, of Peterboro, were guests of Mr and Mrs. W. Wilkinson on Saturday.

Many in Millbrook and vicinity will be interested in the fact that invitations have been issued by Mr. and Mrs. F. W. Suttcliffe, of Lindsay, for the marriage of their daughter, Elsie Anna, to Mr. Gordon Aird Flavelle, D.F.C., son of Mr. and Mrs. William Flavelle, the marriage to take place at Cambridge Street Methodist Church on Tuesday, May 16th. A reception will afterwards be held at the residence of the bride's parents, 68 Bond Street.

Meeting Postponed

The annual meeting of the Women's Institute, which was to have been held on Wednesday, April 26th, was postponed because of the small attendance of members, until Saturday, May 6th, at 8 p.m. The meeting will be held on that date at the home of Mrs. F. Smith, and a social hour will follow at the close of the business session, with refreshments served. It is important that there should be a large number present as the election of officers for the ensuing year take will place, and the disposal of the funds on hand ($500) must be decided upon.

Programmes for "Go-To-Sunday-School-Day," which occurs on Sunday, May 28th, have been revived. The object is two-fold, first to have every member of the School in his or her place that day, and also to have every member of the family enrolled in some one of the Departments of the Sunday School. Second, a liberal offering for the work of the Religious Education Council of Ontario, all C.S.E.T. and C.G.I.T. organizations are expected to contribute to the funds of the R.E.C., as their budget for Camps, Conferences, Training Courses, etc., is included in the expenses incurred by the council.

"Hobab, the Helpful Companion," is the subject of the service, the Scripture reference being, "Come thou with us, and we will do thee good," Numbers x., 29

Rev. D. J. Craig of Toronto, who is conducting special evangelistic services at St. Enoch's Church, Garden Hill, was called away last week, by the sudden death of his eldest sister, leaving after the Sunday evening service for her home near Ottawa, and returning in time to resume his "Mission" on Tuesday evening. The latter has proved very interesting and successful, the various meetings in connection with it being well attended, increasing in spiritual power and results constantly.

The next dance, under the auspices of the G.W.V.A., will be held in the Armouries on Monday, May 22nd, with the L. Linton orchestra of Toronto, to furnish the music.

The frame house on Fallis Line, occupied by Mr. Murphy, was burned to the ground on Saturday. The fire, which was discovered just as the family sat down to dinner, apparently originated from the chimney. Considerable repairs had been carried out on the house recently by Mr. Murphy, and these were still in progress, making the loss more severe. The major portion of the contents were saved.

Personals.

Dr. H. A. Needler of Toronto, was the guest of his sister, Miss Etta, and brother, Mr. A. A Needler, over the week-end.

Mrs. W. Williamson, (nee Bertha Locke), and her little daughter, Norma, of Leader, Sask, are visiting her parents, Mr. and Mrs. George Locke, arriving from the West on Friday.

Mrs. Ira Nattrass, who has been making an extended visit with her daughter, Gladys whose home since her marriage is in Indianapolis, returned on Friday.

Mr. A. Lang and son, were business visitors in town on Thursday

Messrs. P. Stinson, R. H. Edmunds, C. Nattrass, and L. C. Russell attended the baseball meeting at Bethany on Thursday evening, when the Cavan-Manvers-Emily League was formed. The meeting was a very enthusiastic one, and good sport is promised for the coming season. Mr. R. H. Edmunds is one of the Honorary Vice-Presidents, and also a member of the Executive Committee, and Mr Percy Stinson is President of the League. Delegates were present from Millbrook, Omemee, Mt. Pleasant, and Bethany.

Workers in the local C.S.E.T. and C.G.E.T organizations will be interested in knowing that the rotary Club, of Cobourg, is leasing Pine Tree Point, on Rice Lake, and will give it as a camping ground for all boys' and girls' organizations in this locality, during the summer, who desire to use it. This action will probably lead to the purchase of permanent camping grounds in the near future, and the erection of suitable buildings.

Miss Marian Spence visited friends in Peterboro on Tuesday.

Mrs. J. Pitt, accompanied by her daughter, Miss Mary, spent a couple of days visiting friends in Lindsay, this week.

Mr. Archie Moore, of Peterboro, was a business visitor in town on Tuesday.

Mr. E. McCullough, of Bethany, was a guest of Mr. and Mrs. J. Steele, on Thursday.

Mrs. Foster, of Bethany, visited friends in town on Thursday.

Don't Scratch Teeth

Beautify them in this scientific way

Don't try to whiten teeth by use of harsh abrasive. The enamel, if you harm it, won't come back. Polishing agents should be mild, as in Pepsodent.

Combat the dingy film. Do it as millions now are doing — in this scientific way. Then the prettier teeth you see everywhere now will come to you and yours.

The cloudy film

Your teeth are coated with a viscous film. It clings to teeth, gets between the teeth and stays. When not combated, it forms coats which are the basis of tartar. Film absorbs stains, making the teeth look dingy. Those cloudy teeth rob millions of much beauty.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Germs breed in it, and they, with tartar, are the chief cause of pyorrhea. Thus most tooth troubles are now traced to film.

Ways to end it

Film has been the great tooth problem. Old methods did not end it. So well-brushed teeth discolored and decayed. Tooth troubles have been constantly increasing. Now dental science, after long research, has found two ways to fight film. Able authorities have proved their efficiency. Careful people the world over now see and feel the results.

A new-type tooth paste has been created, made to meet modern requirements. The name is Pepsodent. These two film combatants are embodied in it for daily application.

Five new effects

Pepsodent brings five effects which science now demands. One is to multiply the starch digestant in the saliva. That is there to digest starch deposits on teeth before they ferment and form acids. One is to multiply the alkalinity of the saliva. That is Nature's agent for neutralizing mouth acids—the cause of tooth decay. It leaves the teeth so highly polished that film less easily clings.

All five effects come from every application. So film, starch and acids are constantly combated. Forces are created which night and day fight enemies of teeth.

To countless homes, all the world over, this has brought a new era in teeth cleaning. The results will be life-lasting.

Send the coupon. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. The results will surprise and convince you. Cut out the coupon now.

New Theology Undermining

"There is no fact in all human history that can be better established then the resurrection of Jesus Christ from the dead," said Rev. Robert A. Jaffray of China in an address at the Christian and Missionary Alliance Tabernacle on Queen street, Toronto.

To those who knew Christ as their Saviour, he said, no other proof was required to establish the fact of His resurrection. "Why do I believe that Jesus Christ has risen from the dead? We could give many proofs, but the greatest proof is the witness we have within ourselves. Why do I know that He is risen? Because I spoke to Him this morning."

One of the things that he most deplored with regard to missionary work, the speaker said, was that so many missionaries on the foregin fields had accepted Modernism and denied the fundamental things of the Christian faith.

Easy to Tear Down

It was supposed to be scholarly and the mark of an educated mind to deny these things, but to his mind, Mr. Jaffray said, such views had nothing constructive about them. It was an easy thing to tear down and to destroy and the teaching of modern criticism was entirely negative. It would take away the great assurances of the faith and had nothing to offer in return.

In a conversation at one time with Paul Kanamori, the noted Japanese evangelist of three-hour-sermon fame, Mr. Kanamori, had told him, Mr. Jaffray said, that what he had learned of German theology while a professor at college had completely destroyed his fatih for years, though he had later been led to see the truth of the things he had formerly denied

Dangerous Modernism

Missionary work in foreign lands, the speaker believed, was being sadly undermined by the preaching of this new theology.

Speaking of his work in French Indo-China, Mr. Jaffray told of various incidents in connection with the opening of the work there, to illustrate remarkable answers to praying in relation to it.

Prospers in Adversity

Hindered and impeded in every way by powerful enemies and false friends, the work had, nevertheless, grown and prospered, and was to-day a witness to the truth that "more things are wrought by prayer than this world dreams of."

Prayer the Need

What was needed most of all on the mission field to-day, Mr. Jaffray said, was prevailing prayer. It was not a warfare against flesh and blood that was being waged, so much as against the powers of darkness. Every step of the way, every advance they sought to make, was contested by the powers of evil and only earnest prevailing prayer could avail to break down the resistance of the Evil One and let the light of the Gospel shine in on the heathen darkness of China.

TO-DAY--ST. PHILIP AND ST. JAMES

(THE LESS)

These Two Apostles Are Commemorated This Day

May 1st is a festival of the Church in honour of St. Philip and St. James the Less, apostles.

Saint Philip.

Like the brothers, Peter and Andrew, Philip was a native of of Bethsaida on Lake Genesareth.

But little is told us of him in the Gospels. He was among those surrounding John the Baptist when the latter first pointed out Jesus, as the Lamb of God. On the day after Peter's call, when about to set out for Galilee, Jesus met Philip and called him to be an apostle, with the words

"Follow Me."

Philip at once obeyed this call, and a litle later brought Nathaniel as a new disciple. This Nathaniel is in a knowledge of holy scripture, as it prevailed in all pious Jewish houses, James was called to be an apostle with his brother Jude. In all four lists of the Apostles he stands at the head of the third group. These will be found in the Gospels of S. S. Matthew, Mark, Luke and in the Acts of the Holy Apostles. Of this apostle we hear no more until after the Resurrection; but St. Paul alludes to the fact that the Lord appeared unto James before the Ascension. Then

We Lose Sight of James

Until St. Paul, three years after his conversion in A.D. 37, went up to Jerusalem. Of the Twelve Apostles he saw only Peter and James. When in the year A.D. 44 Peter escaped from prison, he desired that the news of his freedom might be conveyed to James, who already had attained a high standing in the Church of Jerusalem. In A.D. 58 St. Paul paid a visit to St. James, who was then Bishop of Jerusalem.

Who Was St. James ?

This one was the brother of Jude. Other James were the son of Zebedee, an apostle and brother of John; the son of Alphaeus (apostle); the brother of our Lord; the son of Mary (wife of Cleophas) brother of Joseph.

The Epistle of St. James.

Reveals a grave, a meek, and calm mind well acquainted with the Scriptures of the Old Testament, given to prayer, devoted to the poor, resigned in persecution, the type of a just and saintly man. There is, however, some divergence of opinion; some authorities attributing the Epistle in question to James, the brother of our Lord. The Western church appears to hold the latter view, while the former theory is upheld by the Eastern church. Be this as it may, the Epistle is well worthy of attention.

Tradition,

Mentions that Hegersippus, a Christianized Jew, who lived about the middle of the second century, relates (and authorities agree that his narrative is highly probable) that James the Less (or James the little) was also called James the 'Just'; that he drank no wine or strong drink; that he ate no animal food; that no razor touched his head; that he did not anoint himself nor make use of the bath.

His Martyrdom.

The manner of his death is uncertain, but it is fairly evident that he was put to death by the Jews.

In Art

St. Philip is represented as a man of middle age, with a scanty beard and a benevolent face. His attribute is a cross, or a staff with a small cross on the top.

ST. JAMES.

St. James, who is this day commemorated in conjunction with St. Philip, is one of the several James mentioned in the New Testament; and to distinguish him, he is usually known as James the Less, proabbly because he was the shorter man. He was the author of the Epistle bearing his name.

His History.

James the Less was the brother of St Jude, and was evidently trained in a knowledge of holy scripture, as it prevailed in all pious Jewish houses, James was called to be an apostle with his brother Jude. In all four lists of the Apostles he stands at the head of the third group. These will be found in the Gospels of S. S. Matthew, Mark, Luke and in the Acts of the Holy Apostles. Of this apostle we hear no more until after the Resurrection; but St. Paul alludes to the fact that the Lord appeared unto James before the Ascension. Then

RUSSIAN EMIGRATION

RIGA, LATIVA, May 1.—(Associated Press).—The United Baltic Shipping Corporation recently petitioned the Latvian government requesting permission to transport Russian emigrants from the United States to Russia and vice versa, via Latvian ports. The company undertakes to guaranted that none of the transit passengers will remain in Latvia.

For this purpose, the shipping company plans to erect special camps in Riga or Libau as soon as the concession requested of the government is granted.

TRAFFIC TROUBLES AND REGULATIONS.

Others Than Motorists Too Blame For Accidents.

Traffic troubles, their regulations, and their violations, are one of the considerations that occupy a good deal of the attention of the police force of any city, and Peterboro' is not free from the scourge. In the opinion of those who know, however, there are others than motorists to blame for many of the accidents, minor or otherwise, that come up in the daily routine. An effective phrase which describes the ideas of some with regard to the proper methods of using the streets is that of "jay-walking." The "jay-walkers" are those care-free pedestrians who step joyously off a curb at any point within the street intersections, and proceed across the street at an acute angle.

There is an ancient tradition to the effect that pedestrians have the right of way, and there have been in times past, possibly, some who gave up their lives for their faith in an exploded theory. Whether the fact that he defended his inalienable privilege to the right of way is of any use to a dead or disabled man is a question. At any rate, in these motor-driven times, the pedestrian's priority, although remaining the same in theory, is in practice, more a matter of luck than anything else. If he gives the motorist a wide leeway, he can have the right of way, otherwise, discretion is now, as always, the better part of valor. Why should an erect, two-footed creature, with, presumably, active ideas and underpinnings, expect a man in a sitting posture, with his mind on gears and gas and tire troubles, to be ready at a moment's notice to instantaneously stop his more or less heavy machine?

Motorists have nerves, as well as anyone else. And street-car conductors have nerves also. The streets are often muddy and the car-rails greasy. A man, to save a minute of time, drops off a still moving street-car into the direct path of the motor-car; a child races across the street with the utter disregard of life and limb of innocent, happy immaturity; or a lady with a baby-carriage, actuated by that sublime indifference to caution or commonsense which marks the female of the species, darts suddenly in front of the moving street-car or motorist. Either car-driver or motor-man would be held up to the execration of the multitude if anything happened to that woman with the baby-carriage, and they know that a stripped gear or a sudden grinding wrench of the throttle is the only thing that saves them often from a charge of man-slaughter.

There is something peculiar in the attitude of the woman with the baby carriage or one of those odd little contrivances that push the child away from the mother at the end of a long handle. A woman with a baby carriage will take all sorts of chances. She will park herself serenly in the middle of a crowded street; she will obstruct store and theatre entrances; she will proceed composedly at any angle across a thoroughfare, while delivery rigs, streetcars and motorists wait for the leisurely passage of the family vehicle, in fact, the lady with the baby is omniscient. She knows right well that nothing can harm her, and she takes advantage of the knowledge every time.

A rule which is recommended for those who absentmindedly progress across streets, at angles other than the proper intersections, is to look to the left when stepping off the curb. When half way over, "eyes right" is the formula, in this way getting an idea of approaching traffic as it is regulated. The procedure most strongly recommended however, and endorsed by drivers whose breaths catch and whose hearts miss a beat many a time in the course of their daily rounds, is to use the street crossings. That is what they were put there for.

DRUGS EXCITE YOUR KIDNEYS, USE SALTS

If your Back hurts or Bladder bothers, drink lots of water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water — you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.

TO PLANT CLOVER IN BED OF DRY LAKE

MEXICO CITY, May 1.—(Associated Press)—After years of experimenting in an effort to stop the dense clouds of dust which sweep down on Mexico City at certain regular periods, the Department of Agriculture has decided to plant clover and alfalfa in the bed of Lake Texcoco, a lake near the capital which has been dry for several years.

Agricultural experts believe well cultivated verdure will invite moisture in greater quantities and will prevent the dust from rising in the dryest seasons.

SIGNIFICANT NOTICE.

DUBLIN, May 1. — (Canadian Press.)— The Sunday Independent states that the commandant of the dissident ary in Clonmel has served notice on some of the leading citizens suporting the treaty, warning them that their moveemnts are deemed dangerous and inimical to the Irish Republic, and that if any action be taken against the Executive Council's troops (mutineers) in that area, they willl be held personally responsible.

A Word Picture of General Grant's Home Town Where President Harding Will Speak, April 27th

Point Pleasant, O., U.S.A., a village with a population of 145, was visited on Thursday, April 27, by President Harding, who told the country what he thinks of General Ulysses S. Grant, Point Pleasant's favorite son, whose hundredth anniversary was observed on that day —April 27.

He addressed the nation from the porch in front of J. B. Winspear's general store, which is around the corner from the lot on which General Grant's birthplace stood.

It was Point Pleasant's one day of glory in a hundred years; one day of excitement in 36,500; one day of noise and of brass bands and of jostling crowds on Main street.

Town Little Changed.

One hundred years after Grant's birth, Point Pleasant is much the same sort of a place it was then. If you and we stop and make a call on Merrell Cummins it will be as if we were going back 100 years and calling on the infant Grant.

Merrell Cummins, the youngest child in Point Pleasant, is six months old and lives two doors from Grant's birthplace. About him is the same setting in which Grant began his life; some of the same trees and some of the same houses that stood there 100 years ago; and the same sort of callous-handed villagers; and the same quiet contentment.

The life and environment of the baby Cummins differs not at all from the life of the baby Grant, except at times his parents may go to a movie show in New Richmond. On the same wretched road over which the father of Grant drove a team for Page, the tanner, today the father of Merrell Cummins drives a truck for Winspear, the merchant.

Little Money; Much Health.

The circumstances of the Cumminses are like the circumstances of the Grants. Not much money, but health and contentment; wholesome food and comfortable clothing and wood in the wood-shed.

And Point Pleasant is proud that time has not changed much its looks or its way of living. They say it is as if Providence wanted it left as it was 100 years ago, like a village that had gone to sleep and hadn't changed, so that Americans might see from what humble beginnings great men may rise in America.

Above: Main street of Point Pleasant, O., where President Harding spoke on April 27, and J. B. Winspear with carriage springs from General Grant's father's carriage. Below: The building in which General Grant's father worked as a tanner, and the house at Point Pleasant where General Grant was born.

Once Point Pleasant dreamed of greatness. It boasted several pork houses and a tobacco warehouse and a tannery on Indian street, in which Grant's father worked. And there was a pottery and a factory that made clay-pipes. The village was a port of call for all boats plying the Ohio between Pittsburg and the Mississippi, and its pork and leather and pottery were known far and wide.

Railroads Never Came.

But the railroads never came to Point Pleasant, and industrial enterprise deserted it, and its young men began going away to the cities, and it was left drowsing here in the hills, unchanged, except for the gasoline-filling station on the highway and the automobile agency and the Fords that ply through the village.

So Point Pleasant's dream of greatness vanished; but Winspear, the storekeeper, says: "Isn't it greatness to be known as the place where Grant was born? Isn't it a great community that gives to the nation a great man?"

One Ambition.

The village has only one ambition. It is that the house in which Grant was born be returned to it. Many years ago it was taken from its foundation, taken on an exhibition tour, and finally presented to the State of Ohio, which keeps it on the State fair ground in Columbus.

"We want it back," say the people of Point Pleasant. 'Here it belongs. We want to place it where it stood before and it shall be a shrine for the nation. What will people be saying now that they have discovered that our most valuable treasure has been taken away from us?"

MORE MACHINES AND FEWER FARM HANDS.

War-Time Labor Saving Has Its Effect in Michigan

LANSING, May 1. — The effect of war-time methods of labor conservation and the steadily growing tendency toward adoption of modern farm machine and equipment have so changed farming methods in this state that the number of farm employes never again will equal proportionately the number in pre-war years.

An inquiry by Verne H. Church, of the Federal-State Bureau of Farm Crop Estimates, and John A. Doelle, state agricultural commissioner, shows the number of men now seeking farm work is little in excess of normal. The demand for labor, however, is 10 per cent. below normal.

When labor was scarce, farmers revised their farming methods to meet the situation. They are returning to the former system of farming only to a very limited extent even though labor is plentiful.

The situation briefly is this:

The supply of farm labor exceeds the demand by about 13 per cent., although the supply is only about normal and in normal pre-war years would have been entirely absorbed. Wages have taken a considerable slump as a result of the situation.

WOMAN TOO WEAK TO WALK

Now Works Nine Hours a Day. Lydia E. Pinkham's Vegetable Compound Restored Her Strength

Union Village, Vt.—"I was weak and nervous and all run-down. I could not walk across the floor without resting, and I had been that way for weeks. I saw your advertisement in the paper and after taking one bottle of Lydia E Pinkham's Vegetable Compound I felt the good it was doing me and I took seven more in all. Before I finished I was able to work nine hours a day in a steam laundry. I cannot say too much in favor of your medicine. I trust all sick and suffering women will take it. It has been two years since I took it and I am strong and well." — Mrs. L. A. GUIMANN, Union Village, Vermont.

This is only one of such letters we are continually publishing showing what Lydia E. Pinkham has done for women. Mrs. Guimann's letter should interest you.

Many women get into a weak, nervous, run down condition because of ailments they often have. Such women should take Lydia E. Pinkham's Vegetable Compound at the first sign of trouble.

VETERAN OF 2 BRITISH WARS REGAINS VIGOR

Toronto Man Says Every Bone In His Body Ached From Rheumatism, And He Was Almost Past Going When He Got Tanlac.

"When I began taking Tanlac, I weighed only ninety-eight pounds. It built me up in a most remarkable manner, and when I stopped taking it I weighed a hundred and forty-eight pounds, and I have been in the best of health ever since," said Robert Gill, well-known tailor of 1173 Dundas Street West, Toronto, Ont. Mr. Gill served twenty-three years in the English Army, going through the Boer War in South Africa and the Burma Campaign in India.

"I had suffered from rheumatism all over my body for three years. I had it in my joints, in my back, and my bones seemed to ache to the very marrow.

"If I hadn't goten hold of Tanlac in time, I don't know what would have been the result. It has not only built me up wonderfully, as I have stated, but my rheumatism has entirely disappeared, and I feel at least twenty years younger. I am convinced that Tanlac is the best medicine in the world."

Tanlac is sold by all good druggists.

Would African Colonies Attract Negroes of U. S.?

BERLIN, May 1. — (Associated Press).—"Could the United States dispose of her surplus colored population by distributing it among the former German colonies in Africa under some agreement with the present European mandatories?"

This question arose in the course of a conversation with Dr. Heynrich Schnee, former Governor of German East Africa, in connection with a special dispatch from Washington published in Berlin attributing to United States Senator France a suggestion that Allied debts to the United States could be redeemed by the transfer of the former German colonies in Africa now controlled by Great Britain and Belgium to the United States. Senator France is reported to have declared that such a transfer would need as a complement a plan international plan for reconstrutive development."

Hope for Restoration

"Assuming that the senator means the transfer of the mandatory powers, and not annexation, the scheme would seem both feasible and desitable, provided United States control would mean a continuation of her open door policy, admitting the co-operation of all nations," said Dr. Schnee.

"This," he added, "would be exactly opposite to the present regime, which excludes all but the nationals of the occupying powers. We still hope that our colonies, now held in trust by the Entente Powers, sometime will be restored to us.

"Doubtless the German-African colonies would be able to support thrice the present native population. Indeed there is room there for 50,000,000 colored people now; and there will be more room as development progresses. German East Africa, Southwest Africa, Togoland and the Cameroons aggregate an area of more than 1,000,000 square miles, rich in natural wealth and abounding in the raw materials the world sorely needs. Moreover, most of them have zones suitable for white settlers; but their tropical coast line regions are entirely suitable for colonization by millions of colored people.

"The largest zone, East Africa, consists of 389,000 square miles, about the size of Alabama, Georgia, athe two Carolinas, Florida, Virginia, Mississippi and Louisana, combined, and has a population of less than 8,000,000. Next is Southwest Africa with 326,000 square miles and only about 90,000 population, while the Cameroons has 809,000 square miles and a population of 2,300,000.

Cites Liberia

"As a colonizing power, I have the greatest regard for the United States. I was able to observe American methods while I was governor of Samoa. Their sanitary achievements in Panama deserve the highest praise.

"With regards the attempt to colonize Africa with the surplus American colored population, this would bin a long way to settle the vexed problem, and under a plan such as Senator France has outlined, might enable France and Great Britain to discharge their debts to the United States and simultaneously ease the burden of German reparations which is paralyzing economic life.

"But this subject, however, interesting in the perspective it opens, presents enormous difficulties. Remember the failure in colonizing Liberia."

INSERTING VALVE STEM PINS

Nearly every motorist who has tried grinding in the valves of an L head or T head motor has experienced considerable trouble in holding the valve spring compressed and getting the pin in place in the stem of the valve. The writer has found the following method a great help in inserting these pins.

Take a piece of hard wood about half an inch in diameter and ten to twelve inches long, and make in one end a hole slightly smaller than the diameter of the stem pin and about a quarter inch deep. Then split the stick back for about three-quarters of an inch through this hole. The valve stem pin can now be driven lightly into the end of the stick, and as the spring is forced up with the valve lifter in one hand, the pin can easily be inserted into the hole with the stick in the other hand. A slight twist of the hand upward will spring the stick off the pin, and you have done the job without running the risk of pinching your fingers, and with an unobstructed view of the pin hole.

Paradise of Bargain Hunters

ODESSA May 1. Associated Press.—This port is, and will be for a few months, the paradise of the bargain hunter. A leather valise sold in Paris or London for $50 may be had here for $6.

Persian rugs go begging at $15 to $20, rugs that in Persia would sell for $50, while the seller swore by his father's memory that he was robbing his family of daily bread.

Paintings by good artists sell for $2 or $3, with a frame thrown in worth $10 or $20. Silver tableware sells for five to ten cents, per ounce.

A foreigner settling here for business reasons may rent a house for $50 a year, and possibly buy an indefinite lease on it for $200. The furniture, excepting the table dishes, may be had for another $200; but if there are any repairs he must pay western European wages for labor.

The reasons for these low prices of articles are, that many of them were stolen, that there isn't much trade and the original owners are selling off all their home treasures for food.

To keep alive a family of five, it takes 1,000,000 rubles, or $2 a day, and the prices of food jump as the ruble drops in value.

Trade has not been so brisk here as in Moscow, as there are fewer strangers to buy. Fewer Russians can get into the City because the trains run only a few times a month owing to lack of fuel. At that, shops are opening daily, as the new economic policy of the Moscow government is applied. Diamonds and objects of value are covertly shown to prospective purchasers in these shops, the dealers still being in fear of the old laws against speculation and free trade.

The City is full of thousands of young men and old, who speak and write English, French, and German,—men who in the old days of commerce were employed about the port or with American and other foreign firms dealing with the interior. These men are glad to get work insuring them $20 worth of food a month.

ARE YOU SQUARE-TOED, GIRLS?

(By Harry Hunt.)

The fashionable foot just now among Washington's debutantes is the blunt, square-toed foot.

It's all because Paul Tschernikoff, ballet master, formerly with Pavlowa, who is instructing Washington's society nurses in the difficult steps of Russia's pre-soviet dances, declares the short, broad, square-toed foot the best possible foundation for a god dancer.

Short Big Toe.

"The big toe should be short," says Tschernikoff, "and at least the next two toes should form a straight line with it. It's still better if all the toes, excepting the little toe, form a straight line.

"In point work"— Tschernikoff says one should always say "point work," never "toe dancing"—"this enables the weight of the body to be borne on all four toes instead of on the big toe alone. A lone big toe is one of the greatest possible handicaps in point work."

Ballet dancing is apt to put the beginner to bed, following the first few lessons, unless she is in the finest physical trim.

"It brings into use muscles a lot of the girls never before knew they had," Tschernikoff says. "After the first few lessons they are likely to be so sore and stiff they can hardly get out of bed. But those that have the grit to stick to it develop a physical stamina and agility that few sorts of exercise can give."

PAUL TSCHERNIKOFF, THE DANCING TOES AND HOW THEY AID DANCING.

Slender Foot Passe.

A love of dancing, a sense of rhythym and natural grace are all helpful to the successful ballet artist. But the foot is the foundation. And that, if not actually stubtoed, should be at least square-toed.

Which confronts society's flappers with the enigma:

"Is the long, slender foot formerly so fashionable, after all to be desired?

"Give us square toes and a chance at Tschernikoff's ballet," is the verdict of Washington's debs.

The Blonde Thunderbolt Who Snapped Her Fingers at Farrar

How the Viennese Stranger Said "Pooh Pooh" to the Semi-Sacred Traditions of Operatic Vested Rights, and "Kidnaped" the Famous Tosca

Striking Poses of Marie Jeritza, Beautiful Viennese Blonde, and Newest Star of Metropolitan Opera, Whose Tosca Triumph Was Far from Relished by America's Tosca, Geraldine Farrar.

Jaritza, a Moment After the Tragic Climax of La Tosca.

JUST when everyone had decided New York was to have a nice, harmonious Winter—musically speaking—a tawny thunderbolt flashes into the middle of the Metropolitan Opera Company knocks another prima donna into the seventh gehenna of jealousy, and gives the whole of highbrow Manhattan somersaults of excitement.

The thunderbolt's name is Marie Jeritza; she's young, beautiful, unconventional, daring, wilful and trouble-stirring; in brief, a Viennese blonde. And, of course, the lady in the other corner of the ring is Geraldine Farrar, for whoever heard of an operatic rumpus that didn't include the tempestuous "Gerry" somewhere in the melee?

Only this time, instead of holding the centre of the stage by scratching up a tenor, singing "Zaza" bareback, or giving Lou Tellegen the papers, Madame Farrar must look from the outside in, where another gets the cheers and flowers and tributes she once received in avalanches.

The blonde thunderbolt stole Farrar's thunder. She preempted Farrar's pet role. She sang "Tosca," and not only did she "get away with it," but she inspired even Farrar's debutante adorers to tear off their corsages and fling them at the footlights. All of which, say the insiders, has launched such a temperamental feud as Breathitt County, Kentucky, couldn't equal on its bloodiest Saturdays.

Sig. Gatti-Cazazza, the impresario who so deftly directs the Metropolitan's destinies, really didn't mean to start anything when he dodged over to Europe last year and thrust a tempting contract at the former star of the Imperial Opera at Vienna.

"You shall make your American debut in the Korngold opera, 'The Dead City,'" he told Jeritza.

"Yes," she agreed. "And after that I shall sing 'La Tosca.'"

Gatti looked politely explanatory. He hinted that this particular role was the property of another singer, Geraldine Farrar.

The blue eyes suddenly flashed fire, the pearly teeth disappeared behind a resolute little pucker of scarlet; two white fingers shot out, doubled and unbent with a staccato "click."

"That," said Marie Jeritza, "for Geraldine Farrar!"

Gatti stroked his beard, examined the ceiling and diplomatically mentioned the beautiful weather along the Riviera.

But Mme. Jeritza had not specialized for ten years in Puccini to toss it all away because America also had a Tosca. Nor was she blonde for nothing. When the new star arrived in New York, Mr. Gatti discovered he had landed a lady with a will as well as a voice. Farrar or no Farrar, she wanted to sing Tosca—she WOULD sing Tosca!

Just what transpired in those back-scenes conferences where tenors are made and unmade, and mortals slated for immotality, only a few people know.

But enough has leaked out here and there to say it was not without many heart-burnings from the two Toscas and not without a shiver of misgiving on his part that Impressario Gatti-Cazazza decreed the blonde thunderbolt should have her way. She should sing Tosca, and if anyone else didn't like it—well, they could just bite all the finger-nails they wanted to. And tear all the hair they desired—provided it wasn't blonde.

The news thrilled the company—some marvelled, some scoffed, some sympathized with Farrar, others made no secret of their delight, all were astounded and more than cynical of results. Then it thrilled the public. It was a tremendous audience, an incredible, almost hostile audience—that streamed into the Metropolitan to hear the newcomer attempt the role Farrar had made supremely hers in American opera.

"She can sing," admitted the lobby loungers who had heard Jeritza in "The Dead City." "But can she act? She'll have to go some to out-Tosca Geraldine."

The Golden Horseshoe dimmed to darkness and the great curtain parted. Through the opening moments of the opera, while Cavaradossi and the convict, Angelotti, plotted in the church of St. Andrea, the audience was all but deaf to them. They were waiting for Jeritza, expecting they knew not what—certainly not the amazing figure that suddenly burst upon them.

A Blonde Tosca! It was unthinkable. Not Farrar nor any other singer had ever so flouted the conventions, Jeritza, scorning the wig even for co-singers had expected her to wear, had let her own golden curls fall to her shoulders. She snapped her fingers not only at Farrar, but at tradition. For an instant the audience wavered; then a chuckle of sheer delight at such daring rippled along the packed rows. Jeritza "got" them from the first.

Jeritza Made Her Debut—and Her First Sensation—When She Sang in Korngold's "The Dead City." A Scene from the Opera—the Tempestuous Prima Donna and Orville Harrold, Tenor.

And this was only sensation number one. Where Farrar had made Floria Tosca a flaming and seductive enchantress in the first act, Jeritza made her a simple, unaffected girl who had come to a church to pray. Again, in act two she discarded the Farrar type—the sophisticated plotter, deliberately planning an assassination—and replaced it with her own Tosca, swayed by terror, love and cunning, until she finally tattered to the floor and, in a manner without precedent, reclined there while she sang her "Vissi d'Arte." When the curtain fell on the blonde thunderbolt after she had seized the knife and, in one breathless transformation, changed herself into a tiger-woman, killing for her love and her honor, the Metropolitan was the scene of such an uproar as it has not known since the heyday of Caruso's fame.

Said one review next morning: "New Yorkers have known various Toscas. But none that so gripped the feelings and set the pulses in commotion as Mme. Jeritza's, no, not even the Tosca of Milka Ternina. . . . What wonder that the big theatre reverberated with a tumult of handclapping and shouting at the fall of the curtain! What wonder that Mme. Jeritza, her face pale and drawn, her walk unsteady, as if she could hardly sustain her own weight, was greeted with deafening bravos when she finally came out alone. Her triumph was of the sort that occurs only once or twice in a generation."

So the critics hailed her. So the house went mad. So the "Gerry-flappers"—the subdebs who have made a fetich of Farrar—pelted Jeritza with bouquets. So blase first-nighters rushed to the next-door florist's and ordered tons of roses to be sent to her dressing room. If the blonde thunderbolt had snapped her fingers once at Farrar before she sang "La Tosca," she could well afford to wear them out snapping—afterward.

Jeritza's triumph with La Tosca, moreover, is but first blood in her duel with Farrar, say the wise ones. If the American prima donna was irritated by her Austrian rival's seizure of the Sardou creation, what will Farrar do, ask the gossips, should Jeritza poach on that most precious of all Farrar parts—Madame Butterfly?

European friends of Mme. Jeritza declare she invests the role of Cio-Cio San with as many unusual thrills as she imparts to Tosca. She is anxious to sing it; the whisper goes that Mr. Gatti, after her Tosca triumph, is not averse to giving her a second opportunity at a Farrar specialty. And, if she does, watch out! So say those in the confidence of Madame Farrar. Something may snap besides fingers.

While the New York intelligentsia thirsts for the next development in the prima donna feud, it is absorbing all the information it can get concerning Jeritza. Who is she? they ask. What is the origin and history of this beautiful young woman who has swept all before her, who is hailed as the star that will take Caruso's place as the Metropolitan's brightest favorite?

Marie Jeritza is only in her twenties. Born in the city of Brunn, now part of the republic of Czecho-Slovaxia, there runs in her veins the blood of a long line of Austro-Slavic ancestors. As little "Mizzi," a girl of blue eyes and flaxen hair, she studied for the stage from the time she could toddle. Ten years ago she was singing in light vaudeville, when the director of the Vienna Volks Opera heard her and offered her a contract.

That was the first big moment in her life. The second came when the Emperor, Franz Joseph, attended her performance. It was by his royal order that she began a sensational career as the favorite of the Imperial Opera in Vienna. And the nex: big moment was when Otto Kahn, on one of his periodical European tours in search of new talent for the Metropolitan, cabled to Mr. Gatti to come over and get Jeritza at any price.

Had it not been for the war, Jeritza would have sung in America seven years ago. But she was in love with a nobleman, Baron Popper—the first and only romance she has had, she says—and she refused to leave Vienna while her fiance was fighting on the western front.

CY HOPKINS WILL MOVE TO TORONTO.

Cyril Hopkins, a promising young athlete of this city, will likely move to Toronto in a week or so. He will be missed in local sports, as he was an all-round athlete, playing baseball last season with the Bankers and Y.M.C.A., Junior O.H.A. hockey, basketball with local junior team, soccer with the Comrades, and he also took a hand at wrestling. Hopkins was expected to play second base with the Adanac juniors this coming season.

FOUL RULE HAS BEEN CHANGED IN CAGE GAME

Several Drastic Changes Made At Recent Meeting of Basketball Experts

BY BILLY EVANS.

The foul rule in basketball has finally been changed.

All winter long the foul rule has been an issue in basketball.

A majority of the experts felt that the foul rule destroyed action and made the game largely a specialist affair, in which the foul shooter was featured.

At the recent meeting of the basketball rules committee the foul rule was debated for two days. Some of the leading basketball officials argued against any change. It seemed as if the rule would stand.

However, the progressive element won out and the foul rule has been much altered.

A decided line has been drawn between the technical and personal foul.

When a technical foul is made the ball is awarded to the opponents at the right to put the ball in play with an unguarded pass. They shall not be permitted to dribble or shoot for the goal.

The penalty for personal foul differs according to the point on the court where the foul is committed.

If the personal foul is committed within certain areas, hereafter to be called the penalty areas, at either end of the court, the penalty will be greater than if the foul be committed outside that space.

The penalty area is a zone formed by the extension of the present free throw line to either side of the court.

The penalty area a zone formed by the extension of the present free throw line to either side of the court.

For fouls committed within the zone the price paid will be two free throws. For a personal foul committed outside the zones, the penalty will stand as a present, namely, a single free throw.

POSITION OF PORT HOPE RE LEASIDE

Judging from some of the comments made by one or two newspapers it was expected that Leaside would be given a rough passage in Port HopeWednesday at the executive meeting. But those who were of the opinion that nothing was too bad for the Toronto Club took an entirely different attitude at the meeting and they were most desirous of having George Peacock's clan in the league.—Oshawa Reformer. The Reformer might have been more explicit in their reference to the one or two newspapers and named the Port Hope Guide. The application of Leaside for admission to the Central League was opposed by Port Hope at the annual meeting and the Guide at the time upheld the action of the Port Hope representatives. The majority however, decided that Leaside should be admitted and the local representatives and the Guide bowed to the decision of the majority. We never carry around a grudge but rather accept the ruling of the majority and do all we can to boost the proposition which has been adopted. Oshawa opposed the entrance of Leaside and it is quite evident from the above paragraph from the Reformer that they expected Port Hope to offer the same opposition at the executive meeting here on Monday, as was done at the annual meeting a month ago. Cobourg and Peterboro representatives, who at the annual meeting favored the admission of Leaside, were opposed to any change in the residence rule at Monday's meeting and all it required was a resolution to this effect and it would have carried by a two-thirds vote. But no person introduced the resolution; they all expected this move to come from Port Hope. We had however, said our little piece at the annual meeting and the majority voted nay, nay, to it. "Let Leaside in" was the slogan and when it carried Port Hope said yea, yea. And for the benefit of the Oshawa Reformer let it be known that we are still saying yea, yea. The Central League knowing all the circumstances in connection with Leaside encouraged them to enter the League. The officials of the team have gone to considerable expense and trouble in making all the necessary preliminary preparations and no organization with a spark of sportsmanship would think of turning them down at this late date.—(Port Hope Guide).

PORT HOPE LEAGUE.

The Junior City League of Port Hope will start the season's activities to-morrow. Three games are scheduled for the opening date. The boys are playing seven inning games.

Two High Priced Stars

JIMMY O'CONNEL, A ND WILLIE KAMM.

The San Francisco club of the Pacific Coast League is hopeful of doing some more frenzied finance in baseball circles at the close of the present season.

On the Frisco club at present is Jimmy O'Connell, the property of the New York Gians, the player for whom McGraw gave $75,000.

On the same club is Willie Kamm crack third baseman. The Frisco owners are confident that the majors will be willing to a price for Kamm that will approach the O'Connell figure.

Kamm led the Coast League third sackers n fielding last year with an average of .98 and hit .288.

Diamond Dust

Manager Hill, of the Lock Works, is rounding up a fast aggregation for the coming season.

Leaside and Bowmanville, both new-comers, will be well represented in the Central League this year. Leaside will no doubt have a fast team, as there is lots of material up that way to pick from.

The Lakeviews Juniors have already been out for a couple of practices, and are fast rounding into shape.

Practically every team in the Central circuit will have new slab artists this season. Oshawa has Gallagher, the whirlwind heaver of the Kingston Ponies, whom the Toronto Leafs tried to secure. Port Hope will have Deer again this season, and also a Jersey City man. Belleville has Manning, a newcomer in the League. Lindsay will have Oulette back on the job, and the other teams are fast lining them up. It'll be some race in the Central circuit this season.

The local Junior League promises great excitement this season, with four teams, Adanacs, Lakeviews, Lock Works and Holy Name all showing up with fast aggregations. It promises to be a tight race.

Chris Bergoine will manage the Classics in the City League this season. He should whip up a fast team, as he has already got some good material to choose from.

C.G.E. will have a strong team in the City League this season, and will make a strong bid for the O.A.B.A. Intermediate championship.

The Classics will hold their initial work out to-morrow evening in Central Park. An invitation has been sent out to any players wishing to try out with a fast team to be on hand at 6 o'clock.

The warm weather Saturday was welcomed by managers and players and several teams had light workouts.

NEW UNIFORMS FOR THE PETES

Local Aggregation Will Have Their New Duds On When They Bump Up Against Lindsay Here on May 20.

The local Central League team will flash new uniforms in the opening game with Lindsay here on May 20. The suits are white with a blue stripe and were made by Gemmell ad Sherwood, local manufacturers, who supplied the team at a cost much less than called for by outside firms. The boys will look pretty nifty in their new duds.

GIRLS PLAY IN THREE GAMES OF FAST BALL

Y.W.C.A. Tigers, C.G.E., and Bonner-Worth Teams the Victors. C.G.E. Win By Default.

GOOD PLAY.

The winning teams in the three games scheduled for the Girls Indoor Baseball League Saturday afternoon were the C.G.E., the Tigers of the Y.W.C.A. and the Bonner-Worth girls. The C.G.E. nine won by default when the Westclocks failed to have a team on the field.

The Y.W.C.A. Tigers defeated the Colonial Weaving team 23 to 13. The Weavers got away to a good start in the first inning with 10 runs but they were unable to hold the lead for in the third inning the Y. Girls passed them and piled up a score that they were unable to overcome. This game was marked by one triple play, four double plays and two home runs.

The players were: Tigers: Hazel Jackson, pitcher; Kathleen Holmes, catcher; Marguerite Holmes, first base; Eva Outram, second base; Mildred Sisson, third base; Ethel Nichol, short stop; Ethel Curry, Claire Robertson and Mary Eastwood, fielders.

Colonial Weavers: Annie Burns, pitcher; Lily Wade, catcher; June Bradshaw, first base; Ida Eggleton second base; Nellie Thomas, third base; Doris Goodwin and Trixie Wade short stops; Dorothy Yodley and Viola Wade, fielders.

The Bonner-Worth team defeated the Normalites. This was also a fast game all of the girls showing up in good form. The players were, for Bonnar Worth: Lily Gregory, Doris Sturgeon, May Howe, Myrtle Bradley, Rose McGovern, Ivy Veeman, Lily Slaughter, Gladys Howarth, Dolly Woodgate and Minnie Ashmore.

Normalites: May Reed Alma Warren, Ruby Wyre, Bertha Sargent, Audrey Milburn, Vera Squire, Mary Squire, E. Saunders, Fanny Blacklock, and Kathlene MacPherson.

Bill Jackson was the umpire for the Tigers-Colonial Weavers game and Walter Smail for the Bonner-Worth-Normalities. The games were played in the Armpuries.

HUDDERSFIELD WINS ENGLISH SOCCER FINALS

Penalty Kick Late in the Second Period is the Only Score Made.

FAST GAME.

LONDON, May 1 (Canadian Press). — Huddersfield Town won the English Association Cup yesterday at Stamford Bridge, beating Preston North-End, the other finalist, by the narrow margin of one goal to nothing. This is the third year in succession that the winning team has annexed the coveted trophy, emblematic of the soccer football championship of England, in a game in which only one goal was scored.

Huddersfield yesterday won its first cup tie since the competitions open to all English teams were begun in 1871, though it was runner-up in 1920.

The game was replete with fouls. It was following a mix-up right in the mouth of the Preston goalposts when Hamilton, of Preston, fouled Smith, the Hudersfield player, who had bored into the edge of the penalty area, that Referee Fowler insisted, in face of a protest by the Preston captain in allowing a penalty kick from which Smith scored.

The Line-up.

Huddersfield — Mutch, Wood, Wadsworth, Slade, Wilson, Watson, Richardson, Mann, Islip, Stephenson and Smith.

Preston North-End — Mitchell, Hamilton, Doolan, Duxbury, McCall, Williamson, Rawlings, Jeffries, Roberts, Woodhouse, and Quinn.

Referee—J. W. D. Fowler, Sunderland.

WHEN YOU SCORE A BALL GAME REMEMBER—

If a first baseman receive a throw in ample time to retire the batsman, and fails to touch the base in time to get the decision, the first baseman is charged with an error.

HASTINGS BOY LACROSSE STAR

HASTINGS, May 1.—Andy McGee, the fast lacrosse player of this section, who figured on Havelock's good team last year, has signed with the Maitlands of Toronto. Andy also plays on the University lacrosse team, and is one of the players mentioned to meet the the Oxford-Cambridge team from England which is touring the continent.

TIE GAME AT KING EDWARD

Canadian Woollens and C.P.C. Battle to a Draw Saturday Afternoon.

At King Edward Park on Saturday The Canadian Woollens and the C.P.C. football teams played a 1 to 1 draw.

The game was played throughout in a very clean manner. Both teams being very keen and determined, not to lose. In this they both succeeded.

The Packers scored first, Mr. Shaw doing the trick in fine style, giving Murray (in goal) no chance. Just before the interval "Woollens" equalized in a very "lucky" (for them) manner. The ball was shot from a good distance, and rebounded off of Mann's foot into the goal This was hard luck for Mann who had put up a brilliant game at back saving his side time and time again.

There was no scoring in the second half which was somewhat spoiled by both sets of forwards being pulled up for offside, continually.

The teams:— Canadian Woollens, —Goal, Murray; backs, Hilman, Chambers, half backs Reid, Roberts Monkman; forwards, Hotson, Shuttle, Gaskell, Jones, Downers.

C.P.C. — Goal, Lazenby; backs, Downer, Mann; half backs, Bradbury, Oxley, Batley; Forwards, J. Shaw, Follis, M. Shaw, Clarke, Strickland.

Referee—H. Andrews.

OWLS VICTORS IN CLOSE GAME

Quaker Oats Eleven Defeated 3-2 in Good Game Saturday afternoon.

The Owls defeated the Quaker Oats eleven on the Oval grounds by the narrowest possible margin the final score being 3 to 2. In the opinion of a good many of the spectators the Owls should have won by a larger margin, owing to the fact that they did most of the attacking, but it is goals that count. The Quakers did well to hold them and showed great improvement over their previous games. The goals were: Owls; Hannah 2, Ralston 1. Quaker Oats; J. Wilson (penalty) 1, Gandy 1.

The teams:—Owls; McFadden, goal, Hardie, Ralston; backs; Burrows, Hoskins, Frost, half backs; Burgess, Hotson, Davey, Hannah, Hotson, forward.

Quaker Oats — Griffin, goal; Young, Willshaw, backs; Hepburn, Clark, Chandler, half backs; Honour, Duffrey, J. Willshaw, Gandy, Foster forwards.

LACROSSE SQUAD OUT SATURDAY

Only a Few of Last Year's Juniors at First Practice, But the Beginners Were Numerous.

The first practice of the junior lacrosse team at Central Park on Saturday afternoon brought out quite a number of candidates and a lot of other youngsters, who are breaking ing into the game with the Strathconas and Athletics teams in the City League.

Bert Todd was in charge of the bunch, and divided them into two scratch teams for an hour's game.

Johnnie Ward and Alf Johnston were the conspicuous members of last year's O.A.L.A. team, and Fred Goodfellow, of the Intermediates of a year ago, also took a stick for the last part of the practice.

The new material looks decidedly promising, especially for the City League games, and some of these novices will probably catch the Junior O.A.L.A. team. They all appeared eager to learn, and mixed things in lively fashion for a while. Dunk, of Campbellford, who is attending the Normal School, would fit into the team nicely, but it is unlikely that he will be in Peterborough after the school year ends. Stacey, Curtis, Breyfogle, and other newcomers to the game should make good with practice.

A few of the juveniles were also out, including young McMillan, who showed up so well in hockey last winter. He is attached to the Athletics' string, and handles his stick well.

Jack Lebarr, Pogue, and a few others of the smaller crowd are staying right with the game, and were on hand for the first call.

The bulk of the juniors, that is, of the remnant of last year's team, were absent, but it is understood they were playing with the City League teams on their own lots.

None of the Crescents reported, and the pick of the Athletics' juniors were also missing. However, it was a highly satisfactory beginning, and next Saturday's game should find them all in line.

TRACK BUILDER TELLS RESULTS OF HIS EFFORTS

'Dad' Moulton Has a Very Simple Formula For Building Fast Cinder Tracks.

"Dad" Moulton makes men run faster. He slices off two-fifths of a second from the time required to run the 100-yard dash, and does it painlessly.

It is a mechanical process with "Dad." His formula is simple.

Moulton builds a cinder running track so "fast" that the sprinter runs four yards faster than he could on the old-style dirt and cinder track.

"Dad's" record, since he built his first track at the University of Minnesota 25 years ago, proves his claim.

He has built more and faster tracks than any other man in the world. His total is 14, seven more than "Sparrow" Robinson, his nearest rival, has built.

This veteran track builder has worked out a self-draining, indestructible-by-ravages-of-time type of track which he believes will be the fastest in the world. It will be installed at Stanford University, and will cost $15,000.

Its composition is as follows:

One inch of crushed rock, rolled hard.

Cover the crushed rock with three inches of Redwood shavings.

Then a two-inch layer of crushed rock, one-inch size, rolled.

One inch of dirt and clay mixed equally is next in the scheme.

Then follows two inches of two-thirds clay and one-third cinders, mixed.

Finish it all off with one inch of clay and cinders, mixed half and half.

This track will offer a resiliency unequalled in no other running track. The Redwood shavings is what will turn the trick. Several years of experimenting have proved this fact.

BELLEVILLE'S TEAM.

The Belleville Interrigencer is evidently well pleased with the results of the spring work-outs of their team. Most of the players on last year's line up will be on the diamond again this season. This is what the Intelligencer says:

"There were two pitchers and two catchers warming up. Jack Williams, the Veronna Indian, and Vern Ferris, boys' secretary at the Y. M. C. A., were displaying their wares. Of course it would not be proper to pass judgment on their pitching as yet, but they have certainly handled a baseball considerably in their days, it is quite evident. Williams is a southpaw and Ferris a right-hander.

"Those persons of the poetic imagination, who dwell in other towns on the C.O.B.L. circuit, and who have prophesied that "Peeney" Mills, having graduated into the Benedict classification, would turn in his uniform this season, should have seen that well-known receiver handling them the other night. He's just as good as ever."

Lacrosse

Crescent Lacrosse Club will hold their practice on Monday and Wednesday nights at 6 p.m., instead of Saturday afternoons, so as not to interfere with the junior practices, which are held on Saturday. Every player is requested to turn out on time fo practice. Those specially requested are: L. Lebarr, J. Collins, A. Brauix, F. Collins, J. O'Toole, W. Ranger, J. Killoran, A. Lavasseur, W. Meagher, H. O'Toole, E. Graham, L. Johnson, A. Rose, V. Risher, V. Masterson, E. Donnovan, A. Girard, M. Neary, W. Meagher.

Mr. A. Rose, coach, is handling the men in good form; his knowledge of lacrosse is unsurpassable, and the Crescents are proud of having such a fine coach.

SPORT QUERIES.

BY BILLIE EVANS.

Please explain the rule that governs how an umpire determines the legality of a home run? Is it decided on where the ball passes out of playing territory, or where the ball is when it finally passes from the view of the umpire? Has there not been some change in this rule made in recent years? If so, please explain the nature of same.—C. A. C.

* * *

The rule governing the legality of a home run says that the umpire shall rule a hit over the fence or into the stands fair or foul according to where he last sees the ball.

That means that if a ball was hit over the fence, and was 20 feet fair when it passed out of playing territory, but curved into foul territory when it finally passed from the umpire's view, it would be a foul ball.

It is where the umpire last sees the ball rather than the fact it was fair when it passed out of playing terrritory.

The rule originally was that the umpire should decide the hit on where he last saw the ball. At a meeting of the rules committee three years ago a change was made in the rule. It was ruled a home run if the ball was fair when it passed out of playing territory, regardless of where it later went.

After two months of trial the major leagues went back to the old rule, believing that it was more difficult for the umpires to decide just where it was when it passed out of playing territory than to watch it until it passed from their view.

DEMPSEY OFF TO BERLIN GETS SEND-OFF IN PARIS

PARIS, May 1. — (Canadian Press.)—Jack Dempsey bade farewell to Paris Saturday. He was given a great send-off by throngs of French and American admirers as he boarded the train for Berlin. He acknowledged the demonstration in a brief speech, and said that he was leaving with his heart full of gratitude for the royal reception and wonderful hospitality.

NEWTON AND COYNE IN SHAPE

Both On Edge For To-night's Bout. Thirty Rounds Of Boxing Is Scheduled.

The Wm. Hamilton Athletic Club's big programme to-night at Brock street rink promises to attract the biggest crowd that has seen a boxing card in Peterborough. The enterprise of the management in looking up such top notch amateurs as Walter Newton, Ontario champion, and Tommy Coyne, the Classics' cleve. 135 pounder, who holds the Toronto title, has created widespread interest in the bouts and the card will be liberally patronized. Newton and Coyne are of course in the pink of condition, and they should give an exhibition of clever boxing that will open the eyes of the fans.

Second only to the main bout is the clash between Trickey of Toronto and Irish Jordan of Peterborough. The local lad has little defence, but he carries a sleeping draught in either hand, and he counts on his heavy artillery to win for him. Trickey, however, is fast enough to keep out of the way, his comrades say, and at the same time hang up a big lead on points.

Rube Maddeaux, who meets Ted Williams at 158 pounds is a hard-hitting Toronto boy who is likely to keep the local lad busy for the three rounds.

In addition to these three feature bouts, there are seven local bouts, thirty rounds altogether on the list. Sid Simmons of Toronto will referee.

BASEBALL NOTES

The annual meeting of the East Peterborough Baseball League will be held at the Chamber of Commerce on Tuesday at eight o'clock p.m. It is important that all clubs interested in this league, be represented at the meeting. Applications for membership will be received from new clubs.

The senior teams of King Edward and Queen Mary public schools are away to a good start in school baseball league, King Edwards with Charlie Bradley pitching won the opening game against the Prince of Wales nine by the score of 19 to 2, and Queen Mary defeated Centrals by 8 to 1.

IF THIS PLAY COMES UP HERE'S YOUR DECISION.

If a pitcher starts to throw to first to catch a runner napping he must compete the throw or it is regarded as a balk, entitling all runners to advance one base. If after stepping toward second or third, with the intent to catch a runner napping, he believes he has no chance to get the runner, it is not necessary to complete the throw to escape having a balk called. All that is necessary is that the pitcher step toward second or third.

WHEN YOU SCORE A BALL GAME

Remember—

An assist is always credited to a player who makes a play in time to put a runner out, even if the player who would complete the play afils, through no fault of the assisting player.

PUPIL'S PRANKS CAUSE RIOT IN SCHOOL ROOM

One of the many humorous touches in Gus Edwards' "School Days", featuring Wesley Barry, which comes to the Grand Theatre next Thursday takes place in a French tutor's private school for wealthy children. The freckle-faced screen star is one of the pupils, and he loses no time in making the teacher look foolish in the eyes of the school children.

The French teacher called Wesley to the platform to read the day's lesson —La Parfume de Le Rose.

"Consider, M'sieur.," the dapper instructor quoth, dipping his finger into a small jar of pomade and waxing the tips of his dainty mustache. "Consider: What is stronger and sweeter than the scent of the lovely rose!" Again that habitual dipping of the fingers into the pomade and the artistic waxing of the mustache.

Wesley knew what was stronger than the scent of the rose. Also, he knew that it was necessary for many reasons to rid himself of the limburger cheese melting in his pocket. His agonized eye lit on the jar of pomade. With a surreptitious movement he deposited the cheese therein, and hurried on with his translation.

"Not so rapid, cautioned the teacher. Again the fingers dipped into the jar. Again the tips of the mustache were twirled. A smile of satisfaction—but suddenly a queer look came into the teachers eyes. An odor a detestable pungent odor of — where was it coming from? One glance into the pomade jar, one hasty whiff and he leaped to his feet. Hurriedly, Wesley rushed to his seat.

Around the room in delirious quest for the culprit ran the Frenchman. "I am not excit," he yelled. "No, I am a cucumber. But politely, painfully I ask—who put ze cheese in ze pomade?" He passed Wesley, yanked the kerchief out of his hands and sniffed it. "Aha!" he thundered. "You — I — you — I —" words eluded him. 'What to expect! From a silk ear you cannot make a sow's purse! Class adjourn for lunch. As for me, I go to disinfect."

Capitol Entertainment

To-day William Farnum will be seen in his latest "Perjury" a great super special feature—Snub Pollard comedy—Pathe News—6th Episode "White Eagle". Special added attraction Cameron Geddes will sing Mendelssohn's "I am a Roamer Bold". "Rosary".. Mr. Geddes has been held over a second week by public demand.

BIG NEW YORK SUCCESS COMING HERE FOR RUN

"Perjury", a William Fox super-special which was the talk of New York while running at a prominent Broadway theatre, will come to the Capitol Theatre to-day for a three days' run. It presents William Farnum in a role similar in several essential respects to that of Jean Valjean in Victor Hugo's "Les Miserables", in which this famous emotional screen star made a tremendous hit. New York reviewers and theatre-goers, during the run of "Perjury" in the metropolis, declared that William Farnum surpassed all former efforts in the expression of human emotion. They predicted that the gripping photodrama will establish itself permanently as one of the classics of the screen.

"Perjury" provides a supreme test of William Farnum's dramatic genius, for in the role of Robert Moore he runs the gamut of human as an active, ambitious factory superintendent of 45, happy in his home life and in the friendships which his engaging personality has won for him. Jealousy and dread grip his mind, followed by red rage and finally despair. Then the prison gates close upon him for twenty years, during which the inherent gentleness and sweetness of his nature develop in remarkable degree. The family is left, outside prison walls, to misery and pathetic struggle

For the picturizing of "Perjury" the enormous space at the Fox plant in New York known as the 'little studio", and part of the "big studio" as well, was turned over to the Farnum company. Twenty-four separate interior sets were erected for the elaborate production, including a large courtroom for the murder trial scene.

The cast of "Perjury" includes Sally Crute, Wallace Erskine, John

Webb Dillion, Frank Shannon, Frank Joyner, Grace La Vell, Gilbert Rooney and Albert Mann. Harry Millarde directed the production.

AT THE ROYAL.

Pauline Starke, who appears to-night in "Wife Against Wife," is noted as the best dressed actress of the Hollywood colony. In this great human interest drama Miss Starke is seen in more than a dozen of the latest creations. Not only are the costumes smart, but the dainty actress wears every one of them, from the garb of an artist's model to the modern gown of a New York society woman, with all the grace of a true aristocrat. The story sweeps from an artist's studio in Paris to the whirl of society in New York, where wives are wives and oversea love must be forgotten. Some of the scenes are actually taken in Greenwich Village Studio, which has frequently attracted attention from the press. An emotional drama with an ever sustained interest and a charming end. William Duncan and Edith Johnston are presented in this thrilling story of society and mining camp life called "No Defense." It is a story with a punch, a film of action, a photo-drama of suspense and excitement, of daring deeds in the open which blend in leading to a happy culmination. Then we have Ben Turpin in that sparkling comedy called, 'Love and Doughnuts,' which is a riot of fun and laughter.

DARE DEVIL DRIVER DRIVES DOROTHY DALTON

Thrilling Scene Pictured in Star's Latest Picture "Behind Masks."

One scene of "Behind Masks," Dorothy Dalton's latest Paramount picture, demanded the skillful driving of a high-powered foreign car carrying Miss Dalton along a country road on the outskirts of New York. When it was time to "shoot" the scene, Director Frank Reicher was astounded to see the car come tearing down the road and go through the required action perfectly without rehearsal.

This unusual incident caused the director to make inquiries of the driver. It proved that he was Captain N. C. Fitzgerald, late of the United States Aviation Service, a dare devil automobile driver and aeroplane stunt man. He explained that he happened to be at the garage at the time that a call came in for a car and he volunteered to drive it in order to get motion picture exeprience for a production of his own he was going to put in. "Behind Masks," starring Dorothy Dalton, will be shown at the Regent Theatre to-day. Her leading man is Fredrik Vogeding, a player of considerable note. The support generally is excellent.

THE MARKETS

NEW YORK, May 1.—(Canadian Press).—The Stock Market prices registered further substantial advances at the active opening of today's session. The volume of dealings indicated further large accumulation of orders over the week-end. Gulf States Steel was a conspicuous feature, soon gaining 4½ points. International Paper, Associated Dry Goods, American Locomotive, Otis Elevator, California Petroleulm and Kelly Springfield Tire rose 1 to 1½ points. Mexican Petroleum and Studebaker were the only leaders to re-act, the latter being sold on failure of directors to declare more than the regular common dividend.

Studebaker soon threw off its heaviness, rallying two points within the first hour. Other motors, notably Willis Overland Preferred, Pierce Arrow Preferred, Mack Trucks and Stromberg rose 1 to 1½ points. Oils and Independent Steels added substantially to last Saturday's gains, especially the California division. An average of one point and Montana Power and Brooklyn Union Gas featured Utilities. Rails were only laggards, aside from higher prices quoted for Illinois Central and New York, Chicago and St. Louis. Food specialties were strong. National Biscuit rising six points. Call money opened at 4 per cent., as against last Friday's final quotation of five per cent.

The list continued to give a good demonstration of rising strength in the early afternoon, despite the marking up of call money rates to 4½ per cent. Rapid advances in closely controlled shares indicated an expansion of pool operations, with the general market benefitting by the confident accumulation of various leaders. Reputed progress in street merger was responsible for further gains in the group, Republic rising four points and Lackawanna 2½. Gains of two to four points were established in many shares, including May Department Stores, General Electric, Tidewater Oil, Standard Oil of New Jersey, Cluett Peabody and Postum Cereal.

STERLING EXCHANGE.

NEW YORK, May 1.—(Canadian Press).—Sterling exchange firm; demand rates, Great Britain 4.42 5-8; Canadian dollar, 1⅛ per cent. discount.

CHICAGO GRAIN MARKET.

CHICAGO, May 1. — (Canadian Press).—Higher wheat quotations at Liverpool helped to lift the value here, so too did the talk of the large abandonment of winter wheat acreage in Oklohoma. Wheat here ¾ to 2 cents higher, May 1.41 to 1.41½, and July 1.26½ to 1.27, then a moderate set-back of prices ensued, with trade meanwhile consisting chiefly of local character.

Corn and oats showed independent firmness, based to a considerable extent on the authoritative assertions that corn must have been used for feeding on farms in much greater quantities than has been generally realized.

Corn opened unchanged to 3-8 cents higher, July 65 to 65 1-8, and then scored slight general gains.

After starting unchanged to ¼ cent higher, July 39 7-8 to 40, the oats market continued to advance.

MONTREAL STOCK MARKET.

MONTREAL, May 1.—(Canadian Press).—The local Stock Exchange presented a very bullish aspect during the trading this morning. Paper stocks led the market in strength and activity, and nearly all these issues made substantial advances from Saturday's closing levels. Abitibi was very active this morning and advanced another point to 55, while Price Bros. was up two points to 46. Brompton too was strong, and sold at 29¼, after closing at 29 5-8. Laurentide remained unchanged at 88. Atlantic Sugar and Consolidated Smelters were quiet.

TORONTO STOCK EXCHANGE.

TORONTO, May 1. — (Canadian Press).—The local Stock Exchange advanced the opening hour this morning to 9 o'clock in order that the hours for trading would be uniform with cities in which daylight saving came into effect yesterday. Little business was transferred this morning, however, although prices were mostly unchanged to higher. Steamship issues were strong, with Common closing at 21¾, and Preferred at 51½, the high mark of the morning, and a gain of 1 point for the latter. Abitibi was 3-8 higher at 48 3-8; Toronto Rails gained two at 66½, while Brazilian was unchanged at 45¼. Bonds and Banks were very quiet, but trade in unlisted securities was fairly active.

TORONTO CATTLE MARKET.

TORONTO, May 1. — (Canadian Press). — Receipts, 2,347; trade steady. Quotations: Heavy beef steers, $8 to $8.75; butcher steers, choice, $7.75 to $8.50; butcher cows, medium, $4 to $5; calves, $9 to $10.50; lambs, $13; hogs, selects, $13.50 to $13.75.

MUSIC AT MARK ST. CHURCH ESPECIALLY GOOD

The music at Mark Street Methodist Church services yesterday, under the capable direction of Mr. V. Boorman, was particularly good. An augmented choir of 28 voices rendered some beautiful selections, with solo work taken by Mrs. Mendell Braund. Anthems sung by the double quartette, which is composed of Messrs. Mason, Batchelor, Howson, Ridyard, Sr., Wynn, Ridyard, Jr., Speers and Rome, included two splendid numbers, "O, Be Joyful in the Lord" and "If Ye Love Me."

Open Letter

To the Mayor and Members of the Council—

The Local Council of Women wish to call to your attention a few facts concerning the Supervised Playgrounds of the City.

Last year 1200 children used these playgrounds. This number would be equalled, perhaps exceeded, this year. These children will play somewhere, the majority of them on the streets, if the playgrounds are not open. Also $3000 worth of playgrounds equipment will lie idle during the holiday months, when the children should have the use of it.

What does Supervision of the Playgrounds mean to children and the parents? It means no bad language tolerated, no quarrelling allowed, smaller children cared for and protected from aggression, the larger children taught to assume a little responsibility, all taught the value of team work. The practical things taught include basket weaving, knitting, sewing, cross-stitch, with kindergarten work for the smaller children.

The Inspector of the Public Schools states that the children who have been under discipline at the Playgrounds all summer settle down to work much more quickly in September than they otherwise would.

In addition the Supervisors perform a most useful public service at the bathing beaches. Two are in attendance at each beach, four afternoons a week, teaching beginners, and ready for any emergency that may arise. The value of this service cannot be overestimated, as our beaches are none too safe.

Since it is possible to secure these advantages for 1200 children at a cost of about 1-6 of a mill in tax rate (50c a year on a $3000 assessment) can the council hesitate to grant the amount required? In view of these facts and many more which might be added, we emphatically protest against the council shirking its responsibility to the children of this city. The council seems willing to spend a good deal of money advertising Peterborough's advantages. The fact of possessing proper Playgrounds and Bathing-beaches would be the best advertisement Peterboro could put up.

C. JAMIESON,
Secretary Local Council of Women.

U.S. BILLS FOR MOTOR TAXES

Eighteen States in Union Adopt Measure.

Of the eleven States whose legislatures have convened this year or are still in session, four have enacted a gasoline tax. They are Maryland, Louisania, South Carolina and Mississippi. Bills for a gasoline tax are still pending in Massachusetts and Rhode Island. In all of these cases, as has hitherto been the custom, the gasoline tax has been enacted in addition to the customary motor vehicle registry and general license fees. The gasoline tax in these four States is one cent a gallon.

These recent additions give a total of eighteen States in the Union which collect fees on gasoline purchased within their borders. The fourteen which had the law last year are Arizona, Arkansas, Colorado, Connecticut, Florida, Qeawgo, Kentucky, Montana, New Mexico, North Carolina, Oregon, Pennsylvania, South Dakota, and Washington. The rate in every case is one cent a gallon, except in Oregon, where the fee is two cents. A gasoline fee bill, it will be remembered, was introduced into the recent New York Legislature, but in view of the fact that registry fees were materially increased on both passenger cars and trucks no serious effort was made to pass it.

The gasoline system of motor-taxation is gaining favor from the lawmakers as a handy source of revenue getting from motorists. Logically it has many factors in its favor, and motorists are by no means averse to it, provided it is fairly enacted so as not to become a supertax upon moto users. Commissioner Law, head of the New York Tax Commission, in speaking of its advantages early in the year, took the sensible view that if the gasoline tax were the only motor vehicle tax imposed by the State it would be the fairest system of motor taxation.

Motorists are in accord with the Commissioner in this view but the difficulty thus far lies with the legislators, who, while enacting the gasoline tax, fail to lessen in any degree the former annual fees based upon horse power, or weight. The opposition, therefore, to the tax is that it is imposed as an extra burden upon the motor-using public and solely with the object of obtaining more revenue. With a fair gasoline tax, motor car users would pay according to the extent of their automobile usage. The man who uses his car but a short period would pay a similar amount than the man who keeps his car in use practically the entire year.

Under the present system everyone pays the same proportionate registry fee. Instead of exacting the full annual fees, some States allow a half-year fee. This is the case in New York provided the application is filed for a new car between July 3 and the end of that year. To register an old or used car for the half fee an affidavit is required showing that it has never before been registered in the State. Connecticut, on the other hand, has a more equable law. The motor year begins Jan. 3, but all cars registered after April 3 pay a lower fee for every remaining month of the year, according to the time of registry.

It is interesting to note that of the States having a gasoline tax, the only one where it met with general favor among motorists was Maryland, and that, too, without any change in the usual motor car fees. The gasoline tax there goes into effect June 1. It is estimated that in the seven months from that time to Dec. 31, about $1,180,000 will be raised from gasoline sales. Approximately half of the sum will be devoted to removing a deficiency in the maintenance and reconstruction fund of the State Road Commission. The other half will be used for the construction of State roads through incorporated towns and cities to connect the State's arterial system of roads. There is also pending in the Maryland Legislature a two-cent gasoline tax bill. It has passed the House and is expected to pass the Senate. This act will go into effect Jan. 1. 1924, and the revenue obtained will take the place of the existing motor horse power registry tax, the money to be applied for the maintenance and construction of roads. If this bill is adopted and signed, the one-cent gasoline act will cease on Jan. 1, 1924. According to the arrangement, motorists in Maryland will, after Jan. 1, 1924, pay practically nothing more than a two-cent a gallon gasoline tax as their State motor fee, although a small charge, it is understood, will be made for the annual registry and plate numbers. Of all the gasoline motor hills thus far enacted, the plan worked out in Maryland seems to be the most just.

There is another bill pending in the Maryland Legislature which a few years ago would doubtless have earned the support of every automobile owner. It provides for a material reduction in the existing minimum obligatory fines for speeding. The Automobile Club of Maryland, it is interesting to note, is strongly opposed to the bill. Osborne I. Yellott, counse to the club, voiced strong opposition to the changes as lowering the bars of highway safety. He was killed in an automobile accident a few days ago. One of his last acts was the writing of a letter to the Senate Chairman in charge of the bill pointing out its defects. He called attention to the fact that the present State law prohibits the operation of a motor vehicle at a greater speed than thirty-five miles an hour, subject to a penalty of not less than $25 or more than $100.

"The new bill," wrote Mr. Yellott, "cuts out the minimum fine of $25, leaving the magistrate free to impose a penalty as low as $1. The present law also provides a minimum of not less than $100 or more than $1,000 for any person exceeding a speed of sixty miles an hour on the road. To my mind, no penalty can be too great for any one driving at such a speed on our public roads. Yet even in this case the proposed bill cuts out the minimum fine of $100 and again leaves it to the magistrate to impose a $1 fine if he should choose to do so."

Action such as this by a representative automobile club indicates that the speed maniac can no longer hope to merit even the tacit recognition of motor club men in relating his speed triumphs for long distances on the public roads.—N. Y. Times.

JOHN H. VERNOR TALKS ON HIS WORLD TRAVEL

Pithy Description to Kiwanians of Things Foreign, Full of Romance and Adventure.

WIDE EXPERIENCE

J. H. Vernor, superintendent of the Western Clock Company took the Kiwanis Club at its noon luncheon in the Empress Hotel to-day, around the world in fifteen minutes From his wide experiences in practically very country in the world during ten years travelling Mr. Vernor told some of the most interesting incidents and the pithy descriptions of things foreign proved full of romance, interest and adventure.

His experiences in South Africa in 1918 were interesting, and the accounts of sea-travel in the East India waters conjured up visions of tramp steamers, coolies and Malay pirates. During an account of a trip from Madra to Singapore, in which cholera broke out among the 1300 coolies on board, Mr. Vernor took occasion to contrast the conditions of our civilization with the eastern The coolies were just one class above the animal, so far as chances of progress in the world were concerned.

Mr. Vernor, in the short time at his disposal, told of travelling in Australia and Japan. From what he said about the heat and the dryness of South Africa (not in an O.T.A. sense) his auditors displayed no great enthusiasm about the country. Mr. Vernor gave them an opportunity to try out the canvas helmets worn in that country and the novelty was thoroughly appreciated. A cane made from rhinoceros hide also came in for close inspection.. At the close of the interesting address the Kiwanis lion outdid itself in a roar that threatened to loose the plaster in the grill room.

There were a large number of guests today. The list is as follows: Mayor W. H. Taylor, Edward Bailey, manager of the Canada Cement Works, Lakefield, Rotarian Walter Smaill, Walter Kidd, Cameron Geddes, Toronto and Kiwanian Lt.-Col. George Gillespie of Kingston. A solo and encore by Mr. Geddes who is a popular baritone was much appreciated. During the luncheon Walter Stocker, announced the speakers for the next three weeks in the following order, Duncan Walker, Reg. H. Turner, Dr. G. S. Cameron.

The club again demonstrated today its sympathy and foresight by deciding to place flowers in the public ward of St.. Joseph's Hospital during the months of June, July and July. Dr. J. E. Middleton introduced this matter as coming from the Horticultural Society, the Club did not hestitate in cooperating with the society in this way.

A little sunshine and a message of hope and life will be brought into the public ward of the hospital as a result of the Kiwanis decision.

Dr. Graham McDougall acted as booster to-day.

Born on Nelson's Battleship, Just Died

PORTSMOUTH, May 2.—(Associated Press)—Mary Ann Carr, who was born in the cockpit of Nelson's ship "Victory" near the spot where the famous Admiral fell, has just died here, at the age of 85.

Her memory of the early days aboard the ship was fresh up to within a few nights of her death. She once saw a sailor flogged. The picture of the man suffering remained vivid in her mind through her long life. Only once did she see such a sight for on other occasions she was sent ashore to be spared the spectacle.

LESSON IN CAFE SERVICE COSTLY

Belleville Drunk Wanted Mustard on Every Table in Class Cafe.

As Gerald Alexander Simons, of Belleville so truly stated, it was a most unfortunate trip altogether. Before he had eben in town two hours yesterday he was in the lock-up and two charges hanging over his head. This morning they descended upon him in all their fury and when he finally emerged from under he was within seventy-five cents of being able to debit his resources by $35. It was an immensely unfortunate trip for Simons.

It appeared from the first case against the Belleville man that he caused considerable excitement in the Class Cafe just about an hour after he landed in town. He at once pleaded guilty to assaulting Harry Chew, son of the proprietor, but put in in his defence that the boy had been impudent and aggravated him. Chew said the accused put in an order for a sandwich at 9.30 and asked for mustard. As there wasn't any in the restaurant he went to the kitchen to make some. When he got back Simons complained loudly about the lack of service and said they should have mustard on every table. He kept on talking and ended by jumping up suddenly and grabbing Chew by the neck. Simons released him to wait on another man who wanted pie but followed him out to the kitchen. "He said you're trying to make a fool of me and he grabbed me by the neck again."

The boy's shirt was not used to such a-tuggging and gave way at the collar band with disastrous results for future use. The shirt rent from stem to stern was submitted in court as evidence of the roughness of Simons. Finally the police were called by a man in the restaurant after tiring of the spectacle and Simons was led off to the police station. He refused to admit to-day he was arrested, but claimed he came of his own volition.

Magistrate Langley found the torn shirt strong evidence against Simons and the fine was set at $10. When charged with being intoxicated in a public place, to wit, the Class Cafe, he was doubtful as to how to plead. He wanted a definition of what constituted intoxication. He was ready to admit he was excited, but after the Magistrate read the statute regarding intoxication he decided he must be guilty. All the Crown could get out of an examination was that he drank the liquor in Belleville and had not had any additional supplies. He used the liquor on doctor's orders, he said to relieve lung trouble caused by being gassed in France.

Radio Keeps Baby Happy

BABY GEORGIA MOSES "LISTENING IN." ....

Another use for radio!

Keeping baby happy and contented.

Mrs. A. L. Moses, of Seattle Wash., says it's the best subsititute for mother' arms she has found.

All she does is to set little Georgie beside the radio receiving apparatus, attach head phones, tune in a broadcast concert and then go about her own work. Mrs. Moses says she's had no worry since she bought this "toy" for baby.

The only difficulty at first, says Mrs. Moses, was in keeping Georgia from putting some of the pieces into her mouth. But she soon learned the best way to prevent the baby from tasting everything was by keeping the whole radio set intact.

ISOLATION HOSPITAL LACKS SATISFACTORY FACILITIES

Dr. McCullough, Amongst Other Deficiencies, Reports Sewage Conditions Unsanitary and Menacing to Institution—Inadequate Provisions for Lavatory and Bathing Needs.

Provincial Health Officer Dr. McCullough has submitted the following report to the City Council, which they last night referred to the Property Committee:

On the 7th instant I made an inspection of the Isolation Hospital in the city of Peterborough. I found the hospital clean and in good order, but sadly lacking in facilities necessary to the satisfactory working of such an institution. The site is first-class, and I am told there is adequate land for future expansion.

The attention of the local Board of Health and Council is called to the following conditions in respect to the hospital:

1—The fire escape is entirely inadequate.

2—The provisions for the disposal of sewage is most unsatisfactory. I am told that the sewage backs up and floods the basement at times, thus producing a condition of an unsanitary and dangerous character to the institution.

3—There are very inadequate provisions for lavatory and bathing purposes, there being but one bath for 18 persons.

4—The receiving and discharge quarters for patients are unsatisfactory.

It is recommended that (1) a new and adequate fire escape be provided in each wing; (2) that the sewer outlet be carried to the most convenient city sewer; (3) that proper lavatory equipment be provided for nurses and physicians, and that an additional bath be installed in each wing; and (4) that provision be made for proper receiving and discharge rooms.

PLAYGROUNDS ASSN. WILL GET NO GRANT

The Question Definitely Settled When Mayor Taylor Cast a Negative Vote on a Tie Division of Council.

ROUTINE BUSINESS BY CITY COUNCIL

Although the Playgrounds Association again applied to the City Council last night for a grant of $1,500, the request was turned down, on motion by Ald. Phelan, that his report of the Finance Committee recommending no action be taken be adopted.

The vote was taken on Clause 6 of the finance report to the foregoing effect. Ald. Phelan explained that there was no committee appropriation for such a grant.

Ald. Hamilton moved in amendment that this clause be eliminated; the division was a tie, and Mayor Taylor voted on the negative side. This means that Clause 6 in the report was adopted, refusing the grant petitioned for.

V. J. McElderry, Geo. A. Gillespie and Mrs. W. R. Morris each addressed Council in support of the request for a grant, explaining that $1,500 was required for paying salaries of supervisors at all playgrounds four days a week, and those of a man and woman swimming instructor at each of the bathing beaches. If the grant were withheld 1,200 children would be deprived of their playground privileges enjoyed heretofore, petitioners declared.

Later on in the evening Ald. Gainey's report of the Parks Committee provided for advertising for caretakers at the bathing beaches, who shall also be capable of instructing in swimming.

Ald. Crowe Stays With It.

City Relief Officer F. W. Miller will be allowed no increased of his $1,000 a year salary, and Ald. Jones took strong exception to the clause to that effect in the finance report, which, however, was adopted. He urged that Miller had given the city valuable services, and he should be allowed a living salary.

Ald. Holloway was heartily in accord with these sentiments. He explained that Miller, instead of taking advantage of the city's offer to engage for him a stenographer, had done the work himself, thus saving an expense which he is entitled to in the way of a salary increase.

Ald. Holloway's and Jones' motion here that the Relief Officer be paid $100 a month failed to carry on a vote of 6 to 4.

Ald. Crowe, in Finance Committee, had voted with Ald. McIntyre that Miller's application for an increase be not granted, as there was no appropriation in the estimates for it. He then remarked that he would staw with it (his vote), and so he did last night.

Western Clock Bylaw

Bylaw to aid Western Clock Co., by a fixed assessment of $10,000 was ratified in accordance with the expressed wishes of the ratepayers at the polls recently.

Cricket Place Extension

W. J. Mein and others petitioned against the extension of Cricket Place on the ground that opening the thoroughfare would place Mein's property on a corner, entailing to him an assessment on two fronts.

Ald. Gainey replied that such should not necessarily be the case the extension would be 68 feet wide leaving a street of 60 feet with the remainder width divided each side, allowing Mr. Mein or someone else to build a corner house if desired by acquiring the vacant land in conjunction with Mein's existing lot. He left this matter in Council's hands to see for themselves were this not an opportune time for council to acquire the Rome property for the proposed street opening. The Rome house, he said would let for $25 or

Grand Opening Day for Trout

If You Were Adamant to the Lure Just Look at What You Missed!

May Day for most persons was just so much fine weather, comfortably warm and cool, and made for enjoyment and refreshment; for others it was a summons to the annual moving day outing, with its confusion and work; for some few others it was a day of demonstration about something or other, with a red flag sticking out in the scenery; and for a final few, it was the opening of the trout fishing season.

Little Willie, looking forward to 25th December, was scarcely more eager and expectant than your dyed-in-the-wool devotees of the ancient art and rite of angling for trout as the days of April run out.

One party of them piled into an automobile before daybreak on Monday morning, and by six o'clock was well on the way to a remote stream as daylight was expanding.

They expected to have the whole course to themselves, but three other cars arrived before the morning was far advanced. Noon found the party hungry and fagged, so they set up the sheetiron stove they had brought with them, and cooked a meal fit for a god, even Nimrod himself. Teabone steak and friend potatoes garnished by all the subtle delicacies that hunger gives to such a meal, especially when served on a sparkling May day beside a trout stream in an open woods.

In the afternoon they motored away off to another creek, and by 7.30, when the dusk of evening was gathering, they set up the stove again and "saved a life" with a meal that was the counterpart of the dinner.

That tired feeling vanished under the spell of the trees and the glow of the fire and the black coffee, but it was in full possession of four weary bodies this morning.

Luck wasn't as god as last year, one member of the party told The Examiner. He brought home thirty-three brook trout, and the biggest catch in the party was fifty.

"Last year I caught 150 on the first day, and that was the average for the gang, but the streams are being fished out. If they keep on, there'll soon be no trout left."

There's a reason!

GEORGE GRANGE STILL PETERBORO FIRE CHIEF

Has Not Resigned

GEO. GRANGE,
Who has ignored Council's demand on April 3 that he resign his office as Peterboro's Fire Chief by the end of April, and still carries on.

The Council Has Not Yet Appointed His Successor and Grange, It Is Alleged, Will Not Resign.

PETITIONERS SEEK CHIEF'S RETENTION.

Both the City Council and Fire Chief George Grange are marking time in regard to the situation at the fire hall and the department and the city stands relatively in pretty well the same position as it has for the past three weeks. Grange has (on advice it is assumed) declined complying with Council's demand for his resignation and out of 30 applicants for his position no suitable successor for his shoes is yet in sight.

The only real tangible results accruing from an extended and vexed controversy in a serious question are first that Ald. Mel. Turner has changed coats and lined up with Ald. Morrison, Jones and McIntyre for giving Chief Grange opportunity to demonstrate his worth and that three applicants for fire chief here will be invited to come at the city's expense and interview council in committee of the whole.

The foregoing was decided last night in Council on motion of Ald. Hamilton and Stocker. The division was as follows:

Yeas—Ald. Stocker, Hamilton, Crowe, Gainey, Holloway and Phelan.

Nays—Ald. Jones, McIntyre, Morrison and Turner.

These applicants are: — George Gimblett, Hamilton, salary $2,500 a year. R. Dey, Cosingwood, salary $2,000. G. M.. Brady, North Bay, salary $2,400 a year.

Ald. Jones protested that it was not necessary to pay these men's expenses; two of them are asking $2,400 and $2,500 year, respectively as against Grange's salary of $2,000, and if they want the job he said let them come after it at their own expense.

He here moved in this direction seconded by Ald. Morrison, but the amendment was lost on the same foregoing rate.

Two Petitions

Earlier in the evening when in committee of the whole, Council discussed two petitions, praying that Chief Grange be retained in office. One was signd by Geo. A. Gillespie and carried a number of names the length of five sheets of foolscap, the other bore the signature of R. C. Braund and of quite a few other citizens. The latter document said its signatures were actuated in defence of Grange after hearing Fire Marshal Heaton's endorsation of his services as chief.

In Council these petitions were simply "received" on motion of Ald. Hamilton and Stocker.

Ald.. Holloway declared one man had signed the petition for "business reasons" and Ald. Stocker advanced that both petitions were signed by some simply out of sympathy.

No Choice

Mayor Taylor reported in committee for the delegation who went to Toronto and interviewed six applicants for Grange's position that they could not recommend the appointment of either of them. The applicants interviewed were three men belonging to Toronto, two from Hamilton and one from Guelph.

But Ald. Jones had another report up his sleeve —one gleaned by Ald. Morrison and he when in that trip. They, on their own initiative consulted Fire Chief Russell of Toronto, who spoke, he said, highly of Chief Grange, recommending him as reputed by members of the Fire Chief's Association as being as good in fire prevention as any chief in the country. Chief Russell further declared that he himself would not undertake to fight a big fire in Peterborough with the out-of-date equipment in use.. A blaze of any considerable size, Russell asserted

DAD FLIRTING WITH THE SOIL

The Old Man is Tearing His Shirt Off in an Effort to Get Garden In.

'Tis a season full of meaning for the person known as dad, who is active as a sand flea in a drouth as he putters in the basement with his near-to-nature fad, which arrives with the breezes from the south. For father is a garden bug, and he thinks he loves to toil with spade and rake, with trowel and with hoe, to macerate and manicure the miasmatic soil, then plant the funny seeds he hopes will grow.

When all the world was scrapping dad became a green goods bug, and won a dinky medal for the way he lacerated real estate and murdered weeds and dug and kept the home fires buring night and day. Why, dad became so clever he could take an onion set, and chuck it in the dark complexioned loam and leave it there to ruminate a spell, and on a bet 'twould grow an onion for our happy home!

All Cuttered Up.

For weeks he's snooped in catalogues that feature garden seeds until he raves about 'em as he sleeps and now the house is littered with the kind he thinks he needs, arranged in rows and piles and humps and heaps. He's testing 50 cereals and different kinds of grass —at least, the darn stuff looks like sprouting hay—but father softly chuckles, for he knows it's garden sass in its tender, juicy adolescent day.

He battles with the angleworms, the chickens, dogs and cats and should a sparrow try to filch a bite he bristles like a porcupine, and sputters, spouts, and blats and hops around and dares 'em all to fight. He even ditches business for his little radish farm and all but sleeps among the beets and beans. Oh, naught in life is lovelier nor has more pristine charm than his zephyr-undulated patch of greens.

He passes up base ball and golf, preferring in the dirt to scrape and delve and root just like a mole, and if you call him daffy, why, the poor old goof acts hurt, and, like

You Are Just Asked to Go and Hear Him

There is NO ADMISSION CHARGE in connection with DR. BARKER'S LECTURES in the GRAND OPERA HOUSE TO-MORROW, nor will a COLLECTION be taken up.

The Addresses are the **Peterborough Rotary Club's** contribution to Community Welfare. The only reward the Rotarians ask is that **Capacity Audiences Hear Dr. Barker's Messages.**

That there may be no misunderstanding, the Programme for To-morrow is repeated:

In the Morning—To the Collegiate Institute Pupils.

Afternoon at 3.30 o'clock—To Women, and Girls over 15, at the Grand Opera House. Subject: **"The Modern Mother and Her Daughter."**

Evening at 8 o'clock—To Men, and Boys over 15, at Grand Opera House. Subject: **"A Father's Responsibility to His Son."**

Peterborough rarely has an opportunity of hearing vital subjects discussed so ably as Dr. Barker will discuss them To-morrow. He is an Eloquent and Forcible Speaker, and his Lectures are expected to be of benefit to everyone who hears him.

DON'T MISS DR. BARKER TO-MORROW!

Overland Country Club, a Bargain

NOT A FAULT TO FIND

Mr. Struan G. Robertson, of Seabank, Pictou, N. S., writing in April as to his Overland purchased in the previous May, says: "I have pleasure in stating that I have not a fault to find with it. I did 3,560 miles with the car during the summer and fall without trouble of any kind except the breaking of an ignition wire. I did not have a puncture.

"Today the car seems as good as when I got her.

"On a 210 mile run round Cape George, Antigonish, Guysboro, Melrose, Glenelg and home by East River St. Mary's with four passengers, I used but ten gallons of gas, being an average of 22 miles to the gallon.

"I am thoroughly well satisfied with it and have not seen anything in its class that I would exchange it for."
